12.20.020 Dutch Elm Disease	52	51.5	16.5	1,526	1,559	2,430

12.30 Forest Practice Regulations

The goal of this element is to achieve the maximum sustained production of high-quality timber while protecting other values associated with forest land. Activities include regulating timber harvesting operations on non-federal timberlands, issuing licenses to timber operators and assisting taxing agencies in their administration of taxes on timber.

In 1984–85, $50,000 from the California Environmental License Plate Fund is proposed for work required under Notice of Intent for Corrective Action to correct forest practice violations.

Also, an increase of $38,000 is proposed for soil erosion studies from the Renewable Resources Investment Fund. This will continue two personnel years, limited term to June 30, 1985, at which time the project will be complete.

A reduction of 1.5 personnel years is proposed as a program efficiency.

In 1983–84, the Department of Forestry has contracted with the Department of Fish and Game for a Forestry Aide. This will add 0.5 personnel years in the current year. This limited term position is scheduled to terminate June 30, 1984.

12.30.040 Soil Erosion Studies	2.3	3.6	2.1	903	518	657

12.40 Forest Resource Inventory and Assessment

The objective of this element is to provide information that will assist in the formulation and analysis of resource policies and practices at the state and federal level. Activities include assessing forest and range land conditions; identifying policy options for improving conditions; designing and conducting inventories to gather forest and range land data; developing a data storage, retrieval and analytical system for these resources; producing maps displaying soil and vegetation types. Providing input for and comment on U.S. Forest Service Resources Planning Act (USFS RPA), National Forest Management Act (NFMA), and Soil Conservation Service Resource Conservation Act (SCS RCA) processes.

In 1984–85, funding for the Soil Vegetation Survey is proposed to increase by $218,000 from the General Fund. A reduction of one-half personnel year is proposed as a program efficiency.

In 1984–85, an increase of $63,000 and one personnel year is proposed to coordinate management efforts and provide assessment information on California's range resources for policy evaluation and development.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

12.50 Foresters Licensing

The goal of Professional Foresters Registration is the protection of forest resources and the public through the licensing of competent professional foresters. Working through the Board of Forestry, activities include development of rules, regulations and policies to effectuate the Professional Foresters Law (PF Law); review, examining and licensing of applicants; receiving and investigating malpractice complaints; taking disciplinary actions for censure, suspension and/or revocation of licenses; filing of criminal complaints for violation of the PF Law; and recommending legislative action related to licensing.

20 Management Services

Program Objectives and Description

The objective of this program is to provide executive leadership, policy direction, and administrative services required for the successful completion of the many program objectives; to provide uniform departmentwide staff services; to assure coordination at the policy level with other state, federal, and local government agencies; and to provide specialized staff services to management. A uniform departmentwide application of policy and procedure is essential to maintain effective program operations.

Administrative activities are performed at several organizational levels within the department. Departmental headquarters provides executive leadership from the directorate and central services in accounting, budgeting, management analysis, personnel, technical services, training and safety. Department field units provide localized general support services throughout a variety of locations in the State.

* Dollars in thousands

3540 DEPARTMENT OF FORESTRY—*Continued*

Significant program changes for 1984–85 include:
Due to significant increases in workers compensation payments, an augmentation of $1,915,000 is proposed from the General Fund.
This budget includes $598,000 for acquisition of micro-computer hardware to implement an information systems plan designed to automate department functions.
The department has signed a stipulated judgement to institute a Joint Apprenticeship Program (JAC) beginning in 1983–84. This budget proposes 0.9 personnel years in 1983–84 and 4 personnel years in 1984–85 to implement this program.
A reduction of 1.5 personnel years is proposed for 1984–85 as a program efficiency.

3560 STATE LANDS COMMISSION

The State Lands Commission administers policies established by the Legislature and the State Lands Commission in the management and supervision of all statutory lands which the State has received from the federal government. Statutory lands include the beds of all naturally navigable waterways such as major rivers, streams and lakes; tide and submerged lands in the Pacific Ocean which extend from the mean high tide line seaward to the three-mile limit; swamp and overflow lands; vacant state school lands; and granted lands.

California's growing population continues to make increasing demands upon the State's land resources. The State Lands Commission is responsible for comprehensive land management activities involving more than 4,000,000 acres of State-owned lands. The State Lands Commission authorizes the use of land subject to reasonable rules and regulations and the determination of fair and adequate compensation. Their decisions are reached at public hearings and are based upon environmental, health and safety, and public benefit considerations.

The primary objectives established by the Legislature and implemented by the State Lands Commission are:

a. Comprehensive land use planning which encourages compatible multiuse development of State lands while conserving, preserving and protecting irreplaceable resources.

b. Location of the precise boundaries of tide, submerged and other land areas to assure protection of the State's interest.

c. The effective development of oil, gas, geothermal and other mineral resources through the administration of policies and programs designed to assure protection of the environment and which will also facilitate the generation of vitally needed revenues.

d. Surveillance necessary for effective management and title protection of these lands, and if necessary, litigation in the courts, to protect the State's sovereign interests.

e. Maintenance of records on the acquisition and disposition of the lands and on uses of the lands, and maintenance of an environmental inventory of the lands.

The State Lands Commission land management program is accomplished through the efforts of two basic programs: Extractive Development, and Land Management and Conservation. The Administration program provides executive, legal, planning, administrative and technical services.

SUMMARY OF PROGRAM REQUIREMENTS

10.20	Funding shift for Long Beach Operations from reimbursements to General Fund	–	($3,212)

10 EXTRACTIVE DEVELOPMENT

Program Objectives and Description

The State Lands Commission oversees the extractive development of mineral resources located on State lands. The Commission also controls the development and operation of the Long Beach tidelands oil operations. The objectives of the Extractive Development Program are to manage the orderly extraction of oil, gas, geothermal resources and other minerals; to maximize the revenue generated from extractive activities consistent with the best interests of the State; and to ensure development of these resources consistent with public safety considerations and environmental protection.

Authority

Division 6, Public Resources Code; Chapter 29, Statutes of 1956 (1st Ex. Sess.); Chapter 138, Statutes of 1964 (1st Ex. Sess.).

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	127.9	144.5	137.5	$5,664	$8,117	$7,211
General Fund				*2,966*	*4,543*	*6,413*
Reimbursements				*2,698*	*3,574*	*798*

Program Elements

10.10	Extractive Development—State Leases	72.5	92.8	85.8	$3,072	$5,091	$3,999
10.20	Extractive Development—Long Beach Operations	55.4	51.7	51.7	2,592	3,026	3,212

10.10 Extractive Development—State Leases

This program involves leasing of land for mineral extraction purposes, and royalty and operational surveillance to assure that the lessee adheres to the terms and conditions of the lease and the rules and regulations of the Commission. The primary management objective is to provide an orderly and controlled system for exploration and development of oil, gas, geothermal and other mineral resources on State-owned lands, to assure maximum revenue to the State consistent with multiple land-use concepts, good engineering and conservation practices, with consideration for public safety and protection of the environment. Protection of the coastal tidelands and inland waters from oil-related mishaps is promoted by regulation of petroleum production operations and design review of underwater piping systems. As required by the Public Resources Code, appropriate environmental impact documents are prepared on all extractive projects and are made available to interested federal, State and local governmental agencies and the public for review and comment. For the 1983–84 fiscal year State revenue from Extractive Development-State Leases (oil, gas, geothermal and other minerals) is estimated to be $95,481,000.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

3560 STATE LANDS COMMISSION—*Continued*

Oil and Gas Leasing and Development

During the productive life of a mineral property it is necessary to perform continuing engineering and geological studies. This ensures that the lessee develops the resource to the maximum benefit of the State. In the case of oil and gas properties, the required studies include geological evaluation of known or potential productive areas, reserve determination, unit equities calculations and monitoring of secondary recovery operations. Operational surveillance of ongoing operations provides control of and accounting for oil and gas revenues, engineering data for management decisions and strict compliance with environmental protection requirements including investigations of all reported pollution incidents. The commission also has an interest in Federal regulation of the outer continental shelf and has assumed an active part in urging the adoption of regulations containing safety and pollution controls consistent with those already adopted by the State.

In concert with the Commission's policy of maximizing development of State-owned energy resources while maintaining strict environmental controls, environmental review and resource assessment has been initiated on approximately 40,000 acres of unleased tide and submerged lands near Pt. Conception, Santa Barbara County. The offshore lands near Pt. Conception are considered excellent oil and gas prospects based on the interest and high borrower-bids received by the federal government on the adjacent Outer Continental Shelf lands. The Commission has completed pre-lease environmental impact and resource evaluation studies. Minimum rental on these parcels will total $34,000,000 annually for the first three years. *Due to litigation the sale has been delayed.*

$250,000 and 7 positions which were provided for administration of federal oil and gas parcels to be received from the Bureau of Land Management have been deleted. Legal problems and recent changes in BLM management have delayed transfer of these parcels therefore, staffing is not required.

Geothermal Leasing and Development

Geothermal resources are recognized as an important clean energy source. Development of these resources helps meet California's energy requirements. The State Lands Commission issues permits to prospect for geothermal resources and negotiates geothermal leases on all lands owned by the State. A 1977 court decision in favor of the State established the State's ownership of geothermal resources from lands in which the State has sold the surface, but reserved the mineral rights. This decision added large amounts of energy producing lands to the State's inventory and increased the commission's management responsibilities of this valuable energy resource. Currently the only commercial electrical generating complex in the nation using geothermal steam is located at The Geysers in Sonoma County. Approximately half of the steam production comes from State-owned lands. Field inspections during drilling, testing, and subsequent production operations are necessary to ensure that such operations are conducted consistent with public safety and environmental concern. Evaluation studies include the analysis of geological and geothermal reservoir parameters for determination of bid sufficiency in competitive geothermal lease sales and in the projection of future revenues from geothermal production.

Mineral Leasing and Development

Mineral leasing and development covers processing and issuance of mineral extraction leases, mineral prospecting permits, and dredging permits by private interests and public entities. Leasing lands for mineral extraction requires determination of ownership and physical boundaries, preparation of proposal to offer and lease agreements, and engineering and geological determination of economic feasibility prior to offering for lease, and economic sufficency of subsequent offers. Additional detailed operating requirements for the proposed extraction operations must be prepared, including restoration and reclamation plans for the lands. Field investigations covering extractive operations, permits, and mineral trespasses are integral features of the resource management program.

Revenue data for the Extractive Development-State Leases Element are shown below:

				*1982–83**	*1983–84**	*1984–85**
Revenue				$110,323	$95,481	$100,981

Expenditures	72.5	92.8	85.8	$3,072	$5,091	$3,999
General Fund				*2,966*	*4,543*	*3,451*
Reimbursements				*106*	*548*	*548*

10.20 Extractive Development—Long Beach Operations

The tidelands along the Long Beach shoreline are granted in trust to the City of Long Beach. Chapter 29, Statutes of 1956 (1st E.S.), originally defined the role of the State in the development of oil and gas from these tidelands. The passage of Chapter 138, Statutes of 1964 (1st E.S.), gave the State a more active and prominent role in such development and increased the State's revenue. Under Chapter 138, the State was given control over the plan and budget of the field contractor who develops and operates the tidelands oilfield.

The operations of the tideland portions of the Long Beach Unit and the previously developed productive areas of the Long Beach tidelands are conducted under individual net profits agreements. For the 1983–84 fiscal year the state oil and gas revenue attributable to Long Beach tidelands is estimated to be $275,000,000.

Of primary importance in such operations is the prevention of land subsidence from causes other than natural phenomena and the application of proper measures to protect the environment.

Workload Information

The Long Beach Operations staff maintains economic control over the Long Beach Unit Plan of Operations and Development and Budget totaling $254,900,000 for 1983–84. Average daily production of the Long Beach Unit is 65,000 barrels of oil and 12.4 million cubic feet of gas. The staff also reviews and evaluates production programs and water injection operations for other adjacent tideland oil and gas leases. Average daily production in these tideland developments is currently 13,000 barrels per day.

The funding source has been changed from reimbursement by the City of Long Beach to General Fund. Since this reimbursement was previously subtracted from the State's share of revenues, this funding change will have no net effect on State costs or revenues.

Performance Measures

The Long Beach Operations staff also performs economic analysis of the development and operation activities of the Long Beach tidelands. Output includes control of expenditures through the plan and budget of the Long Beach Unit. This control is exercised by itemizing and monitoring the use of budget funds and through approvals for new wells and redrills, budget-fund transfers and augmentations. The plan and budget is prepared jointly by the City of Long Beach and the staff of the State Lands Commission and is subject to the approval of the State Lands Commission.

Another important activity is the determination of equity (area assignments) for the Long Beach Unit. Area assignments determine the actual allocation of oil and gas production and of expenditures among the participants. Equity determinations have a direct impact on the State's share of the net profits. Long Beach Operations staff also monitors seismic activity and surface elevations to detect any evidence of subsidence.

Reimbursements				*2,592*	*3,026*	*250*

20 Land Management and Conservation

Program Objectives and Description

The State Lands Commission provides management of all State sovereign and school lands to ensure use of lands consistent with the Public Trust and prudent land use practices. Program objectives are to:

— plan for and control use of State lands in order to protect the State's interests;
— maintain a program of land use to meet orderly land planning requirements;
— assure appropriate compensation for use of State lands;
— minimize commercial and recreational trespass on State lands;
— perfect title to the lands the State owns; and
— review activities on lands granted to local entities.

Authority

Division 6, Public Resources Code.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements				*212*	*275*	*35*

Program Elements

20.10 Ownership Determination	65	58.7	58.7	$2,526	$2,403	$2,602
20.20 Land Management	50.9	48.2	48.2	2,136	2,089	2,245

20.10 Ownership Determination

Effective management of State-owned tide and submerged lands requires that real property boundaries be identified and located. Accordingly, ownership determination is essential. This usually involves extensive engineering, title and legal research studies. In general, boundary claim lines are identified and located by surveying and mapping, and ultimately finalized by land exchange, boundary line agreement, litigation, or title settlements.

1. Exchange. An exchange requires an identification of the title conditions of both the parcel currently owned by the State and the parcel to be received in the exchange. An appraisal of both parcels is required to determine that the value to be received is as great or greater than the value relinquished.

2. Boundary Line Agreement. When the location of the common boundary between the State and a private owner cannot be determined, the State, acting by and through the State Lands Commission, is empowered to enter into a negotiated settlement of the boundary.

3. Litigation. Case preparations includes the search for, identification of, and analyses of facts for the consideration of and presentation into evidence by the Attorney General. Court appearances by Commission staff members to present testimony are occasionally required.

4. Title Settlements in Lieu of Litigation. Where the nature and extent of the State's sovereign ownership in real property resulting from its tidelands or submerged lands character is in dispute by other parties claiming title, the titles may be established by title settlement agreements in lieu of the costs, uncertainties, and delays of proceeding to final judgment by the courts.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

3560 STATE LANDS COMMISSION—*Continued*

20.20 Land Management

Land management activities include:

1. Appraisal. Appraisals are essential in settlements of litigation of title and boundary agreements in which exchanges are involved. Lands being received must be at least of equal value to the interest being given up. Sales and leases also require appraisal to determine the consideration to be received.

2. Leases. State lands are leased for commercial, industrial and recreational purposes and rights-of-way to accommodate public utility and various types of pipelines which utilize tide and submerged lands and state school lands. Following an appraisal and an investigation to determine whether existing use of the land to be leased is compatible with the proposed use, the Commission derives a rental rate for the property. Most leases must be reviewed on each fifth anniversary to determine if changes in market value indicate that a new rental should be set.

3. Indemnity Selections. The State is indemnified for loss to the school land grant by selection of desirable federal land. This activity will increase after completion of the inventory and classification of school lands, and as the Commission land management program develops.

4. Inventory, Classifications and Management Plan. The Commission has directed its staff to inventory, classify and plan prudent management for the 600,000 acres of school land. The Legislature has also required an inventory of all lands under commission jurisdiction and an identification of those lands having significant environmental values of statewide interest. The Commission is participating with the California Coastal Commission and the San Francisco Bay Conservation and Development Commission in planning uses of coastal tide and submerged land.

5. Land Title Information. This component provides all information required by law to be kept by the Commission, as well as the working data necessary to properly administer, manage and protect the lands under its jurisdiction.

6. Reforestation and Timber Management. The objective of this component is to optimize timber stand improvement, erosion control and harvest of merchantable timber on lands under the Commission's jurisdiction.

7. Sales. A land sale requires an identification of the title conditions and an appraisal of the land authorized to be sold. Whether a parcel of land is susceptible to sale depends upon the policies adopted as a result of a completed environmental inventory. Only those lands unsuitable for public retention are considered for potential sale.

$220,000 has been provided to fund the School Land Forestry Program previously reimbursed by Department of Forestry. All Commission costs for administering school lands will be deducted from revenues received from these lands and deposited in the General Fund. All net school lands revenues will be deposited in the Teachers Retirement Fund pursuant to Chapter 1213, statutes of 1983.

30 ADMINISTRATION

The administrative staff of the State Lands Commission operates under the general direction of the Executive Officer of the State Lands Commission. The program is composed of two major elements: executive, and administrative and technical services. The executive element includes the executive staff, the commission's legal staff, and a comprehensive planning and environmental section. The administrative and technical services element is comprised of six components, four of which (budgeting, personnel and training, accounting and business services, and data processing and records), provide direct staff support to the line programs; and two (auditing and program analysis), which emphasize improving the State's fiscal position and assuring effective and efficient operation of all Commission programs.

$200,000 has been provided to replace out-dated EDP and word processing equipment.

3580 SEISMIC SAFETY COMMISSION

Program Objectives and Description

The purpose of the Seismic Safety Commission is to strengthen earthquake safety in California. To accomplish this, the Commission works with Federal, State and local agencies, as well as the private sector, on a variety of activities ranging from the issuance of policy studies to the coordination of seismic safety activities.

In addition to continuing existing activities, in 1983–84 the Commission will initiate a comprehensive report on the May 1983 Coalinga earthquake, as mandated by Chapter 1191, Statutes of 1983. Also in 1983–84, the Commission will complete several major activities: (1) a two-year pilot earthquake education program for Alameda, Contra Costa, and Los Angeles Counties; (2) the Southern California Earthquake Preparedness Project, which began in 1981 pursuant to Chapter 1046, Statutes of 1980; and, (3) the Bay Area Earthquake Study, which began in 1983 under a cooperative agreement with the Federal government. *Due to the completion of these activities, the Commission's 1984–85 budget will be reduced by 12 personnel years.*

Planned 1984–85 activities will address California's ability to respond to and recover from a great earthquake. In addition, in 1984–85 it is proposed to extend catastrophic earthquake planning to Northern California. To accomplish this, the Commission will offer assistance in 1984–85 to the Office of Emergency Services, who will be budgeted $108,000 (General Fund) and 2 personnel years to implement the program.

3600 DEPARTMENT OF FISH AND GAME

The program objectives of the Department of Fish and Game are to insure that fish and wildlife are preserved to be used and enjoyed by the people in the State, now and in the future.

The specific objectives of the department are:

1. To maintain all species of fish and wildlife for their natural and ecological values as well as for their direct benefits to the public. The objective, "to maintain," is a basic necessity if any species is to be used in the future, and this includes the principle that fish and wildlife should be preserved as a human environmental necessity.

2. To provide for varied recreational use of fish and wildlife. The objective, "recreational use," embraces all the ways that people may enjoy fish and wildlife. This variety of recreational opportunity will enable each individual to select the types of recreation which are found to be most rewarding. This objective is to maintain fish and wildlife populations at levels that will insure the survival of all species for the benefit of the general public and provide a harvestable surplus of game species so that hunting and fishing will continue to be enjoyed as two of California's traditional and leading forms of recreation.

3. To provide for an economic contribution of fish and wildlife in the best interests of the people of the State. The third objective, "economic contribution," covers several distinct interests concerned with the use of fish and wildlife resources. These include the commercial harvesters of these resources, and the people who provide goods and services to all. The objective is to provide the maximum economic benefits to the people of the State within the limits of the resources and other objectives.

4. To provide for scientific and educational use of fish and wildlife. The fourth objective, "scientific and educational use," proposes to insure the availability of fish and wildlife for study and research by both scientists and students.

All of the programs of the department are directed towards the accomplishment of these objectives through the protection, conservation, enhancement, and restoration of fish and wildlife resources and habitats and the regulation of resources used.

Pursuant to Chapter 855, Statutes of 1978, the General Fund is used exclusively for agreed upon nongame and environmental programs, and the Fish and Game Preservation Fund exclusively for game programs beginning in Fiscal Year 1979–80.

10 ENFORCEMENT OF LAWS AND REGULATIONS

Program Objectives and Description

The two primary objectives of this program are to ensure that the provisions and regulations pursuant to the Fish and Game Code are enforced, and to insure that the State's fish and wildlife resources are managed for optimum sustained yield, utilization and benefit to the public. These provisions and regulations are enforced primarily by means of an extensive network of wardens. Activities in this program include the protecting of habitat as well as game and nongame species from willful or negligent destruction; monitoring public and commercial fishing and hunting practices; issuing licenses to consumptive users; conducting a hunter safety program; and regulating the importation, transportation and possession of exotic animals in the State.

The significant 1984–85 fiscal year changes proposed for this program are: (1) to add $46,000 from the Fish and Game Preservation Fund and two personnel years of temporary help to meet new workload in the license branch for deer licenses; (2) to add $295,000 from the General Fund and $107,000 from the Fish and Game Preservation Fund to offset $402,000 in reimbursements to improve the budgeting procedures for the streambed alteration permit program; and (3) to reduce 9 low priority personnel years as a result of program efficiencies and redirect the savings to mitigate serious operational and equipment needs.

Authority

Constitution, Fish and Game Code, Fish and Game Commission.

10.50	General Enforcement Activities	101.6	106.6	104.8	7,623	10,003	8,841

10.10 Protection and Use Regulation of Game Fish and Wildlife

Enforcement is used to protect the game species of fish and wildlife and regulate their use for maximum public benefit. A staff of wardens patrol to prevent infractions of game laws, wildlife bag limits, seasons, closed areas, and license requirements by individual hunters and fishermen as well as the commercial fishing industry. Administration of hunting club programs is a warden function. Additional protection of wildlife and habitat is accomplished by the issuance of permits for special purposes such as scientific collections, research, suction dredges, and the related follow-up inspection to assure compliance of permit terms. Preventive enforcement is accomplished through personal appearances before sportsmen organizations and field contacts.

10.10.060 Big Game Protection and Regulation	53.8	56.5	54	2,832	3,057	3,224

10.20 Licensing

Licensing establishes and collects the fees charged for the consumptive use of the State's fish and wildlife resources. Those who wish to take advantage of the recreational, educational, and economical benefits provided by California's fish and wildlife resources are required to contribute to the conservation and management of these resources through the purchase of various types of fish and game licenses. The license fees provide the major support of California's fish and wildlife conservation programs. This element also provides special big game permits and reservations at state-operated wildlife areas.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of fishing licenses, stamps, and permits sold	6,523,995	4,918,210	3,264,100
Number of hunting licenses, tags, and permits sold	1,029,975	1,048,545	1,061,170
Other regulatory licenses and permits	16,550	15,184	15,495

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Fish and Game Preservation Fund)*	22.6	23.7	25.5	$1,315	$1,409	$1,543

10.30 Hunter Safety

Hunter safety courses are provided to reduce the frequency of accidents involving use of firearms and archery gear while hunting, or traveling to or from a hunting area. Volunteer instructors are used by the department to teach firearms safety to state residents. All resident applicants for hunting licenses who cannot document possession of a previous year's hunting license or a hunter safety certificate from this or another state are required to participate in this program.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
New instructors certified	161	150	150

10.40 Nongame Fish, Wildlife and Plant Protection

This element of the enforcement program protects the nongame species of fish, wildlife, plants, marine mammals and birds of the State. Wardens patrol and enforce laws relating to the protection and preservation of those species legally classified as "rare, threatened, or endangered" or other "nongame" species.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

3600 DEPARTMENT OF FISH AND GAME—*Continued*

10.50 General Enforcement Activities

This element provides various activities which are neither "game" nor "nongame", or include characteristics of both. Such activities include: support (indirect cost activities); maintenance and care of DFG vehicles, boats, radio equipment, etc.; fish and wildlife conservation education; control of raptors and exotic/prohibited species including airport terminal and pet shop inspections; water pollution, streambed and/or lakebed alterations, and detection and/or investigation of actual or impending damage to fish and wildlife from the spillage of oil and other hazardous or toxic materials; responding to needs of other law enforcement agencies for assistance, e.g., search and rescue, traffic control, etc.; and emergency services such as public assistance during civil defense and natural disasters.

20 WILDLIFE MANAGEMENT

Program Objectives and Description

The program objectives are to maintain all species of wildlife in the State, and to provide wildlife-oriented recreational and educational opportunities to the public. Projects includes studies aimed at management needs related to big game, upland game, nongame wildlife and waterfowl; disease research; and habitat development and management on 52 designated state-owned wildlife areas and other public lands.

Commencing in the 1983–84 fiscal year and continuing in the 1984–85 fiscal year are: (1) 1.5 personnel years and $20,000 in Federal Funds for the endangered, threatened and rare wildlife project and (2) one personnel year and $15,000 in Federal Funds for the Elkhorn Slough project.

For 1984–85, the following significant changes in this program are proposed: (1) a one-time increase of $2,014,000 in General Funds to continue the wetlands restoration at Bolsa Chica and Upper Newport Bay; (2) an increase of $55,000 from the Fish and Game Preservation Fund and 1.5 personnel years of temporary help to control botulism in the Tulare Lake basin; and (3) to reduce 5.5 low priority personnel years as a result of program efficiencies and redirect the savings to mitigate the department's serious operational and equipment needs. Also, the following activities are proposed for funding from the California Environmental License Plate Fund: (1) $1,000,000 for wildlife habitat improvement on Federal lands; (2) $200,000 to augment the bighorn sheep project; (3) $258,000 in one-time funding to restore the Mission Avenue/Rancho Del Oro coastal wetland basin in the city of Oceanside; (4) $169,000 in one-time funding for the support of the California condor recovery program; (5) $105,000 in one-time funding to reduce siltation and increase shoreline protection at the Buena Vista lagoon; (6) $37,000 to augment support for the Suisun Resource Conservation District; and (7) $10,000 in one-time funding for raptor rehabilitation.

Authority

Constitution, Fish and Game Code and Commission regulations.

20.20 Nongame Species Improvement and Preservation

The activities of this element strives to maintain and preserve California's endangered, threatened, rare and other nongame plants and wildlife. Activities include habitat improvement and preservation (e.g., brush manipulation, burning, ponding, levee building and species inventories); preparation and distribution of information on nongame species; and disease investigations. It also includes staff time spent on preservation and management of the species of furbearers which are neither trapped nor hunted.

30 INLAND FISHERIES

Program Objectives and Description

This program provides diversified fishing opportunities for anglers, while ensuring the perpetuation of the State's native fish fauna. The department operates seventeen fish hatcheries for the purpose of producing trout and other game fish species. The fish produced are distributed and planted in various lakes, rivers, reservoirs and streams. Other program activities are directed toward the management and research of game fish and nongame species (including rare, threatened or endangered fish, amphibians, reptiles and invertebrates), and for the management and protection of their respective environments. Management activities include fish population and habitat inventories, habitat acquisition and improvement, fish population manipulation to increase yield, fish salvage, and disease control.

Commencing in 1983–84 and continuing into 1984–85 are 3 personnel years of temporary help and $27,000 in Federal Funds for the endangered, threatened and rare fish project.

For 1984–85, 8 low priority personnel years are proposed for reduction with the savings to be redirected to the department's high priority operational and equipment needs. Additional support of $188,000 from the Fish and Game Preservation Fund is proposed for one-time special hatchery repairs.

Authority

Constitution, Fish and Game Code, and Fish and Game Commission.

30.10 Game Species Management and Research

This element is to ensure the perpetuation of California's game fisheries in inland waters. Management includes planning, conducting and reporting on lake and stream surveys, creel censuses and use counts for trout and other game fish. Also included are planning and evaluating habitat improvements; stream rehabilitation; erosion and weed control; advice to owners of private fishing waters and hatcheries; and monitoring of commercial catches.

30.10.030 Commercial Fisheries Monitoring	0.5	0.6	0.5	–	–	–

30.20 Game Species Production and Distribution

The goal of this element is to provide an adequate supply to meet the demand for California anglers with respect to inland species of game fish. Through its network of fish hatcheries, the department propagates and stocks catchable-sized fish (trout, black bass, catfish, etc.), subcatchables and fingerlings in suitable lakes and streams. Production covers rearing, trapping and spawning, compiling hatchery records and preparing cost and production reports. Distribution includes loading, planting, and keeping and compiling planting records and preparing planting reports.

40 ANADROMOUS FISHERIES

Program Objectives and Description

The primary purpose of this program is to maintain, restore and improve anadromous fish populations (salmon, steelhead, striped bass, shad and sturgeon); provide for their optimum recreational and, where appropriate, commercial harvest; and provide for their educational and scientific use. Where habitat has been lost by water development, hatcheries are operated to replace natural reproduction. The population sizes of all anadromous species are monitored to detect changes in abundance and related causative factors. The Sacramento-San Joaquin Estuary is being studied to determine the optimum way to protect it (and the anadromous fishes that use it) from the effects of water development.

Anadromous fish resources support an estimated 3 million angler days of recreational fishing annually in marine and inland waters, and the salmon resource provides a commercial catch averaging 8 million pounds annually with a current net worth of over $20 million. The contribution of these resources to the economy of the State and the enjoyment of its citizens justifies research and management programs to maintain and improve existing anadromous populations.

Commencing in 1983–84 and continuing into 1984–85, 1 personnel year and $23,000 is being proposed for the ocean salmon project.

For 1984–85, the significant changes proposed in this program are: (1) to reduce 10.5 low priority personnel years as a result of administrative efficiencies and redirect the savings to the department's high priority operational and equipment needs; (2) to increase $194,000 from the Fish and Game Preservation Fund for the commercial salmon trollers stamp program; (3) to increase 0.5 personnel years of temporary help and $447,000 from the Fish and Game Preservation Fund for the striped bass enhancement project; (4) to increase $8,000 from the Fish and Game Preservation Fund for the salmon limited entry project; (5) to increase $551,000 from the California Environmental License Plate Fund to augment on a one-time basis support for salmon and steelhead enhancement projects, and (6) to better utilize existing funds, a fund shift of $900,000 is proposed from the Renewable Resources Investment Fund to the California Environmental License Plate Fund to continue support for North Coast salmon restoration projects.

Authority

Constitution, Fish and Game Code, and Fish and Game Commission.

40.10 Management and Research

Salmon and steelhead activities are aimed at maintaining and improving existing populations of anadromous fish. Management includes planning and monitoring the population sizes, the magnitude and location of sport and commercial catches; sampling landings for species, size and age information; and protection, maintenance, and improvement of the quality and quantity of spawning habitat. Research includes studying the behavior, life history and population dynamics of anadromous fish species. To meet these objectives, the department operates 8 fish hatcheries constructed for mitigation purposes by federal, state and private entities. These hatcheries are expected to produce 31.9 million fish including 24 million fingerlings and 7.9 million subcatchables.

Habitat maintenance and improvement programs include major efforts to replace spawning and nursery habitat, to restore access to some 500 miles of existing habitat through barrier removal and installation of fish passage facilities, and to screen major and significant water diversions.

50 MARINE RESOURCES

Program Objectives and Description

The objectives of this program are to maintain and enhance marine fish, plant and animal resources and to provide for the optimum harvest of these resources by sport and commercial fishers. Studies monitor the population sizes and fluctuations of marine fish, shellfish, and plants and examine the effects of the environment and human activities on these resources. Techniques are developed to assist private industry in culturing some shellfish species. Management recommendations are developed to protect marine resources and to provide for their wise use and enjoyment.

The significant program change proposed for 1983–84 is the reduction of: (1) 5.8 personnel years and $101,000 for the Diablo Canyon study; (2) one personnel year and $28,000 in federal funds for fishery management in Southern California; and (3) one personnel year and $23,000 in federal funds for the thresher shark study. Commencing in the current year and continuing into the budget year is the addition of 4.5 personnel years and $49,000 in federal funds for the sea otter study.

The significant program changes proposed in 1984–85 are: (1) to decrease 1.8 temporary help personnel years and $17,000 for the Diablo Canyon study; (2) to reduce 12 low priority personnel years as a result of program efficiencies and redirect the savings to mitigate the department's critical operational and equipment needs; and (3) to increase $26,000 from the Fish and Game Preservation Fund for the annual assessment for the Pacific Marine Fisheries Commission.

Authority

Constitution, Fish and Game Code, and Fish and Game Commission.

3600 DEPARTMENT OF FISH AND GAME—*Continued*

50.10 Management and Research for Game Species

Management and research activities are conducted to specifically maintain and enhance the various species of marine game fish and plants and to provide for the optimum harvest of these resources by sport and commercial fishers. Management activities include monitoring sport and commercial catches; analyzing data to determine fishing effort and localities; developing management plans; administering mariculture, oyster, and kelp leases on State lands.

50.20 Management and Research for Nongame Species

Management and research activities are conducted to ensure the continued existence of marine mammals and birds. Activities include studying the interaction of marine mammals and ocean fisheries; such interactions are one of several issues that must be defined before the federal government will return management authority for seals and sea lions to the State.

60 ENVIRONMENTAL SERVICES

Program Objectives and Description

The purpose of the environmental services program is to minimize the adverse impacts on fish and wildlife and their habitats from projects affecting the land, waters, and water quality of California. Federal and State laws require review by the department of projects proposed or permitted by Federal, State, and local agencies. The review of all these projects and the protection of water quality mandated by the Fish and Game Code is accomplished in this program. The review work is usually divided between staff of the Environmental Services Branch and staff in the relevant other program area(s).

Commencing in 1983–84 and continuing into 1984–85 are: (1) one reimbursable personnel year and $14,000 for the department to assist the State Water Resources Control Board to carry out its toxics monitoring program; (2) one reimbursable personnel year of temporary help and $7,000 for the department to assist the Department of Health Services to carry out its hazardous waste project; and (3) 0.5 reimbursable personnel year and $7,000 for the department to assist the Department of Food and Agriculture to carry out its herbicide monitoring program.

The significant changes proposed for 1984–85 are the reduction of 4 low priority personnel years with the savings to be redirected to high priority operational and equipment needs and the reduction of 6 personnel years and $200,000 from the California Environmental License Plate Fund in the environmental review and evaluation element as a result of program efficiencies through a more selective in-depth review of projects.

Authority

State: Constitution, Fish and Game Code, State Water Code, Government Code, Health and Safety, Public Resources Code, and Fish and Game Commission regulations.

Federal: Fish and Wildlife Coordination Act, the Water Projects Recreation Act, the Federal Power Act, the National Environmental Policy Act, the Clean Water Act, and the intergovermental Cooperative Act 1968.

3600 DEPARTMENT OF FISH AND GAME—*Continued*

70 ADMINISTRATION

Program Objectives and Description

The program provides general policy direction, executive leadership and both central and regional administrative services to the program divisions of the department. General policy direction is provided by the Fish and Game Commission which also regulates the taking of fish and game by promulgation of regulations. The Director, with the assistance of regional managers, provides executive direction. Support services include planning, fiscal, personnel and engineering activities. Support services costs are distributed throughout the various programs.

The significant program changes proposed for the budget year are an increase of $181,000 for attorney general charges and a fund shift of $125,000 from reimbursements to the Fish and Game Preservation Fund for employee housing rental rate adjustments.

3640 WILDLIFE CONSERVATION BOARD

Program Objectives and Description

The Wildlife Conservation Board is involved in acquiring, conserving, developing, improving, and providing access to our natural resources to accommodate the needs of the people who utilize outdoor recreation resources.

The Board is composed of the Director of Finance, the Director of the Department of Fish and Game, and the President of the Fish and Game Commission. The Board is advised by a joint interim investigating committee consisting of three Members of the Senate and three Members of the Assembly. Annually, $750,000 is transferred to the Wildlife Restoration Fund from license fees collected for conducting horseraces. The Board is charged with the administration of this fund. Additional funding for the Board's activities resulted from the State, Urban, and Coastal Park Bond Act approved by the voters in November, 1976, which provided $15,000,000 for acquisition and development of our natural resources.

Through its staff, the Board conducts necessary investigations and studies to determine the areas within the State most essential and suitable for wildlife production and preservation and which will provide recreational advantages. As a result of such studies, the Board determines which lands or rights in lands or waters should be acquired by the State to effectuate the wildlife conservation and recreation program. The Wildlife Conservation Board develops fishing piers and fishing access sites at lakes, on the ocean and along the State's waterways and aqueducts. Development includes, as necessary, features such as boat ramps, parking areas, water supply, and sanitary facilities.

Through purchase of key land parcels and development of roads, the Board is trying to meet the demand for hunting access to public lands. Protection and improvement of the resource is accomplished by building fish screens, fish ladders, and fish hatcheries and preserving wildlife marshlands or ecological areas.

3640 WILDLIFE CONSERVATION BOARD

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*
CAPITAL OUTLAY			
Wildlife Restoration Fund			

Continuation of the acquisition and improvement of wildlife conservation projects is planned. The revenue of $750,000 each fiscal year, as provided by the Business and Professions Code, Section 19632(a), has been or will be allocated to projects by the Wildlife Conservation Board. Fish and Game Code Section 1352 authorizes expenditures for the Wildlife Restoration Fund. The schedule reflects the estimated expenditures, based on anticipated allocations by the Wildlife Conservation Board. Commencing with the 1983–84 fiscal year, however, funds for these purposes are appropriated by the Legislature.

In addition to the Wildlife Conservation Board's regular funding, it is expected that federal funds will become available on a reimbursable basis for qualifying projects, and such funds will be reported annually as received.

Fish habitat development and improvement projects	$18 APWC	$200 APWC	-
For acquisition and development of warmwater lakes; for reservoir construction and improvement; for stream improvement; for fish screen construction; for making habitat improvements.			
Public Access	649 APWC	3,040 APWC	-
For the acquisition and development of coastal access; river, stream and bay access; lake and reservoir access, pier construction.			
Wildlife habitat	525 APWC	1,588 APWC	$1,394 APWC
For the acquisition and development of wildlife areas.			
Project planning	6 P	15 P	20 P
For project evaluation, preliminary land acquisition costs; engineering studies of potential projects.			
Construction—Avila Pier reconstruction	-	-	500 C
Funds for the reconstruction of Avila Pier in San Luis Obispo County.			
Construction—Pier 7	-	-	500 C
Funds for the conversion of an existing shipping pier to a public fishing pier in San Francisco.			
Minor Projects	-	-	715 PWC
TOTALS, EXPENDITURES	$1,198	$4,843	$3,129
Less reimbursements from other state departments	*—1,749*	*—900*	-
TOTALS, WILDLIFE RESTORATION FUND	—$551	$3,943	$3,129

State, Urban, and Coastal Park Fund

This bond act passed by the voters in November, 1976, provided $15,000,000 to the Board for acquisition and development projects in accordance with the provisions of the Wildlife Conservation Law of 1947.

Coastal wetlands, acquisition	$891 A	$2,230 A	-
Interior wetlands and riparian habitat, acquisition	101 A	32 A	-
Development	738 PWC	220 PWC	-
TOTALS, STATE, URBAN, AND COASTAL PARK FUND	$1,730	$2,482	-

Resources Account, Energy and Resources Fund

Funding for the 1982–83 fiscal year is for the acquisition of valuable wildlife habitat, including wetlands and habitat for upland wildlife and endangered species.

Acquisition of wildlife habitat lands	$1,969 A	-	-
Construction—Oyster Point fishing pier	165 PWC	-	-
Construction and renovation—Berkeley Pier	400 PWC	-	-
TOTALS, RESOURCES ACCOUNT, ENERGY AND RESOURCES FUND	$2,534	-	-

California Environmental License Plate Fund

Funding for the 1984–85 fiscal year is for the acquisition of valuable wildlife habitat, including wetlands for ecological reserves.

Acquisition and development of wetlands and riparian habitats	-	-	$3,000 APWC

3680 DEPARTMENT OF BOATING AND WATERWAYS

The program objectives and responsibilities of the Department of Boating and Waterways are to develop and improve boating facilities throughout the State, to promote safety of persons and property connected with the operation of vessels on State waters and promote uniformity of law relating thereto, and to conduct a beach erosion control program in cooperation with the federal government and local governmental agencies.

The Department makes loans for small craft harbor development and grants for boat launching facilities, plans and provides funding for capital outlay projects, licenses yacht and ship brokers and for-hire vessel operators, and conducts a program of boating safety and regulation. The Department also participates with the U.S. Corps of Engineers and local agencies in the construction of beach erosion control projects.

The Department has a seven-person commission appointed by the Governor.

Significant 1984–85 changes are the proposal of $2,885,000 from the General Fund for beach erosion control projects.

In addition, total local assistance grants and loans in 1984–85 from the Harbors and Watercraft Revolving Fund are proposed at $3,933,000 and $11,350,000 respectively. Boating safety and enforcement subventions are proposed at $3,200,000 from the Harbors and Watercraft Revolving Fund and $227,000 from Federal funds. Also in 1984–85, it is proposed to implement a reduction of 2 personnel years and $42,000, which will be achieved through efficiencies in the department's boating safety and regulation programs. These programs are funded from the Harbors and Watercraft Revolving Fund.

10 BOATING FACILITIES

Program Objectives and Description

The objective of this program is to continue to plan, develop, and construct environmentally sound boating facilities in areas of demonstrated need throughout California.

To accomplish this objective, the Department functions as a central source of boating information by conducting special studies, assembling and compiling existing data, and disseminating the information to both public and private groups; contacts and meets with local governmental planning agencies and private individuals to plan local boating facilities development; provides technical assistance for new boating facilities projects; provides financial assistance to local governments in the form of loans for small craft harbors and grants for boat launching facilities and floating restrooms; provides financial assistance in the form of subordinated loans, made in connection with Federally guaranteed loans, to owners of recreational marinas; ensures that proper environmental safeguards are met in developing all boating facility projects; and acts as the lead agency for the state in the control of water hyacinth in the Sacramento-San Joaquin Delta and the Suisun Marsh.

The Department also plans, designs, and constructs boating facilities throughout the State Park System, on state water project reservoirs, and on other state lands. These projects are planned and coordinated to ensure proper recreational and environmental utilization. In addition, because marina–related concessions contribute to the financial feasibility of department–financed projects, the Department of Boating and Waterways reviews and approves concession proposals to ensure compatibility with departmental policies and objectives. Coordination with federal, state, and local governmental agencies, as well as private concerns, is maintained on all matters affecting navigation, boating, and boating's relationship with the environment.

In 1984–85, $150,000 from the Harbors and Watercraft Revolving Fund is proposed to continue the water hyacinth control program. Local assistance launching facility grants were authorized at $4,077,000 in 1983–84 and are proposed at $3,933,000 in 1984–85 from the Harbors and Watercraft Revolving Fund. In addition, the 1983–84 Budget Act appropriation provided $13,297,000 for local assistance small craft harbor loans. For 1984–85, $11,350,000 is proposed for this purpose from the Harbors and Watercraft Revolving Fund.

Authority

Division 1, Harbors and Navigation Code.

10.10 Grant Program

This program provides grants to local governments and funds for joint state/federal projects in an effort to alleviate the shortage of safe and convenient boat launching facilities.

Grant expenditures are used to fund boat launching ramps and ancillary facilities including restrooms, lighting, car–trailer parking, ramp extensions, drinking fountains, utilities, boarding floats, safety signs, erosion protection, environmental enhancement and landscaping. In addition, the Department may grant funds to governmental agencies for the construction of floating restrooms when conventional restrooms cannot meet the needs of boaters and the presence of floating restrooms could lessen environmental degradation.

Performance Measures	*1982–83**	*1983–84**	*1984–85**

3680 DEPARTMENT OF BOATING AND WATERWAYS—*Continued*

10.20 Loan Program—Local Government

This program provides loans to local governments in an effort to alleviate the shortage of safe and convenient small craft harbor facilities. California continues to experience increases in the boating population with its attendant demand for berthing spaces in small craft harbors throughout the State, especially in the south coastal area.

In addition to developing new small craft harbors, the Department places a high priority on the expansion of existing berthing facilities.

Loan program expenditures indicate the level of funding to local governmental jurisdictions. A harbor development project may include dredging, excavation, erosion control, environmental enhancement, landscaping and irrigation, as well as the construction of breakwaters, harbor master offices, rest rooms, boarding floats, fuel docks, sewage pump–out stations, mooring buoys, berths, public access areas, and utilities.

Performance Measures	*1982–83**	*1983–84**	*1984–85**
Expenditures for completed projects	$10,625	$17,797	$18,425
Number of completed projects	3	9	9

Expenditures	9.5	10	10	$12,986	$13,987	$12,086

10.30 Loan Program—Private Recreational Marinas

Chapter 1062, Statutes of 1979 (Knox), authorizes the Department to provide subordinated loans, made in connection with bank loans guaranteed by any agency of the federal government, to small businesses for the development of recreational marina facilities. The program commenced in July 1980. Its objective is to provide financial assistance to the owners of recreational marinas in order to expand and improve the boating and ancillary facilities available to the public.

Performance Measures	*1982–83**	*1983–84**	*1984–85**
Expenditures for completed projects	$100	–	–

Expenditures	–	–	–	$100	–	–

10.40 Capital Outlay Administration

The capital outlay program consists of boating facilities development in the state park system, on state water project reservoirs, and on other state lands. The Department is responsible for the project location, scope, planning, and design of environmentally sound boating facilities within units of the state park system and at state water project reservoirs.

Surveys of boating facility needs throughout the state park system and the state water project reservoirs are conducted and priorities established by the Department in cooperation with the Departments of Parks and Recreation and Water Resources. The Department schedules the construction of boating facilities to meet the needs of the boating population in the various areas of the State.

20 BOATING OPERATIONS

Program Objectives and Descriptions

The primary objective of the boating operations program is to reduce the incidence of loss of life, personal injury, and property damage resulting from boating accidents.

This program includes activities in uniform boating law enforcement, boater education, and boating safety. Problems of increased boating activity necessitate study and recommendations in waterway use and management practices. Aspects of the program involve gathering statistical information concerning boating accidents to enable the department to monitor accident trends, and problem areas, and to research causal factors in such accidents. Additionally, the Department develops and implements programs for the elimination or marking of waterway hazards. Boating safety literature is also published and distributed to prevent problems before they occur. Coordination of boating educational programs is of major importance, too, in reducing accidents. Continuous coordination with over 700 municipal and justice courts and over 150 enforcing agencies ensures an acceptable level of uniformity in boating law enforcement.

In 1983–84, $3,440,000 was authorized for local assistance boating safety and enforcement subventions. Of this amount, $3,155,000 was authorized from the Harbors and Watercraft Revolving Fund and $285,000 from Federal funds. For 1984–85, $3,427,000 is proposed for this purpose. Of this amount, $3,200,000 is proposed from the Harbors and Watercraft Revolving Fund and $227,000 from Federal funds. A reduction of 2 personnel years is also proposed due to efficiencies in the department's boating safety and regulation programs.

20.40	Yacht and Ship Brokers Licensing	3.5	3.5	3.5	158	156	157

20.10 Boating Safety

Work in boating safety includes analysis and investigation of boating accidents, recommending changes in the law and regulations governing the marking or removing of boating hazards, helping local agencies warn boaters of hazardous conditions, and recommending improvements in boating equipment. Presentations on boating safety are given to boating clubs, public service organizations, and others interested in boating. Safety literature is disseminated statewide. In addition new projects are inspected for compliance with state laws, and local entities are assisted in proper zoning and marking of waterways. In spite of a substantial increase in the number of boaters, the number of boat related deaths has remained fairly constant in California.

Performance Measures	1982-83	1983-84	1984-85
1. Total number of boating accidents [3]	623	723	762
2. Fatalities [1, 3]	108	110	110
3. Injuries [3]	340	354	358
4. Property damage [3]	$3,000 *	$3,012 *	$3,110 *
5. 1 accident per number of boat-use days [2, 3]	21,500	21,650	21,710
6. 1 fatality per number of boat-use days [2, 3]	162,850	163,150	164,000
7. 1 injury per number of boat-use days [2, 3]	63,011	63,119	63,210

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	8	8	7	$387	$556	$555

20.20 Boating Regulation and Enforcement

This element administers the state and federal aid programs which provide funds to qualifying local agencies involved in boating safety and enforcement. Additionally, it monitors local programs for effectiveness. To ensure uniform law enforcement statewide, annual training is provided to enforcement officers. Local boating ordinances are reviewed to ensure conformity with state law. This element maintains liaison with appropriate federal agencies as it relates to regulation and enforcement of boating statutes. Where changes are necessary in state regulations, draft regulations are developed and public hearings are held. Also, all public notices affecting the state's waterways are reviewed and commented upon when necessary.

Performance Measures	1982-83	1983-84	1984-85
Number of patrol boats (estimated)	327	330	332
Number of citations	2,800	3,000	3,125
Number of boats per citation	203	190	179
Total number of peace officers trained and in service	700	830	760
Number of public notices reviewed	1,732	1,900	2,100

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	8	8.5	7.5	$3,103	$4,027	$4,005

20.30 Boating Education

The boating education element develops safety leaflets and posters; produces and issues news releases, radio and television public service announcements; and coordinates the publicity of boating instruction with the State Department of Education, United States Coast Guard Auxiliary, United States Power Squadrons, and other boating organizations to promote better boating safety education. An elementary and secondary curriculum for public schools is being developed and will be introduced throughout the State.

Performance Measures	1982-83	1983-84	1984-85
News releases	51	60	65
Public service announcements	1	3	3
Safety leaflets distributed	690,930	698,000	700,000
Films loaned to boating organizations	374	392	411
Students educated by State course	5,543	6,654	7,384

Input	82-83	83-84	84-85	1982-83*	1983-84*	1984-85*
Expenditures	6	6	6	$325	$416	$420

20.40 Yacht and Ship Brokers Licensing

The objectives of this program are to protect the public from fraudulent acts by persons engaged in the sale or resale of used vessels, and to provide a minimum level of competence among such brokers and their salespersons. To accomplish this, yacht brokers and salespersons are licensed, and complaints resolved through arbitration or legal action. In addition, for-hire vessel operators are licensed by this program.

---

30 BEACH EROSION CONTROL

Program Objectives and Description

The objective of the beach erosion control program is to mitigate coastal erosion and develop shoreline protection measures to preserve and enhance the beach and shoreline developments of the State. The Department is responsible for advising local, State, and federal governments on the need to protect critical areas of erosion, and for cooperating with all levels of government in programs to provide protection.

The program involves cooperative efforts with the federal government, the California Coastal Commission, and local agencies to study and report on problems of beach erosion. Major beach erosion projects are constructed by the U.S. Corps of Engineers in cooperation with state and local agencies. Small beach erosion projects are constructed by local agencies with State cooperation.

California's marine shoreline was seriously damaged during the winters of 1978, 1980 and 1982, particularly the beaches in San Diego County, Los Angeles, Santa Cruz County, and in Marin County. Mitigation of severe storm damage has been achieved, but remedial works are needed to protect coastal developments against future high energy storm waves. Corrective measures to preserve recreational beaches and to protect existing shoreline developments will require the cooperative participation of federal, State, local, and private agencies.

For the 1984–85 fiscal year, $2,885,000 from the General Fund is proposed for the following beach erosion control projects: Imperial Beach, San Diego County ($1,355,000), and Pacifica Shore, San Mateo County ($1,530,000).

40 GENERAL MANAGEMENT

Program Objectives and Descriptions

General management consists of executive direction and administrative services essential to the operation of the line programs.

The executive direction provides policy formulation, administrative direction, and guidance in policy implementation; overall planning and program management; coordination of line programs; and evaluations of program results.

The administrative services provide accounting, budgeting, personnel, and business management services to the line programs, as well as financial audits of expenditures for small craft harbor planning and construction loans, launching facility grants, and boating law enforcement subventions.

3720 CALIFORNIA COASTAL COMMISSION

In 1972, the voters of California passed Proposition 20, which established a temporary state agency—the California Coastal Zone Conservation Commission—and required it to prepare a long-range plan for the conservation and development of the state's 1,100-mile coastline and to regulate virtually all development along the coast while the plan was being prepared. The Coastal Zone Conservation Commission completed its plan in 1975 and, based on the recommendations contained in the plan, the Legislature enacted the California Coastal Act of 1976 to provide for the permanent state management of California's coastal resources. The 1976 Coastal Act established the California Coastal Commission to succeed the Coastal Zone Conservation Commission, which expired at the end of 1976 under the provisions of Proposition 20. The Commission is composed of 15 members: 12 voting members appointed by the Governor, the Senate Rules Commitee, and the Speaker of the Assembly, each of whom appoints two public members and two locally elected officials; and three nonvoting exofficio members (the Secretaries of the Resources Agency and Business, Transportation and Housing Agency, and the Chairperson of the State Lands Commission). From 1977 through June 1981, six regional coastal commissions assisted the state coastal commission in carrying out its responsibilities. Under the provisions of the Coastal Act, the regional commissions were terminated on July 1, 1981.

The Coastal Act established policies with which "coastal zone" conservation and development decisions must comply. The "coastal zone" is defined on maps incorporated into the Coastal Act. The zone extends three miles seaward and generally about 1,000 yards inland. In particularly important and generally undeveloped areas where there can be a considerable impact on the coastline from inland development, the coastal zone extends as much as five miles inland. In developed urban areas, the coastal zone extends considerably less than 1,000 yards inland. The coastal zone does not extend into or around San Francisco Bay, where development is regulated by another state agency—the San Francisco Bay Conservation and Development Commission (SFBCDC)—under a different state law.

The policies of the Coastal Act deal with public access to the coast, coastal recreation, the marine environment, coastal land resources, and coastal development of various types, including energy facilities and other industrial development. To carry out these policies, each local government within the coastal zone is required to prepare a local coastal program (LCP) that reflects the policies of the Coastal Act. An LCP is composed of a land use plan (LUP) and implementing ordinances. Each LCP must be submitted to the Commission for review and certification of its adequacy. Until the LCP has been certified, virtually all development within the coastal zone requires a coastal permit from the Commission as well as a local permit from the city or county in which the development would be located. After certification of an LCP, the Commission's regulatory authority over most types of development is delegated to the local government, subject to limited appeal to the Commission. In 1981, legislation was passed (Chapter 1173, Statutes of 1981) to modify the procedures for the preparation and certification of LCPs. Under these amendments, a local government can take over the authority for regulating most coastal development upon the certification of the LUP portion of its LCP. However, if a local government elects to use this early transfer option, all local decisions on coastal development permits are subject to appeal to the Commission.

The Coastal Commission is also the designated state coastal management agency for the purpose of administering the federal Coastal Zone Management Act in California. Under this federal law, California has received substantial financial assistance to develop and implement the federally approved California Coastal Management Program, which is based on the policies of the California Coastal Act. The Commission also administers the federal Coastal Energy Impact Program, which was established under the federal coastal act to provide funds to coastal states and local governments to study and deal with the impacts of coastal energy projects. This program is scheduled to phase out in 1984–85. In addition to financial assistance, the federal coastal act gives the Commission authority over federal activities that would not otherwise be subject to state control under California law.

The Budget Act of 1983 made significant modifications to the Commission's activities. On September 30, 1983, the Governor signed into law SB 232 (Chapter 1308, Statutes of 1983) appropriating $517,000 in Federal Funds to mitigate identifiable costs associated with staff reductions at the Commission while at the same time maintaining a staff level consistent with the approved 1983–84 budget for the Commission. For 1984–85, the Governor's Budget proposes to increase operating expenses by $159,000 in General Funds for scheduled office rent increases.

10 COASTAL MANAGEMENT PROGRAM

Program Objectives and Description

The elements of this program implement the California Coastal Act and the California Coastal Management Program under the federal Coastal Zone Management Act. The objective of this program is to provide for the permanent management and protection of California's coastal resources. This objective is being accomplished by: the preparation and certification of local coastal programs (LCPs) to bring the general plans and implementing ordinances of coastal local governments into conformity with the policies of the California Coastal Act; the interim regulation of coastal zone development by the Commission while the LCPs are being prepared to ensure that all development is consistent with the policies of the Coastal Act; the permanent regulation by the Commission of development on tidelands, submerged lands, and public trust lands and the Commission's monitoring, enforcement, and handling of appeals of certain types of local regulatory decisions made under certified LCPs to protect state and national interests; the review of federal projects and activities to ensure that these activities are consistent with the California Coastal Management Program; the Commission's involvement in addressing those coastal issues that cannot be adequately handled by local governments alone; the operation of a program to protect and increase usable areas for public access to the coastline; and the provision of technical information and assistance to local governments in the implementation of their LCPs.

Chapter 1308, Statutes of 1983 (SB 232) appropriated $517,000 in Federal Funds to mitigate identifiable costs associated with current year staff reductions. Of this amount, $333,000 is for costs directly associated with staff reductions such as lump sum vacation and compensating time off, $90,000 is for pass through federal coastal management funds for the San Francisco Bay Conservation and Development Commission, and $94,000 is for federally-mandated activities.

10.10 Regulation of Coastal Development

The California Coastal Act of 1976 requires all new development in the coastal zone to be consistent with the Coastal Act policies. To achieve this, the Commission is authorized to regulate new coastal development through the issuance of permits. This authority applies to all proposed development except for powerplants, electric transmission lines, and certain other specified uses which are excluded from the Commission's jurisdiction by the Coastal Act. The Commission's coastal permit authority can be delegated to local governments under one of three methods. First, a local government may elect at any time to take over the permit review authority for all coastal zone development. However, local decisions can be appealed to the Commission and development in certain areas (tidelands, submerged lands, estuaries, public trust lands, the area between the first public road and the sea, and the area within the first 300 feet inland from the sea) continue to be subject to direct regulation by the Commission. Only one local government (the City of Los Angeles) has used this method.

The second method was provided by 1981 amendments to the Coastal Act. Under this method, a local government must take over the coastal permit authority when the land use plan (LUP) portion of its local coastal program (LCP) has been certified by the Commission as being in conformity with the policies of the Coastal Act. As with the first method, development offshore and along the immediate shoreline also requires a permit from the Commission and all local decisions on development within the coastal zone can be appealed to the Commission.

The third method covers areas where a local government does not choose to assume the coastal permit responsibility until it has completed its LCP. Here the Commission retains regulatory authority until the local government has completed its entire LCP (the LUP and its implementing ordinances) and the Commission has certified that the LCP complies with the requirement of the Coastal Act. During this interim period, the Commission may issue a permit only if a proposed development will be in conformity with the provisions of the Coastal Act and will not prejudice the ability of the local government to prepare its LCP. Upon certification of an LCP, the local government must take over the permit authority for the entire coastal zone within its jurisdiction. Development proposed in tidelands, submerged lands, or public trust lands continue to require a permit from the Commission. Local decisions or permits for development between the first public road and the sea and along the immediate shoreline can be appealed to the Commission.

The Commission also administers the federally-approved California Coastal Management Program, which was established by the Coastal Act. Under the requirements of federal law, federal agencies are required to carry out their activities and programs in a manner generally consistent with the Coastal Act policies. To implement these requirements, federal agencies and applicants for federal permits, licenses, or local financial assistance must submit their proposals to the Commission for its review and approval.

10.20 Local Coastal Programs

Each coastal city and county is required to prepare a local coastal program (LCP) for the portion of the local government's jurisidction that is within the coastal zone, and to submit the LCP to the Commission for certification. An LCP includes a land use plan (LUP) which is the relevant portion of the local general plan, including any maps necessary to administer it, and the zoning ordinances, zoning district maps, and any other legal instruments necessary to implement the land use plan. The policies specified in the Coastal Act are the standards by which the LCPs are judged for their adequacy.

The entire LCP may be submitted at one time, or the land use plan can be submitted first and certified before work is begun on the implementing ordinances, which require a second separate certification by the Commission. Under 1981 amendments to the Coastal Act, the Commission is required to establish schedules for the submission of LUPs and implementing ordinances. Under these amendments all LUPs must be submitted by January 1, 1983 and all implementing ordinances by January 1, 1984. If a local government fails to meet the Commission's schedule for the submittal of the LUP, the Commission can prepare an LUP for the affected area to guide the Commission in reviewing applications for coastal permits in that area, or report the matter to the Legislature and recommend appropriate action. In addition, if a local government fails to meet the Commission's schedule for the submission of LUPs or implementing ordinances, the Commission may waive the deadlines imposed on the Commission by the Coastal Act for the processing of the ordinances when they are submitted.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

10.30 Planning and Support Studies

The Commission requires technical information for use in the regulation of coastal development and to assist in the preparation of local coastal programs. Moreover, as the LCPs are being completed and the Commission's regulatory responsibilities are being delegated to local governments, the Commission may be called upon to provide data, expertise, and advice to local governments in carrying out their Coastal Act responsibilities. The Commission continues to rely heavily on other state agencies with specialized staff expertise to avoid duplicating the resources available from these agencies.

10.40 San Francisco Bay Segment—Federal Coastal Management Program

In order for California to have an approved state coastal management program under the provisions of the federal Coastal Zone Management Act, it is necessary that the entire coastal zone—including San Francisco Bay and its shoreline—be covered by the program. Under state law, the San Francisco Bay segment of the coastal zone is under the jurisdiction of another state agency, the San Francisco Bay Conservation and Development Commission (SFBCDC). Although the federal coastal law permits an approved state coastal management program to be made up of two or more distinct segments, the federal law requires that only one state agency can be the primary recipient of federal coastal act funds. The California Coastal Act designates the Coastal Commission as the state agency responsible for receiving and administering these funds. As a result, any federal coastal management funds for SFBCDC must be received by the Commission and passed through to SFBCDC.

3720 CALIFORNIA COASTAL COMMISSION—*Continued*

10.50 Coastal Access Program

One of the Commission's statutory responsibilities is to promote maximum public access to and along the coast. Under the California Coastal Act the Commission's primary means for meeting this responsibility is through access elements in LCPs and by including conditions in the coastal development permits approved by the Commission requiring that public access to the coast be allowed as part of the approved development. To ensure that the required access is, in fact, dedicated, opened to the public, and maintained, and to provide a comprehensive coastal access program, the Coastal Act was amended in 1979 to require the Commission to carry out additional public access responsibilities. These include: maintaining an inventory of existing, proposed, and pending coastal accessways; developing standards for locating and building accessways; identifying the agency which should most appropriately operate and maintain each accessway; and reporting to the Legislature and the Governor on the cost and proposed financing methods for maintaining such accessways.

The 1979 legislation also requires the Commission to prepare an atlas of coastal accessways for distribution to the public and to permanently serve as the lead state agency in an ongoing public access program operated jointly with the State Coastal Conservancy. The access atlas is updated regularly and is published by the University of California Press under the title, *California Coastal Access Guide.*

Program Measures	*1982–83*	*1983–84*	*1984–85*
Permits with access conditions	200	200	200
Access dedications accepted	50	75	80

20 COASTAL ENERGY PROGRAM

Program Objectives and Description

The elements of this program implement the energy planning and regulatory requirements of the California Coastal Act and the California Coastal Management Program under the federal Coastal Zone Management Act. The objective of this program is to provide for the permanent management and protection of California's coastal resources while at the same time ensuring that the state and national energy concerns, which are afforded special treatment in the Coastal Act, are addressed. This objective is being accomplished by: the inclusion of energy components in the LCPs of local jurisdictions that are facing significant energy development; requiring the amendment of an LCP that would prevent a needed energy development if the development would otherwise conform with the Coastal Act; the regulation of coastal energy development under a special Coastal Act policy which allows approval even if a development would not meet other policies of the Act; the regulation of oil and gas drilling offshore California to ensure that this drilling will be consistent with the California Coastal Management Program; the biennial designation of areas where the location of thermal electric generating plants would conflict with the objectives of the Coastal Act; and the administration in California of the federal Coastal Energy Impact Program, which provides financial assistance to state agencies and local governments to plan for and mitigate the impacts of coastal energy development.

For 1984–85, the Commission is proposing a reduction of 0.5 personnel years, as a result of the phase-out of the federal Coastal Energy Impact Program.

20.10 Coastal Energy Impact Program

The Coastal Energy Impact Program (CEIP) is a federal financial assistance program that was established in 1976 in recognition that energy development can have significant effects on coastal communities. Coastal local governments receive CEIP funds through the state agency designated to administer the program which, in California, is the Coastal Commission.

The primary objective of the CEIP is to balance the need for coastal resource protection and management with the need for national energy exploration and development. Consequently, the CEIP provides financial assistance to coastal states to help them and their local communities cope with the economic, social, and environmental impacts expected from coastal energy development. Historically, this financial support has been used for energy facility planning, mitigating adverse impacts from such energy activities, and developing public facilities and services required as a result of exploration and development activities on the Outer Continental Shelf (OCS). This program is scheduled for close-out in 1984–85.

20.20 Coastal Energy Planning and Regulation

Because of the present and proposed use of the California coastline for refineries, oil and gas drilling, tanker terminals, electric power generating plants, and other energy facilities, the Coastal Act includes many special provisions relating to the siting and operation of these facilities. The Commission implements these provisions through its interim coastal development regulatory process and by including energy components in LCPs so that local governments can address proposals for new energy development. In addition to the policies relating to the siting of energy facilities, the Coastal Act includes special procedures that must be used in carrying out the Commission's planning and regulatory responsibilities when energy projects are concerned. These include: Section 30260, which allows coastal-dependent industrial facilities, such as energy projects, to be approved even if they would be inconsistent with other Coastal Act policies if alternative locations are infeasible or more environmentally damaging, to do otherwise would adversely affect the public welfare, and the adverse environmental affects are mitigated to the maximum extent feasible; Section 30515 which allows the Commission to require a local government to amend its LCP to accommodate an energy development that would meet a greater-than-local public need if the energy development would be consistent with the Coastal Act; and Section 30601, which requires that a major energy facility must receive a permit from the Commission in addition to the permit received from a local government under a certified LCP.

30 ADMINISTRATION AND SUPPORT ACTIVITIES

Program Objectives and Description

Under the direction of the executive director, this program provides general management guidance and administrative support to all other Commission programs. *Commencing in 1984–85, the Commission is proposing a $159,000 General Fund augmentation for unavoidable scheduled office rent increases.*

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	21.8	16.9	16.9	$806	$682	$872
Totals, Administration and Support Activities	21.8	16.9	16.9	$806	$682	$872

Net Totals, Administration and Support Activities *(Reimbursements)*	2	2	2	$40	$40	$40

30.10 General Administration

This program element provides administrative services to all other Commission programs in the areas of general management, public information, legislative liaison, personnel, accounting, business services, budget administration, and grants management. All program element costs are distributed among other program elements.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	(19.8)	(14.9)	(14.9)	($766)	($642)	($832)

30.20 Administrative Support to Other State Agencies

The Commission provides administrative support services to the San Francisco Bay Conservation and Development Commission under an interagency agreement. This support includes personnel and accounting services and advice and assistance in general administrative, budget, and federal grant activities.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40 LEGISLATIVE MANDATES

In accordance with Section 2231 of the Revenue and Taxation Code, Section 30340.5 of the Coastal Act allows local governments to be reimbursed for costs they necessarily incur in complying with the Coastal Act if other state funds or Federal funds are not available.

Funding for this mandate for 1983–84 and in subsequent years is provided in the budget for "State-Mandated Local Programs" (Department 9680) in the General Government Section of the Governor's Budget; data shown here in parentheses is for information purposes only.

3760 STATE COASTAL CONSERVANCY

Program Objectives and Description

Chapter 1441, Statutes of 1976 established the State Coastal Conservancy within the Resources Agency. The State Coastal Conservancy was created to develop and implement programs to protect, restore, and enhance natural, scenic, and man-made resources in the coastal zone within policies and guidelines established pursuant to the California Coastal Act of 1976.

Specifically, the State Coastal Conservancy is empowered to:

a) acquire agricultural lands in order to prevent the loss of such lands to other uses and to assemble such lands into parcels of adequate size so as to permit continued agricultural production;

b) provide grants to local agencies for, or undertake itself, projects designed to restore areas which may be adversely affecting the coastal environment or impeding orderly development due to poor lot layout, scattered ownerships, incompatible land uses, or other conditions;

c) award grants to local or State public agencies for, or undertake itself, projects designed to enhance natural and scenic values threatened by dredging or filling, improper location of improvements, and other conditions;

d) undertake projects in the preservation of significant coastal resource areas until other public agencies are willing or able to acquire such sites;

e) award grants to the Department of Parks and Recreation or to local public agencies for the purpose of acquiring and developing public accessways to the coast; and

f) award grants and provide technical assistance to nonprofit organizations.

Chapter 1264, Statutes of 1983 (SB 997) established a California Urban Waterfront Area Restoration Financing Authority (CUWARFA), with the authority to issue up to $650 million in tax exempt revenue bonds, to make loans or acquire title to property, to underwrite or undertake directly a variety of urban waterfront development projects within the coastal zone, the Sacramento-Yolo Port District, the Stockton Port District, and metropolitan statistical areas meeting specified conditions. The legislation requires that the Conservancy must approve both the project and a master plan for urban waterfront restoration before any project can obtain CUWARFA approval for revenue bond financing. Because of these new statutory responsibilities, the Governor's Budget proposes a $352,000 State Coastal Conservancy Fund loan to the Conservancy to finance startup operations, including the addition of 7 new personnel years (limited term to June 30, 1985). This loan is expected to be repaid from project revenues.

In addition, for workload purposes, the Governor's Budget proposes to establish 4 permanent conservancy analyst personnel years in lieu of temporary help and to continue, for one additional year, 2 personnel years and $82,000 in State Coastal Conservancy Funds for storm disaster relief activities.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands, excluding salary range.

3790 DEPARTMENT OF PARKS AND RECREATION

The Department of Parks and Recreation acquires, designs, develops, operates and maintains units of the State Park System. The Department also has the responsibility to administer both federal and State local assistance programs. These activities are directed toward the accomplishment of seven principal objectives:

1. To secure and preserve elements of the State's outstanding landscape, cultural, and historical features.
2. To provide the facilities and resources which are required to fulfill the recreational demands of the people of California.
3. To provide a meaningful environment in which the people of California are given the opportunity to understand and appreciate the State's cultural, historical, and natural heritage.
4. To maintain and improve the quality of California's environment.
5. To prepare and maintain a statewide recreational plan that includes an analysis of the continuing need for recreational areas and facilities, and a determination of the levels of public and private responsibility required to meet those needs.
6. To encourage all levels of government and private enterprise throughout the State to participate in the planning, development, and operation of recreational facilities.
7. To meet the recreational demands of a highly accelerated, urban–centered population growth, through the acquisition, development, and operation of urban parks.

An ever-increasing population in California has resulted in accelerated urbanization which necessitates the establishment of park units and recreation areas accessible to the major population centers of the State. Technological advances have created a more affluent society with additional leisure time increasingly spent in pursuit of various forms of recreation. It is necessary to provide for the wise and constructive use of the State's natural resources for recreational uses and to preserve the State's cultural, historical, and natural heritage for future generations to enjoy.

In addition to the General Fund expenditures shown in the Department's budget for support and local assistance, an additional $71.9 million in 1982–83, $73 million in 1983–84 and $89.8 million in 1984–85 General Fund expenditures will be incurred for the redemption of various general obligation bonds for grants, acquisition, and development of the state and local park systems. Although the expenditures for bond redemption are shown in the Debt Service—Bond Interest and Redemption section of the Governor's Budget, they are directly related to this department's local assistance and capital outlay programs.

Due to a reduction in available funds for future capital outlay projects, the Department's 1984–85 planning, acquisition, and development budget will be reduced by 85 personnel years and $1,843,000. In the event additional funding becomes available for the Department's capital outlay program, it may be necessary to increase personnel to meet any new workload.

10 STATEWIDE PARKS AND RECREATION PLANNING

Program Objectives and Description

The objective of this program is to provide the basic planning framework for the maximum use of state resources devoted to recreation. Its goal is to establish needs and priorities on a statewide basis to facilitate distribution of resources into areas of maximum benefit. Primary responsibility for this program is vested in the Department's Planning Division.

The Department's Planning Division proposes to establish 0.9 personnel years in 1983–84 to accomplish capital outlay-agency retained item workload.

For 1984–85, the Department's Planning Division will be reduced 6.0 personnel years to reflect a decrease in the available funding for future capital outlay programs.

20 DEVELOPMENT OF THE STATE PARK SYSTEM

Program Objectives and Description

The objective of this program is to meet the demand for additional State lands and facilities through its efforts in acquisition of lands and development of facilities. It is also the goal of this program to develop effective interpretive programs for all State Park System units. This program also provides the technical assistance for accomplishing maintenance of State Park System facilities. The program is the joint responsibility of the Acquisition and Development Divisions.

The Department's Development Division proposes to establish 3.8 personnel years in 1983–84 to accomplish capital outlay-agency retained item workload.

For 1984–85, the Department's Acquisition and Development Divisions will be reduced 39 personnel years to reflect a decrease in the available funding for future capital outlay programs. In addition, 6 personnel years have been reduced as a result of the reduction in Administration that is charged to this program.

20.20	Facilities Development	128.7	123.4	81.7	5,703	5,856	4,563

20.10 Acquisition

This element involves the preparation of budget requests, negotiations, condemnation and liaison necessary to acquire lands for the State Park System. It requires the administration of the Department's acquisition program including funded acquisition projects, gifts, exchanges, transfers and leases, as well as the real estate management and ownership mapping functions of the department.

Continuous liaison is maintained with the Real Estate Services Division of the Department of General Services as well as various State and federal agencies to insure a well coordinated acquisition program.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Acres acquired	10,680	37,575	4,661

Reimbursements				*229*	*307*	*271*

20.15 Property Management

The Property Management element was established as a result of Chapter 752, Statutes of 1982, which provided that all real property acquired by the State for the Park System prior to April 1 of each year, which constitutes a sufficient usable area of land for Park System purposes, be transferred to the Department of Parks and Recreation by July 1 of each year. The Department, through this element, is responsible for the management and maintenance of this property while ensuring that it is made accessible and usable by the general public at the earliest opportunity.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

State Parks and Recreation Fund				–	*1,232*	*1,308*

20.20 Facilities Development

This element includes all efforts culminating in a completed recreational facility or major modifications or repair to an existing facility. Such efforts include refining plans as required to support reliable cost estimating, budget preparation for approved projects, production of general development plans for control of design in working drawing development, production of working drawings and specifications, coordinating project bid and contracting program, construction inspection and necessary liaison with State, federal and private agencies.

25 RESOURCE PRESERVATION AND INTERPRETATION

Program Objectives and Description

This program provides protection and interpretation for the natural, cultural and historic resources of the State Park System. Preservation and interpretation efforts are directed toward two major types of resources: (1) natural and environmental resources and (2) cultural resources which includes archeological and historical resources.

The Department's Resource Protection Division and Office of Interpretive Services propose to increase 107 personnel years in 1983–84 to accomplish capital outlay-agency retained item workload.

For 1984–85, the Department's Office of Historic Preservation, Resource Protection Division and Office of Interpretive Services will be reduced 17 personnel years to reflect a decrease in the available funding for future capital outlay programs. In addition, 3 personnel years have been reduced in Administration that is charged to this program.

25.10.020 Natural Resources	46.4	43.8	28.3	1,543	1,984	1,703

25.10.010 Cultural Resources

This component is directly responsible for the Department's participation in the preservation of the State's cultural resources. These include archeological and historical features over which the State has jurisdiction and all of the State's historic resources as outlined by the Department's participation in the National Historic Preservation Act of 1966. Responsibility for this program rests with the Cultural Heritage Planning and Cultural Resources Management Units of the Resources Protection Division and the Office of Historic Preservation.

Preservation responsibility for State Park System cultural resources includes providing professional expertise concerning cultural resources and monitoring the status of cultural resources. The collection of basic resource data in the form of park unit inventories of cultural resources provides the data required to complete the resource management element. These are the principal resource documents for all Department lands and are key components to the General Plan. This program includes the mitigation of archeological and historical resources which is the logical step following the identification and protection of cultural resources.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

25.10.020 Natural Resources

This element concentrates its preservation and protection efforts in areas of environmental importance within the State Park System. Field reconnaissance, studies, and consultations related to identification, analysis and formulation of management and protection programs for vegetative, wildlife and scenic resources are major activities included within this program. The maintenance of a hazard review program is included as a major component toward this effort.

30 STATE PARK SYSTEM OPERATIONS

Program Objectives and Description

It is the responsibility of this program to provide services such as protection, interpretation, and public information to the users of the State Park System. It is also the responsibility of this program to preserve and maintain all features of the State park. Its primary goal is to insure a significant recreational experience at each park unit. The activities of this program can be grouped into three major elements—park unit services, public information and concession services.

During 1983–84, the Department's Operations Division transferred 90.9 personnel years to the Off-Highway Motor Vehicle Recreation Program on a permanent basis.

The Department's Operations Division proposes to establish 1.3 personnel years in 1983–84 to carry out capital outlay-agency retained item workload and 42.2 personnel years of temporary help for implementation and administration of the Federal Jobs Bill.

For 1984–85, the Department's Information Office and Concessions Office will be reduced 3 personnel years to reflect a decrease in program workload. Commencing in 1984–85, 30.1 personnel years are being proposed to operate newly completed facilities and to staff units for fee collection activities.

In addition, in 1984–85, the department proposes a $4.4 million funding shift from the State Parks and Recreation Fund to the General Fund to fund the actual revenue shortfall experienced during 1982–83 which is expected to continue in the 1983–84 fiscal year. This funding shift will enable the department to fully staff field operations in maintenance and visitor service functions.

Performance Measures	*Actual 1982–83*	*Estimated 1983–84*	*Projected 1984–85*
Visitor days (millions)	61.3	62.3	63.5
Acreage (thousands)	1,116	1,154	1,173
Campsites	15,866	15,962	16,067

30.10 Park Unit Services

It is the purpose of this element to maintain park unit facilities for public use and insure a significant recreational experience at each park unit within the State Park System. This is accomplished by providing a wide range of visitor services such as law enforcement, interpretation of the various resources within the system, and other visitor services. Also contributing to the accomplishment of this goal, this element provides a wide range of maintenance services including resource management, housekeeping, and maintenance to preserve the facilities and resources of the system.

In 1983–84, 40.2 personnel years of temporary help were administratively established, limited term to September 30, 1983, to implement a $525,000 grant from the Small Business Administration's Park and Recreational Area Development Grant Program pursuant to the Federal Jobs Bill (HR 1718). The purpose of this grant was to hire the unemployed to perform tree, shrub, and grass planting, related vegetative management activities, and other park development and rehabilitation projects.

30.20 Public Information

This element includes all efforts necessary to communicate to the public and departmental personnel meaningful information on the Department's program and on the environmental, historical, archeological, natural, recreational and scientific resources of the State Park System.

The program includes the production of park publications, brochures and folders as well as maintenance of contacts with the various news media.

30.30 Concessions Services

It is the responsibility of this element to coordinate and direct the work of the Department relating to concessions, special use permits, and certain agreements issued to and received from federal and local agencies. This element encompasses the administration of concession contracts including analysis of bid contracts and the planning and supervising of concession operations. It is the goal of this element to provide adequate concession services which are reasonable, clean, and add to the citizen enjoyment of the State Park System.

The following are concessions proposals planned for 1984–85 which involve either private investments or concessionaire gross receipts in excess of $100,000 on an annual basis.

Concession Projects:

Big Basin Redwood State Park—Camp Store
Monterey State Historic Park—Mexican Restaurant
Morro Bay State Park—Morro Bay Golf Course
Old Sacramento State Historic Park—Excursion Trains
Old Town San Diego State Historic Park—Mexican Handicraft Store
Old Town San Diego State Historic Park—Mexican Furniture Shop
Old Town San Diego State Historic Park—Parking Lot Concession
South Carlsbad State Beach—Food Services

35 OFF-HIGHWAY MOTOR VEHICLE RECREATION

Program Objectives and Description

The Off-Highway Vehicle Program was established by Chapter 994, Statutes of 1982. That Act required the consolidation of all existing Off-Highway Recreation activities currently contained in other programs of the department. This program is intended to consolidate all responsibilities of the department relating to the planning, acquisition, development, management, operation, and conservation of the State Vehicular Recreation Area and Trail System. The goal of this program is to provide adequate facilities for the use of off-highway vehicles while minimizing deleterious impact on the environment, wildlife habitats, native wildlife, and native flora.

Beginning in 1983–84, the Office of Off-Highway Vehicle Recreation was reorganized into the Off-Highway Motor Vehicle Recreation Division. All activities related to Off-Highway Vehicles are to be administered by this Division. During 1983–84, 90.9 personnel years and 3.7 personnel years were transferred from Park Unit Services (program 30.10) and the old Office of Off-Highway Vehicle Recreation, respectively, on a permanent basis.

Authority

50 ASSISTANCE TO RECREATIONAL AGENCIES

This program is the sole responsibility of the Recreation and Local Assistance Office. Its main objective is to administer State and federal programs for financial assistance to local jurisdictions and State agencies for outdoor recreation. It also seeks federal, State, and private funds, gifts, lands and other donations for use in the Department's park and recreation related programs. A second main objective of this program is meeting statewide recreational deficiencies by qualifying the State of California as a recipient of grants from the Federal Land and Water Conservation Fund. The costs of providing additional recreational facilities often exceed the financial capability of local government agencies, and the federally sponsored Land and Water Conservation Fund along with the 1974 State Beach, Park, Recreational and Historical Facilities Bond Fund help to alleviate this deficiency.

For 1984–85, the Department's Recreation and Local Assistance Office will be reduced 8 personnel years to reflect a decrease in program workload.

50.10 Grants Administration

This element includes those efforts needed in administering the requirements of federal and State grant programs which provide financial assistance to local agencies for recreational development, developing and coordinating the means by which individuals, organizations and federal agencies can contribute money and gifts to enhance the State Park System. It also provides planning and technical–informational services to local governmental agencies, nongovernmental entities and individuals as needed to maximize their involvement in helping to meet public recreational needs.

In 1983–84, the department received $5,177,000 from the Small Business Administration's Park and Recreational Area Development Grant Program pursuant to the Federal Jobs Bill (HR 1718). These funds were allocated to the Department of Forestry ($2,013,165), the California Conservation Corps ($2,706,324) and the California Transportation Department ($457,811) for the purpose of contracting with local agencies who would hire directly and/or contract with small businesses to plant trees and shrubs, perform landscaping, and other restoration and rehabilitation work on publicly owned or controlled land including park and recreational areas.

50.20 Grants to Local Agencies

This element consists of the estimated State and federal grant allocations to be administered by the Department of Parks and Recreation to local recreational agencies throughout California from all sources not including the California Urban Open Space and Recreation Local Grants Program.

In 1983–84, the department received $1,164,292 from the Land and Water Conservation Act Fund and $643,000 from the Natural Park Service pursuant to the Federal Jobs Bill (HR 1718). The purpose of the funds was to contract with local agencies to provide for recreational development and creating jobs for the unemployed.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$31,167	$33,160	$1,729

60 DEPARTMENT ADMINISTRATION

Program Objectives and Description

This program provides the necessary leadership, regulation, and policy determination to ensure the Department's goals and objectives are satisfactorily met. This program is also responsible for providing the necessary administrative services and guidance for the proper functioning of all departmental programs.

It is the purpose of this element to consider recommendations and guidance from the State Park and Recreation Commission, the California Recreational Trails Committee, the California Historical Landmarks Advisory Committee, and the Advisory Board on Underwater Parks and Reserves and to formulate departmental policy, establish departmental organization, direct operating organizational units, review and draft legislation, and represent the Department in all operational functions.

To use Department resources efficiently toward the accomplishment of the Department's principal objectives, this element sees that policy is constantly analyzed, formulated, and reviewed. Use of Department resources toward common goals is also monitored within this element to ensure the setting of project and program schedules and priorities to realistically reflect the Department's policies.

The administration element provides the necessary business and administrative functions for the proper operation of all departmental programs. Activities include those involving human resources—personnel, affirmative action, and training; fiscal support—auditing and accounting; and business management including departmentwide clerical, distribution, reproduction and office management services.

In 1983–84, $25,000 and 2 personnel years of temporary help are included for the administration of the Federal Jobs Bill (HR 1718).

In 1983–84, the Department is proposing to fund deficiencies in Unemployment Insurance ($490,000), Worker's Compensation ($330,000), and employee housing reimbursement ($500,000). For 1984–85, the Department's budget has been augmented by $850,000 for Unemployment Insurance, $430,000 for Worker's Compensation, and $500,000 for employee housing.

Commencing in 1984–85, the Department's Executive and Administrative Divisions will be reduced 12.0 personnel years to reflect a decrease in the available funding for future capital outlay programs.

3810 SANTA MONICA MOUNTAINS CONSERVANCY

Program Objectives and Description

The Santa Monica Mountains Conservancy was created by Chapter 1087 (AB 1512), Statutes of 1979, to implement the Santa Monica Mountains Comprehensive Plan by developing programs for full fee or less than fee acquisition, and restoration or consolidation of lands in the Santa Monica Mountains Zone for park, recreation, or conservation purposes. The specific powers of the Conservancy include authority to:

1. Acquire real property, including development rights and easements, and lease, rent, sell, transfer, or exchange these lands for park purposes;
2. Award grants or interest free loans to State and local agencies for purchase or restoration of park, recreation, conservation or buffer-zone purposes to ensure that the character and intensity of development on these lands is generally compatible and does not adversely impact the Santa Monica National Recreation Area;
3. Award grants or interest free loans to State and local agencies for assembly of parcels to improve or correct resource management or for development of public facilities essential to park, recreation, or conservation purposes;
4. Acquire and hold for subsequent conveyance, or award grants or interest free loans, to an appropriate public agency for acquisition of park, conservation, or recreation sites, when that agency cannot expedite acquisition of critical sites under immediate development pressure;
5. Accept dedication or easements of tax delinquent parcels and have first right of refusal on property being sold as excess land by a public agency.

In 1982–83, a $5,092,000 appropriation from the Energy and Resources Fund (Resources Account) was authorized for acquisition of parklands. The 1983–84 Budget Act provided for $5,000,000 to be deposited from Tidelands Oil Revenues to the Santa Monica Mountains Conservancy Fund for capital outlay and local assistance grants program. $100,000 of this amount reimbursed the agency's General Fund appropriation for project planning and design and an additional $130,000 reimbursement was authorized from the Parklands Fund of 1980.

No additional funds are proposed for the Conservancy's capital outlay program during the 1984–85 fiscal year at this time. A total of approximately $10 million has already been appropriated to the Conservancy over the last three fiscal years. These funds will provide sufficient workload related to the Conservancy's Revolving Fund Land Program through the 1984–85 fiscal year.

The Conservancy has identified, for the 1984–85 fiscal year, two high priority acquisition projects—properties known as Corral Canyon and Arroyo Sequit (Mason Ranch). No funds are proposed for these acquisitions at this time. The Conservancy is preparing the necessary documentation, including preliminary appraisals, for these projects. In addition, the Conservancy is examining priorities in the existing authorized Revolving Fund Land Program to identify the acquisition of properties which could be deferred or currently owned properties which could be sold to provide sufficient funds to acquire these two new properties during the 1983–84 or 1984–85 fiscal year. In the event the Conservancy is unable to identify sufficient funds from currently authorized sources for these acquisitions, an augmentation proposal could be considered for possible inclusion in a budget change letter, or in a subsequent Governor's Budget.

In addition, $211,000 in reimbursements are anticipated to be generated from the sale of lands in the Conservancy's Revolving Fund Land Program. These reimbursement funds will provide necessary funding for the permanent continuation of one personnel year which was previously established in the current year as limited term. The funds will also provide related expenses and an increase in per diem for a newly appointed Conservancy Board member.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands, excluding salary range.

3820 SAN FRANCISCO BAY CONSERVATION AND DEVELOPMENT COMMISSION

The San Francisco Bay Conservation and Development Commission, headquartered at San Francisco, was created by the Legislature in 1965 to provide a regional approach to protecting the public interest in San Francisco Bay; to insure the beneficial use of the most valuable single natural resource of the entire region; and to provide a democratic and politically responsive process through which the bay and its shoreline can be managed as a single unit.

10 BAY CONSERVATION AND DEVELOPMENT

Program Objectives and Description

The San Francisco Bay Conservation and Development Commission is responsible for: maintaining the bay plan in an up-to-date manner based on current information and projections in order to serve as a guide for the conservation of San Francisco Bay and the development of its shoreline; carrying out provisions of law by issuing or denying permits for all filling or dredging in the bay; approving any change in use of salt ponds or other "managed wetlands" adjacent to the bay; and for approving any substantial change in use of property within 100 feet of the bay.

Comprehensive regional planning studies are conducted by staff and consultants to provide the basic information and planning data for granting or denying permits and to strengthen or revise specific parts of the San Francisco Bay Plan. This requires continuing and extensive cooperation and coordination with federal, state, regional, local, and private agencies.

In addition, in 1977 the Legislature gave the Commission responsibility for implementing, in cooperation with local government, the Suisun Marsh Preservation Act of 1977 (Public Resources Code, Sections 29000–29612).

Beginning in 1977, the Commission received reimbursements from the California Coastal Commission for coastal zone activities within San Francisco Bay. These funds were derived from federal grants received by the Coastal Commission and are not anticipated after 1983–84. It is proposed to return the Commission's budget to all General Funds in 1984–85.

The current year includes an augmentation of $25,000 and 0.8 personnel year funded by reimbursements from the San Francisco Port Authority for the loan of a coastal program analyst to assist in the development of the Bay Plan.

In 1984–85, 0.7 personnel years are proposed for reduction to reflect operational efficiencies.

20 LEGISLATIVE MANDATES

Program Objectives and Description

Section 2231(a) of the Revenue and Taxation Code requires the state to pay local governments the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. Within the program area of the San Francisco Bay Conservation and Development Commission, there is one legislative mandate, Chapter 1155/77 (AB 1717) Suisun Marsh Preservation Act of 1977.

3860 DEPARTMENT OF WATER RESOURCES

The role of the Department of Water Resources is to protect, conserve, develop, and manage California's water. This means the Department has a major responsibility for supplying suitable water for personal use, irrigation, industry, recreation, power generation, and fish and wildlife. The Department also has major responsibilities for flood management and dam safety.

Detailed program descriptions of all activities discussed in this budget are contained in the Program Component Statements, which are published separately. These statements are available upon request from the Department of Water Resources.

To carry out its responsibilities, the Department is proposing a total budget of $565,070,000, of which $516,311,000 is for the State Water Project. This represents a reduction of approximately $370.4 million compared to 1983–84, due primarily to smaller bond debt service costs for the State Water Project, completion of State Water Project-funded energy development programs, and the anticipated commitment of all available Safe Drinking Water Project loan and grant funds during 1983–84. Also in 1984–85, the Department will achieve a 204.8 reduction in personnel years, which is associated with program efficiencies and schedule changes in State Water Project activities.

Significant changes in 1984–85 include a proposal, to be introduced through legislation, to use $22.4 million of the existing $25 million tidelands oil allocation for a local water protection and development program. The $25 million from tidelands oil revenues is included in the 1984–85 budget pursuant to Public Resources Code Section 6217(b), with $2.6 million being proposed specifically for continuation of the Los Banos demonstration desalting facility.

The 1984–85 budget also proposes $14,798,000 from the General Fund and $4,460,000 from the Special Account for Capital Outlay for flood control projects necessary to offset the effects of two consecutive years of record water runoff. The proposed projects are described in the program displays.

Authority

3860 DEPARTMENT OF WATER RESOURCES—*Continued*

10 CONTINUING FORMULATION OF THE CALIFORNIA WATER PLAN

Program Objectives and Description

The objective of this program is to provide a framework for sound management of California's water resources by local, State, and Federal agencies. This program keeps in focus the statewide needs for water and explores ways to meet them in an environmentally acceptable manner.

Demands on California's water resources continue to grow. More water is needed to sustain the State's rich agricultural production and to meet growing urban demands, while maintaining instream flows for fish, recreation, esthetics, water quality, salinity repulsion, and navigation. Since new surface water projects are increasingly costly and difficult to develop, it is important that existing water supplies be used effectively. This means that all nonstructural water management practices as well as structural measures be thoroughly investigated and developed to the extent practicable. *In 1984–85, there will be a reduction of 6.4 personnel years due to an overall reduction in the Department's planning activities.*

10.10 Water Management Planning

The California Water Plan serves as a general guide for water management activities throughout the State. The plan consists of the Phase II water quality basin plans prepared by the State and Regional Water Quality Control Boards together with the water management element prepared by the Department. Future water demands and management actions are periodically updated in the Department's Bulletin 160 series. The Department also reviews plans for water development or management proposed by other government agencies and develops the State's position on interstate and Federal-State water resources issues.

California's water issues are continually reevaluated in an attempt to resolve them in line with current social, agricultural, and environmental needs. Water demand is critically examined to determine realistic needs. Subjects being studied or reviewed are improved water management, water exchanges among systems, energy impacts, surface water development, drainage, identification of ground water storage resources, and conjunctive use of surface and ground water supplies.

Other activities under this program include local investigations that contribute to the California Water Plan, review of studies and reports of other agencies, and studies of specific water quality problems conducted in coordination with the State Water Resources Control Board and other local, state, and federal agencies.

Performance Measures

The output of this program in 1984–85 will include reports on water exchanges, system integration and the economic impact of State Water Project irrigated crops.

3860 DEPARTMENT OF WATER RESOURCES—*Continued*

10.20 New Sources of Water

The average annual water supply of the State is nearly 77 million acre-feet. Of this amount, about two-thirds (50 million acre-feet) is consumptively used or dedicated to environmental purposes. Additional development of adequate surface water resources to meet future demands will be difficult because much of the undeveloped water occurs in remote areas, at infrequent intervals of short duration, where regulatory reservoir sites are lacking, or where it is not physically possible to regulate or conserve the runoff. Therefore, nontraditional sources such as water reclamation and desalting have become increasingly important as new or supplemental supplies of fresh water. Waste water reclamation and desalting of saline and brackish water activities are being conducted as Reclamation of Water Supplies. Technical data and cost information for the new sources are being acquired and the economic and environmental impacts of using these sources are being evaluated.

For the past several years, local and State agencies have been assisted and encouraged to implement waste water reclamation and desalting projects to reuse the water resources of the State to the fullest extent reasonable. Aid is provided by the program for research and demonstration of new technology for reclamation of water supplies, desalting and other nonconventional sources being conducted by local agencies and universities.

A demonstration module for desalting agricultural drainage water was completed at Los Banos in F.Y. 1982–83. It is being operated to develop design information for full scale desalting plants. *An appropriation from the California Water Fund in the amount of $2,609,000 is proposed in 1984–85 to continue operation of the desalter and associated salt gradient solar ponds. Information will be collected to determine costs of construction and operation of large-capacity desalting units, pretreatment methods, energy recovery systems, and solar ponds for energy production. 1984–85 is the second year of the planned three years of operation.*

10.25 Water Conservation

The objective of this element is to promote more efficient use of water in the state to reduce the projected deficit between supply and demand. Water conservation activities in this element include research and development, planning, and direct implementation actions. Interagency activities are absolutely critical to this effort. Further, the activities identified in this element strike a balance between water saving programs using proven technology (i.e., distribution of devices) and conducting the necessary research and planning on which to base future conservation programs.

In 1984–85, Renewable Resources Investment Funds in the amount of $402,000 are proposed to distribute water saving devices to 800,000 homes and to implement in-school water conservation education activities. Environmental License Plate Funds in the amount of $888,000 are also included to fund the final year of the California Irrigation Management Information System. The Urban Water Conservation component reflects a net increase of $372,000 in 1984–85, primarily due to increased reimbursements from the State Water Resources Control Board for leak detection activities.

10.30 Data Collection, Evaluation, and Use

Projection and estimates of future water supplies from streams and ground water sources must be statistically developed. The reliability of these projections and estimates is dependent upon the number of data sources, their distribution, and length of record. Under this program element, data on the quantity and quality of surface and ground water resources are collected, analyzed, and distributed. Climatological data is also collected and disseminated. A computer retrieval file of historical data has been developed, and is being refined for access to more detailed information covering the full period of record at specific locations. The State Water Resources Control Board, the Department of Health, the Department of Transportation and the Department of Fish and Game are cooperating with the Department of Water Resources for data input, storage, and the computer retrieval system. The accumulated information is used by other agencies and the general public.

The cooperative snow surveys component coordinates and standardizes the collection of snow survey data by about 40 cooperators and uses the data to provide forecasts of spring snowmelt runoff and general water conditions for project operators and water users throughout the State.

The land resources and use component provides continuing surveillance of the nature, location, and rate of change of land use. It produces the only complete land use data file in the State. These data are required for water resources planning but are also extensively used by other agencies.

Under the agricultural and urban water use component, measurements are made and information gathered on the current rate of water use for agricultural crop production from sample locations around the State; and current water delivery data from sample urban water service agencies around the State are collected, the population of each service area is determined and gross per capita use rates are calculated for each service area. In addition, special surveys and studies are conducted to determine the portions of the gross per capita water use for residential, commercial, industrial, and governmental purposes and to determine the efficiency of various water agencies' water delivery systems. *Included in 1984–85 is $65,000 for telemetry equipment as part of a five-year program to complete a system of telemetered snow data gauges.*

Performance Measures

A hydrologic index of basic data stations, streamflow, ground water levels, precipitation, and water quality parameters was published as Bulletin No. 230. Water Well Standards were updated and published in Bulletin No. 74. Data on snowpack conditions, which are critical to operational planning, are published from February through May each year in the Bulletin No. 120 series.

20 IMPLEMENTATION OF THE STATE WATER RESOURCES DEVELOPMENT SYSTEM

Program Objectives and Description

This program has three objectives. The first is to provide necessary water supplies as contracted for by users of the State Water Project. The second objective is to plan, design, construct, operate, maintain, and manage facilities of the State Water Project in an efficient, economic, and timely manner. The third objective is to further the development of essential and economically justified local water projects through financial assistance to local public agencies under the Davis-Grunsky Act.

The State Water Project is made up of physical facilities to meet a portion of California's increasing water needs from Plumas County in the north to the Mexican border. By 1973, the initial conservation facilities and most of the transportation features of the State Water Project were completed. Additional features will be planned, designed, and constructed, as needed, during the ensuing years.

In 1984–85, it is proposed to defer any State payments for recreation and fish and wildlife enhancement costs payable under the Davis-Dolwig Act of 1961. The Davis-Dolwig cost allocation will be the subject of a review to be completed prior to the 1985–86 budget. Also in 1984–85, there will be a reduction of 203 personnel years due to completion of State Water Project-funded energy development programs and reduced workload in design and construction activities.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20.60 Southern California Wildlife Mitigation	–	–	–	492	–	–

20.10 Planning and Investigations for the State Water Resources Development System

Although the construction of the initial stage of the State Water Project is complete, planning and management work must continue on additional water supply and conveyance features in order to meet later year contractual delivery levels of approximately twice the existing firm yield of the project. Under this program element, activites include geologic studies, cost estimates, economic analyses, flood control studies, fish and wildlife and recreation resources development studies, water quality studies, environmental studies, and determination of land acquisition requirements. Project Power Development studies must continue to insure an adequate power supply for operation of the State Water Project.

Detailed planning studies are conducted to determine actions necessary to meet project contractual requirements and to select additional project features to satisfy both local and export water requirements. Protection and enhancement of fish and wildlife and recreation needs are planned and developed as part of the project.

Water rights considerations in connection with the State Water Project are investigated, and project effects on physical and environmental conditions are monitored and evaluated. This component provides funds to the Attorney General's Office for legal services in actions to prevent unauthorized use of State Water Project water. In June 1979, the Department filed a lawsuit seeking damages and a judicial declaration that it is entitled to be paid for State Water Project water used by Delta water users in excess of that which would be available in the absence of the Project. Final settlement of this lawsuit is still pending.

Specific plans for recreation development at State Water Project facilities are prepared to ensure that water project recreation resources, including fish and wildlife and water project public facilities, are adequately developed.

---

3860 DEPARTMENT OF WATER RESOURCES—*Continued*

A cooperative study involving the California Departments of Water Resources and Fish and Game, the U.S. Bureau of Reclamation, and the U. S. Fish and Wildlife Service is proceeding to develop proper design and joint operating criteria for the State Water Project and Central Valley Project for the protection of the Delta, Suisun Marsh and San Francisco Bay fish and wildlife resources. This activity includes ecological studies of striped bass and other species, general water quality studies, marsh management studies, and studies concerned with evaluation and development of fish screening facilities.

The San Joaquin Valley Drainage component collects and provides data and information that will be required for planning and implementing an agricultural waste water management plan for the San Joaquin Valley.

Power contracts for the purchase, sale and/or exchange of power continue to be negotiated, reviewed, and updated as necessary to provide a reliable source of power for Project pumping. Fiscal 1983–84 and 1984–85 reflect the need for energy resource managment to mitigate against rising energy costs.

Performance Measures

Output from this element consists of reports on proposed features of the State Water Facilities.

20.20 Design, Right-of-Way, and Construction of the State Water Resources Development System

The energy supply activity will reduce by 62.0 personnel years and $37,677,000 in 1984–85. Reid Gardner Unit No. 4 became operational early in 1983–84, and Bottle Rock Powerplant is expected to become operational in the first half of 1984–85. South Geysers Powerplant is expected to become operational in 1985–86.

The Feather River facilities has a reduction of 21.4 personnel years and a decrease in funding requirement of $9,669,000, primarily due to Thermalito Diversion Dam Powerplant moving from the design phase to construction, and deletion of Thermalito Afterbay Powerplant.

Requirements for the Suisun Marsh Mitigation facilities indicate a reduction of 36.4 personnel years and $29,152,000 due to delay in the start of construction on the overall facilities.

The North Bay Aqueduct is expected to have a net increase of 4.8 personnel years and $10,980,000 as design and right of way activities decrease and construction activity increases.

There will be a relatively large decrease in requirements for the Tehachapi Division (29.6 personnel years and $9,929,000) due to completion of construction on the Second Barrel of Pastoria Siphon early in 1983–84, and the completion of installation of the three additional units at A. D. Edmonston Pumping Plant early in 1984–85.

The most significant change in this element will be in the Mojave Division. There is a net increase of 34.8 personnel years and $26,211,000. This is due primarily to work on the East Branch Enlargement, offset by a reduction in activity on Alamo Powerplant.

Capitalized Operations and Maintenance activities decreased 11.1 personnel years and $5,370,000 in 1984–85 due to the decrease in the number of scheduled work items from 22 to 8, and the elimination of a duplication of budgeted monies for right-of-way purchases in the Arroyo Pasajero Sediment basin. Operation and Maintenance Activation activities in 1984–85 decreased 25.4 personnel years and $4,026,000 as two projects were eliminated and four projects became operational.

Performance Measures

Initial water deliveries were made in the Feather River area, the North Bay area and the San Joaquin area in 1968. Water deliveries were first made to the South Bay area in 1962 and to Southern California in 1972. Flood control benefits of Oroville Dam have been substantial since the first flood operation action in December 1964 and recreation facilities provided throughout the project have received use measured in millions of visitor-days. Electrical energy is now being generated at all presently scheduled power plants except Bottle Rock, South Geysers, Isabella, Thermalito Diversion Dam, Alamo, and Mojave Siphon Powerplants.

20.30 Operation and Maintenance of the State Water Resources Development System

Operations and Maintenance of completed facilities of the State Water Project is provided through two activity groupings: operations development which includes the system development activities, and facilities operations and maintenance.

Operations development activities are concerned with the continued development of an operations plan, integrated with federal and other agencies, which will meet the future contractual water commitments of the State Water Project (SWP). The system development activities provide for the simulation and optimization of the operation of Project water facilities and power sources in planning for future cost-effective service by the SWP bulk power function. The SWP bulk power function became effective April 1, 1983. On that date, the SWP shifted its role from a power customer to an interconnected bulk power organization which supplies load with its own resources and sells, purchases and/or exchanges power on the open market.

Facilities operations and maintenance activities are the actual operations of the SWP facilities and maintenance of these facilities in accordance with prescribed standards. Water and power is scheduled and dispatched to meet all project commitments and where possible to minimize cost through power sales. Recreation, flood control, and fish and wildlife mitigation facilities are operated. Routine and extraordinary maintenance is performed to insure capability to deliver water and produce power. Also included in facilities operations and maintenance are activities such as specialized testing and maintenance, specialized technical inspections, consulting board investigations, surveillance of dams and structures through system instrumentations; coordination of maintenance and repair work; precise topographic surveys; corrosion control; water and power operating techniques; training, safety, and management of project real property.

Major changes in 1984–85 for Operations and Maintenance activities occur in the Geothermal powerplants component as a result of the Bottle Rock Powerplant becoming operational (+$3,170,000); increased power purchases (+$2,000,000); General Statewide Operations and Maintenance activities (+$2,011,000) for the purchase of circuit breakers for the Delta, San Joaquin, and Southern Field Divisions; Suisun Marsh (+$521,000) for the initial phase of this facility; and Major Replacements and Renovations (−$4,345,000) primarily as a result of replacement of the Oroville Thermalito control system.

20.40 State Financial Assistance for Local Projects

This program element provides loans for feasibility studies, reservoir site acquisitions, and the construction costs of local projects. Grants are provided for certain recreation, fish and wildlife enhancement, and initial water supply and sanitary facilities costs. The State may also participate with an applicant as a partner under certain circumstances.

Projects approved for assistance must be found by the Department to be in substantial conformance with the California Water Plan, be engineeringly feasible, economically justified, and, if a loan is proposed, there must be reasonable assurance that the public agency can repay it. Loans may be made only for that portion of the project cost beyond the reasonable ability of the public agency to obtain funds from other sources. The department must impose such terms and conditions as are necessary to protect the State's investment and carry out the objectives of the program. Also included in this element is the program component for loans to local agencies for water distribution systems as authorized by Section 12894 of the Water Code.

Performance Measures

A report of findings is made to the Legislature on each local agency's formal application evaluating engineering, economic, and financial factors and recommending approval of loans or grants for qualified proposed projects. Following contractual arrangements with eligible applicants, funds are disbursed and projects are inspected for conformance with contract terms.

3860 DEPARTMENT OF WATER RESOURCES—*Continued*

20.50 Financial and Contract Management of the State Water Resources Development System

The State Water Resources Development System is financed from a variety of sources: general obligation bonds authorized by the Burns-Porter Act, revenue bonds, Federal funds appropriated for flood control, funds advanced from water contractors, appropriations from the California Water Fund, State-appropriated funds for recreation and fish and wildlife enhancement, and miscellaneous funds including funds earned from investments and sale of property. Public agencies contracting for project water are required to repay the costs with interest of constructing, operating and maintaining the water supply facilities. Payments from the sale of project power to utilities and payments by public agencies beginning on April 1, 1983, when the State assumed responsibility for repayment, go to retire the Oroville revenue bonds sold, and pay the costs of operation and maintenance of the Oroville power facilities. The public agencies that contracted for water served down-aqueduct from the Devil Canyon Facilities and the Castaic Facilities make payments to retire the Devil Canyon-Castaic revenue bonds as well as the cost of operation and maintenance of the facilities. The people, through governmental appropriations, repay the costs of constructing, operating and maintaining recreation and fish and wildlife enhancement facilities.

Projections are made of future financial conditions. The water contractors are notified of future costs to allow adequate planning in the event adjustments in tax and/or water rates are necessary. Water contractors and utilities are billed for water delivered and power generated. Bond counsel, financial institutions and other governmental agencies are retained to market and administer bonds in the department's behalf. Finally, the principal and interest of the bonds outstanding must be repaid. The above activities devoted to maintaining the financial integrity of the State Water Resources Development System are contained within this program element.

Bond service and administration costs for the State Water Project will decrease by $263,558,000 in 1984–85 due primarily to the completion of the Reid Gardner Powerplant and the retirement of bond anticipation notes in 1983–84.

Performance Measures

The output of this program element is the maintenance of the financial integrity of the State Water Resources Development System. Specific qualitative outputs are an annual report of the continuing history and future management plan for the State Water Project, a presentation of the long-term financial analyses, accurate billing records, repayment of bond principal and interest on time, and power and water contractual agreements negotiated to best meet the mutual needs of the Department, water contractors, utilities and the people of California.

20.60 Southern California Wildlife Mitigation

This program element provided for the designation, acquisition and improvement of land in Southern California for the purpose of improving and maintaining wildlife habitat populations that were adversely affected by the development of State Water Project facilities in the general area. The Department of Fish and Game accomplished the various workload activities by contract.

30 PUBLIC SAFETY AND PREVENTION OF DAMAGE

Program Objectives and Description

The objective of this program is to protect life and property from damage or destruction by floods or dam failures, to make loans for construction improvement or rehabilitation of domestic water systems to bring them up to State standards for safe drinking water and to provide information, guidance, and assistance in water management during dry years.

Experience demonstrates that the people of California are vulnerable to the destructive effects of floods. The Department issues flood warnings in cooperation with the National Weather Service to alert the public when flooding is probable. Based on these forecasts, flood control facilities are operated to prevent or minimize damage. The Department also supervises and coordinates flood fighting activities when necessary and performs annual levee and flood channel maintenance. Other activities include the provision of technical information to local agencies to assist them in the regulation of development on floodplains as required by National Flood Insurance programs. Also included in this program are funds to pay for the cost of lands, easements, and rights-of-way for Federal flood control projects, as well as Departmental effort related to design review of all proposed new dams and periodical inspection of all existing nonfederal dams for proper construction and maintenance. A limited review of the safety of federal dams is also undertaken.

* Dollars in thousands

3860 DEPARTMENT OF WATER RESOURCES—*Continued*

As a result of two consecutive years of record runoff, $14,798,000 is proposed from the General Fund for six separate flood control projects. The projects include $830,000 to restore flow capacities in the Sacramento River, $100,000 to remove sediment at Deer Creek, and $500,000 to replace seven 66 inch diameter pipes at Butte Slough inlet. Also proposed is $50,000 to upgrade and maintain the flood center's computer software, and $118,000 to replace obsolete Central Valley telemetry equipment. The remaining $13,200,000 from the General Fund is for continuation of the State's Flood Control Subventions Program, which assists local agencies in the financing of flood control projects constructed by the U.S. Corps of Engineers.

In addition, $4,460,000 is proposed for flood control from the Special Account for Capital Outlay. A total of $2,150,000 is proposed for the Sacramento-San Joaquin River Bank Protection Project, and $2,235,000 to fund the costs to date for the Fairfield Stream Project. The remaining $75,000 is to repair the Knights Landing outfall gates.

Combined, these state operations and capital outlay projects represent $19,258,000 in funding for flood control work.

In accordance with the requirements of Chapter 40, Statutes of 1983 (AB 112), the Department of Finance has established a formula for allocating the costs of flood management at Lake Elsinore. In addition, Chapter 40, Statutes of 1983 mandates that, commencing with the budget bill for 1984–85, the Department of Finance include an appropriation to the Department of Water Resources for the State's share of costs associated with flood management at Lake Elsinore. The State's share of costs cannot be accurately identified at this time because it is dependent on future estimates of the flood damage at Lake Elsinore. Therefore, it is proposed that the State's share of costs be identified in early 1984. Applying the formula, the necessary revisions to the department's budget will be proposed at that time.

Also in 1984–85, there will be a net reduction of 1.9 personnel years. This is associated with the anticipated commitment of all available Safe Drinking Water Project monies offset by an increase in flood management.

30.40	Safe Drinking Water Projects	17	13	6.5	40,495	58,419	359

30.10 Flood Management

This program element assists local agencies in the development of regulations for management of floodplain areas. Such regulations are compliant with the Cobey-Alquist Flood Plain Management Act and the National Flood Insurance Program. This program element also assists local agencies in the performance of flood hazard investigations. Storms and high water conditions are continually monitored during the flood season and flood forecasts prepared as needed. A flood center is activated during potentially dangerous periods to coordinate flood emergency operation and collect and disseminate flood data. Also included is the operation and maintenance of Sacramento River flood control projects and the periodic inspection of all flood control works in the Central Valley.

The Reclamation Board's function is to cooperate with the Corps of Engineers and local agencies in constructing and maintaining flood protection projects in the Central Valley; to assist local agencies in estimating flood damages and repairs required; to evaluate accomplishments of past flood control measures; and to identify alternative future policies and programs for flood damage prevention.

Performance Measures

Plans and recommendations are produced for solution of flood problems and safe development of floodplains; information regarding floodflows is collected and disseminated; flood forecasts are prepared and furnished to interested agencies; technical direction and assistance is provided during flood emergencies and the Central Valley is afforded a high degree of flood protection by the maintenance and operation of the Sacramento River Flood Control Project.

30.10.080 Natural Disaster Assistance	0.8	4.5	4.3	2,264	555	631

30.20 Flood Control Subventions

The primary purpose of this element is to reimburse local agencies for the nonfederal rights-of-way and relocation expenses incidental to flood control projects constructed by the U.S. Corps of Engineers outside the Central Valley. This is accomplished through the review and processing of claims submitted by the local agencies. These claims are tested against the provisions of the authorizing legislation and guidelines published by the department in order to identify the amounts eligible for State reimbursement. Other activities include the review of proposed federal flood control projects to determine potential State costs, continuous review and revision of program policies and procedures, and preparation of final reports on completed projects.

In 1984–85, $13,200,000 is proposed for the flood control subventions program. Consistent with last year's method of payment, the $13,200,000 represents the amount of claims estimated to be audited and approved for payment by the State Controller at the end of 1983–84. This funding level will be reviewed again in early 1984 to determine if revisions are necessary based on changes in the State Controller's audit schedule or other factors. The delta levee maintenance subvention program is not included in the 1984–85 budget and will be the subject of separate legislation.

Performance Measures

1. Engineering reports and reallocation orders to pay flood control claims, and reports on reimbursement for rights-of-way and relocation costs.
2. Determination of future State costs in connection with proposed projects and determination of adequacy of floodplain regulations.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

30.30 Safety of Dams

The safety of dams program provides for independent analysis of plans and specifications for new dams, and for enlargement or alteration of operational dams prior to approval for construction. The projects are under supervision and inspected during construction. It also provides inspection and evaluation of operational dams and reservoirs, determination of need for the installation of instrumentation, independent analysis of instrumental surveillance, and the investigation and analysis of dams constructed illegally, together with the activity necessary to terminate these violations by removal, alteration or repair.

* Dollars in thousands

3860 DEPARTMENT OF WATER RESOURCES—*Continued*

Performance Measures

Activities involve the independent analysis and evaluation of about 30–40 applications for new construction, enlargement, alteration, and repair or removal of dams, and supervision during the resulting construction. In-depth reviews and appraisals will be done on existing dams at five-year intervals. About 1,300 systematic examinations and evaluations of nearly 1,100 operational dams will be made and about 400–450 surveillance and instrumentation reports will be analyzed. Dams allegedly constructed in violation of the code will be investigated and the violations terminated. The structural reevaluation program for seismic stability of critical dams will be performed. Flood hydrology will be reevaluated for spillways suspected to be inadequate.

Element Components						
30.30.010 Supervision of Safety of Dams	59.4	55	55	3,126	3,313	3,496

30.40 Safe Drinking Water Projects

This element implements the "California Safe Drinking Water Bond Law of 1976" and is a joint effort with the Department of Health Services. The Department of Health Services is responsible for the development of a priority list of substandard domestic water systems for which loans to water suppliers could be made. The Department of Water Resources has adopted regulations necessary to carry out the Act, to process applications, and to negotiate contracts for loans with domestic water suppliers.

Legislation enacted in 1978 provides for grants of up to $400,000 each for public agencies to improve water systems up to Safe Drinking Water Standards. As of June 30, 1983, there were 202 loans committed totaling $140.1 million and 111 grants totaling $29.9 million. Funds are being disbursed for 192 loans and 91 grant applicants, with disbursements for 62 completed. There is a total of 754 applicants on the April 1983 priority list. Loan and grant commitments were counted separately, although there are 46 that are combinations of loans and grants. *The reduction of $58,060,000 in funding between 1983–84 and 1984–85 is due to the anticipated commitment of all available loan and grant funds during 1983–84.*

Performance Measures

All available loans and grant funds will have been committed in the current year.

40 SERVICES

Program Objectives and Description

The objectives of this program are to provide technical support to the Department's activities and to make this expertise, as well as the specialized engineering experience of the department, available to other agencies.

The Department has developed a significant capability for providing specialized skills and experience in the field of water resources planning, development and management. Support activities involving laboratories, electronic data processing, mapping and surveying have also been developed over the years. Occasionally, this expertise is found helpful by certain other agencies in assisting them in their missions. The Department's own operations must be supported by certain technical functions that can best be furnished on a centralized as-needed basis.

This program also provides the capital improvements, other than those associated with the State Water Project, necessary to allow the Department to carry out its assigned functions. *In 1984–85, there will be an increase of 5.3 personnel years due to the Department's providing increased technical support to other State agencies.*

40.10 Services to Other Agencies

Under this element, the department, as watermaster, measures streamflows and distributes water in accordance with decreed water rights. In addition, the department conducts engineering investigations in such topics as: water supply drainage, flood hazards, sewage disposal, water quality, water rights, engineering feasibility, and project cost estimates when requested to do so by other agencies. The department also provides electronic data processing to other departments and agencies as well as laboratory and graphic services on a reimbursable basis.

---

* Dollars in thousands

3860 DEPARTMENT OF WATER RESOURCES—*Continued*

Performance Measures

In 1979–80, water allocations were provided on about 50 streams in 22 service areas, of which four are ground water basins. This ongoing service involves a total of about 1,800 parties. These activities are reported in Bulletin Numbers 177, 178, and 179, which are published annually.

Reports are prepared on investigations and services conducted for other agencies as requested.

40.20 Technical Services

Technical services are provided by specialty units to all divisions, branches, and offices for the programs of the Department. These services are totally reimbursed by charges to the programs, except for additional equipment related to data processing, mobile equipment and graphic services which is initially financed from reserve funds.

Performance Measures

The accomplishment of their program purposes by user programs, within and outside the Department, in the most efficient and economical manner available.

Capital outlay projects are formulated as required to support the Department's general activities. Such projects may include new construction or substantial alterations, purchase of equipment related to the projects, and associated land costs. Capital outlay costs related to the acquisition of properties or property rights are shown under the program impacted.

50 MANAGEMENT AND ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide sufficient managerial and administrative services to insure that the overall missions and goals of the Department are accomplished.

Without the proper level of executive leadership and its staff support, the Department of Water Resources would not be able to function in an efficient and effective manner. The benefits to be derived from all of the various other programs carried out by the Department as described elsewhere in the budget would not be realized. Therefore, a program of management and administration has been developed as, and continues to be, an integral feature of the total program activity. *In 1984–85, there will be an increase of 1.2 personnel years due to workload adjustments.*

50.01.010 General Management

Most of the functions included in the Department's executive and administrative headquarters organization comprise this component. Included are the Director and his immediate staff, the legal staff, public information, program analysis, internal audits, budgeting, accounting, business and office services, personnel, training, management analysis, and safety. The costs of general management are distributed to all of the Department's directly funded programs through an indirect cost structure on the basis of direct labor costs.

Performance Measures

The accomplishment of the programs of the Department are indicative of the effectiveness of the managerial supervision and administrative services that were provided.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	238	242.1	241.2	$8,424	$8,977	$9,541

50.01.020 Water Resources Staff Specialists

This indirect cost component represents staff specialists such as geologists, economists, hydrologists, and program coordinators. These costs are distributed to all programs in which the organization's personnel participate, on the basis of direct labor costs.

Performance Measures

Each major organization's staff specialists, program coordinators, and related clerical support are provided through this program element.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	19.6	17.3	17.3	$719	$741	$782

50.01.030 Line Management

This indirect cost component represents the supervisory, administrative and housekeeping costs of a major organization. These costs are distributed to all programs which the organization's personnel participate in on the basis of direct labor costs.

Performance Measures

Each major organization's supervisory and related clerical support are provided through this program element.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*
Summary of Capital Expenditures			
The Capital Outlay schedule summarizes expenditures and projections for the Implementation of the State Water Resources Development System Program, the Public Safety Program and the State Building Program. A general explanation of the state projects under the California Water Resources Development Program is presented in the support budget with a description of the significant units of each project as well as detailed expenditure information.			
CAPITAL OUTLAY			
PROGRAMS			
10 Continuing Formulation of the California Water Plan			
New Sources of water	$4,021	–	–
Totals, Continuing Formulation of the California Water Plan	$4,021	–	–
20 Implementation of the State Water Resources Development System Program			
Planning and investigations	235	$120	$120
Design and construction	159,125	154,611	100,367
Operations and maintenance	2,994	13,796	10,087
Financial and contract administration	154,445	453,664	189,815
Power purchases	49,101	93,600	95,600
State financial assistance for local projects	1,440	5,000	5,000
Southern California wildlife mitigation	492	–	–
Totals, Implementation of the State Water Resources Development System	$367,832	$720,791	$400,989
30 Public Safety and Prevention of Damage			
Maintenance of Facilities:			
Knights Landing outfall gates	–	–	75 [PWCk]
Install programmable gate control system, stainless steel bulkhead gate support seal plate, and renew submerged steel metal work.			
Flood control activities under the Reclamation Board authority:			
Sacramento-San Joaquin River bank protection project	491 [Ak]	1,851 [Ah]	2,150 [Ak]
Purchase of lands, easements, and rights of way as the state's one-third share of the cost for the Sacramento River and Tributaries and the San Joaquin River and Tributaries bank protection project.			
Cache Creek levee repair	–	700 [Ch]	–
Sacramento River flood control system and bypass rehabilitation	–	2,300 [Ch]	–
Fairfield streams	–	–	2,235 [Ak]
Purchase of lands, easements, and rights of way as the state's share of the Federal Fairfield Stream Group Project.			
Sacramento River riparian habitat	209 [Ah]	–	–
Totals, Public Safety and Prevention of Damage	$700	$4,851	$4,460
TOTALS, CAPITAL EXPENDITURES	$372,553	$725,642	$405,449

3940 STATE WATER RESOURCES CONTROL BOARD

The objectives and responsibilities of the State Water Resources Control Board and the nine Regional Water Quality Control Boards are to preserve and enhance the quality of California's water resources and to assure their proper allocation and effective utilization. These objectives are achieved through two action programs: water quality and water rights.

SUMMARY OF PROGRAM REQUIREMENTS

	1982-83*	1983-84*	1984-85*
10 Water Quality	$92,378	$99,945	$101,806
20 Water Rights	5,018	5,500	6,182
30 Administration	3,445	3,960	3,849
Distributed Administration	−3,445	−3,960	−3,849

SIGNIFICANT PROGRAM CHANGES

Program	Description	Personnel Years	Dollars *
10.10	Investigate and inventory underground storage tanks in the State and initiate enforcement action to regulate tanks that are known to be leaking hazardous substances	52.2	$2,539
10.10	Hazardous waste facility permits, monitoring and enforcement (RCRA)	8.9	452

10 WATER QUALITY

Program Objectives and Description

The broad objective of the Water Quality Program is to achieve and maintain the highest possible quality of the waters of the State consistent with their use. Specific objectives are:

1. To monitor the quality of the waters of the State in order to develop an understanding of the quality, causes and effects of such quality and to support all State pollution control activities.
2. To formulate, adopt and update water quality control plans and policies for guidance in water management decisions.
3. To monitor the quality of the waters of the State in order to determine compliance with control plans, permit terms, conditions and receiving water standards; report such quality, its causes and effects; and assess the effectiveness of the State's water pollution control program.
4. To maintain effective control of toxic wastes through implementation of toxic standards.
5. To require of waste dischargers those actions necessary to prevent and abate water pollution, inspect dischargers to determine compliance with requirements and carry out enforcement actions to obtain full compliance with waste discharge requirements.
6. To assist local entities in the construction of wastewater treatment facilities needed to comply with discharge requirements and achieve receiving water standards.
7. To ensure that State and federal funds allocated for construction of wastewater treatment facilities are expended in a timely and proper manner.
8. To evaluate new problems, specialized techniques and concepts in water quality control; define and develop solutions to unique water quality problems in the State; conduct a wastewater treatment plant operator training program to provide the skills necessary in operating today's complicated facilities.

California faces serious challenges in water management, pollution control, and water quality enhancement. Residents, industry, and agriculture demand abundant clean water; at the same time, they threaten its quality and availability. An effective, comprehensive program for managing California's waters is essential to balance these conflicting pressures on one of the State's most precious resources.

Authority

Porter-Cologne Water Quality Control Act, California Water Code Sections 13000 et seq. provide general legislative authority for the State's Water Quality Control Program. This code also authorizes the State Board to exercise those powers delegated to the State by Federal water pollution control legislation such as PL 92-500.

10.10 Regulation

The Regional Water Quality Control Boards regulate waste discharges with four closely related activities: adoption of waste discharge orders, surveillance, monitoring, and enforcement.

The waste discharge orders are the cornerstone of regulation. They specify limits on the quality and quantity of an effluent and may include time schedules for achieving compliance. Regional Boards issue two types of orders depending upon the physical location of the discharge. For discharges to surface waters, discharge requirements are issued in the form of National Pollution Discharge Elimination System (NPDES) permits. The State issues these permits under a delegation agreement with the Environmental Protection Agency. For all other discharges, requirements are issued under the Porter-Cologne Act. Regional Boards also periodically reevaluate and upgrade these requirements to conform to current technology, water quality conditions and treatment levels as specified by changes in State and Federal regulations.

Waste discharge orders are ineffective without surveillance and monitoring and enforcement to assure compliance. Surveillance and monitoring activities include collection, interpretation, and storage of water quality and quantity data. Regional Boards use these data to measure compliance with discharge requirements and achievement of water quality standards, to identify sources of pollution, and to identify waters requiring special studies. These data are also essential for establishing and reviewing water quality standards, an important activity of the planning element.

Whenever surveillance and monitoring activities uncover a violation of discharge requirements, the Regional Board attempts to gain compliance through voluntary action by the discharger. If this fails, administrative enforcement, cleanup and abatement orders, cease and desist orders and finally, judicial enforcement remedies are sought.

The State Board must consider all petitions from persons aggrieved by Regional Board actions. The appeals process provides a final opportunity for administrative review of a Regional Board action and is particularly important when actions may later be subject to judicial scrutiny.

A major new threat to ground water is hazardous materials leaking from defective underground storage tanks. To combat this problem, the budget provides 52.2 personnel years to implement the following: 1) Chapter 1045, Statutes of 1983, 13.4 personnel years and $617,000 (Underground Container Inventory Account) to compile a statewide tank inventory; and 2) Chapter 1046, Statutes of 1983, 18.2 personnel years and $811,000 ($601,000 Underground Tank Storage Fund, $210,000 reimbursements) to develop a tank permitting program (A $550,000 General Fund loan will provide program implementation until fee revenues are sufficient to fund the legislation). The budget also includes $1,111,000 and 20.6 personnel years so the State and regional boards can immediately concentrate their efforts to investigate and mitigate 80 known high-risk leaking tanks located over ground water basins.

The current year includes an augmentation of $562,000 and 9.4 positions (4.5 personnel years) funded from Federal Resources Conservation and Recovery Act grants to allow the Board to issue hazardous waste site permits, conduct inspections, monitor ground water and take necessary enforcement actions with respect to hazardous waste sites. This augmentation has been reported to the Legislature pursuant to Section 28 of the Budget Act. The budget year also proposes to continue the additional 9.4 positions (8.9 personnel years) and estimates additional funding of $452,000. Funds in both years are reflected as reimbursements because the Federal Government has designated the Department of Health Services as lead agency for receipt of funding for the State of California.

Improved regulatory effectiveness will result from the ability to initiate periodic and systematic updating of existing waste discharge orders. Proposed is $521,000 ($481,000 General Fund and $40,000 Reimbursements) to initiate the process for periodic updates of existing orders and examine the potential for automating the Board's regulatory activities. Currently, 2,600 waste discharge orders should be reviewed.

State Assistance Program Grant funds will increase the Board's reimbursements by $1,488,000 to continue work to stop acid run-off from Leviathan Mine including excavation of contaminated materials, construction of drainage and evaporation facilities and other site stabilization and restoration work.

The 1984–85 budget also includes a reduction of approximately 4 personnel years to reflect elimination of the Underground Injection Control Program.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

3940 STATE WATER RESOURCES CONTROL BOARD—*Continued*

10.20 Planning

Planning for water quality control, including economic and environmental considerations, are essential for effective water quality control and wastewater management. The State and Regional Boards completed California's first major phase of water quality planning in 1975 when Water Quality Control Plans (Basin Plans) were adopted for the State's 16 hydrologic basins. In Fiscal Year 1976–77, the State Board initiated revisions, as necessary, of the Basin Plansand embarked on the second phase of water quality control planning. In subsequent fiscal years, the Board continued the second phase of water quality planning emphasizing the definition of best management practices to control nonpoint sources of pollution and to meet the goal of the Federal Water Pollution Control Act and identifying and developing solutions to priority nonpoint source water quality problems statewide.

Recent amendments to the Federal Clean Water Act added Section 205(j) which provides grant funds for water quality management planning to states and localities. Formulas contained in Federal law are estimated to result in an annual allocation to California of about $1.8 million annually through Federal Fiscal Year 1985.

Proposed is an increase of $1,932,000 in 1983–84 and $837,000 in 1984–85 for Federal Section 205(j) grant funds to continue contracts to develop solutions to water quality problems resulting from point and non-point pollution sources. The current year augmentation has been reported to the Legislature pursuant to Section 28 of the Budget Act.

The 1984–85 budget also reflects the shift of approximately 1 personnel year from this element to the Regulation element.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements				*21*	–	–

10.30 Facility Development Assistance

Inadequate wastewater treatment facilities and improper operation of them are principal causes of water pollution in California. To help solve these problems the State Board administers State and Federal programs for awarding wastewater facilities construction grants to public agencies and for training and certifying facility operators.

Administration of the financial assistance programs includes developing a statewide project needs list and establishing priorities for grant requests; reviewing and evaluating facilities plans, including environmental impact reports; revenue programs and cost effectiveness analyses; reviewing design plans and specifications, certifying projects to the Environmental Protection Agency and executing contracts with grantees (local wastewater management agencies); monitoring construction and approving progress payments; performing final construction inspections and resolving issues raised by EPA auditors. The Board staff works closely with the local agencies and their consultants through all phases of development to ensure compliance with all applicable Federal and State regulations.

Wastewater facilities are very costly to plan, design, and construct, and most local communities require financial assistance. To provide this assistance, the federal government, through the Environmental Protection Agency (EPA), presently pays 75 percent of project costs. This percentage will be reduced to 55 percent during 1984–85 for most projects. California, through three bond issues totaling $875 million, provides 12½ percent.

The Environmental Protection Agency and the State have determined that the effectiveness of the grant program would increase if the principal program responsibility rested with the State. Delegation agreements have been signed covering almost all program activities. While this action gives the Board much more control over the program, along with all the accruing benefits, it requires considerably more effort and diligence. To date, many of the projects have been large, complex and sophisticated and required careful, in-depth review.

The most carefully planned and constructed wastewater treatment plants are ineffective unless operated properly by well trained personnel. Recognizing this, the State Board has established a program required by Chapter 1315, Statutes of 1972, whereby municipal treatment plants are classified according to their complexity and the level of competency needed by their operators. In addition, operators are tested and certified at these different levels according to their experience, education, and examination results. Training is available to treatment plant operators through the Board's Water Quality Control Institute located in San Marcos. There is also a mobile classroom laboratory which is utilized to train operators at their own facilities.

Program activities for facilities development assistance will remain level from 1983–84 through 1984–85. New federal funds are anticipated to be $175 million for each year.

The 1984–85 budget includes a reduction of six personnel years to reflect reduced support from the Army Corps of Engineers for construction inspectors.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Operator certifications, new and renewed	2,994	3,050	2,900
Operators trained	990	1,010	1,010

Expenditures	142.4	145.6	139.2	$72,050	$74,405	$74,679
General Fund				*435*	*279*	*292*
State Water Quality Control Fund				*1,060*	*1,260*	*1,240*
State Clean Water Bond Fund				*63,534*	*65,073*	*65,062*
Federal Trust Fund[†]				*6,867*	*7,603*	*7,892*
Reimbursements				*154*	*190*	*193*

10.40 Research and Technical Assistance

In addition to research activities, State Board technical specialists provide assistance to all water quality program activities of the Board in the areas of economics, engineering geology, hydrogeology, aerial surveillance, and wastewater reclamation conservation. This expertise is required for studies in such areas as groundwater hydrology, control of nonpoint sources of pollution and marine water quality.

The State Board is mandated to develop and implement a statewide water quality information storage and retrieval program. The primary emphasis of the data management program is on the Waste Discharger System which provides the data necessary to monitor dischargers throughout the State, the Water Quality Data System which provides the data necessary to monitor the quality of water in the State.

Also included in this element are those efforts necessary in planning, organizing, coordinating and directing activities of the Water Quality Program.

The 1984–85 budget includes the reduction of 1.8 personnel years to reflect a shift to the Water Rights program.

20 WATER RIGHTS

Program Objectives and Description

The broad objective of the Water Rights Program is to assure that California's water resources are put to beneficial use to the fullest extent while protecting vested rights, water quality, and the environment. Specific objectives are:

1. To allocate the remaining unappropriated waters of the State in accordance with the laws of the State.
2. To maintain a record of title and extent of rights initiated and maintained since 1914, involving over 10,000 projects.
3. To maintain a record of stockpond water rights, diversions and uses throughout the State, groundwater extractions in five southern counties and cessation of or reduction in extraction of groundwater by use of water from a contributory source.
4. To obtain the greatest beneficial use of the waters of the State by enforcement of permit and license terms and conditions, abatement of illegal diversions and prevention of waste or unreasonable use under all rights.
5. To determine existing rights throughout the State through the court reference and statutory adjudication procedures.

Authority

Division 2 of the California Water Code and Title 23 of the California Administrative Code.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20.40 Technical Assistance	22.6	19.8	22	776	822	1,205

20.10 Water Appropriation

In order to obtain the rights to take unappropriated water from surface streams, other surface bodies of water, or defined subterranean streams, an application to appropriate such water must be filed with this Board. In considering the application, the Board must weigh the relative benefits to be derived from all beneficial uses of the water concerned. It may subject such appropriations to terms and conditions that will best develop, conserve, and utilize the water sought for appropriation.

Environmental impact assessments are made for all projects. These lead to the preparation or review of exempt status declarations, negative declarations, or environmental impact reports. In the event an application is protested, the Board must hold hearings and conduct field investigations to determine whether the application should be approved or denied. In many cases, the Board retains continuing jurisdiction over the project when a permit is issued under controversial conditions.

The drought which occurred in 1977 and 1978 imposed unforeseen demands on the normal activities of the Water Rights Program. As a result of the two successive dry years, the competition for available water stimulated an expanded interest in water rights issues. The drought brought into public view the fact that we must be continually concerned with the conservation and effective utilization of the State's water resource.

The 1984–85 budget includes a reduction of two personnel years to reflect reduced workload for small hydroelectric projects.

3940 STATE WATER RESOURCES CONTROL BOARD—*Continued*

20.20 Water Management/Enforcement

The Board is responsible for the administration of laws which require the collection of water diversion data pertaining specifically to water rights. In Southern California, the Counties of Riverside, San Bernardino, Los Angeles, and Ventura have a severe groundwater shortage. The law requires that reports be filed by anyone within these counties extracting more than 25 acre-feet of water from the ground. Statewide, the law requires that notices be filed for any extractions from sources in lieu of groundwater. Also, any person who diverts water from a surface stream or body of water and does not have a permit or license issued by the Board, is required to file a statement of the diversion and use with the Board.

Drought years have brought about a revision in the Board's approach to enforcement. An adequate enforcement program requires not only a quick response to public complaints of illegal diversions, but also a determination of the availability of water for various priorities of water rights and notice to these right-holders prior to and after the time when water is no longer available for diversion.

The 1984–85 resources for this program include 1.6 personnel years redirected from the Water Quality Program to ensure compliance with permits and licenses.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

State Clean Water Bond Fund				*160*	*231*	*160*
Reimbursements				*9*	–	*10*

20.30 Determination of Existing Rights

The Board and its predecessor agencies have been assisting the courts in adjudication of water disputes since passage of the Water Commission Act in 1914. The Board assists the courts either by: (1) court references under which the Board is appointed referee in actions before a court, or (2) statutory adjudications, wherein a determination is initiated through petition to the Board by the affected users. Both procedures culminate in a court decree defining the water rights involved.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Statutory adjudications	22	28	27

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	3.5	4.8	4.8	$201	$274	$288
General Fund				*132*	*181*	*167*
Reimbursements				*69*	*93*	*121*

20.40 Technical Assistance

The Water Rights Program requires several support activities involving public information, legal assistance, data management, records maintenance and administration. Also included are those efforts necessary in planning, organizing, coordinating, budgeting and directing activities for the Water Rights Program.

An augmentation of two positions, limited to December 31, 1986, and $313,000 (General Fund) is proposed to improve and complete the Automated Water Rights Information System (AWRIS). The information provided will asist in compliance and protection of water rights, expedite the processing of water rights applications, and provide water supply and demand data for the States major rivers and streams. Future efficiencies realized by these improvements will permit a staff reduction of two positions in the Water Rights Program beginning in 1987–88.

30 ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide management, program and policy direction, legal and administrative services, legislative and public affairs activities, and coordination to the five divisions of the State Board and the nine Regional Water Quality Control Boards.

The five appointed State Board members, each of whom represent specified areas of knowledge required by the Water Code, are responsible for establishing overall policy, providing direction to State Board staff and to the Regional Boards, approving Regional Boards' water quality control plans, considering appeals concerning other actions or inaction of the Regional Boards, and coordinating all water quality and water rights activities in the State.

Specialized staff services are provided to the State Board and Regional Boards in the functional areas of: legislative and public affairs, legal advice and assistance, fiscal management, personnel management, training, business services, and administrative analysis.

The program includes a reduction of approximately eight personnel years to reflect program efficiencies.

Authority

California Water Code, Sections 174–188.5.

HEALTH AND
WELFARE

4100 STATE COUNCIL ON DEVELOPMENTAL DISABILITIES

10 STATE COUNCIL OPERATIONS

The California State Council on Developmental Disabilities comprised of seventeen members operates under the provisions of Division 4.5 of the Welfare and Institutions Code, and the Federal Developmental Disabilities Assistance and Bill of Rights Act (42 USCA 6000 et seq.). The State Council plans and coordinates State resources to assure that the legal, civil, and service rights for persons with developmental disabilities are fully ensured by public and private, State, and local agencies. Council activities focus on state-level policy development as required to conduct its system planning and review functions. Pursuant to both federal and state law, the California State Plan for Developmental Disabilities' services forms the basis for expenditures of federal funds for local service development and regional monitoring by area boards.

By state and federal law, the Council is required to utilize the following definitions of developmental disabilities in fulfilling its mandates:

A developmental disability is a severe, chronic disability of a person which:

(1) Is attributable to a mental or physical impairment or combination of mental and physical impairments;

(2) Is manifested before the person attains age 22;

(3) Is likely to continue indefinitely;

(4) Results in substantial functional limitations in three or more of the following areas of major life activity: (a) self-care, (b) receptive and expressive language, (c) learning, (d) mobility, (e) self-direction, (f) capacity for independent living, and (g) economic self-sufficiency; and

(5) Reflects the person's need for a combination and sequence of special, interdisciplinary, or generic care, treatment, or other services which are of lifelong or extended duration and are individually planned and coordinated.

Four positions were established in 1983–84 pursuant to an interagency agreement with the Employment Development Department (EDD) to conduct a sheltered workshop wage/placement study. The findings of the study were submitted to EDD in October, 1983 after which the positions were vacated.

20 COMMUNITY PROGRAM DEVELOPMENT

The Community Program Development Fund was established in 1977 in order to provide necessary resources to initiate new programs. In addition to parental contributions, this Fund may be augmented by Federal funds through the State Council. Welfare and Institutions Code Section 4677 provides that PL 95-602 funds received by the State Council may be allotted to the Program Development Fund. Requests for proposal and allocations from the Program Development Fund require approval of the State Council and must be consistent with the priorities in the state plan.

The Program Development Fund is administered by the Community Development Branch of the Department of Developmental Services. Funds are used to expand community programs for the developmentally disabled.

30 ALLOCATION TO AREA BOARDS

There are 13 Area Boards on Developmental Disabilities throughout California each having monitoring and coordinating responsibilities within their regional boundaries. Funding for these Area Boards is provided by a reimbursement from the State Council on Developmental Disabilities. Welfare and Institutions Code Section 4611 provides that the State Council must allocate a portion of the Federal funds received under Public Law 95-602 to the Area Boards.

Annually, each Area Board presents a proposal requesting funding to the State Council for consideration. After review and approval, the amount of funding to be allocated is included in the State Plan. In July of each year, the Area Boards summarize their activities and accomplishments and submit this information to the State Council.

4110 AREA BOARDS ON DEVELOPMENTAL DISABILITIES

The Area Boards on Developmental Disabilities are authorized pursuant to Welfare and Institutions Code Sections 4570 et seq. Each Board is given regional monitoring and coordinating responsibilities to protect and advocate the legal, civil, and service rights of persons with developmental disabilities. Voting membership is composed of volunteers appointed by the governing body of each county in the area served and by the Governor. There are thirteen Area Boards geographically dispersed throughout the State, and an Organization of Area Boards in Sacramento to coordinate administrative support activities.

The functions of an Area Board are to protect and advocate the legal, civil and service rights of persons with developmental disabilities; review the policies and practices of publicly funded agencies; conduct or cause to be conducted public information programs; encourage and assist in the establishment of citizen advocacy organizations; encourage the development of needed services of good quality; coordinate services to prevent duplication, fragmentation, and unnecessary expenditures; and assist the State Council on Developmental Disabilities in preparation of the state plan.

The Area Boards are funded through an allocation received from the State Council on Developmental Disabilities which is the cognizant State agency for federal grants provided under Public Law 95-602. In order to ensure the ability to meet statutory mandates and contractual requirements, an additional 0.5 Community Program Specialist I position is proposed to be established in Area Board X.

4120 EMERGENCY MEDICAL SERVICES AUTHORITY

The Emergency Medical Services (EMS) Authority was created by Chapter 1260 (SB 125), Statutes of 1980. The EMS Authority coordinates EMS statewide, develops guidelines for EMS systems, regulates the education, training and certification of EMS personnel, and coordinates the State's medical response to any disaster.

The overall responsibilities and goals of the EMS Authority are as follows:

a. Assessing statewide EMS needs, effectiveness, and coordinating services;
b. Providing technical assistance to existing agencies, cities and counties;
c. Developing implementation and planning guidelines for EMS systems and disaster medical response;
d. Reviewing and approving local EMS agency plans on an annual basis;
e. Reporting annually on EMS effectiveness commencing January 1, 1984;
f. Coordinating the EMS-related activities of State government through the Interdepartmental Committee on EMS;
g. Reporting biennially on the coordination of the budgets and activities of other State agencies as they relate to EMS;
h. Coordinating medical and hospital disaster preparedness and response, and assisting the Office of Emergency Services in the preparation of the medical component of the State Emergency Plan;
i. Establishing minimum standards for the education, training and certification of specified emergency medical care personnel;
j. Staffing the Commission on EMS;
k. Receiving, awarding, and monitoring implementation of Federal, State and Local EMS-related grants;
l. Reviewing EMS legislation, activities, and other materials, and serving as a clearinghouse for EMS-related information.

The local EMS agency is responsible for administration of emergency medical services, and the county health officer or county designated physician is responsible for determining that the operation of training programs are in compliance with State standards for certifying an individual upon completion of an approved training program, and for issuing certificates to qualified persons. The EMS Authority must assist in this implementation and monitor annually.

Chapter 1260 also established a Commission on Emergency Medical Services, consisting of 14 members appointed as specified. The Commission serves in an advisory role to the Authority on specified issues and reviews and approves all regulations, standards, and guidelines developed by the Authority. Members may only be reimbursed for actual, necessary travel and other required expenses.

The Emergency Medical Services (EMS) Authority will receive $1.7 million from the Federal Preventive Health Services Block Grant in 1984–85. The majority of these funds will be allocated to develop local EMS systems. A portion of the funds will be retained at the State level to provide program support and to fund the statewide administration of these additional funds.

The increased funding shown in the current year results from forward funding of federal local assistance money. The amount includes funding for the Local EMS agencies for 1983–84 and 1984–85. In order to accelerate planning activities related to catastrophic disasters involving mass casualties, 3 additional positions in the Disaster Medical Services Unit are proposed for 1984–85.

4130 HEALTH AND WELFARE AGENCY DATA CENTER

Chapter 787, Statutes of 1972 established four consolidated data centers in State government, including one for Health and Welfare. The primary objectives of the Health and Welfare Agency Data Center are to:

(1) Insure the effective, efficient, and economical use of agency electronic data processing resources by providing EDP services at the most economical cost, eliminate unnecessary duplication, and insure optimum utilization.

(2) Insure that the necessary EDP resources are available to meet Agency needs by providing the necessary computer capability and capacity to meet those needs.

(3) Promote the appropriate use of EDP resources to assist in the achievement of Agency goals and objectives by identifying potential EDP related applications and by formulating and recommending policies on the appropriate use of EDP in the Agency.

To achieve these broad program objectives, the Data Center was established on January 1, 1978.

4130 HEALTH AND WELFARE AGENCY DATA CENTER—*Continued*

10 FACILITIES OPERATIONS

Program Objectives and Description

The principal objective of this program is to provide the necessary computer operation services and resources to the departments within the Health and Welfare Agency. The two major elements of the Facilities Operations program are:

(1) Operations—The functions assigned to this element are related to the operation of the Data Center's central computer processors and attached peripheral equipment. The equipment is operated to meet user schedules. Normal operations are 24 hours-a-day, five days-a-week, and on weekends as needed.

(2) Software Support—This element is responsible for maintaining the software operating systems for the computers, maintaining software for the telecommunications system and on-line inquiry systems, installing and implementing proprietary software packages, monitoring and adjusting the computer systems configuration to achieve optimal performance and efficiency and insuring adequate hardware and software resources are available to meet the current and projected needs of the user departments. In addition, they provide advice and consultation to user departments on request regarding software systems, hardware service requests, workload, and resource utilization data.

In FY 1984–85, Facilities Operations are proposed to be increased by $1.3 million for dedicated equipment and communications to meet the growth requirements of the departments within the Health and Welfare Agency. Four (4) positions are proposed to be redirected from Administration and 3 redirected within the Division to accommodate the increased workload.

Health and Welfare Data Center Revolving Fund[e]				*$17,911*	*$17,394*	*$18,832*
Reimbursements				*5*	–	–

20 ADMINISTRATION

The objective of this program is to provide administrative support to the Data Center programs such as personnel, training, budgeting, cost recovery, liaison, contracts administration, procurement of hardware and software, general business services, general systems and programming support, and planning. Chapter 486 Statutes of 1981 continuously appropriated the Health and Welfare Data Center Revolving Fund; providing HWDC the flexibility to provide increased services to user departments as additional funds become available to the various departments.

In FY 1984–85 the Administration Program is proposed to be reduced by 8 positions. Various efficiencies have been initiated which will allow the work of 1 position to be absorbed by existing clerical staff, the work of 3 to be accomplished through use of contractural services. The work of 4 positions will be consolidated with other like functions and the positions are proposed to be transferred to Facilities Operations to support the growth in workload. By also reducing certain operating expenses and equipment, the Data Center will save an additional $79,000 in State Administration costs.

4140 OFFICE OF STATEWIDE HEALTH PLANNING AND DEVELOPMENT

The goal of the Office of Statewide Health Planning and Development is to develop a State health policy to assure the accessibility of needed, appropriate and affordable health services. Working with California's 12 Health Systems Agencies, the Office of Statewide Health Planning and Development is responsible for: (1) developing the State Health Plan and the Statewide Health Facilities and Services Plan; (2) implementing the State Certificate of Need Program; (3) assuring that construction plans and specifications for all major health facilities are in compliance with State building codes; (4) assuring that available federal and State financial assistance is provided for development of needed health facilities; (5) assuring that all health facilities receiving Federal construction funds provide uncompensated services to those who cannot pay; and (6) conducting health profession staff planning activities.

10 HEALTH PLANNING

The Health Planning program carries out health planning activities and develops statewide health policy. Specific functions include:

1. Development of a State Health Plan (pursuant to PL 93-641) and development of a Statewide Health Facilities and Services Plan (pursuant to Ch. 854/76).
2. Provision of technical assistance and development of guidelines for use by local Health Systems Agencies in the development of their health plans.
3. Review of institutional and home health services to determine the appropriateness of such services (pursuant to PL 96-79 and Ch. 854/76).

The Health Planning program develops State plans for use by the Certificate of Need program. The Legal Office, Certificate of Need, and Health Planning programs jointly review Health Systems Plans and develop review criteria for Certificate of Need. Statewide policy for health personnel is developed jointly between the Health Planning and Health Professions Development programs.

The budget reflects a reorganization of the Office which consolidates the planning and review functions and allows the reduction of two management positions. This consolidation will facilitate a closer working relationship for these activities. The departmental reorganization also results in the transfer of 2.4 data processing positions from the Health Planning Division to the Administration Division.

20 CERTIFICATE OF NEED

Program Objectives and Description

This program administers the State's Certificate of Need law. Reviews are conducted of projects proposed by any licensed health facility in the State which would create or expand bed capacity or establish special services. The program develops recommendations regarding the need for these projects and presents its recommendations at public hearings. The final decision to grant or deny a Certificate of Need is made by the Director of the Office of Statewide Health Planning and Development.

Follow-up on approved projects is made with the assistance of Facilities Development Program staff to assure compliance with the certificate as granted.

The program requires representation by legal counsel in certificate of need hearings and appeals.

With the enactment of Chapter 1105/83 (SB 517), the State's Certificate of Need requirements were revised. The bill deleted Certificate of Need requirements for purchases or leases of diagnostic or therapeutic equipment, conversion of existing beds from one licensing category to another, and capital expenditure projects involving health facilities. In addition, the bill raised the Certificate of Need threshold for certain specialty clinic diagnostic or therapeutic equipment purchases and specialty clinic capital expenditures from $600,000 to $1,000,000. These revisions reduced the workload of the program and allowed the reduction of six positions. Additionally, 0.9 Temporary Help equivalents were redirected in 1983–84 to 0.9 regular ongoing positions: 0.6 clerical position in this program and 0.3 professional position in the Legal Office. These conversions are proposed for continuation in the budget. The departmental reorganization also results in the transfer of 2.4 data processing positions from the Certificate of Need Division to the Administration Division.

30 HEALTH PROFESSIONS DEVELOPMENT

Program Objectives and Description

This program issues the biennial California Health Manpower Plan, which assesses the present and future supply of specific categories of health personnel; establishes standards for determining the adequacy of supply; assesses the projected impact of changes in the financing and delivery of health care on the demand for the services of health personnel; and contains recommendations on personnel policy and programs.

Health Professions Development administers the Health Manpower Pilot Projects program, which tests expanded duties and other innovations in health personnel utilization. Under this program, trainees in approved projects are exempted from other provisions of law, such as the healing arts practice Acts. Results of the pilot projects become the basis for recommendations for change in the healing arts practice Acts and regulations.

Health Professions Development administers the Family Physician Training Program through the California Health Manpower Policy Commission, a statutory body whose members are appointed by the Governor and the Legislature. This program uses State funds to contract with medical schools, teaching hospitals, and other training programs to increase the number and improve the distribution of family practice physicians, primary care nurse practitioners, and primary care physicians' assistants.

Health Professions Development also administers the Health Professions Career Opportunity Program, which works at solving specific health care underservice problems by increasing the number of qualified minority students in health professions.

Two positions are proposed to assist the National Health Service Corps in the placement of scholarship recipients in priority urban and rural health manpower shortage areas. This activity will be funded through a contract with the U.S. Department of Health and Human Services.

40 FACILITIES DEVELOPMENT

Program Objectives and Description

The program reviews health facility construction plans and specifications for conformity to State statutes and regulations to assure that facility construction or alteration meets applicable standards and administers the Seismic Safety Program and the Fixed Hospital Equipment Anchorage Approval Program to assure the continued functioning of health facilities for a major earthquake. This program is also responsible for the financial analysis and review of health facility project applications for Federal Hill-Burton Grants, Hill-Burton Loans with Interest Subsidy, FHA Loans, Health Facility Construction Loan Insurance, Fire Protection Loans, Clinic Renovation Grants and Loans and Administration of Eminent Domain Applications for health facilities. The program assures that available financial assistance is allocated only to eligible health facilities in California. Projects receiving such assistance are subject to on-site construction progress and payment verification inspections to assure conformity with approved plans and specifications, loan agreements, wage and labor standards, affirmative action and equal employment mandates.

All projects subject to the Comprehensive Health Planning Law (Ch. 854/76) must receive prior approval by the Certificate of Need Division before the Facilities Development Division will review for financial assistance.

SB 961 (Chapter 303, 1982) transferred local responsibility to the State for inspection of hospital continuation projects and pre-empted local jurisdictions from enforcement of building standards relating to hospital projects. Seven positions were added in 1982–83 and seven additional positions were authorized in 1983–84 for this purpose. *The Office is evaluating its projected workload, funding and staffing requirements for 1984–85, and will pursue the necessary adjustments prior to the budget hearings in the Spring of 1984.*

50 UNCOMPENSATED CARE

Program Objectives and Description

This program administers the Hill-Burton Uncompensated Service and Community Service Assurances which are applicable to health care facilities financially assisted by the Department of Health and Human Services under Titles VI and XVI of the Public Health Service Act. Health care facilities which have received federal funds under Title VI and Title XVI of the Public Health Service Act, known as the "Federal Hill-Burton Act", gave an assurance to provide a reasonable volume of service to persons unable to pay and make their services available to all persons residing in a facilty's service area. In California there are 288 facilities which have an obligation to provide uncompensated service and community service. To assure that these obligations are met, the Office performs onsite evaluations, complaint investigations and compliance report assessments.

The budget reflects a revision of the compliance assessment activities of the program to permit more efficient evaluation of the facilities uncompensated care obligations. This modification will permit the reduction of one and one-half positions. Additionally, the Office reorganization relocates the unit under the Facilities Development Division thereby allowing the reduction of one management position.

70 LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) property tax revenue loss, (2) new programs, and (3) increased level of existing services mandated on local entities by legislation or executive regulations.

Authority

The State is required by Ch. 1406/72 (SB 90), as amended by Ch. 358/73 to pay the cost of legislative programs mandated on local governmental entities. These two acts apply to mandates effective after January 1, 1973. As added by this legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, and Section 2231 provides for reimbursement of costs of legislatively mandated programs. Ch. 854/76 revised existing provisions of law relating to health planning. Each health facility is required to pay a special assessment fee to offset the administrative cost of the program.

80 ADMINISTRATION—Distributed

Program Objectives and Description

The functions of this program include policy formulation and direction, legislative liaison, civil rights and affirmative action, public information, fiscal and personnel management, contract processing, business services, labor relations and data processing.

During 1983–84, four positions were administratively established to provide administrative support services to the Health and Welfare Agency. Also, 0.3 position was redirected from the Certificate of Need Program to provide legal assistance to the Emergency Medical Services Authority under an interagency agreement. These positions are proposed for continuance on a limited-term basis through the 1985–86 fiscal year. One clerical position, currently limited to June 30, 1983, is proposed for continuance. This position provides support for National Health Services Corps activities funded through a contract with the U.S. Department of Health and Human Services.

Based on the reorganization of the Office, two positions in the Civil Rights Office are proposed for reduction. The departmental reorganization also results in the transfer of 4.8 data processing positions to the Administration Division from the Certificate of Need and Health Planning Divisions. Sufficient staffing remains to handle the civil rights, affirmative action and labor relations functions. Additionally, one position is to be reduced due to a decline in the clerical workload in the Legal Office.

4170 DEPARTMENT OF AGING

The Department of Aging administers federal funds for specific grant programs under the Federal Older Americans Act of 1965, as amended. These grant programs have service priorities assigned by Congress and the U.S. Administration on Aging. Specifically, the Department has management responsibility for Federal Older Americans Act grant programs administered under Titles III, IV-A, IV-C and V and specific Federal and State Model Projects. To provide services mandated by the Act, the Department generally works through Area Agencies on Aging (AAA) which are public or private nonprofit organizations established in each of the 33 Planning and Service Areas (PSA) of the State. These agencies then work through 800 service providers statewide to serve the elderly population.

The Department provides a variety of technical and advisory activities pertaining to the development of priority services for the elderly and in the advocacy for effective use of other existing resources. The Department also serves the State's elderly population as (1) a clearinghouse and center for information on aging, (2) an advocate for development of new resources for the elderly, and (3) a statewide link between Federal, State, and local agencies that are responsible for development and management of other programs that serve the elderly.

Various	1983–84 Departmental Reorganization	−22.3	−$321

10 NUTRITION

Program Objectives and Description

The Nutrition Program provides older Americans, particularly those with low incomes, with low cost, nutritionally sound meals served at strategically located congregate centers or delivered to the homebound. Besides promoting better health among the older segment of the population through improved nutrition, the program focuses on reducing the isolation of old age and providing a link to other social and rehabilitative services. Meals are provided to persons 60 years of age or older.

The Federal Department of Agriculture (USDA), Food and Nutrition Service, provides at least 56.5 cents per meal served to seniors by the elderly nutrition programs; either in cash or in commodities. California has elected to receive cash in lieu of commodities to supplement the Nutrition Program.

The Older Americans Act, as amended in 1978, requires (a) a 15% match for federal funds, and (b) that one-third of that match be either cash or in-kind from State sources. Currently, 10% of the match is provided through cash assistance and in-kind match at the local level.

In 1983–84,$954,000 was provided in the Budget Act to provide additional match and to ensure continuance of existing Congregate Nutrition funding levels. A further $1,286,000 was made available on a one-time basis by the Budget Act of 1983 to augment the Congregate Nutrition program.

In 1984–85, the Federal fund allocation for nutrition programs was increased by $4.9 million because of revised census data. The $954,000 is continued in 1984–85 to provide matching funds and to maintain the program levels established in 1983–84. The department projects that 16.6 million meals will be provided in 1984–85 through approximately 320 subcontractors statewide.

4170 DEPARTMENT OF AGING—*Continued*

10.10 Congregate Nutrition

Congregate Nutrition project grants provide nutritional meals to older, mostly low income, Californians at 829 nutrition sites where other social or rehabilitative services can also be obtained. In addition to promoting improved health among older Californians, Congregate Nutrition is also aimed at reducing the isolation of old age. Congregate Nutrition services are available to persons 60 years of age or older, and their spouses, regardless of age.

In 1984–85, the baseline budget provides for $954,000 in General Fund which will be used to match increased federal funding in all Title III programs. The Department projects that approximately 13.3 million meals will be produced and served through 170 contractors statewide. Program emphasis in 1984–85 will be upon specific initiatives that generate higher program income and increased productivity.

10.20 Home Delivered Nutrition

A separate category of federal funds is used to provide Home-delivered Nutrition Services for homebound seniors who are unable to participate in the congregate meals program. This element is designed to enhance independence and to prevent premature institutionalization. Home-delivered services are available to persons 60 years of age or over who are homebound by reason of illness, incapacitation, disability, or who are otherwise isolated.

The Department projects approximately 3.3 million home-delivered meals will be produced and served through 150 contractors statewide. Program emphasis in 1984–85 will be upon retaining as many elderly as possible in their home settings as long as possible.

20 SENIOR COMMUNITY EMPLOYMENT SERVICES

Program Objectives and Description

The Federal Senior Community Employment grant provides part-time subsidized employment in community service facilities for low-income persons, 55 years and older. The major objectives of the program are to meet three significant needs of individual participants: (1) to earn additional income; (2) to regain a sense of involvement with the community; and (3) to receive training to improve their employment prospects. During Fiscal Year 1983–84, 878 seniors (age 55+) were projected to be employed in jobs funded by these grants. Through passage of the Federal Jobs Bill (P.L. 98-8), the program was increased in 1983–84 by $603,000 and 114 job slots for a total of 992 seniors.

Through efficiencies generated by a Departmental reorganization implemented in 1983–84, the Budget proposes to reduce administrative support for this program by 3.0 personnel years for 1984–85.

That reduction will generate $121,000 in savings, which is proposed to be redirected to direct services so 24 additional job slots can be supported.

30 SUPPORTIVE SERVICES AND CENTERS

Program Objectives and Description

The Older Americans Act, as amended, provides grants to States for Supportive Services and Centers. Services provided include transportation services to facilitate access to social services or nutrition services, or both; services designed to encourage and assist older individuals to use the facilities and services available to them; services designed to provide legal services and other counseling services and assistance, including tax and financial counseling, to older individuals; services of an ombudsman at the State level to receive, investigate and act on complaints by older individuals who are residents of long-term care facilities and to advocate the well-being of such individuals; services to assist in acquisition, alteration, renovation, and operation of multipurpose senior centers. There are in excess of 1 million Californians served by this program.

In 1983–84, Budget Act control language provided for a minimum allocation to area agencies of $817,000 for the Ombudsman program. The Budget Act also provided for additional matching monies should increased federal funds become available.

In 1984–85, the Department proposes to not only maintain the $817,000 Ombudsman allocation but to augment it by $35,000 which was previously expended for state level administration of the Ombudsman program. Further discussion is provided in element 30.20.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

30.10 Coordinated Senior Services	$24,839	$23,612	$23,458
30.20 Advocacy Assistance and Long-Term Care Ombudsman	389	1,085	1,112

30.10 Coordinated Senior Services

The purpose of Coordinated Senior Services grants is to strengthen or develop systems of comprehensive and coordinated supportive services for older persons, utilizing resources from all levels of the community and the economy, and avoiding duplication in some service areas at the expense of others. These services are designed to avoid unnecessary institutionalization by enabling older persons to live in their own homes or other places of residence for as long as possible. Emphasis is placed on multipurpose senior centers to serve as community focal points for development and delivery of an array of services.

The 1984–85, sufficient federal funds and state matching funds are projected to be available to continue essentially the same level of service as was provided in 1983–84.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

30.20 Advocacy Assistance and Long-term Care Ombudsman

The Older Americans Advocacy Assistance Program (OAAAP), funded under Federal Title IV-C of the Older Americans Act (AoA discretionary funds) is a national, regional and state system of support and technical assistance to advocates for older persons, including support for the development of legal services for the elderly and the Long-Term Care Ombudsman Program (LTCOP).

The California LTCOP is mandated under the 1978 Amendments to the Federal Older Americans Act for resolution of complaints by or for residents of skilled, intermediate and residential care facilities.

The State Ombudsman and OAAAP staff provide backup and support to predominantly volunteer local ombudsman projects which provide services in facilities throughout California. the Long-Term Care Ombudsman component of the OAAAP is intended to support the mandated State LTCOP.

The Department is required by the Older Americans Act to utilize at least 1 percent of Title III-B funds to support the State Ombudsman program. As permitted by regulations, the Department has elected to allocate a major portion of these funds to area agencies for support of local ombudsman programs rather than to utilize all of the funds for State administration of the program. Additionally, Budget Act control language in 1983–84 provided that at least $817,000 of Title IIIB funds be allocated to the area agencies for local long-term care ombudsman programs.

Through redirection and reorganization the Budget proposes to reduce expenditures from Title III for State-level administration of the Ombudsman Program by 1.0 personnel year in 1984–85. The 1.0 personnel year will continue to provide ombudsman support, but will be funded through other general administrative sources. The savings of $35,000 are proposed to be redirected to local assistance where they will augment ombudsman allocations to the area agencies.

40 SPECIAL PROJECTS

Program Objectives and Description

The special projects program consists of projects funded through both Federal and State Funds. The one Federally funded project is a training grant. State General funded projects are Foster Grandparent program, a Brown Bag Program, a Senior Nutrition and Volunteer Program, a Senior Companion Program, and a multipurpose center nutrition demonstration project.

Through a shift in policy, from direct provision of training by the State to emphasis on increased subventions to area agencies, the Budget proposes to reduce support by 2.2 personnel years in 1984–85. These reductions will generate additional local assistance funding of $90,000 in 1984–85 for training purposes.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40.10 Training

Funded through Title IV-A of the Older Americans Act, the training grant provides in-service, continuing education and technical assistance training to service providers, Agency on Aging staff, Departmental staff, advisory committee members and volunteers.

During 1984–85 increased emphasis will be placed on utilizing available funding to provide training to Area Agencies on Aging and their advisory boards to carry out national and State program initiatives such as targeting and performance-based contracting.

40.30.010 Brown Bag

The Brown Bag program, established by Chapter 1345, Statutes of 1980, created a demonstration program through which senior citizens collect and distribute food to needy persons. The program has demonstrated the success of the concept through a 22:1 benefit to cost ratio since its inception. Originally scheduled to sunset on December 31, 1983, Chapter 269, Statutes of 1983 was enacted which removed the sunset date and paved the way for the project to become a permanent part of the Department's budget. In 1983–84, the Legislature provided continuance funding for this program through a reappropriation of Chapter 1X, of the Statutes of 1983, 1st Extraordinary Session. *In 1984–85, the appropriation for this program will be included in the Budget Act. In 1983–84, the program expanded from 19 to 27 contractors.*

40.30.020 Senior Nutrition and Volunteer Program

The Senior Nutrition and Volunteer Services Program (SNVP) established by Chapter 1199, Statutes of 1977, as amended by Chapter 20, Statutes of 1980, and Chapter 251, Statutes of 1981, has included funding from the State Nutrition Reserve Fund, the State Transportation Fund and the General Fund. Model projects were established in Sacramento, San Diego and Humboldt counties to recruit, train and place seniors in community agencies for the purpose of serving the needs of children and adolescents. In accordance with legislation this program was integrated with existing area agency administered nutrition programs in Sacramento and San Diego counties. However, due to basically geographical difficulties with the scheduled program integration, the Legislature provided $70,000 to Area Agency on Aging I in Humboldt County in 1983–84 to complete the integration by June 30, 1984.

40.30.040 Senior Companion

The Senior Companion Program, established by Chapter 1121, Statutes of 1979 provides volunteer community service opportunities to low-income senior adults to provide care and support to adults with special needs. The legislative authority was to terminate on December 31, 1982, but was extended until 1988 by Chapter 1458, Statutes of 1982. In 1983–84, the program was funded by the Budget Act with $127,000 authorized as part of continuing program authorizations and and additional $127,000 authorized as part of the reappropriation of Chapter 1X, Statutes of 1983, 1st Extraordinary Session.

The 1984–85 Budget proposes to continue the program at the current level.

40.30.050 Multipurpose Center Nutrition

Authorized by Chapter 1X, Statutes of 1983, 1st Extraordinary Session, this one-year pilot project provides nutrition services in senior multipurpose center nutrition sites in Watsonville. As provided in the legislation, the Department *submitted an evaluation report in December, 1983. In as much as this project served in excess of 100 seniors per day, continuing funding for this project will be considered by the involved Area Agency on Aging during its 1984–85 planning process.*

50 ADMINISTRATION

Program Objectives and Description

The Department of Aging is designated by law to be the single State unit for supervision of all programs under the Older Americans Act of 1965, as amended. To meet this charge, the Department was organized through 1982–83 into a Directorate and five major functional units: (1) State and Federal Coordination; (2) Special Services; (3) Community Programs Division; (4) Planning Evaluation and Research Division; and (5) Administration and Finance Division. The Director's Office and the Administration and Finance Division provide the general administrative services of overall guidance and business affairs of the Department and its programs. The other major functional units provided program services of general liaison with the aging network, program consultation and development and other field operations.

During 1983–84, the Department reorganized in order to better meet the administrative needs of the various programs with reduced staffing. Because of resulting organizational efficiencies, the Budget proposes to reduce 16.5 personnel years in 1984–85 and redirect the savings of $183,000 to Local Assistance to help meet the need for additional matching funds.

The resulting streamlined organization maintains two divisions in addition to the Directorate; an Aging Division and an Administration and Finance Division. This structure will allow for the same level and quality of services as provided in the past but with less administrative cost.

4170 DEPARTMENT OF AGING—*Continued*

50.01.010 Directorate

The Director's Office provides overall direction and control for all functions of the programs being carried out by the Department. The Director, with assistance from the Chief Deputy Director, works with the Commission on Aging, confers with representatives of aging organizations throughout the State, and conducts public hearings to develop meaningful objectives for current and planned service programs for the State's elderly.

The Director's Office maintains liaison with the Legislature and analyzes pending legislation for its potential impact on the well-being of California's elderly. *The proposed reorganization places the Department's audit function into the Director's Office. Audit Services include direct audits of special grants, review of area agency audits and post-audit resolutions.*

Distributed Expenditures	8.5	7.1	10.7	$356	$309	$463

50.01.020 State And Federal Coordination

Specialists in identified service areas initiate and maintain linkages with Federal, State, and local entities having specific service responsibility, requirements, interest, and/or resources, in order to encourage those other entities to participate in the development of a comprehensive, coordinated service system for older persons. Specified areas of coordination include transportation, housing, social services, health services, mental health, long-term care, employment, and arts.

For 1984–85, the services provided by this Division have been combined into the Aging Division as a result of a Departmental reorganization started in 1983–84.

50.01.030 Special Services

This unit included those programs within the Department which were either unique in their source of funding or responsibility, or must be separate and apart from the rest of the organization.

For 1984–85, the services provided by this Division have been combined into the Aging Division as a result of a Departmental reorganization started in 1983–84.

Distributed Expenditures	10.6	4.4	–	$444	$192	–

50.01.040 Community Programs

The Division of Community Programs was responsible for providing general assistance to and monitoring Area Agencies on Aging, special project development and monitoring, and, program policy development. The Community Program Services Branch (with geographically assigned analysts) provided overall technical assistance to Area Agencies on Aging.

For 1984–85, the services provided by this Division have been combined into the Aging Division as a result of a Departmental reorganization started in 1983–84.

Distributed Expenditures	22.8	8.9	–	$952	$388	–

50.01.050 Planning, Evaluation and Research

This division served to identify the needs of older persons, assess the effect of programs, identify problem areas, study problems through applied research, and make recommendations for program modifications. The Planning Branch had primary responsibility for facilitating the coordination, development and completion of the State Plan on Aging as well as all statewide planning activities. The Evaluation Branch was also responsible for conducting program evaluations which determined the effectiveness and efficiency of local programs serving older persons.

For 1984–85, the services provided by this Division have been combined into the Aging Division as a result of a Departmental reorganization started in 1983–84.

Distributed Expenditures	10.4	4.4	–	$436	$192	–

50.01.060 Administration and Finance

The Division of Administration and Finance develops fiscal and program operational safeguards against misuse or misappropriation of Federal and State funds administered by the Department. Supportive services are provided in personnel, budgeting, accounting, management analysis, business and office services, contract administration, and communication. In addition, Administration is responsible for the development, implementation and maintenance of the Department's manuals of operating policy and procedure, its Emergency Preparedness Program and its Employer-Employee Relations Program. Administration processes about 90 contracts anually, schedules payments in response to about 2,300 requests for funds, and processes 110 contract closeouts annually.

50.01.070 Aging Division

As a result of a Departmental reorganization started in 1983–84, the Aging Division is now responsible for: 1) providing technical assistance, performing evaluation and monitoring of Area Agencies on Aging, 2) administration of special projects, 3) coordination and completion of the State Plan on Aging as well as providing statewide planning, and 4) initiating and maintaining coordination linkages with Federal, State and local entities in specified functional areas in accordance with the Older Californians Act.

4180 COMMISSION ON AGING

Program Objectives and Description

The Commission on Aging is charged with the responsibility of being the principal advocate for older persons in California. The objectives are to insure that the interests of older persons in California are represented by advising the Governor, Legislature, Department of Aging, and agencies at all levels of government regarding the problems and needs of older persons.

The Commission holds monthly meetings and special hearings throughout the State to identify the needs and solicit the recommendations of older persons. The Commission works closely with the State's 33 Area Agency on Aging Advisory Councils, and through its monthly newsletter provides information to individuals and senior organizations regarding matters of public policy affecting older persons.

The Commission provides coordination and support to local and statewide senior groups relating to program, legislative, and policy advocacy activities. The Commission also serves in an advisory capacity to several state programs for the elderly, such as Adult Day Health Care and the Interdepartmental Social Services Transportation Council.

The Commission coordinates and convenes the annual California Senior Legislature, and provides staff and other administrative support to the Senior Legislature throughout the year.

The Commission was directed by the legislature to conduct a study of the administrative cost-efficiency of the State Department of Aging and the 33 Area Agencies on Aging, during the 1983–84 budget year. The Commission redirected staff and suspended a majority of its ongoing activities from July 1 to October 28, 1983 to comply with this mandate.

4200 DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS

The principal objective of the Department is to direct and coordinate the State's effort to prevent and minimize the effects of alcohol misuse, narcotic addiction and drug abuse on the State of California and its citizens.

The Department's activity is divided into three major program areas: Alcohol Programs, Drug Programs, and Administration. These programs provide a cost effective network of monthly services to approximately 320,000 Californians each year. In addition, extensive prevention efforts are provided to reduce the incidence of alcohol and drug abuse in the general population and within special target populations.

4200 DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS—*Continued*

10 ALCOHOL PROGRAM

Program Objectives and Description

This program provides a network of services for both the general public and special target groups and assists persons and their families impaired by alcohol problems to attain adequate physical, social, psychological and economic functioning.

During FY 1983–84, the Department received authorization to increase the Alcohol Program expenditure authority in federal Local Assistance by $1,013,004. The increases were: (1) $79,221 in federal Block Grant funds due to the re-estimate of funds available on an annualized basis; and (2) one-time increase of $933,783 in federal Block Grant funding as a result of the "Jobs" Bill.

The FY 1984–85 Governor's Budget proposes to realign state and county responsibilities and to reduce State involvement at the local level. The Alcohol Program has been consolidated with the Drug Program into the Alcohol and Drug Program. Refer to that program description for additional information.

10.10 County Administration

The Health and Safety Code requires counties to administer and manage all county alcoholism programs funded by the State. The county is accountable to the State for the effective operation of these programs. Within standards and regulations established by the State, counties develop program priorities and reflect these in the county alcoholism plan and budget.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$7,892	$4,602	–

10.20 Identification and Prevention—Indirect Services

The objectives of Identification and Prevention—Indirect Services are: (1) to educate the public about alcohol use and to enable it to preclude or recognize actual or potential alcohol problems; (2) to inform the public concerning availability of alcohol services; (3) to educate the public concerning alcohol problems and (4) to improve public knowledge and change attitudes regarding alcohol use. The following are descriptions of those types of activities that are an integral part of this program:

a. Prevention. These activities include educational efforts intended to preclude or avert the harmful effects of inappropriate alcohol use.

b. Information and Referral. These activities include crisis intervention and specific contacts which result in dissemination of alcohol-related information and the referral of individuals to appropriate facilities.

c. Resource Development. These activities are designed to contact and train available staff and volunteers in human service agencies, other community organizations, and established health networks, to be sensitive and responsive to alcohol use and alcohol problems.

d. Supplemental Security Income (SSI). These state-administered, county-conducted services, screen, refer to treatment, and monitor individuals with serious alcoholism problems who are receiving supplemental payments under Social Security.

Input	*1982–83**	*1983–84**	*1984–85**

General Fund	*4,694*	*5,822*	–
Federal Trust Fund[f]	*2,532*	*2,865*	–

10.30 Treatment and Rehabilitation—Direct Services

The objective of this element is to provide a comprehensive continuum of alcohol recovery services which emphasize sobriety and abstinence. Services are divided into residential and non-residential and may be provided through county administered programs and services.

Residential services include detoxification, which assists individuals to recover from the effects of intoxication and to plan for continued recovery in residential programs, in which food, shelter, professional treatment, and possibly medical services are furnished in a nondrinking, supportive environment, and recovery home services for the longer term provision of food, shelter, and rehabilitation in a peer group-oriented, community-based supportive environment.

Nonresidential services include a wide range of activities including diagnosis, individual, group and family counseling therapy, and social, occupational, and recreation therapy for those alcoholics not requiring the supportive environment of a residential facility. Nonresidential services may be provided through self-help groups, outpatient clinics, day treatment programs, or Drinking Driver Programs approved by the Department.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$23,680	$29,420	–
General Fund	*21,812*	*22,965*	–
Federal Trust Fund[f]	*1,868*	*6,455*	–

10.40 State Administration

These activities relate to the process of providing funds to counties to establish and maintain a statewide alcohol services delivery system utilizing a county planning, budgeting and management review process. The Division of Alcohol Programs approves and disapproves county plans; reviews county program management and assures program quality in compliance with standards; sponsors and encourages research in social factors contributing to problems relating to the inappropriate use of alcohol; cooperates with other governmental agencies and the private sector in coordinating alcohol

* Dollars in thousands

4200 DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS—*Continued*

programs; and develops and implements a statewide alcohol plan. In addition, the Division coordinates an Employee Assistance Program whose services are designed to assist employees to recognize and address personal problems, including alcohol-related problems which impair job performance.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20 DRUG PROGRAM

Program Objectives and Description

This program provides a network of services for both the general population and special target groups in the areas of prevention of narcotic and drug abuse and the care, treatment and rehabilitation of narcotic addicts and drug abusers. Programs are designed to reduce the incidence of narcotic addiction and drug abuse among their clients and participants and to assist persons and their families impaired by narcotic addiction and drug abuse to attain adequate personal and social functioning.

During FY 1983–84, the Department was authorized to increase the Drug Program expenditure authority in federal Local Assistance by $1,339,797. The authorization was for (1) $406,013 in carryover federal Block Grant funds which will allow county drug programs to maintain their FY 1982–83 federal base county allocations; and (2) one-time increase of $933,784 in federal Block Grant funding as a result of the "Jobs" Bill.

The FY 1984–85 Governor's Budget proposes to realign state and county responsibilities and to reduce State involvement at the local level. The Drug Program has been consolidated with the Alcohol Program into the Alcohol and Drug Program. Refer to the Alcohol and Drug Program for additional information.

Federal Trust Fund[†]	*6,025*	*756*	–

20.20 Prevention

The objective of the Prevention element is to reduce the incidence of drug abuse through primary prevention and early intervention programs. Specific activities include the development and implementation of community-based preventive service programs which emphasize primary prevention, prevention education, intervention, public information, drug abuse consultation, and community organization services to families, women, the elderly, children and youth, and other special population groups within a multi-cultural context. Prevention efforts are coordinated with the State Department of Education and local school systems to encourage sound community and school-based prevention programming. Prevention programs are funded from two sources: State drug abuse funds channelled through the State-County Short-Doyle system and Federal drug program funds that are administered by the State, either directly, or by State-county agreements.

Input	*1982–83**	*1983–84**	*1984–85**

* Dollars in thousands

4200 DEPARTMENT OF ALCOHOL AND DRUG PROGRAMS—*Continued*

20.30 Treatment and Rehabilitation

Element Objectives and Description

The objective of the Treatment and Rehabilitation element is to increase the personal and social functioning of narcotic addicts and drug abusers. Programs funded by the State are located in communities throughout California. These programs provide detoxification, methadone maintenance, counseling, housing, and family counseling. Treatment and rehabilitation programs are funded from State Short-Doyle drug abuse funds and from the Federal Block Grant.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$27,627	$34,809	–

25 ALCOHOL AND DRUG PROGRAM

Program Objectives and Description

The 1984–85 Governor's Budget proposes to realign State and county responsibilities and to reduce State involvement at the local level. The Alcohol Program and the Drug Program have been consolidated into the Alcohol and Drug Program. Implementation of the realignment proposal will become effective on January 1, 1985 and will result in State Operations savings of 80 positions and $993,137 in 1984–85. The General Fund and Federal Block Grant State Operations savings of $760,137 resulting from this proposal will be transferred to Local Assistance and subvened to the counties. Since that represents only half-year savings, an equal amount will be available for transfer in FY 1985–86. The remaining $233,000 is federal categorical funding and not available for transfer (SSI and provider fees).

Further, the Department will no longer contract with the Social Security Administration (SSA) to provide funds to the counties for SSI monitoring and referral of alcohol clients. Consequently, the budget proposes a reduction of $436,000 to Local Assistance. The SSA, in turn, would have the option of contracting either with another organization or with counties directly in order to continue the provision of SSI services.

By reducing and eliminating certain operating expenses and equipment purchases and activities, the Department is proposing to save $89,000 in State Administrative cost during FY 1984–85.

25.10 Alcohol and Drug Program Grants

Under the realignment proposal, most existing state statutory and regulatory requirements will be eliminated or reduced and local government will have increased flexibility in the use of state administered funds. The proposal will increase the effectiveness of local government by allowing more control over activities which are more appropriately administered at that level. The counties will assume the primary responsibility for assuring quality alcohol and drug services through county review and certification of programs in compliance with county standards; for assuring the health and safety of individuals in methadone treatment programs; for management, monitoring and approval of multiple offender drinking driver programs; and for providing technical assistance and training to both county-operated and contract provider programs.

Further, the proposal increases local government's responsiveness to community needs by making local county allocations available on the basis of the same 35% alcohol/35% drug/30% discretionary formula that is now contained in the federal block grant law. Since this proposal will require substantive statutory changes, the Administration will propose legislation to statutorily redefine state and local responsibilities and requirements.

In FY 1984–85, there will be an increase in expenditure authority in federal Local Assistance from FY 1983–84 of approximately $1.2 million in federal block grant funds for alcohol and drug programs. This increase is primarily the result of a $23 million increase in the nationwide base of the federal Alcohol and Drug Abuse and Mental Health Services Block Grant. Additionally, due to the considerable lessening of inflation over the last year and a half, the 1984–85 budget proposes a 2% cost-of-living adjustment of $1,252,000.

25.20 State Administration

The department's role will be to assure accountability in the expenditure of State and federal funds, define minimum service quality and provide leadership, direction, and coordination in the State's effort to prevent and effectively treat alcohol and drug misuse.

30 ADMINISTRATION

Program Objectives and Description

The Administration Program provides interagency coordination among State, federal, and local entities; information and data services to management; public information and awareness about alcoholism and drug abuse in California; auditing; development of program rules and regulations and a strong emphasis on evaluation.

The Executive Office provides overall direction to the Department's mission which includes planning, coordinating and encouraging the development of State and local programs for prevention, identification, treatment, care and rehabilitation of alcohol and drug abusers.

The Division of Administration provides training, budgeting, auditing, contracting, data processing, management analysis, accounting, data management, evaluation and research utilization, regulations, and other support services to the Department.

The Administration Program has been consolidated into the Alcohol and Drug Program. Refer to the Alcohol and Drug Program—State Administration.

4220 CHILD DEVELOPMENT PROGRAMS ADVISORY COMMITTEE

The Child Development Programs Advisory Committee was established to provide policy recommendations to the Governor, the Superintendent of Public Instruction, the Legislature, and other relevant state agencies concerning child care and development. The Committee also reviews and evaluates the effectiveness of child development programs, along with the need for children's services.

The Committee consists of 25 members and is staffed with an executive secretary, an analyst, and clerical support.

The Committee is composed of representatives from various State agencies, public members (representing private education, health care, child welfare, child care, and community action interests), and parents of children in child care programs.

During 1983–84, the Committee is completing and distributing media productions on child care, undertaking a special report on the state of children in California, and compiling a directory of resources for child abuse prevention.

During 1984–85, the Committee will continue its review of relevant policies and legislation, evaluating the effectiveness of programs that affect the development of children, and continue to work closely with those state agencies that administer these programs.

The Committee has received federal grants for two demonstration projects. One was awarded in FY 1982–83 for $73,000 to conduct a project designed to educate consumers and health professionals on quality infant and child day care selection. The other is for a $97,680 demonstration project on meeting the child care needs of low income clients. Both awards were allocated between two State fiscal years.

Two half-time limited term positions originally scheduled to terminate on September 30, 1984 have been extended to work on these projects.

4260 DEPARTMENT OF HEALTH SERVICES

The Department of Health Services' goals are to:

1. Promote an environment that will contribute to human health and well-being.
2. Assure the availability of equal access to comprehensive health services using public and private resources.
3. Emphasize prevention-oriented health care programs.
4. Promote the development of knowledge concerning the causes and cures of illness and the means of delivering health services to the public.
5. Assure economic expenditure of public funds to serve those persons with the greatest health care needs.

These goals are carried out through ten programs: Health Protection, Toxic Substances Control, Environmental Health, Community Health Services, County Health Services, Rural Health, Medical Assistance, Licensing and Certification, Audits & Investigations, and Administration.

11 HEALTH PROTECTION

Program Objectives and Description

The general objectives of the Health Protection Program are to: (1) identify unmet public health needs, (2) prevent and control infectious and chronic disease, (3) develop and carry out preventive and curative measures to eliminate or modify the impact of disease and illness, and (4) *provide technical assistance and carryout investigations related to non-infectious exposures in the general and occupational environment. By reorganization effective July 1, 1983, the Vital Statistics element is included within the Administration Division.*

One position and $42,000 in the Health Protection Division is proposed to be eliminated as the function performed by this position can be absorbed with remaining staff.

Authority

Health and Safety Code, Sections 200–211.3, 300.5, 349–349.5, 350–354, 360–373, 410, 417–418.1, 423–423.9, 425, 429.5, 458.5, 1700–1721, 1900–2000, 2100–2108, 2950–2952, 3000–3125, 3180–3199, 3220–3230, 3279–3356, 3380–3390, 3400–3456, 3500–3507, 25990–25994.5; Civil Code, Section 4300; Labor Code, Section 147.2; Welfare and Institutions Code, Sections 18375–18379; Chapter 297, Statutes of 1976.

11.10 Preventive Medical Services

The objective of Preventive Medical Services is to single out special high risk groups in the population and provide those groups preventive activities relative to heart disease, stroke, cancer, kidney disease, arthritis, dental disease, and other afflictions that cause disability and death. To meet these objectives the Preventive Medical Service element includes several components:

Adult Health—provides technical assistance in planning, developing and operating local adult health programs, promotes the better use of medical, paramedical and allied manpower through training, demonstration and experimentation. In addition, specific programs are provided in cancer control, diabetes control, cardiovascular disease and kidney diseases control as well as a public health nursing program to serve the aged and a program of health education and risk reduction.

One position and $68,000 in the Adult Health Section is proposed for elimination due to increased management and staffing efficiencies in this section.

Dental Health—promotes the development of dental disease prevention programs in schools and industry and evaluates their cost effectiveness, administers the State's topical fluoride program for school children and provides consultation to other programs and agencies on dental subjects. A comprehensive dental program serving approximately 333,000 elementary school children has been implemented including topical fluoride rinse, plaque control, nutrition education and teacher in-service training.

One position and $36,000 in the Dental Health Section is proposed for elimination due to streamlining of duties within the section.

Infectious Disease—identifies and defines the occurrence of infectious diseases in California and directs and coordinates efforts to prevent or minimize their harmful effects. This component is responsible for surveillance, investigation and control of over 75 communicable diseases, including influenza, malaria, mosquito borne viral encephalitis, venereal disease, tuberculosis and diseases spread from animals to man. Surveillance is maintained to identify illness preventable by immunization. *One and one half limited-term positions for Acquired Immune Deficiency Syndrome research terminate June 30, 1984.*

* Dollars in thousands

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

Two positions and $74,000 in the Infectious Disease Section are proposed for elimination due to increased work efficiencies and span of supervision in the section.

Resource for Cancer Epidemiology—carries out studies directed at determining the relationship between various types of cancer and environmental and cultural influences on its prevalence and includes the California Tumor Registry which collects information concerning the incidence of cancer in California. A majority of the work carried out is through a contract from the Northern California Cancer Program as a part of the national effort for cancer control.

The Dental Health, Preventive Health Services to the Aged and $1,000,000 of the $1,371,000 immunization local assistance appropriations are proposed for inclusion in the Public Health Enhancement Program scheduled for implementation January 1, 1985. Eleven positions will terminate December 31, 1984 and the associated state support funding will be transferred to local assistance via the Public Health Enhancement Program which is discussed as a separate element on page 47 of this budget. For immunization assistance a core staff and $371,000 will be maintained at the state level for emergency vaccine preventable disease control.

The 1984–85 Governor's Budget proposes to continue the base funding for the Federal Preventive Health and Health Services Block Grant at $5.9 million. In addition, $.6 million in one-time funds will be allocated in 1984–85 for high priority programs. Although the Block Grant is administered by this element, Block Grant funding is reflected in Program 90 Special Projects.

Summary of Preventive Medical Services

	82–83	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Adult Health	15.8	14.9	9.3	$3,402	$3,003	$2,270

11.20 Laboratory Services

This element provides laboratory support services for surveillance, epidemiological investigations, prevention and control of infectious diseases; assures the quality of biomedical laboratory services in laboratories throughout the state which monitor air pollution; protects employees against health hazards of their work environments; assures the safety and quality of foods, medicinal drugs, and other consumer products; controls water and waste water quality; and averts health hazards from radioactive materials and hazardous wastes. *By reorganization effective July 1, 1983, the Hazardous Materials and Air and Industrial Hygiene Laboratories were moved to this element from the Toxics Substances Control Program.*

One and one-half limited-term positions for the certification of hazardous waste testing laboratories terminate June 30, 1984.

Four positions and $151,000 are proposed to meet increased workload in the Hazardous Materials Laboratory associated with the number of determinations estimated in sampling and analyzing hazardous wastes.

Chapter 1209, Statutes of 1982 allows DHS to certify local and private laboratories which analyze hazardous wastes. As such, two positions and $107,000 are proposed to meet the workload of certifying laboratories. All laboratories will require recertification every two years.

Three positions and $105,000 in 1983–84 and $120,000 in 1984–85 are proposed for elimination due to a reduction in reimbursements from the Air Resources Board.

Six positions and $317,000 in 1983–84 and $328,000 in 1984–85 are proposed for elimination due to a reduction in CAL/OSHA funding.

Four positions and $90,000 are proposed for elimination due to increased work efficiencies.

Four positions and $176,000 are proposed to meet laboratory workload increases for the Genetic Disease Testing program.

Ten positions limited to June 30, 1985 and $1,460,000 are proposed for laboratory workload increases for the implementation of the Neural Tube Defects program. The department is currently performing a workload evaluation on the entire Genetic Disease Testing program to be completed this Spring. When this evaluation is completed, permanent positions will be proposed.

As a part of the consolidation of the various categorical programs into the Public Health Enhancement program, eleven positions in this division are proposed to be eliminated.

Summary of Laboratory Services

	82–83	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

11.40 Epidemiology and Toxicology

By reorganization effective July 1, 1983 the Toxics Substances Control Program's Laboratory and Epidemiology Branch Office, Epidemiology Studies Section and Hazard Evaluation System and Information Services Section were moved to Health Protection to create this new element.

This element provides technical assistance and carries out investigations related to non-infectious exposures in the general and occupational environment.

Epidemiology Studies—distinguishes between environmental exposures which pose a health hazard and those which do not; provides technical assistance to local governments and regulatory agencies by summarizing existing health effects information; and conducts direct investigations on human population when additional information is needed.

One position and $33,000 in the Epidemiology Studies Section are proposed for elimination due to increased work efficiencies and streamlining of duties within the section.

Hazard Evaluation System and Information Services—acquires, stores and disseminates information to the private and public sectors regarding occupational health hazards.

The on-going operations of the Hazard Evaluation System Information Service (HESIS) library is funded via interagency agreement (IAA) with the Department of Industrial Relations. Consistent with the IAA, one full-time librarian position is proposed to be eliminated in current and budget years to fund an increase of 2.3 temporary help in the HESIS Section.

Seven positions and $275,000 in the current year and $290,000 in the budget year are proposed for elimination due to reduced funding from the Department of Industrial Relations.

One position and $39,000 is proposed for elimination in HESIS in 1984–85 as the Department intends to use a federal employee for this purpose.

Summary of Epidemiology and Toxicology

12 TOXIC SUBSTANCES CONTROL

Program Objectives and Description

The objectives of the Toxic Substances Control Program are to (1) reduce public exposure to toxic substances in the environment, (2) reduce the amount of hazardous waste being discharged into the environment, (3) provide technical and scientific consultation on toxic substances related to public health or environmental issues, and (4) provide technical and scientific support services to other state agencies.

The Administration is committed to reducing the hazards of toxic substances to the public health and environment. Present efforts to reduce landfill disposal of highly toxic wastes, encourage construction of alternative waste management technologies, strengthen monitoring and enforcement, insure that operators of hazardous waste sites are responsible for providing safeguards which protect the public health and environment and provide for the continued cleanup of hazardous waste sites.

As a result of a reorganization effective July 1, 1983, the Laboratory and Epidemiology Studies element will be included in the Health Protection Program.

12.30 Public Information and Participation	5.5	4.5	4.5	362	431	462

12.10 Hazardous Waste Management

This element regulates hazardous wastes produced in California; promotes new technologies to reduce the amount and toxicity of hazardous waste produced in the State; enforces the Hazardous Waste Control Law through legal and regulatory sanctions; provides for the cleanup of abandoned sites and provides emergency response to toxic spills. *One two-year limited-term position which supported the Hazardous Waste Management Council terminates June 30, 1984.*

Two positions and $57,000 in the Hazardous Waste Management Branch are proposed for elimination due to streamlining of duties and increased work efficiencies within the branch.

Alternative Technology and Policy Development—develops, evaluates, and establishes the use of new technologies and waste management practices which minimize the hazardous wastes disposed to land, reclaim and recycle the maximum amount of materials from hazardous wastes and treat or destroy hazardous properties of wastes.

Two positions and $85,000 in Alternative Technology and Policy Development are proposed for elimination due to the ability to absorb the workload through consultant and professional services.

Procedures and Regulation Development—develops and maintains appropriate program and management systems, regulations, and procedures to implement state and federal programs and policy on hazardous waste management.

Sixty-two positions and $2.6 million are proposed for augmentation of the Permitting, Surveillance and Enforcement Section to (1) permit all hazardous waste facilities on a 5-year timeframe and (2) ensure compliance with hazardous waste laws. Additionally three positions and $92,000 are proposed for elimination as a result of increased use of interagency personnel agreements with the Environmental Protection Agency and the ability to absorb asbestos related workload.

Permit, Surveillance and Enforcement—performs surveillance, inspection and enforcement actions necessary to assure the proper handling, transporting, storage and disposal of hazardous wastes.

Four positions and $230,000 are proposed to meet increased workload associated with the Hazardous Waste Management Information System's "cradle to grave" tracking system.

Three and one-half positions and $122,000 are proposed to meet workload associated with the review of hazardous waste facilities closure/postclosure plans and financial assurances.

Site Cleanup and Emergency Response—plans and directs all remedial actions conducted under the provisions of State and Federal Superfund programs; responsible for the cleanup of abandoned toxic waste sites, and responsible for responding or coordinating the response to emergency situations involving toxic materials with state and local agencies.

13 ENVIRONMENTAL HEALTH

Program Objectives and Description

The Environmental Health program objectives are to protect California citizens from unnecessary illness and to maintain a physical environment which promotes health prevention rather than treatment. The program assures protection of the public from unsafe or unwholesome foods, drugs, water supplies, vectors, noise, and unnecessary exposure to ionizing radiation.

One position and $42,000 is proposed for elimination due to streamlining of duties within this program.

* Dollars in thousands

13.10 Sanitary Engineering

This element safeguards domestic water supplies, waste disposal operations, shellfish production, harvesting operations, and recreation waters sanitation by standard setting, surveillance, evaluation, education, and enforcement.

Five positions in 1983–84 and seven positions and $321,000 in 1984–85 which were funded from the Safe Drinking Water Bond Act of 1976 via an Interagency Agreement with the Department of Water Resources (DWR) are proposed to be eliminated. Bond monies have been fully expended with the exception of close out functions to be performed by DWR and, as such, require no further administration by the department.

Two positions and $44,000 in the Sanitary Engineering Section are proposed to be eliminated since the functions previously performed by these positions can be absorbed within remaining resources.

Domestic Water Supply—Domestic water utilities are required to have a permit and certificates are issued to qualified water treatment plant operators. Enforcement actions are taken based on: annual surveillance of water systems; comprehensive reviews; investigation of waterborne illness; failure to meet bacteriological water standards; and consumer complaints about water quality.

Domestic Sewage Disposal and Safe Use of Reclaimed Sewage—Evaluates sewage treatment and disposal and sewage reclamation and reuse projects to assess health protection and takes preventive, corrective, and enforcement actions. Recommendations are made to the State Water Resources Control Board and the nine Regional Water Quality Control Boards to ensure health considerations are reflected in water pollution control programs.

Recreational Water Supply—Guidelines, standards, and regulations are developed and technical assistance is given to local health departments and industry.

Shellfish Sanitation—Surveillance, sampling, and testing in shellfish growing areas are done and enforcement actions are taken to assure protection against shellfish toxin.

13.20 Vector Biology and Control

This element, with support from laboratory services, conducts surveillance and coordinates a statewide program to prevent or suppress vectors, hosts, and disease-reservoir animals of greatest health concern. Under guidance of the element, epidemiological, engineering, biological, and chemical methods and materials are used by governmental agencies and the private sector in disease and vector prevention and control.

1. Technical consultation, training, and assistance are provided in developing and conducting programs for vector prevention and control. The use of physical and chemical controls is overseen through cooperative agreement, including certification of pesticide applicators.
2. Surveillance of vectors and vector-borne diseases is accomplished by analyzing populations of major vector species and monitoring environmental conditions.
3. Emergency vector control, conducted to prevent imminent health hazards to the public, includes identifying the area of risk, recommending appropriate action, training personnel involved, overseeing the project, and evaluating control effectiveness.
4. Long range vector prevention, associated with new agricultural, residential, recreational, solid waste management or industrial developments, is accomplished by reviewing planning documents and making recommendations to eliminate environmental conditions which create situations conducive to vector production.

13.30 Radiologic Health

This element protects the people of California from the dangers of ionizing radiation and reduces unnecessary radiation exposure to workers and the public from the use of radioactive materials or radiation machines.

One position and $42,000 is proposed for elimination due to streamlining of duties as a result of increased span of supervision.

Radioactive Materials—Standards are developed and enforced for the use of radioactive materials and licenses are issued to persons/organizations whose training, facilities, and operating procedures are safe; inspections and surveys of licensees are done to assure that appropriate protection standards are followed; and environmental monitoring of radiation from sources such as nuclear powerplants is done to protect the public from uncontrolled releases of radioactivity. The Sanitation and Radiation Laboratory, the Department of Industrial Relations, and other public agencies assist the program.

X-Radiation—Inspections to enforce standards are conducted to assure radiation-producing machines are safely used and maintained in good operating condition. The Department of Industrial Relations and local contract agencies assist the program.

13.40 Food and Drug

This element performs, directs, and coordinates detection and control activities which protect consumers against adulterated, misbranded, or falsely advertised foods, drugs, medical devices, hazardous household products, and cosmetics. Legal and administrative remedies are used to gain compliance. Violations are adjudicated by courts or according to administrative procedures. The Food and Drug Laboratory, the Southern California public health laboratory, and the Microbial Disease Laboratory provide support by analyzing food and drug samples.

Seven and one-half positions and $248,000 in the Food and Drug Section are proposed to be eliminated due to reduced workload and increased supervisory span of control.

Food Control—Enforces statutory provisions pertaining to the manufacture, storage, distribution, sale, labeling, and advertising of foods in California; and regulates 12,000 manufacturers and 50,000 retailers. Specific activities include: monitoring industry, conducting industry surveys for new technology, industry surveillance, industry education, chemical and microbiological analysis of raw and finished products, and review and investigation of consumer complaints. Processors of bottled water, olive oil and shellfish, frozen food locker plants, and cold storage plants are licensed.

Drugs, Cosmetics and Product Safety Control—Assures that intrastate manufacturers produce safe and effective drugs through annual licensing and inspection. Consumer complaints are investigated and marketed products are monitored. All new drugs and devices are subjected to a preclearance review procedure to eliminate the dangers of marketing untested, unproven drugs and devices. The program works with the Federal Food and Drug Administration.

Medical Device Control—Assures that manufacturers produce safe and effective medical devices through annual licensing and inspection of firms. Consumer complaints are investigated and medical devices are routinely monitored via a sampling, testing, and label review program. All new devices are subjected to a preclearance review procedure to eliminate the dangers of marketing untested, unproven devices. The program works with the Federal Food and Drug Administration.

Cannery Control—Prevents outbreaks of botulism in commercially canned foods. Rigid control is maintained by licensing and daily inspecting the operations and products of 125 canneries with an annual production of 100 million cases of low-acid foods. The program develops official thermal processes, examines daily production, and reviews labels.

13.60 Local Environmental Health

This element assures that local health departments and state institutions maintain an environment which is free of disease and hazards through local environmental health program development, environmental health inspections of state institutions and small water system surveillance.

One position and $49,000 in the local Environmental Health Section is proposed to be eliminated due to streamlining of duties and increased work efficiencies within the section.

Local Program Development—Development, planning, and implementation of local environmental health and toxic substances control enforcement programs. Develops standards and procedures to abate loud noise in communities throughout the State, provides training and technical assistance to other State agencies and local noise abatement officials, and conducts health studies and tests to assist in the mitigation of unnecessary noise. Administers a sanitarian registration program to assure that persons practicing environmental health meet minimum qualifications of education, training, and experience necessary to address environmental health issues. Provides the State's expertise in environmental housing issues as they relate to health.

Environmental Health Surveillance of State Institutions—Provides routine environmental health surveillance of state institutions and training of institution staff to assure that a safe and healthy environment is maintained for inmates, wards, patients, and employees in these institutions.

Small Water Systems Surveillance—Inspection and enforcement of drinking water standards for the 10,500 small water systems in the state.

20 COMMUNITY HEALTH SERVICES

Program Objectives and Description

This Program promotes and integrates personal health services programs at the community level, with a focus on services to individuals or populations in need of special programs and on medically underserved populations and geographic areas. The Program funds, monitors and evaluates community personal health services delivery projects and assists in stabilizing the health care operations of community clinics and free clinics through a grant-in-aid program mandated by Ch. 1186/79.

Authority

Health and Safety Code, Chapter 2, Sections 150–155, 190–194, 248–271, 275–284, 288–289, 289.7, 290–293, 300–303, 310, 320–324.5, 325–327, 340–348; Chapters 1389/78, 1066/78, 912/80, 1490/82.
Welfare and Institutions Code, Section 14000, 14103.8, 14105, 14131 and 14500.
Social Security ACT, Sections 1102 (42 U.S.C. 1302), 1902(a)(44) and 1905(a)(4)(B).
California Administrative Code, Title 17, Chapter 4, Sections 6800–6874; Title 22, Sections 51340 and 51532.

20.70	Public Health Enhancement	–	–	87.5	–	–	16,132

20.10 Family Planning

The goal of this element is to make available to citizens of childbearing age, contraception, sterilization and infertility information and education services to provide a means by which people may determine the number, timing, and spacing of their children. Additional goals are to reduce the incidence of maternal and infant deaths and to improve maternal and infant health by promoting the health and education of potential parents through information, counseling, and preventive services.

Publicly supported family planning services are provided to persons who voluntarily request such services and who meet eligibility requirements. All patients must be provided full information on all methods of birth control, including complications and side effects, so as to make an informed and voluntary choice of method. A multidisciplinary professional family planning staff is involved in defining family planning needs, planning and initiating service delivery programs, medical standard setting, providing consultation and technical assistance to family planning providers, managing a statewide family planning/sterilization reporting system, establishing and evaluating programs of professional education and training, and coordinating family planning services and related programs conducted or administered by other state agencies.

Family planning services are provided by more than 180 public and private nonprofit agencies contracting with the Department of Health Services. Each of these contract agencies must provide services in accordance with standards specifying the content and quality of available services and facility and staffing requirements.

The Budget Act of 1983 reduced Family Planning local assistance by $9.5 million. A corresponding unallocated state operations reduction of $458,000 was implemented by deleting 9.0 positions.

One of the main thrusts of this administration is that government services are most effectively delivered if those closest to the recipient have sufficient flexibility to meet the special needs of individual communities. To accomplish this there must be a major change in the involvement of the state bureaucracy in programs. Those at the state level must become less involved in the day to day process of providing services and limit their concerns to assuring that the overall goals of these programs are met.

As part of this policy the administration will be supporting legislation to transfer basic responsibility for family planning to local government. This transfer will allow local governments more flexibility in meeting their community needs and therefore increase the effectiveness of this program. To assist in this transfer and to provide local government with the ability to expand in areas on high need an augmentation to the level contained in this budget will be included in the proposed legislation. In addition the $445,000 saved by the elimination of the twenty-four and one-half positions currently administering this program is proposed for inclusion in the local funds in the budget.

* Dollars in thousands

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

20.20 Maternal and Child Health (MCH)

The objectives of this element are to reduce and prevent maternal, infant, and childhood morbidity and deaths; and to provide maximal nutrition for mothers, infants, and children.

Three positions and $172,000 in the Maternal and Child Health Section are proposed to be eliminated by increasing the span of supervision in this program.

The element includes the following components:

Maternal and Infant Health—The goal of this component is the improvement of pregnancy outcome and the quality of infant care. A multidisciplinary professional perinatal staff is involved in defining perinatal needs, standard setting, providing consultation with perinatal care providers, regionalizing comprehensive perinatal care including the development of high risk perinatal centers and alternative birthing centers, administration of two infant medical dispatch centers for aiding the transport of high risk mothers and infants and a statewide program for sudden infant death syndrome.

Maternal and Child Health Regional Operations—This unit provides for the distribution and monitoring of allocations for perinatal services funded at the state level and federal MCH Block Grant funds which have not been allocated to CCS. The priorities for MCH Block Grant expenditures are perinatal care and integration and coordination of Maternal and Child Health Services. Project proposals are received, evaluated, and funded each year and staff act as liaison and consultants to county health departments and local health agencies.

The Budget Act of 1983 reduced Primary Care Grant local assistance by $650,000 ($200,000 in Rural Health). A corresponding unallocated state operations reduction of $27,000 was implemented by deleting 0.5 position. *This one-time reduction was necessary to high priority needs in 1983–84. This budget proposes to restore this funding to continue to assist clinics experiencing financial difficulty.*

Women, Infant and Children (WIC) Supplemental Food Program—This is a federally funded nutrition program for low income populations determined to be at risk of developing nutritional deficiencies. Vouchers redeemable for specified foods are distributed and consumer education is provided as complements to prenatal and pediatric health care services. Contracts are written with local agencies that perform physical assessment of pregnant women and children, under the age of five years, and distribute food vouchers. While administered by this element, the WIC program is budgeted in program 90, Special Projects.

All functions within the Maternal and Child Health element will be merged into the Public Health Enhancement Program (PHEP) element which is proposed for implementation January 1, 1985. 13.0 positions will be utilized to establish the MCH component and 1.0 position will move to the Program Enhancement component. The current MCH Branch office of 3.0 positions will be transferred to form the PHEP Branch office. The Primary Care Clinic function and 0.5 position will be transferred to the MCH component. The balance of 39.5 positions will terminate December 31, 1984 and their associated state resource costs will be transferred to local assistance via the PHEP.

Summary of Maternal and Child Health Services

20.30 California Children's Services

Children with severe physically handicapping conditions whose families are not able to pay for all or part of the care they require in order to correct, ameliorate or eliminate handicaps are helped through California Children's Services (CCS). CCS is a joint state-county program that provides comprehensive medical and related services. Services provided under this program are diagnosis, treatment and therapy. Each year in California an estimated 19,000 children are born with birth defects which endanger their lives or could cause them permanent disability. CCS serves these children and several hundred others each year who are severely burned, paralyzed or suffer other severe injuries, poisoning or are disabled by infectious diseases. Children who are enrolled in the Medi-Cal Program and have a severe disability are cared for by CCS under a cooperative arrangement with Medi-Cal. Families able to pay part of the cost of care are required to do so, based on their incomes and state income tax liabilities.

Included in this element is the Genetically Handicapped Persons Program, which provides medical care to Californians with the following genetic conditions: hemophilia, cystic fibrosis, sickle cell disease, Huntington's disease, Joseph's disease and Friedreich's ataxia. Program services include: preventive care, out-patient and in-patient treatment, surgery, blood and blood derivatives, purchase of equipment and physical and other rehabilitative therapy. Care is provided through centers that specialize in treating these conditions. Because each of these conditions can be catastrophically costly, assistance with medical costs makes it possible for many to remain in the work force and support themselves and their families.

The program services are funded through a variety of sources including general fund appropriations, Medi-Cal and other federally funded programs, private health insurance and client repayments. Clients are required to repay all or part of the cost of care according to their incomes and their state income tax liability.

The budget proposes to fund a current year caseload increase of $4 million by using one-time federal funds available in 1983–84. For 1984–85 caseload increases will be funded by using $4.1 million General Fund and $5.2 million in Preventive Health and Health Services federal funds and federal "Jobs Bill" monies.

One clerical position and $24,000 in the Genetically Handicapped Persons Program is proposed to be eliminated due to the streamlining of duties within this program.

Summary of Services to Children

	82–83	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

* Dollars in thousands

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

20.40 Long Term Care and Aging

This element develops state policies, activities and programs which promote health in older adults and further the development of a community based comprehensive system of long term care to ensure that elderly and impaired adults receive care while maximizing independence. This element also administers the Adult Day Health Care (ADHC) program.

ADHC became a permanent licensure category and Medi-Cal benefit in January 1983. Primary objectives are to restore or maintain optimal capacity for self-care to frail elderly and impaired adults and to prevent inappropriate, premature, or personally undesirable institutionalization in long-term care facilities. These objectives are met through a day program of health, therapeutic, and social services provided in an ADHC Center. There are 30 licensed centers in the state. Legislation has provided start-up funding for new ADHC centers. Although this element is functionally located in the Community Health Services Division, local assistance costs are included in the Medical Assistance Program as ADHC is a Medi-Cal benefit.

One position and $22,000 in the Long Term Care and Aging Section is proposed to be eliminated since the accounting functions previously performed by this position can be absorbed within remaining resources.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	13.5	12.9	12	$846	$1,048	$718
General Fund				*561*	*709*	*359*
Federal Trust Fund				*285*	*339*	*359*

20.50 Child Health and Disability Prevention (CHDP)

This element carries out State statutory requirements aimed at reducing the incidence of preventable physical and mental illness and disability among California's children and youth. CHDP is administered and funded at the State level with local health departments responsible for carrying out direct activities, which include case management, outreach, health education, follow-up, provider recruitment, and support services such as assistance with transportation and medical appointment scheduling. CHDP includes: the federally mandated EPSDT requirements for Medi-Cal eligible children and adolescents from birth to age 21; preventive health assessments for certain categories of non-Medi-Cal eligible children; and monitoring the first grade entry program which requires that all children entering the first grade (or Kindergarten) have a certificate of health examination or a waiver on file at their school. A health assessment consists of a health history, physical examination, developmental assessment, nutritional assessment, dental assessment, vision and hearing tests, a tuberculin test, laboratory tests, immunizations, health education, and referral for any needed diagnosis and treatment.

Children eligible for services from this program include 1.5 million Medi-Cal eligible children and youth and 166,000 non-Medi-Cal eligible children. In Fiscal Year 1983–84 approximately 700,000 health assessments will be provided through this program.

Three positions and $106,000 in Child Health and Disability Prevention are proposed to be eliminated due to a decreasing workload and a corresponding reduction of the planning and development in this program.

With the proposed implementation of the Public Health Enhancement Program on January 1, 1985, twenty-five positions providing EPSDT claims processing activities will transfer to the new Child Health Information and Claims component. One position will return to the Genetic Disease element for Sickle Cell/CHDP coordination and 12.0 positions will be transferred to the PHEP element to form the Program Enhancement component effective July 1, 1984. The balance of 28.0 positions will terminate January 1, 1985 with their resources transferred to local assistance.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	61.4	63.7	–	$11,661	$11,039	$5,649
General Fund				*9,758*	*8,879*	*4,497*
Federal Trust Fund				*1,903*	*2,160*	*1,152*

20.60 Genetic Disease

This element reduces and prevents disorders having a hereditary or genetic basis by early detection, public and professional education, preventative interventions and counseling.

Genetic Education and Counseling provides carrier screening and counseling for Tay Sachs and sickle cell disorders, a program for prenatal detection of genetic disorders and general genetic counseling. The program monitors Rh hemolytic disease of the newborn.

Newborn screening administers a program that screens all newborns for three preventable causes of mental retardation: phenylketonuria, galactosemia and hypothyroidism using contract laboratories and organized follow-up to ensure complete and accurate testing.

Five positions and $73,000 are proposed to meet workload increases in the Genetic Disease Testing program.

Fourteen and one-half positions limited-term to June 30, 1985 and $1,263,000 from the Genetic Disease Testing Fund are proposed to implement the Neural Tube Defects program. The department is currently performing a workload evaluation on the entire Genetic Disease Testing program to be completed this Spring. When this evaluation is completed, permanent positions will be proposed.

Three positions were established on a limited term basis effective July 1, 1983 to meet increased workload for resolution of disputed billed but unpaid invoices for fees charged to persons requesting diagnostic screening for genetic diseases. The positions are due to expire June 30, 1985.

The Newborn Screening program is supported by a fee of $24 charged to each person receiving services. To initially implement the program, however, a loan was provided from the General Fund to be repaid from the fees deposited into the Genetic Disease Testing Fund. The outstanding balance of $1.2 million will be repaid during 1983–84.

Effective July 1, 1983, under an approved reorganization plan, this component was separated from the Maternal and Child Health element and is now shown as a separate element.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	20.8	23.2	42.1	$6,498	$4,175	$5,750

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

20.70 Public Health Enhancement

The 1984–85 Budget proposes the establishment of the Public Health Enhancement Program (PHEP) effective January 1, 1985.

The PHEP program will transfer public health local assistance funding to local government. Local government, which is closer to and more responsive to the people, should be given more control of programs which are delivered to the people under their jurisdiction. To ensure that the counties will be able to meet changing individual needs, it is important that they be given increased flexibility in assuming control of the proposed programs.

The budget proposes to transfer to the counties the applicable state and federal local assistance funds appropriated by the Legislature. In addition, these local assistance funds will be enhanced with the savings of $852,000 realized in state support when the transfer of responsibility for administration occurs. The position changes associated with establishment of this element are as follows: net reductions of 11.0 in Preventive Medical Services, 28.0 in Child Health Disability Prevention, 39.5 in Maternal and Child Health, and 4.7 in administrative units; position transfers of 25.0 from Child Health Disability and Prevention to form the new Child Health Information and Claims component, 1.0 from Child Health Disability and Prevention back to Genetic Disease to continue Sickle Cell coordination with county CHDP programs, 12.0 from Child Health Disability and Prevention to the new Program Enhancement component, 1.0 from Maternal and Child Health to the Program Enhancement component, 13.0 from Maternal and Child Health to form the new Maternal and Child Health component. While not part of the proposed Public Health Enhancement Program allotments for local government, the existing MCH Primary Care Clinic's local assistance program and 0.5 associated staff support will be transferred to this element for administrative purposes.

The objectives of this element are to reduce and prevent maternal, infant and childhood morbidity and deaths; provide maximal nutrition for mothers, infants, and children; reduce the incidence of preventable physical and mental illness and disability among California's children and youth; promote dental disease prevention; provide preventable disease control through immunization; and provide nursing home care for the aged.

To meet these objectives the element contains the following components:

Program Enhancement—administer the Public Health Enhancement Program through which available state and federal funds will be allocated to all county governments. County governments, in turn, will be permitted to subcontract with cities, special districts, or private contractors (i.e., community and free clinics) to provide services. They will also have the option of joining with other counties to contract for or provide services on a multi-county basis. The five programs included in the PHEP are:

- *Child Health and Disability Prevention (excluding EPSDT)*
- *Children's Dental Disease Prevention*
- *Immunization Assistance (excluding $371,000 and a core staff for emergency vaccine preventable disease control)*
- *Preventive Health Care for the Aging*
- *Maternal and Child Health*

Thirteen positions are proposed to be continued to allocate funding to counties and to administer the EPSDT program including application, evaluation, reports, technical assistance and compliance with Federal and State requirements.

Maternal and Child Health—maintain the minimum level of state activities necessary to provide services in the following areas:

- *Pilot Projects of statewide or regional nature*
- *Regionalization of Perinatal Services*
- *MCH Perinatal Dispatch System*
- *High Risk Infant Follow-up*
- *MCH Data Base*
- *Hearing Conservation Program*
- *Sudden Infant Death Syndrome Program (SIDS)*

Thirteen positions are proposed to continue to administer regionalization of perinatal services, infant dispatch, high risk infant follow-up, maternal and child health data base, hearing conversation and the Sudden Infant Death Syndrome program.

This component will also administer the existing primary care clinic local assistance program with one half-time position. In addition it will oversee administration of the federally funded Women, Infant and Children (WIC) Supplemental Food program. This is a federally funded nutrition program for low income populations determined to be at risk of developing nutritional deficiencies. Vouchers redeemable for specified foods are distributed and consumer education is provided as complements to prenatal and pediatric health care services. Contracts are written with local agencies that perform physical assessment of pregnant women and children, under the age of five years, and distribute food vouchers. While administered by this element, the WIC program is budgeted in Program 90, Special Projects.

Child Health Information and Claims—process claims for the federally mandated EPSDT requirements for Medi-Cal eligible children and adolescents from birth to age 21. Twenty-five existing CHIC positions will be transferred to maintain this function.

25 COUNTY HEALTH SERVICES

Program Objectives and Description

The County Health Services Program provides financial support to local health agencies, county hospitals and facilities, and indigent care programs. The Program receives and reviews annual plans and budgets describing each county's health service programs, assures that critical health services are maintained and negotiates agreements authorizing state assistance to share in uncompensated county costs. It also analyzes and prepares recommendations on county health service issues, monitors hearings concerning the closure, lease, or sale of county facilities, and develops new programs in the area of county health services. The Program prepares and submits reports on county health services to the Legislature.

25.10 County Health Services

The County Health Services element has responsibility for managing a fund that provides support to local health agencies, county hospitals and facilities, and indigent care programs. The element annually reviews each local health agency's plan and budget describing its health programs to assure that essential health services are maintained. In addition, the element negotiates agreements with the counties, analyzes and prepares recommendations on county health service issues, and develops new programs in the area of county health services.

Under Section 1157 of the Health and Safety Code, counties with a population under 40,000 can either contract with the department for public health services or conduct their own public health services. The budget proposes to eliminate four positions from the Rural Health Division to allow Tehama County to conduct its own county health program. $209,000 will be transferred from Rural Health to be allocated to the county for this purpose.

Three positions and $112,000 from the County Health Services Fund are proposed to be permanently established through redirection to recoup savings in county health services funds.

One position, limited-term to June 30, 1985 and $212,000 is proposed to continue final monitoring of the AB 3245 Capital Improvement program.

Two positions and $61,000 in the Local Public Health Assistance Unit are proposed for elimination due to reassignment of staff to minimize duplication.

The element administers the allocation of Special Needs and Priorities (SNAP) funds which are savings in the County Health Services Fund. The total amount of available SNAP funds is limited each year to an amount equal to one quarter of one percent (0.25%) of the County Health Services Fund and is allocated through an RFP process according to categories established by the Legislature in the Budget Act.

The County Health Services Program administers the federal portion of the Preventive Health Services Block Grant for local public health agencies and also the state public health subvention. Mandated review of all public health statutes and assurances that local public health agencies comply with applicable federal and State standards are conducted. The Program administers the Department's preventive medicine residency and public health nurse certification program.

Chapter 323, Statutes of 1983, amended the Welfare and Institutions Code to provide that certain savings in the County Health Services Fund beyond those required for Special Needs and Priorities must be deposited in the Local Health Capital Expenditure Account and must be available as financial assistance to local jurisdictions for capital expenditures involving local health facilities.

Local Health Capital Expenditure Account, County Health Services Fund				*1,386*	*204*	*212*

25.50 Medically Indigent Adults

The element administers the transfer of State responsibility for serving the health needs of Medically Indigent Adults (MIA) population to all counties at a lower level of funding than had been expended by the State. Counties under 300,000 population may elect to contract back with the Department to carry out MIA responsibilities; the County Health Services Program administers the Contract Medical Services Program (CMSP). The County Health Services Program also administers a program for counties to claim federal refugee resettlement funds for medical services.

25.60 Los Angeles County Medical Assistance Grant

Chapter 1594, Statutes of 1982 authorized the transfer of $200 million which otherwise would have been paid to Los Angeles County from the County Health Services Fund, to the Medi-Cal Program to pay bills in process ("pipeline" claims). Chapter 1594 also authorized that $200 million be appropriated from the General Fund to a special reserve account for Los Angeles County and that these funds be transferred to Los Angeles in June 1985. Additionally, Chapter 1594 requires that the maximum allocation of County Health Services Funds available to Los Angeles County during 1983–84 and 1984–85 fiscal years must be paid to Los Angeles County during July of those fiscal years. *The expenditure for the 1984–85 transfer to LA County is shown in the Los Angeles Medical Assistance Grant program (9660).*

40 RURAL HEALTH

Program Objectives and Description

The objective of the Rural Health Program is to provide public health services and ambulatory health care services to persons, primarily in rural areas, who would otherwise have little or no access to such services. The program employs public health nurses, sanitarians and various classes of primary care providers, including physicians and nurse practitioners, to provide direct services. The program also provides additional services through contracts with local agencies.

Authority

Health and Safety Code, Sections 429–429.1, 429.30–429.32, 1157, 1185–1188.7, 1339.

40.10 Rural Health

The Rural Health Program manages a system of public health and primary health services.

The Rural Health Division has reassigned staff to minimize duplication of its administrative functions to achieve greater efficiency. As a result, eight positions and $280,000 are proposed to be eliminated.

Public Health Services (Contract Counties)—Thirteen California counties, each with a population less than 40,000, contract with the state to provide basic public health services. Basic preventive health and disease control services are provided by state public health nurses and sanitarians. A part time local health officer, responsible for the day-to-day activities of the local staff, is appointed by the county board of supervisors. Local health services are provided in close cooperation with county boards of supervisors. Program emphasis varies among counties in accordance with local needs, facilities and interests. This element also operates the Child Health Disability Program and Family Planning Program in these counties.

Under Section 1157 of the Health and Safety Code, counties with a population under 40,000 can either contract with the department for public health services or conduct their own public health services. The budget proposes to eliminate four positions to allow Tehama County to conduct its own county health programs. $209,000 will be transferred to County Health to allocate to the county for this purpose. Two positions are also being eliminated to reflect the Amador County cash-out in 1983–84 F.Y.

Rural Health Development Services—Ch. 1331/78 permanently established a program of health services to underserved rural areas. Funds are awarded to underserved rural communities through contracts with non-profit agencies. Funds are used to provide a wide range of health services. These funds have resulted in the establishment of a system of primary health care centers in locations where services were previously limited or non-existent.

Primary Health Services—Ch. 1332/79 established a 4-year demonstration program to provide technical assistance to rural hospitals and test the concept of swing beds and other diversified services as a strategy for preserving hospital services in rural areas. This program was made permanent by Chapter 1010, Statutes of 1982 (SB 1725).

40.20 Indian Health

California, with 15 percent of the national total, has the largest Native American Indian population of any state in the nation. The 200,000 plus Native American Indians in California have high rates of diabetes, hypertension, infant mortality, dental disease, alcoholism, cardio-vascular disease, and deaths and injuries resulting from accidents. Access to health care services comes primarily from Federal and State funded Indian health clinic programs.

This element provides financial and technical assistance to clinics serving Native American Indians in order to improve their health status through the provision of comprehensive primary medical and dental care services.

One position and $26,000 in Indian Health Services is proposed for elimination due to the increased span of supervision and greater efficiencies to be achieved in these areas.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	11.4	12.3	11.4	$3,273	$3,328	$3,306

40.30 Farmworker Health

Approximately 1.5 million seasonal and migrant farmworkers and their families have primary care access problems. Farmworker families face a shortage of care, and confront health and environmental hazards linked to farmwork and low income. Hazards include high rates of work injuries and environmental occupational disease, such as exposure to pesticides and infant mortality.

The Farmworkers Health Services Section provides consultation and health and nutrition education to clinics serving farmworkers, studies the health needs of farmworker families, and seeks to increase the pool of bilingual/bicultural health care providers. In addition, the section contracts with clinics providing primary health care.

One position and $36,000 is proposed for elimination due to increased span supervision.

FOOTNOTES

[1] Appropriation to cover local assistance and state administration and fiscal intermediary costs as follows:

	1983/84	1984/85
Total Appropriation	477,434	477,434
State Administration	−775	−790
Fiscal Intermediary	−397	−397
	476,262	476,250

[2] Reimbursement from Health Care Deposit Fund for county EPSDT administrative costs.

[3] Scheduled $2,365 revision, balance is result of proposed trailer bill language to revert unexpended balance from 1981/82.

[4] Includes $2,113 reappropriation from 1981/82 CHDP Budget Act appropriation to cover program conversion from cash to accrual basis of accounting.

[5] Family Repayments.

[6] Chapter 478/82 (Adult Day Health Grants).

[7] Chapter 1208/83 (Adult Day Health Grants).

[8] Savings to CMSP Operating Reserve.

[9] Per Chapter 10/83.

[10] From 1982/83 Estimated Actual Recoupments.

[11] From 1983/84 Estimated Actual Recoupments.

[12] Additional $22 transferred to State Controller for support of Agency Block Grant Task Force per Chapter 1343/82. Further, additional one percent of Annual Federal MCH Block Grant award withheld for audit purposes: 1982/83 = $181, again per Chapter 1343/82.

[13] Includes $22 for Agency Block Grant Task Force and $181 for one percent audit withheld per Chapter 1343/82. For 1984/85 one-half of these amounts are included in the Public Health Enhancement Program.

[14] Includes additional $209 for "cash-out" of Tehama County as its population has exceeded 40,000 and is no longer eligible for state support from the Rural Health program.

[15] Authorization for July 1, 1984 to December 31, 1984 only. Balance of annual budget is included in Public Health Enhancement Program (PHEP) proposed for implementation January 1, 1975.

[16] Authorization for July 1, 1984 to December 31, 1984 only. With PHEP implementation January 1, 1975 all county EPSDT administration costs will be charged directly to the HCDF.

[17] Proposed for implementation January 1, 1985 with funding transfers as follows:

	TOTAL	GF	FF
• Preventive Health Services to Aged	$608	$608	–
• Dental Health	750	750	–
• Immunization Assistance	500	500	–
• Infant Dispatch	108	108	–

[18] Primary Care Clinics is not included within the proposed Public Health Enhancement Program allotments but will be administered by the new MCH Section scheduled to be established within PHEP.

[19] Family Planning is not included in the Public Health Enhancement Program (PHEP) allotments but will be administered by Family Planning core staff to be established within PHEP, effective July 1, 1984. Included in the $29,155,000 is the $445,000 Family Planning support operations transfer to local assistance.

[20] Includes a 2 percent population adjustment ($994,000) and 2 percent cost-of-living adjustment ($7,378,000).

[21] CHDP Estimate projects a $574,000 General Fund savings and an increase to reimbursements of $187,000.

[22] GHPP Estimate projects a $398,000 program increase in Fiscal Year 1984–85. Also includes 2 percent cost-of-living adjustment ($115,000).

[23] CCS Estimate projects a shortfall of $4,036,000 in the current year. This shortfall will be funded with uncommitted federal funds that were earmarked for CCS, if needed in the current year.

[24] CCS Estimate projects Fiscal Year 1984–85 expenditures of $52,534,000 which reflects an increase of $9,212,000 ($4,144,000 General Fund increase + $5,218,000 FF increase + $150,000 decrease to Family Repayments). Also included is a 2 percent GF cost-of-living adjustment ($837,000) for net total program expenditures of $53,371,000.

[25] Reflects a $650,000 increase to the primary care clinic program. $450,000 is scheduled in Community Health Services Division and $200,000 in the Rural Health Division.

* Includes 2 Percent Cost-of-Living Adjustment

50 MEDICAL ASSISTANCE

Program Objectives and Description

The Medical Assistance Program is responsible for the overall administration of Medi-Cal, California's Medicaid Program. The program promotes the health of citizens of the State by making available publicly financed health care to low income people. The goal is to insure that medically necessary health services are delivered on an equitable basis to eligible persons at the lowest cost to government.

Functionally, Medical Assistance is comprised of four Divisions: Medi-Cal Policy, Medi-Cal Operations, Fiscal Intermediary Management, and Organized Health Systems:

MEDI-CAL POLICY
- Eligibility Branch
- Benefits Branch
- Rate Development Branch

MEDI-CAL
- Field Services Section
- Recovery Section

FISCAL INTERMEDIARY MANAGEMENT

ORGANIZED HEALTH SYSTEMS
- Program Development Branch
- Program Management Branch

In the current year, no General Fund deficiency is estimated in the Medi-Cal program—shortfalls of $7 million in medical care and services and $.7 million in fiscal intermediary services have been offset by a $2.5 million savings in county administration and $5.2 million of recoupments. Additional recoupments of $33.7 million are anticipated as revenue to the General Fund.

The medical care and services expenditure increase is primarily attributable to the following:

1. Court action (Bagley v. Dawson) delaying the effective date of the other real property changes enacted in Ch. 328 and 1594, Statutes of 1982, and a reduction in the estimate of persons affected ($34.7 million).

2. Approval of liver transplants as a Medi-Cal benefit for a narrowly defined group of young patients and for eligibles with end stage liver disease (Ch. 1173/83–SB 72) ($2.1 million).

3. Denial of Federal waiver for implementing the drug dispensing fee copayment and disapproval of the statutory changes proposed to facilitate the rate adjustment in Ch. 323/1983 negating the 9.6 percent fee reduction savings reflected in the Budget Act of 1983 ($3.3 million).

4. Court action (Beltran v. Myers) requiring retroactive benefit payments for persons denied eligibility prior to 1981 because of property transfer restrictions ($2.7 million).

5. Exhaustion of Federal refugee funds for costs prior to October 1, 1982 and a pending Federal audit on these periods delaying recovery of the General Fund amounts advanced ($12.7 million).

6. Court action (Lynch v. Dawson) delaying implementation of the changes in qualifying persons affected by the elimination of the Special Income Deduction, under the Title II Disregard program (−$2.3 million).

7. Delay in cash flow acceleration for prepayments to county organized health systems pending implementation in San Mateo and Contra Costa Counties (−$6.1 million).

8. Increase in estimated savings as a result of refinements in the estimating techniques and availability of additional data on hospital contracting (−$9.0 million).

9. Lowering of final capitation rates originally estimated for contract with the California Dental Service primarily due to implementation of new utilization control criteria (−$6.5 million).

10. Various cost and savings changes including caseload and utilization changes and repricing of other program policy changes (−$24.6 million).

Additionally, it should be noted that no Federal sanctions beyond the July through September 1983 quarter for eligibility error rates have been reflected. However, additional sanctions are expected for subsequent quarters and will be addressed in the May 1984 Revise.

The expenditures reflected for the Medi-Cal Program are the result of the statistical and program analyses comprising the November 1983 Medi-Cal Estimate. This Estimate will be updated in May 1984 based on available information. Accordingly, the expenditure projections reflected here will be refined in the May 1984 Revise.

50.10 Eligibility

Persons become Medi-Cal beneficiaries through different eligibility processes. Persons who receive cash grant public assistance through the Aid to Families with Dependent Children Program (AFDC) or the Supplemental Security Income/State Supplemental Payment program (SSI/SSP) are mandatory eligibles under Federal law and automatically eligible for "no cost" Medi-Cal. Other persons applying for "Medi-Cal only" participate in a different application process to qualify under the Medically Needy or Medically Indigent Children categories, federally optional eligibility categories. In these programs, persons can have a "share of cost", a "deductible" assessed monthly to those who have income above a fixed level which includes "maintenance need" expenses, job-related expenses, child care expenses and other expenses. In these cases, persons are required to contribute to the cost of their medical care prior to being granted Medi-Cal eligibility for a given month.

AFDC and Medi-Cal eligibility determinations are made by county welfare departments. SSI/SSP eligibility is determined by the Federal Social Security Administration.

The eligibility branch is responsible for: assuring Medi-Cal eligibility criteria and processing rules are in conformance with Federal and State statutes and regulations; issuing eligibility rules and forms to county welfare departments; assuring that eligibles receive their monthly Medi-Cal identification cards in a timely manner; ensuring accuracy in eligibility determinations; and assuring that Medi-Cal eligibles have an opportunity to choose an organized health system form of health delivery when eligibility is determined.

The eligibility process is controlled through the following major activities: revising regulations, procedures and forms to reflect eligibility changes due to federal and state law; developing and maintaining statewide quality control and corrective action plans, and developing, implementing and monitoring county specific action plans; recommending actions, including fiscal sanctions, for counties which fail to cooperate in corrective action efforts; monitoring county eligibility operations, improving the accuracy of eligibility determinations, and providing training in counties with high error frequency rates when regulatory changes occur; establishing and monitoring, by the Administration Division, annual allocations for county eligibility determination costs, and setting performance standards for county workload; monitoring, by the Audits and Investigations Division, to reduce eligibilty determination errors and to assure that the accuracy of eligibility determinations is at a level to preclude federal sanctions; evaluating current Medi-Cal eligibility and eligibility card production data; monitoring the Medi-Cal Eligibility Data System that provides on-line eligibility information and system update capability in conjunction with county welfare departments.

Seventeen positions and $368,204 in the Medi-Cal Policy and Standards Division are proposed for elimination. Sixteen of the positions can be reduced as a result of automating the share of cost processing function under the new Fiscal Intermediary contract. Adjustments in clerical workload will facilitate the position reduction proposed within the Division Office.

50.11 Benefits

California offers a generous benefits schedule under the Medi-Cal Program including services which are federally mandated and many which are optional under federal requirements. The program covers physician services, hospital inpatient and outpatient services, physical, occupational and speech therapy, podiatry, optometry, chiropractic services, psychological services, prescribed drugs, laboratory, X-ray and radioisotope services, blood and plasma, hemodialysis services, long-term care facility services, adult day health care services, dental services, home health agency services, medical transportation, artificial eyes, artificial limbs and braces, hearing aids and audiology services, assistive devices and durable medical equipment, eyeglasses, family planning services, acupuncture services, and health examinations for persons under 21. The benefits element is responsible for policy development and recommendations regarding the scope, quality and methods of providing Medi-Cal benefits. The benefits element develops and implements regulations and procedures related to the scope and duration of benefits and the circumstances under which medical benefits will be covered. This includes the development of claims payment and prior authorization criteria, maintaining liaison with provider groups, overseeing quality control review of the medical policy aspects of claims processing and resolving at the third level beneficiary and provider appeals related to the denial or reduction of medical services.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

County funds				*100*	–	–
Other funds (Medically Indigent Adults)				*(−61,500)*	–	–

50.13 Rate Development

The Rate Development Branch establishes the provider payment schedule for covered services; conducts rate studies; develops and implements systems to constrain the rate of increase of Medi-Cal hospital inpatient costs and reimbursements; and develops capitation rates for pre-paid health plans, organized health systems, and at-risk pilot projects and special projects.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	37.6	34.8	31	$1,631	$1,740	$1,722

Federal Trust Fund				*733*	*885*	*876*

* Dollars in thousands

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

50.20 Program Management

As an alternative to fee-for-service, the department contracts with a number of health maintenance organizations and prepaid health plans. These plans provide a scope of Medi-Cal benefits on a capitated, at-risk basis for each person enrolled. The Program Management Branch administers and monitors these contracts and fiscal intermediary at-risk contracts, such as California Dental Service and the Redwood Health Foundations. An independent audit of prepaid health plans occurs through the Audits and Investigations Division which monitors quality assurance and financial viability.

Two positions and $43,104 in the Organized Health Systems Division are proposed for reduction due to consolidation of clerical workload activities within the Division.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	40.5	35.9	34.2	$318,595	$322,111	$375,284
General Fund				*159,036*	*164,207*	*190,815*
Federal Trust Fund				*159,559*	*157,904*	*184,469*

50.30 Utilization Control

Federal regulations governing the Medi-Cal program require that states control the use of services as a condition of continued Federal Financial Participation (FFP). Field Services Section activities related to utilization control include the direct operation of pre-service utilization controls through "prior authorization" of certain Medi-Cal services and monitoring the effectiveness of utilization controls applied to Medi-Cal services by other organizations including Professional Standards Review Organizations [PSROs], and the Short-Doyle/Medi-Cal Program, and negotiated hospital contracts.

Twenty positions and $688,590 in the Medi-Cal Operations Division are proposed for elimination. Fifteen of these positions are no longer needed and can be eliminated because of additional reductions in the prior authorization workload resulting from the transfer of Medically Indigent Adults to the counties and the establishment of county organized health systems. The remaining positions are engaged in utilization control and various support activities. These can be eliminated due to changes in the need for systems analyses, monitoring of the Short-Doyle/Medi-Cal Program, and administrative support.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	398.7	424.7	407.3	$19,705	$21,043	$21,247
General Fund				*7,939*	*6,523*	*6,598*
Federal Trust Fund				*11,766*	*14,520*	*14,649*

50.40 Health Recovery

The Recovery Section administers a program to collect money owed to the Medi-Cal Program from Medicare and insurance companies, and to recoup debts due from health and casualty insurance companies, providers and beneficiaries.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	217.6	221.4	221.4	$97,716	$100,228	$116,762
General Fund				*58,324*	*59,468*	*69,856*
Federal Trust Fund				*39,392*	*40,760*	*46,906*

50.50 Fiscal Intermediary Management

After a beneficiary has been treated by a fee-for-service provider, the provider bills the fiscal intermediary for payment. The department currently contracts with Computer Sciences Corporation to process claims according to policy established by the Department. The Department then requests the State Controller's Office to issue checks.

The Fiscal Intermediary Management Division ensures that the claims processing system meets all contract requirements, processes claims promptly and accurately, and provides accurate, timely management and utilization reports.

The Department has recently signed a new five-year contract through 1988–89 with the Computer Sciences Corporation for the claims processing of Medi-Cal claims. This contract is expected to save approximately $41 million over the life of the contract as compared to current contract costs.

9.5 positions and $312,705 are proposed for reduction in the Fiscal Intermediary Management Division. These positions can be eliminated through the consolidation of certain functions and reductions in workload in the areas of provider services, contract administration and operations analysis.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	93.3	113.2	84.5	$46,257	$43,987	$33,210
General Fund				*15,331*	*10,770*	*8,363*
Federal Trust Fund				*30,926*	*33,029*	*24,673*
Reimbursements				–	*188*	*174*

50.60 Program Development

The Program Development Branch develops new pilot projects to test the feasibility of alternative methods of financing or delivering existing medical benefits and new capitation contracts with organized health systems. The Branch will be reinitiating the Dental Contract Procurement Project to award the dental claims processing contract on a competitive basis during the latter part of the current year.

Six positions and $201,553 in the Organized Health Systems Division are proposed for elimination. These positions, which are assigned to the Quality Assurance Monitoring System, can be eliminated because the systems developmental work is essentially completed and the ongoing work will be assumed by other staff.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	36.3	36.8	31.4	$2,573	$2,736	$2,665

General Fund				*140*	*132*	*133*
Federal Trust Fund				*111*	*133*	*134*

BUDGET ASSUMPTIONS FOR THE MEDI-CAL PROGRAM

Significant assumptions upon which the 1984–85 budget is based:

1. Continuation of the Federal fund reductions enacted in the Omnibus Budget Reconciliation Act of 1981. Because Federal Medicaid legislation is still under consideration by Congress, the percentage reduction imposed during Federal fiscal year (FFY) 1984 has been assumed for FFY 1985. This assumption will be updated to reflect Congressional action in the May 1984 Revise.

Additionally, it should be noted that no Federal sanctions beyond the July through September 1983 quarter for eligibility error rates have been reflected. However, additional sanctions are expected for subsequent quarters and will be addressed in the May 1984 Revise.

2. Continuation of the savings provisions mandated in Chapter 328/1982 (AB 799) and Chapter 1594/1982 (SB 2012) for 1982–83 and extended in Chapter 323/1982 (AB 223) for 1983–84.

3. A non-elective abortions policy.

4. Increased cost savings from the negotiated hospital inpatient contracts.

5. No savings from the court settlement on peer grouping have been reflected at this time. However, information is expected to become available to facilitate a savings estimate in the May 1984 Revise.

6. Provider cost-of-living increases of two percent for most providers except hospital inpatient service providers who are reimbursed under contractual terms and conditions.

7. Full funding of cost-of-living adjustments (COLAs) which have been granted by the counties over the last three years. The effect of not funding these COLAs has been a reduction in the number of eligibility workers, which increases the potential for General Fund overpayments, higher quality control error rates and Federal sanctions.

8. Requirement for copayments for specific Medi-Cal services.

9. Increase from 217,710 in 1983–84 to 269,030 in 1984–85 for the average monthly enrollment in prepaid health plans.

The expenditures reflected for the Medi-Cal Program are the result of the statistical and program analyses comprising the November 1983 Medi-Cal Estimate. This Estimate will be updated in May 1984 based on available information. Accordingly, the expenditure projections reflected here will be refined in the May 1984 Revise.

[2] Includes $65,628,432 pursuant to Prov. 2 and 3, 4260-101-001, Ch. 324/83

Eligibility	$1,392,513
Benefits	63,631,971 (Includes 5,164,475 of Prov. 3)
Fiscal Intermediary	603,948

[3] Does not include $257,000 of Amount Payable from County Medical Services Program reflected under Preventive Health Services.
[4] Includes $51,821,328 pursuant to Prov. 2, 4260-101-001, Budget Act of 1984 (as proposed)

Eligibility	$1,641,732
Benefits	49,440,600
Fiscal Intermediary	738,996

55 LICENSING AND CERTIFICATION

Program Objectives and Description

The Licensing and Certification Program regulates licensed public and private health facilities throughout the State. These facilities include approximately 3,800 general acute care, psychiatric and chemical dependency recovery hospitals, clinics, intermediate care facilities, skilled nursing facilities, home health agencies, referral agencies, adult day care centers, intermediate care facilities for the developmentally disabled, intermediate care facilities for the developmentally disabled-habilitative, and primary care clinics. To accomplish this activity, the Program develops, implements and enforces health care standards and certifies all long-term care facilities that participate in Title XVIII (Medicare) and Title XIX (Medi-Cal) programs. The Licensing and Certification program maintains an inventory of health facilities; evaluates and reports on services and condition of facilities; cites deficiencies; approves plans for correction; issues, denies, or revokes licenses; and controls performance of other public agencies and agents under contract for these activities. Certain services are delegated to the State Fire Marshal and the Los Angeles County Health Services Agency under contractual agreements.

Eleven positions and $286,000 are proposed to be eliminated due to changing departmental needs and the reassignment of staff to minimize duplication of its administrative functions to achieve greater efficiency.

Nine positions and $351,000 are proposed to meet new and expanding workload associated with the review of California Medical Assistance Commission contracts, licensing of ICF/DD-H facilities, chemical dependency recovery hospitals and Short-Doyle Medi-Cal clinics.

60 AUDITS AND INVESTIGATIONS

Program Objectives and Description

The Audits and Investigations Program includes functions that are concerned with Medi-Cal client and provider fraud and abuse, internal and external audits, quality control, management and accountability of department programs, potential abuse of program expenditures or policies, and potential fraud in Medi-Cal and other department programs. This function, by reporting to the Director, operates independently of program operations and provides the public with a single focus for investigation of fraud and abuse.

Authority

Authorized by Welfare and Institutions Code, Division 9, Part 3, Chapter 7, Section 14,000, Title XIX of Social Security Act as amended.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

60.60	Multidiscipline Audits	42.4	42.2	41.3	1,940	2,394	2,431

60.10 Financial Audits

This element performs fiscal audits of institutional providers under the Medi-Cal program and contract providers under public health programs.

Twenty positions ($694,000) are proposed for audits of County Health Services Program (Ch 282/79-AB 8) expenditures. This will be the first time that the over $300 million allocated through the County Health Services Program has been audited since the program was initiated. The Department projects that these audits will result in the recoupment of up to $10 million annually.

Two positions and $75,000 of Reimbursements ($20,000 Reimbursements in 1983–84) are proposed to be added for audits of health facility financial data reported to the California Health Facilities Commission. This change is to be funded through an interagency agreement with the Commission in both the current and budget year.

Two positions are proposed for elimination as a result of redistribution of workload within the Branch.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	160.1	158.8	175.3	$7,290	$7,313	$8,333

Federal Trust Fund				*3,295*	*3,352*	*3,475*
Reimbursements				–	*20*	*75*

60.20 Investigations

This element investigates alleged provider and beneficiary fraud in the Medi-Cal program. A full investigation is made of complaints concerning possible commission of a crime or violation of a statute or regulation, particularly those violations that have potential for serious harm to a beneficiary, involve a significant amount of Medi-Cal or other funds, or show a repetitive pattern suggesting systematic abuse of the program. Investigations are conducted in full cooperation with law enforcement agencies. If provider fraud appears to exist, cases are referred to the Medi-Cal Fraud Unit in the Department of Justice for further investigation and possible prosecution.

Three positions are proposed for elimination as a result of redistribution of and reductions in the workload associated with support activities of the Branch.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	61.3	83	80.2	$2,803	$3,576	$3,655

Federal Trust Fund				*1,306*	*1,788*	*1,828*

* Dollars in thousands

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

60.30 Surveillance and Utilization Review (SUR)

This element performs postpayment reviews of services provided under the Medi-Cal Program to identify unnecessary or inappropriate health care use by providers and beneficiaries and excess payments, assess the quality of care and recommend and initiate program and administrative corrective action. These tasks are accomplished mainly by 7 review teams staffed with licensed medical, technical, administrative, and clerical support staff. The Beneficiary Utilization Review Unit reviews service profiles of eligibles suspected of overusing or abusing Medi-Cal benefits. Those found to be overusing services are issued "restricted" Medi-Cal cards, requiring prior authorization before obtaining the affected services.

Eight positions are proposed for elimination, two due to elimination of reviews determined to be non-cost effective; three due to transfer of MIA activities to the Counties; and three positions due to redistribution of workload throughout the Branch.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	94.4	89	82.6	$4,312	$4,638	$4,648
General Fund				*1,596*	*1,480*	*1,494*
Federal Trust Fund				*2,716*	*3,158*	*3,154*

60.40 Medi-Cal Quality Control

This element conducts the Federally required Medicaid Quality Control Program. A statistical sample of Medi-Cal eligibles is reviewed to test the validity of the eligibility/liability determinations, the claims payment process and third party liability/other health coverage recovery activities. The purpose of this review is to provide Department management with valid estimates of misspent Medi-Cal expenditures and analysis of the major problem areas and causes. In addition, efforts are directed at determination of county specific error rates relating to eligibility determination.

Six positions are proposed for elimination due to revision of existing systems, increases in workload standards, and redistribution of workload.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	51.8	52.7	47.2	$2,371	$2,515	$2,467
General Fund				*1,267*	*1,258*	*1,233*
Federal Trust Fund				*1,104*	*1,257*	*1,234*

60.50 Prepaid Health Plan Quality Evaluation

This element audits PHPs to assess the quality of health care provided, financial and administrative capabilities, and cost and utilization reports used in rate setting. The element also audits pilot projects, Adult Day Health Care providers, organized health system and health maintenance organizations.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	19.8	19.3	19.3	$882	$1,049	$1,098
General Fund				*390*	*423*	*440*
Federal Trust Fund				*492*	*626*	*658*

60.60 Multidiscipline Audits

This element is responsible for conducting audits of both financial and medical operations of acute care hospitals participating in the Medi-Cal Program and for post-payment review of pharmacies.

One position is proposed for elimination due to a redistribution of workload activities throughout the Branch.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	42.4	42.2	41.3	$1,940	$2,394	$2,431
General Fund				*843*	*951*	*953*
Federal Trust Fund				*1,097*	*1,443*	*1,478*

70 DEPARTMENTAL ADMINISTRATION

Program Objectives and Description

Departmental administration includes management, support and control services to departmental programs. Departmental administration includes the Director's Office, the Administration Division, and program division and branch offices.

Authority

Authority contained in authority references for other programs. Also, Sections 10,000–10,678, Division 9, Health and Safety Code.

70.01.010 Executive

The Director's Office includes the Director, the Chief Deputy Director, Deputy Directors and the following offices: Civil Rights, External Affairs, Legal Affairs.

The budget reflects the transfers of: the Office of Labor Relations from the Director's Office to General Administration, the Office of Regulations to the Office of Legal Affairs, the Offices of Public Information and Legislative Liaison to the Office of External Affairs, and the Executive Secretariat functions to the Executive Office. These transfers are consistent with an approved Department reorganization.

Seven positions $267,000 in the Director's office are proposed to be eliminated by increasing management efficiencies within the Department.

With implementation of the Public Health Enhancement Program on January 1, 1985, 0.2 positions within the Office of External Affairs and 0.2 positions within the Office of Civil Rights will terminate December 31, 1985 and their associated resource costs will be transferred to local assistance via PHEP allocations.

Summary of Director's Office Functions

	82–83	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

70.01.020 General Administration

The Administration component provides general administrative support services to departmental programs. Services include data systems development and maintenance, personnel management, training, recruitment, contract management, business management, cash management, accounting, budgeting, fiscal forecasting, collection and maintenance of statistical data, analytical support, and labor relations.

The Office of Labor Relations (70.10.092), Vital Statistics (11.20), Program and Information [Information and Planning Component (70.01.030)], and the County Administration Expense function were transferred to General Administration consistent with an approved Department reorganization.

As a result of various programmatic reductions due to increased management efficiencies, 48.4 positions and $1.5 million in related Administrative expenses are also proposed to be eliminated in the 1984–85 fiscal year.

As part of the proposed implementation of the Public Health Enhancement Program on January 1, 1985 the following positions will terminate December 31, 1984 and their associated resource costs will be transferred to local assistance via the PHEP allocations: Personnel Management, 0.5 position; Administrative and Business Services, 1.0 position; Contract Management, 0.4; Office Services, 0.5; Accounting, 0.4; Center for Health Statistics, 0.5. One associated Systems Support position will terminate April 1, 1985.

80 LEGISLATIVE MANDATES

Program Objectives and Description

This program reflects the cost of reimbursing local governments for (1) new programs and (2) increased level of existing services mandated on local entities by legislation.

Authority

The State is required to pay the cost of legislative programs mandated on local governmental entities by Ch. 1406/72 (SB 90), as amended by Ch. 358/73. These two acts apply to mandates effective after January 1, 1973. As added by this legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provides for the reimbursement of costs of legislative mandated programs.

Funds are included for mandated costs associated with Ch. 453/74, which established a procedure for collecting information about the frequency of infant death through a mandated autopsy and for costs associated with Ch. 1186/82 for TB exams for busdrivers.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs *(General Fund)*	$23	($136) [1]	($86) [1]

[1] Funding for this mandate for 1983–84 and 1984–85 is provided in the budget for "State-Mandated Local Programs" (Department 9680) in the General Government portion of the Budget. Data shown here in parentheses is for information purposes only.

4260 DEPARTMENT OF HEALTH SERVICES—*Continued*

90 SPECIAL PROJECTS

Program Objectives and Description

The Department of Health Services receives funds through grants and contracts with the federal government, other state agencies and nonprofit organizations to conduct special studies in areas of public health. Funds are also received to provide services to targeted populations or to address specific needs, diseases or conditions which are considered high priority public health issues. Funding for special projects is usually limited in duration and product specific.

Authority

Health and Safety Code, Sections 200–205, 374, 3182, 108–109, and 213.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

90.20 Research Projects

Funds are available to conduct research in areas of public health concern. This research is ordinarily problem defining, problem solving, or the development of new methodologies which may be applied to Department programs or replicated nationwide.

97.10 Special Adjustment—Cost of Living Adjustment

Cost of living increases for certain Department of Health Services programs are reflected separately for the 1984–85 fiscal year. The funding provides an average 2 percent cost of living increase to most program providers in order to ensure the continuity of care to program recipients. It is not proposed that hospital inpatient services, provided under a negotiated contract, receive a specified COLA in 1984–85.

The following is the estimated allocation of funds by program for fiscal year 1984–85.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Totals, Special Adjustment—Cost of Living	–	–	$47,778
General Fund	–	–	*28,531*
Federal Trust Fund	–	–	*19,247*

		General Fund	Federal Trust Fund	Total
11	Health Protection	67	–	67
20	Community Health	1,819	–	1,819
25	County Health Services	7,378	–	7,378
40	Rural Health	152	–	152
50	Medical Assistance	19,115	19,247	38,362

4270 CALIFORNIA MEDICAL ASSISTANCE COMMISSION

Program Objectives and Description

The seven-member California Medical Assistance Commission was established January 1, 1983 (Chapter 329/82), for the purpose of contracting with health care service providers to deliver health care services to Medi-Cal recipients. The goal of the Commission is to promote efficiency and cost-effectiveness in the Medi-Cal program through a system of negotiated contracts which fosters competition and organized health systems in the health care industry. Between January 1 and June 30, 1983, the Commission monitored and reviewed the work of the Governor's Office of Special Health Care Negotiations, which was responsible for contract negotiation functions during 1982–83 (Chapter 328/82). In 1983–84, the contract negotiation function was assumed by the Commission, and the State Medi-Cal Negotiator and staff of the Governor's Office of Special Health Care Negotiations became the Executive Director and staff of the Commission, respectively.

The major functions of the Commission are to direct the activities of the staff and review proposed contracts for Medi-Cal services negotiated by the Executive Director. These contracts may be negotiated with hospitals, county health systems and health care plans (e.g., insurance companies, prepaid health plans, independent practice associations and university medical centers). The Commission is authorized to reject any proposed contract within 20 days after approval by the Executive Director.

The Special Negotiator and staff was responsible for negotiating 245 contracts which represents approximately 85 percent of Medi-Cal hospital inpatient service expenditures. The Commission's primary responsibility will be to review the terms and conditions of these contracts on their respective anniversary dates. In addition, the Commission will continue efforts to negotiate contracts in those areas, primarily rural, where no contracts exist.

4300 DEPARTMENT OF DEVELOPMENTAL SERVICES

The Department of Developmental Services administers the Lanterman Developmental Disabilities Services Act. The intent of this Act is to assure coordination of services to persons with developmental disabilities; to assure that such services are planned and provided as part of a continuum which is sufficiently complete to meet the needs of those who are developmentally disabled at each stage of their lives, regardless of their ages or the degree of their handicaps; and, to the extent possible, accomplish these goals without dislocating persons with developmental disabilities from their home communities.

During Fiscal Year 1983–84, the Department established goals and objectives derived from the Lanterman Developmental Disabilities Services Act to provide a framework for departmental operations. The Department's major goals are to:

1. Reduce the incidence or severity of developmental disabilities through increased prevention efforts.
2. Promote the delivery of appropriate services to persons with developmental disabilities.
3. Increase public awareness, understanding and support for persons with developmental disabilities.
4. Meet or exceed appropriate program standards through an equitable delivery system.
5. Promote cooperation among public and private entities to enhance services to persons with developmental disabilities.
6. Promote policies which encourage living in the least restrictive environment.
7. Identify and capture alternative funding to maintain and develop services to eligible clients.

Specific objectives were developed to meet the Department's goals. Progress in achieving these objectives is monitored on a scheduled frequency and forms the basis for evaluation of departmental operations.

Services under the direction of the Department include prevention of developmental disabilities through community education and consultation; early intervention and crisis response; 24-hour community or state hospital placement; day care; restorative and rehabilitative services; and continuing program coordination.

Emphasis is placed on program outreach services to those persons who, because of geographical isolation, ethnic background, financial restrictions, or other similar causes, have not had ready access to traditional developmental services.

The Department sets broad policy for the delivery of developmental services statewide; establishes priorities, standards, and procedures within which the Developmental Services Program operates; monitors, reviews, and evaluates the actual operation of the services; and oversees the correction of faulty procedures and practices brought to light by the evaluation and review process. Services are delivered directly through eight state hospitals and continuing care support services, and indirectly through a statewide network of 21 private, nonprofit, locally based community agencies.

The Department of Developmental Services provides care, treatment and development to persons eligible for developmental services through the following three programs:

(1) The Community Services Program, through the 21 Regional Centers and the remaining Continuing Care Services offices, coordinates a full range of services for persons with developmental disabilities. These services include counseling, diagnosis and assessment, case management, placement in an appropriate living arrangement and referral for other services. In addition, the Community Services Program works to develop and implement new and innovative programs in every area of the State.

(2) The State Hospital Services Program, through the eight State hospitals, provides 24-hour State-managed care and treatment for clients referred by the regional centers or committed by the courts. Two of the eight State hospitals, Camarillo and Napa, also provide services to mentally disabled clients. Necessary support, including appropriate medical care, is available to prepare clients for eventual placement in the community.

(3) The Administration Program provides centralized management and support for the Community Services and State Hospital Services Programs. In addition, this program evaluates services provided to persons with developmental disabilities and develops new program concepts through a planning process.

To assist in reducing the incidence and severity of developmental disabilities, the Department began a major prevention initiative in Fiscal Year 1983–84. The key components of the initiative include:

1. Outreach and case-finding activities for the identification and provision of services for high-risk parents and children.
2. Provision of genetic diagnosis and counseling for families and persons with developmental disabilities.
3. Assessment and referral of at-risk children and their parents for early intervention and programming.
4. Assistance for parents and careproviders needed to develop the specialized community resources to maintain individuals in the least restrictive setting.
5. Public education to promote awareness and utilization of available prevention services.
6. Development of a uniform prevention data collection system for evaluation and monitoring of programs.

During Fiscal Year 1983–84, a major amendment to the Lanterman Developmental Disabilities Services Act was implemented. As a result of Chapter 16 of the 1983–84 First Extraordinary Session, authority was provided to assure services to clients on a prioritized basis through the promulgation of emergency regulations governing the allocation of resources among regional centers effective until July 1, 1984. The Department proposes to continue this process of allocating resources in fiscal year 1984–85.

10 COMMUNITY SERVICES PROGRAM

Program Description

The Community Services Program is responsible for the development and maintenance of a complete continuum of care for persons eligible for developmental services who reside in the community. Various sections of Division 4.5 of the Welfare and Institutions Code mandate responsibilities that include case finding and management, provision of services, prevention activities, development of new community programs and other activities that assure a systematic approach to the provision of services for persons with developmental disabilities. The Community Services Program responds to these mandates by contracting with 21 private, non-profit agencies (regional centers) that arrange for services and by encouraging the development of quality community programs. In addition the Community Services Program develops standards and regulations for the administration of community programs.

Program Elements

10.10	Regional Centers	80.2	59.6	49	$224,374	$229,461	$244,346
10.20	Community Development Programs	5	7	5	669	3,754	4,433

10.10 Regional Centers

Regional centers are private, nonprofit corporations under contract with the State to coordinate the service delivery system in the community for persons eligible for developmental services. These regional centers use an interdisciplinary process to coordinate diagnosis, assessment of need and development of individual program plans that enable each eligible person to live in as normal an environment as possible and develop to maximum potential. If the services needed to meet the goals and objectives of a client's individual program plan are not available through other public agencies, the centers may purchase essential services directly, subject to the availability of appropriated funds.

Emergency legislation (Chapter 16 of the 1983–84 First Extraordinary Session) gives the Director authority to require plans of action that hold regional center expenditures within the level of appropriated funds. The plans of action, prepared by the regional centers, shall identify services required to be redirected to maintain the program based on service criteria specified by regulation.

A key component of the funding process is the revised allocation methodology implemented in Fiscal Year 1983–84 to be continued in Fiscal Year 1984–85. This methodology attempts to equitably distribute operations and purchase of services funds among the regional centers.

For the 1984–85 fiscal year, it is projected that the net caseload will increase by 4,580 individuals. Based on the revised allocation methodology, $14.5 million is provided for regional center purchase of services. In addition, $1.9 million is added for regional center operations. A reduction of $1.2 million in General Fund will occur in the out-of-home care budget to offset an increase in SSI/SSP payments effective January 1, 1985.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

10.10.050 Regional Centers' Administration	80.2	59.6	49	8,772	8,854	7,835

10.10.010 Operations

Regional centers operations provides funding for the salaries and wages, staff benefits and operating expenses for employees of the regional centers. These employees, representing various medical, psychological and social service disciplines, perform the diagnostic, assessment and program coordination functions mandated by the Welfare and Institutions Code as well as provide administrative support for the operation of the regional center.

The Department is proposing, in Fiscal Year 1984–85, to establish seven transportation specialists in various regional centers to coordinate statewide transportation services for clients. Coordination of client transportation needs will reduce the cost of providing this service. This proposal is funded by a redirection of related savings from the purchase of services budget.

10.10.020 Purchase of Services

Purchase of services provides funding for the implementation of the client's individual program plan when services from other public agencies are not available. Services include out-of-home care and day programs. Included in the other services category is funding for such varied activities as special services, medical services, camps and respite care, transportation, prevention, independent living and social recreation programs.

Beginning in Fiscal Year 1983–84 the Department implemented a new allocation methodology for purchase of services. Out-of-home and day programs continued to be funded on the basis of past expenditures. Funds for the remaining service categories were allocated on an average cost per client basis.

10.10.050 Regional Centers' Administration

Centralized administration of the regional centers is the responsibility of the Community Services Division. This division manages the contracts between the Department and the 21 regional centers including preparation of the contract document, negotiation of budgets, allocation of funds, maintenance of strict accountability and oversight and projection of expenditures. In addition, this division sets provider rates, maintains the Regional Centers Operations and Fiscal Manuals, develops policies, procedures and regulations for the operation of the regional centers, directs implementation of these policies and provides technical assistance. This division also directly provides case management services for clients who reside in out-of-home settings in two regional center areas, East Bay and San Andreas. Implementation of a standard accounting and budgeting system entitled the Uniform Fiscal System (UFS) will occur on July 1, 1984. The system will permit the monitoring of regional center allocations and expenditures, evaluation of program effectiveness, and control of program and organizational costs based on reliable statewide data.

In a continuing effort to transfer case management responsibilities from the Department to the regional centers, the Oakland Continuing Care Services office will "opt-out" in Fiscal Year 1984–85. The 16 positions associated with this office will be reduced and the funding transferred to the regional center operations budget. The Department is anticipating to "opt-out" the remaining Continuing Care Services offices in Fiscal Year 1985–86.

The budget proposes to establish 4 positions to assume responsibility in assessing parents' liability in contributing toward their children's care in the regional center system. The funding of $95,000 will be redirected from the increased parental fee revenue projected to be collected and deposited in the Developmental Disabilities Program Development Fund.

10.20 Community Development Programs

The Community Development Program fulfills the mandate of Welfare and Institutions Code Section 4670 et seq. to develop and provide necessary support for a comprehensive network of quality programs in every area of the State. In addition to the administration of the Program Development Fund and the Cultural Center for the Handicapped emphasis has been placed on the development of a new type of small community facility specializing in services for medically fragile infants and children. In Fiscal Year 1983–84 this effort is being supported by a federal discretionary grant from the Department of Health and Human Services. Federal funding has also been obtained for support of a Home and Community Based Care Waiver under Title XIX. This program will encourage community placement of persons who would otherwise require State hospital care.

10.20.050 Community Development Administration	5	7	5	533	1,722	1,128

10.20.010 Program Development

The Program Development Fund is authorized by Section 4677 of the Welfare and Institutions Code. It consists of parental fee contributions and Federal Developmental Disabilities Allotment Funds through PL 95-602, which are granted to applicants for the development of new community resources. Since 1977, 165 projects have been funded for a total of $10,737,668. Service slots have been created in areas of residential and independent living, vocational and pre-vocational training, infant intervention and stimulation, respite care, education and recreation. Projects funded during 1984–85 will be evaluated by the Department at the end of Fiscal Year 1984–85 to determine whether the State should utilize General Fund monies to continue these programs.

Proposed regulations will become effective approximately January 1984, which will update the parental fee schedule and make other appropriate adjustments resulting in an overall increase in parental fee contributions.

10.20.050 Community Development Administration

Centralized administration for community development is the responsibility of the Community Services Division. This division works to develop a comprehensive network of quality programs in every area of the State by providing technical assistance, advice, consultation and training to service agencies in developing and refining community programs. Assistance is given in assessing service needs and improving service related to out-of-home care, developing programs for model and innovative services, facilitating access to alternative funding sources and in the administration and awarding of Program Development Fund grants. *In Fiscal Year 1984–85 two positions are proposed to be reduced to reflect the completion of the Nursery Project.*

4300 DEPARTMENT OF DEVELOPMENTAL SERVICES—*Continued*

20 STATE HOSPITAL SERVICES PROGRAM

Program Description

The Department of Developmental Services is responsible for the operation of eight State hospitals: Agnews, Camarillo, Fairview, Napa, Lanterman, Porterville, Sonoma, and Stockton. Programs for individuals with mental disabilities at Camarillo and Napa State Hospitals are managed by the Department of Developmental Services through an interagency agreement with the Department of Mental Health.

The objectives of the State Hospital Services Program include:

1. Providing care, treatment, and developmental services, in the most efficient and effective manner, to all residents referred to the State hospital by the regional centers, county mental health departments and/or the judicial system;
2. Providing programs which assure improvement of independence, maintenance of health and welfare, increased ability to control environment, and increased normalcy of behavior for residents in state hospitals who are developmentally disabled;
3. Achieving and maintaining compliance with the program standards of national accrediting organizations;
4. Placing residents in programs that are compatible with their essential physical welfare and meeting their needs for educational, developmental, and habilitative services. Maintaining continuity in program participants' lives and services, with their families, communities, and posthospital programs;
5. Maintaining Federal and State licensing and certification standards;
6. Developing comprehensive abilities in physical, social, intellectual and vocational functioning skills in each resident in a balanced individualized program. Special emphasis is placed upon teaching selfcare and independent living skills which, if acquired, would allow the residents to reside in an appropriate community setting;
7. Developing innovative program activities for use in State hospital and community programs;
8. Obtaining all possible Federal and private funds to supplement State General Funds; and,
9. Ensuring the constitutional rights of State hospital residents.

Hospital staff include such specialists as physicians, psychologists, teachers, social workers, rehabilitation therapists, speech pathologists, audiologists, nurses, and psychiatric technicians who, through an interdisciplinary team process, develop and implement an individual program plan to effect positive, individualized growth for each resident. Evaluation of each resident's functional change and effectiveness of care, treatment, and development is conducted on a continuing basis. A management information system (Client Development Evaluation Report and the clinical record and documentation system) provides uniformly accepted standard measures of resident benefits. Progress is measured by application of standardized evaluation instruments and, at appropriate times, is re-evaluated by the interdisciplinary teams in relation to the previously established performance objectives. The hospital program system is evaluated by hospital program review staff and by headquarter's program management staff, using objective evaluation criteria to determine the overall effectiveness of each program.

State hospital services include care and supervision for all residents on a 24-hour basis, supplemented with appropriate medical and dental care, health maintenance activities and assistance with activities of daily living. Residents who are non-ambulatory receive special nursing and medical care, and residents having maladaptive behaviors receive special supervision. Those residents under the age of 22 are referred to community schools or state hospital classes by the interdisciplinary teams, and receive education programs as outlined in P.L. 94-142.

Increasing numbers of multihandicapped individuals and penal code offenders with developmental disabilities are being referred to the State hospitals by the regional centers and through court commitments. These admissions include infants, blind, deaf, and disturbed persons, destructive hyperactive acting-out adolescents; chronically physically ill people; individuals with cerebral palsy, uncontrolled epilepsy, and other neurological conditions; and persons needing physical, social, intellectual, and vocational development. These residents require highly specialized services to increase their ability to become independent and minimize their need to rely upon public resources when they are returned to community living.

The hospital developmentally disabled program system is organized into the following 10 major program types with residents assigned according to their individual needs: continuing medical care, physical development, autism, sensory development, child development, behavior adjustment, habilitation, social development, physical and social development, and medical/surgical. The programs provide a continuum of services that are organized to assure a range of opportunities consistent with the needs of hospital residents and the principles of normalization within the least restrictive alternatives. Where possible, clients are discharged from State hospital care and released to the regional centers for aftercare and follow-up.

The Hospital Operations Division provides central administrative and clinical management to the eight state hospitals for providing services to persons with developmental disabilities to assure quality treatment and developmental services in compliance with state licensing, federal certification, and JCAH standards. The areas of responsibility include the development of policy and procedures for all aspects of hospital operations, the assurance of integration between hospital and community programs, assurance of compliance with professional clinical standards in providing effective care, treatment, and habilitation training for persons with developmental disabilities.

The State hospital budget for Fiscal Year 1984–85 includes a projected population reduction of 305 individuals with developmental disabilities. Based on the population decline, 244.5 positions and $2,633,000 have been reduced from the budget base. A staff reduction of 12.7 positions and $788,000 is proposed in conjunction with a population adjustment for programs for mentally disabled persons at Camarillo and Napa.

Beginning in Fiscal Year 1984–85, the level of salary savings required in the State hospitals is proposed to be reduced by $3,415,000, or 0.8%. This represents an estimated increase of 108.4 positions. The augmentation is intended to curtail the incidences of prolonged position vacancies that are often necessary to meet the high salary savings level that is currently budgeted for the State hospitals.

In addition, 13 nursing positions are reduced April 1, 1984 and the annualized funding of $257,000 redirected to develop the physicians' order module as part of the Hospital Client Support System.

The budget proposes to re-establish one Client-Patients Rights Advocate abolished under Section 12439 of the Government Code.

Chapter 922, Statutes of 1982 increases the benefits schedule for workers covered by the California Workers' Compensation Law. In recognition of this increase in benefits, $855,000 is proposed for Fiscal Year 1984–85.

The 1984–85 budget proposes a $1.4 million augmentation to purchase irreparable equipment, and equipment necessary for the health and safety of clients with developmental disabilities.

For 1984–85, the Administration is proposing to upgrade the quality of care for persons with mental disabilities and subsequently achieve licensing, certification and accreditation for all state hospital programs. Therefore, the budget proposes an increase of 84 positions and $3.6 million to implement staffing standards and provide resident furnishings at Napa and Camarillo State Hospitals. Funding for these proposals will be reimbursed by the Department of Mental Health.

In an effort to achieve administrative economies in the State hospitals' operating expense and equipment allocation, $530,000 is proposed to be reduced in Fiscal Years 1984–85. Technical adjustments have been made for reimbursable funding, including the addition of $1,600,000 and 69 person years for Manpower Training projects anticipated for Fiscal Year 1983–84 and 1984–85. Other reimbursement changes include adjustments at Stockton for Protective Services (−1.1), County Staff Lunches (1.0), EKG Services (−.3), and systemwide adjustments for Compensatory Education (5.6) and Deaf-Blind projects (−9).

The 1983–84 Budget Act included language requiring the Department to adopt a non-level-of-care staffing plan to equalize staffing among the state hospitals. The Department has initiated action to comply with this requirement by transferring 42 positions in various personnel categories between hospitals where large disparities existed.

The State Hospital Services Program has collected revenue of approximately $154.7 million for Fiscal Year 1982–83, and will collect estimated revenue of $155.8 million for Fiscal Year 1983–84 and $157.2 million for Fiscal Year 1984–85. The sources of revenue include private and third party patient board payments and Federal Medicare and Medicaid reimbursements, which will offset the General Fund costs indicated below.

35 ADMINISTRATION

The Administration Program provides overall direction and support to the Community Services Program and to the State Hospital Services Program. A major reorganization was implemented in Fiscal Year 1983–84 to improve supportive services to the two program areas. The reorganization resulted in combining like functions, improving management oversight and responsiveness and reflecting the priorities of the new Administration in areas such as program assessment, monitoring, long and short-term planning, policy development and prevention of developmental disabilities.

The Department is organized into four divisions which include: Community Services, Hospital Operations, Program Assessment and Administration. The Community Services and Hospital Operations Divisions were described under the specific program narrative sections. The Program Assessment Division is responsible for program evaluation, audits and investigations. The Administration Division is responsible for financial management, collection of revenues to offset program costs, implementation of the Uniform Fiscal System, personnel, labor relations, data processing, and program support including contracts and business services. The Executive Office provides overall direction and also includes several specific functions, including the Office of Legal Affairs, the Office of Human Rights, the Office of Communications, the Office of Legislative Affairs, the Office of External Affairs and the Office of Planning and Policy Development.

[1] Developmentally Disabled Programs at Patton State Hospital were phased out in Fiscal Year 1980–81, and the facility was transferred by Chapter 409, Statutes of 1981 to the Department of Mental Health.

* Dollars in thousands

4300 DEPARTMENT OF DEVELOPMENTAL SERVICES—*Continued*

In Fiscal Year 1983–84, the Department also implemented a management by objectives system under which high priority projects are routinely monitored by departmental management and the Health and Welfare Agency. Key objectives include:

1. Allocating resources among regional centers and ensuring delivery of appropriate services so that service expenditures do not exceed the budgeted funds for Fiscal Year 1983–84.
2. Implementing a program for the prevention of developmental disabilities.
3. Developing a community placement plan for State hospital residents.
4. Achieving accreditation in the eight State hospitals serving persons with developmental disabilities.
5. Increasing the audit coverage for regional center subcontractors to determine the appropriate utilization of funds.
6. Auditing the regional centers to determine compliance with sound financial practices.
7. Preparing a long-term plan for making changes needed in the design and delivery of developmental services in California.

All objectives contribute to the advancement of departmental goals described at the beginning of this budget.

In an effort to achieve administrative economies in the Department's operating expenses, $109,000 is proposed to be reduced in Fiscal Year 1984–85. In addition, 0.5 position is being reduced to reflect a reduction in the reimbursement for the Manpower Program.

40 LEGISLATIVE MANDATES [a]

This program reflects the cost of reimbursing local governments for (1) new programs and (2) increased level of existing services mandated on local entities by legislation or executive regulations. Beginning in fiscal year 1983–84 funding for this program is provided in the Budget for "State-Mandated Local Programs" (Department 9680) in the General Government portion of the Budget.

The specific mandates funded from this item are:

Chapter 498, Statutes of 1977. This is to pay coroner's cost for the inquest into deaths at the state hospitals.

Chapter 694, Statutes of 1975. This pays for court appointed public defenders or attorneys to represent persons with developmental disabilities in conservatorship or guardianship hearings.

Chapter 1304, Statutes of 1980. This pays for court appointed public defenders or attorneys to represent persons with developmental disabilities in proceedings to establish limited conservatorships.

Chapter 644, Statutes of 1980. This reimburses counties, in which state hospitals that treat dangerous mentally retarded persons are located, for the costs of judicial proceedings relating to such persons.

Chapter 984, Statutes of 1977. This reimburses counties for the cost of judicial proceedings relating to persons with developmental disabilities.

Chapter 1319, Statutes of 1978. This reimburses counties for the cost of judicial proceedings relating to persons with developmental disabilities.

Chapter 1253, Statutes of 1980. This reimburses counties for the cost of judicial proceedings related to persons with development disabilities.

97.10 Special Adjustments—Cost of Living Adjustments

This element contains funding to provide a cost-of-living increase for the Community Services Program and community based education services provided to state hospital residents. Due to the considerable lessening of inflation over the last year-and-a-half, a basic two percent COLA increase is provided for these programs.

55 CAPITAL OUTLAY			

The Fire and Life Safety and Environmental Improvements Program for developmentally disabled resident-occupied state hospital units was completed by July, 1982. However, the Department is proposing some fire and life safety-related projects in Fiscal Year 1984–85 which were omitted in the original Fire and Life Safety and Environmental Improvements Program due to lack of funds but are necessary to assure continued certification for Federal Financial Participation. The Department also is proposing projects for mentally disabled resident-occupied units in response to the Department of Mental Health's need to meet fire and life safety and environmental improvement requirements. The majority of other capital outlay requests are necessary to meet various licensing requirements and/or to accomplish projects previously approved by or submitted to the Legislature but subsequently deferred due to limitations on State expenditures.

PROGRAM ELEMENTS

Major Projects

55.10 Statewide			
55.10.015 Fire, Life Safety and Environmental Improvements			
55.10.015.010 Furniture and Equipment	$119 Ek	–	–
55.10.020 Environmental Improvements			
55.10.020.020 Wardrobes, Chests, Shelving, Curtains	1,790 Ek	–	–
55.10.095 Other			
55.10.095.010 Earthquake Safety	−36 Ck	–	–
55.10.140 Buildings and Grounds			
55.10.140.641 Handicapped Accessibility, Phase 2	–	–	$1,379 PWCk
This project will provide alterations and modifications to public access areas throughout the Developmental Services Hospital System. The project is intended to bring these areas into compliance with Federal and State regulations regarding access for the handicapped.			
55.15 Agnews State Hospital			
55.15.015 Fire, Life Safety and Environmental Improvements			
55.15.015.010 Buildings 22, 24	10 Ck	–	–
55.15.065 Boilers			
55.15.065.010 West Facility	12 PWh	–	–
55.15.095 Other			
55.15.095.010 Install HVAC temperature controls, R & T Building (East Area)	–	$6 PWCe	–
55.15.095.020 Hot Water and Steam Pipe Insulation—East Campus	10 PWCe	–	–
55.15.095.021 Commissary Warehouse	−28 Ck	–	–
55.15.096.020 Hot Water and Steam Pipe Insulation—West Campus	38 PWCe	–	–
55.15.110 Mechanical			
55.15.110.931 Hot Water and Steam Pipe Insulation—East Campus	–	170 Ce	–
55.15.110.932 Hot Water and Steam Pipe Insulation—West Campus	–	1,049 Ce	–
55.20 Camarillo State Hospital			
55.20.015 Fire, Life Safety and Environmental Improvements			
55.20.015.010 Buildings 47, 51, 58	58 WCk	2 WCk	–
55.20.015.020 Items to complete, Phase 1	17 PWCk	20 PWCk	325 Ck
This project is comprised of twenty-one items to complete an earlier fire and life safety and environmental improvement project in Units 41, 42, 60, 61, 64, 66 and 67. The primary item of work is the replacement of cracked and plugged sewer laterals.			
55.20.040 Improvements to Electrical Distribution System	−468 PWCk	–	–
55.20.095 Other			
55.20.095.010 Steam and Hot Water Pipe Insulation	2 PWh	–	–
55.20.140 Buildings and Grounds			
55.20.140.641 Children's Unit (FLSEI)	–	–	388 PWk
This request is for the redesign of the Children's Unit for fire and life safety and environmental improvements. The project will yield 72 acute psychiatric beds and alter/upgrade the unit's heating system. This work is expected to lead to Federal financial participation for the affected bed space.			
55.20.160 Temporary Facilities			
55.20.160.641 Swing Space and Trailer Lease	–	–	370 PWCk
This project provides for swing space to house approximately 180 patients during each phase of the fire and life safety and environmental improvement construction which is scheduled to run from July 1985 through June 1989. The project also includes rental of three trailer classrooms for the use of child and adolescent patients. No site preparation for the trailers will be required.			
55.25 Fairview State Hospital			
55.25.095.070 Alterations and Modification to Laundry	−15 Wk	–	–
55.25.110 Mechanical			
55.25.110.641 Replace Number 3 Centrifugal Chiller	–	–	175 PWCk
This project is for replacement of a deteriorated 750 ton chiller with a more efficient 475 ton unit. In addition to the energy-saving aspects of this project, the new chiller will enable the hospital to maintain temperatures as required by code.

4300 DEPARTMENT OF DEVELOPMENTAL SERVICES—*Continued*

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*
55.25.120 Electrical Distribution System			
55.25.120.631 Emergency Electrical Power	332 Cf	–	–
55.25.120.641 Upgrade 5KV Distribution System	–	–	83 PWk
This request is for the upgrade of the electrical distribution system to code requirements. The project will involve extensive cable replacement and rerouting.			
55.30 Lanterman State Hospital			
55.30.020 Environmental Improvements			
55.30.020.010 RTC Building	−48 Ck	50 Ck	–
55.30.095 Other			
55.30.095.010 Replace Existing Interior Lighting with Energy Saving Lighting	111 PWCh	–	–
55.30.095.020 Install Heat Reclaim for Laundry Wash Water	16 PWCe	232 PWCe	–
55.30.110 Mechanical			
55.30.110.641 Install Chiller in Central Plant and Connect to Acute Hospital	–	–	178 PWk
This request is for the replacement of two deteriorated absorption units now serving the acute hospital. A new 1300 ton chiller is to be installed in the central plant and all necessary connections to the hospital are to be made.			
55.40 Napa State Hospital			
55.40.015 Fire, Life Safety and Environmental Improvements			
55.40.015.050 RTC Building	–	6,582 Ck	–
55.40.015.060 Fire Sprinklers—RTC	34 WCk	–	–
55.40.060 Cogeneration Phase II	154 Ce	–	–
55.40.075 Comfort Conditioning—Patient Occupied Space			
55.40.075.040 Units 254, 255, 256, 257	−48 PWCk	–	–
55.40.095 Other			
55.40.095.010 Fire Detection System Buildings 147, 174, 176, 177, 178, 181, 183	4 PWk	–	–
55.40.110 Mechanical			
55.40.110.631 Cogeneration	350 Cf	–	–
55.40.130 Water and Sewage			
55.40.130.641 Improve Domestic Water Supply	–	–	70 PWk
This request is for the installation of new water lines, valves and hydrants in accordance with code requirements.			
55.40.140 Buildings and Grounds			
55.40.140.641 Buildings 254, 256 and 257 (FLSE1)	–	–	3,478 Ck
This request is for construction of environmental improvements to yield 140 acute psychiatric beds for adolescent and young adult patients. The project includes comfort conditioning, classrooms, rooms for four patients each, various patient privacy features and 2,800 square feet of general storage space.			
55.40.150 Communication			
55.40.150.641 Fire Detection System, Buildings 147, 176, 177, 178, 181, 183 ..	–	–	657 WCk
This request is for installation of an automatic wet pipe sprinkler system to protect all attics and hazardous areas within these buildings. The project also includes smoke detectors in corridors, attic separations, manual pull stations, proper fire exits, stairwell enclosures and door closers.			
55.45 Patton State Hospital			
55.45.015 Fire, Life Safety and Environmental Improvements			
55.45.015.030 Building 20 (70)	14 PWCk	–	–

4440 DEPARTMENT OF MENTAL HEALTH

The Department of Mental Health (DMH) as the State's mental health authority administers the Lanterman-Petris-Short Act, the Short-Doyle Act, and other State and federal statutes.

The Department of Mental Health is responsible for the direct operation of Atascadero, Metropolitan and Patton State Hospitals. At Napa and Camarillo State Hospitals, the Department of Mental Health provides direct treatment management and contracts with the Department of Developmental Services for administrative support services.

Within the Department of Mental Health's overall goal of upgrading, balancing, and integrating community and State-operated services, the objectives of the State hospital services program is to complement the mental health services in the community. The program provides specialized inpatient services which are not available in local communities.

The Department promotes access of California residents to appropriate mental health services throughout the State. As the State's mental health authority, the Department invites the participation of numerous persons and organizations such as: the California Conference of Local Mental Health Directors; the Citizens' Advisory Council; Local Mental Health Advisory Boards; Community Mental Health providers; Medi-Cal officials; private psychiatrists; primary health care providers; and individuals in informal networks of local support systems.

Under the provisions of the Short-Doyle Act, counties are responsible for the provision of mental health services to their residents. Services available include prevention and control of mental illness through community education and consultation, crisis evaluation and emergency care, 24-hour residential treatment, day care treatment, outpatient care, continuing care management, and resocialization. These services are primarily supported by the state general fund with local participation as determined by law. The Department, in consultation with the California Conference of Local Mental Health Directors and the Citizens Advisory Council, sets overall policy for the delivery of mental health services statewide; establishes priorities, standards, and procedures within which mental health services will operate; monitors, reviews and evaluates the actual operation of the services; and oversees application of modifications indicated by the evaluation and review process.

The 1984–85 Governor's Budget proposes a Mental Health Initiative which would transfer the administrative responsibility for the State's Short-Doyle local mental health program to the counties and modify the State and county roles in the provision of mental health services. In summary, the 1984–85 Mental Health Initiative proposes: (1) the expansion of local mental health services ($35 million); (2) the first increment of a multi-year proposal which is intended to bring into compliance the State Mental hospitals with fire and life safety requirements and provide environmental enhancements ($21.2 million); (3) the implementation of hospital level of care staffing standards which are aimed toward improving patient care and will enable certification and accreditation of hospital programs ($6.0 million); (4) the reduction of the salary savings budgeted for the State hospitals ($2.6 million); and (5) the reduction to State administrative operations related to the proposed decreased regulatory responsibilities ($0.9 million partial year). In addition, the Initiative provides the assumption by counties of State operated case management services which are provided to mental health patients.

4440 DEPARTMENT OF MENTAL HEALTH—*Continued*

10 Community Services

Program Objectives and Description

DMH's community services program provides mental health treatment and support services through the State, counties and other organizations. This program is comprised of the Community Residential Treatment System, Other Treatment, Community Outreach, and Other Community Programs.

The objective of the community services program is to provide mental health clients with a network of treatment and supportive services in a local setting that will help them return to normal living as fully and quickly as possible. The counties are responsible for developing plans for the delivery of mental health services to their communities. The plans are approved by DMH and serve as the basis for the allocation of State funds to the counties.

The 1984–85 Mental Health Initiative proposes the transfer of 286.9 personnel years and $5,098,472 from State Operations to local assistance and the elimination of $1,590,064 in reimbursements to reflect the assumption by counties of DMH's mental health social/case management services. This proposal would make the 17 counties that now receive State operated services consistent with the 41 counties that self administer their mental health social/case management services.

The 1984–85 Mental Health Initiative proposes to transfer to local government the control and responsibility for community-based mental health services. The intent of this transfer is to maximize the counties use of program funding for the provision of direct treatment services through the reduction of the State's regulatory requirements that are currently imposed upon county mental health programs. This transfer would result in a partial year reduction of the State's administrative operation equal to $367,000 and 35.2 net authorized positions.

As a part of the Mental Health Initiative the 1984–85 budget proposes a $35 million augmentation for community-based mental health programs to expand the availability of direct treatment services.

The budget year includes a 218.3 position adjustment to properly reflect the level of budgeted personnel years.

10.10 Treatment

The treatment element contains the full spectrum of treatment services provided through the community mental health system. The Department of Mental Health and other organizations and individuals involved in the statewide mental health delivery system attempt to provide the least restrictive environment necessary to help patients return as quickly as possible to their normal lives. These services range from short-term crisis intervention to inpatient care and court-ordered treatment. The variety of intermediate services include services such as outpatient clinics, day treatment centers, residential treatment facilities, and mobile services to homes, jails, and related facilities. These services are generally provided in the community as close to the clients' residence as possible. Each year more than 450,000 Californians receive diagnoses and short-term crisis intervention for mental disorders, frequently without having to leave home for even a night.

Treatment is provided by multidisciplinary mental health professionals. Services include individual and group psychotherapy and medical treatment with psychotropic medications. Clientele are mentally disabled persons who voluntarily seek services and those for whom services are provided on an involuntary basis.

Individuals require involuntary treatment under the following circumstances:

1. Detention for diagnosis up to 72 hours (for persons who may be dangerous to themselves or to others—including alcoholics with suspected mental disorders).
2. Detention for treatment of persons diagnosed as dangerous to others or to self (up to 14 days).
3. Additional 14-day period for suicidal patients.
4. Treatment up to 90 days for persons who are imminently dangerous to others.

Another category of involuntary treatment is forensic mental health programs. These programs serve mentally ill people detained in local jails or juvenile detention centers, as well as criminal defendants found by the court to be not guilty by reason of insanity, incompetent to stand trial or mentally disordered sex offenders. Jail or juvenile detention center inmates may be treated within the detention setting or transferred to a local psychiatric facility. Forensic community programs also serve people placed on parole or probation.

DMH will continue administrative responsibility in 1984–85 for California's federally-funded Community Mental Health Centers. The federal block grant supporting the Center services is expected to provide $14 million in 1984–85 for this program.

The Mental Health Initiative proposes $35 million for 1984–85 to expand the level of direct treatment services available within community based programs.

4440 DEPARTMENT OF MENTAL HEALTH—*Continued*

10.10.010 Community Residential Treatment Systems

The objective of the Community Residential Treatment System is to provide mental health treatment programs which are rehabilitative in focus, non-institutional in design, and systematically interrelated so as to form a coordinated continuum of care. These services are intended to reduce the dependence of the mental disordered clients' on psychotic medications and foster the development of social interactive skills, independent living, and vocational performance.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	–	–	–	$16,143	$17,043	$16,030

10.10.020 Other Treatment

Other treatment constitutes the majority of the available local mental health services. These program services are described below.

Twenty-four hour habilitation and rehabilitation is that category of care aimed at those persons who have traditionally been relegated to State hospitals because of behavior manifestations that have caused them to fail in community care facilities. They must be taught socially acceptable behavior, and must also learn to be independent of the traditional institutional structure. The patient is generally young with multiple problems, but may also be aged or have brain damage. Staffing is weighted heavily toward occupational and rehabilitational therapies, but may also include reality orientation for the elderly person. The medical component is generally supplied by outside physicians not on the facility staff. While this area of care is termed 24-hour, much of the patient treatment takes place offsite in Short-Doyle funded outpatient and day-treatment programs.

Satellite housing and supervised out-of-home placement services are the traditional board and care or group homes. The patients are long-term dependent persons who require supervision to function in a community setting. These services expose residents to the full range of supportive social services, including Short-Doyle funded outpatient care and day treatment. The patients are typically chronically disabled due to mental disorders, substance abuse, or aging. Most are eligible for SSI and Medi-Cal.

Semi-independent living takes place in an apartment house or a group home with a client self-government atmosphere. Here, several clients live in a cooperative, self-help environmental and are responsible for various household chores and personal maintenance. Staff come in for a few hours during the day or evening hours to assist and offer guidance to clients trying to become self-sufficient and responsible for their physical and personal needs.

Some individuals require more than short-term treatment but are still able to continue their usual living, working, and social arrangements. They may benefit from services in a day treatment center during part of the day and frequently are able to involve members of their families in their treatment. Others may receive mobile professional services in their own homes, foster homes, schools, jails, or in other community facilities. Such treatment requires only modest changes in the person's normal life, and is far less expensive than institutionalization.

Sheltered workshops are nonhospital-based programs lasting less than 24 hours and designed for the chronically mentally ill client who is unable to participate in competitive employment. These programs include vocational and rehabilitation counseling, work training, and vocational evaluation. These programs stress development of sound work habits and skills and social functioning for marginally productive individuals. There may be provisions for remunerative employment for individuals who are capable of partial self-support in a sheltered work environment.

Rehabilitation provides counseling and social rehabilitation services for clients living in facilities with little or no day treatment component. Ideally, the services are nonhospital based and have a functional orientation with prevocational and vocational services. Prevocational is a long-term "habilitation" service for the seriously disturbed or multiple handicapped. The main focus is on attitudinal, motivational, emotional, and physical blocks which impede functioning. Orientation is toward skill-seeking and skill-enhancement which point toward vocational goals. Prevocational programs are logically attached to residential facilities. Vocational programs provide vocational experiences which will enhance an appreciation and understanding of the reality of work. Some vocational services may be permanently "sheltered" in the sense that they are permanently programmed for people who have reached their optimum level of vocational growth.

10.20 Community Outreach

The objective of the Community Outreach element is to stimulate positive mental health behaviors through mental health education and information dissemination programs. Specifically, these programs are designed to assist individuals to focus on coping with stressful life situations and avoid serious emotional disruptions.

The State's Community Outreach program is responsible for the development and distribution of educational materials and resources to mass media and local human service programs. The educational materials are produced through the Request for Proposal and contractual process, and are designed to serve both the general public and specific high-risk target populations.

Local mental health and human service organizations utilize a variety of educational materials and resources to develop Community Outreach programs in multiple community settings. The settings targeted include schools, civic organizations and service centers. Specialized program materials are used to reach high-risk populations including children, older persons, and ethnic minorities before the onset of severe problems.

4440 DEPARTMENT OF MENTAL HEALTH—*Continued*

10.30 Other Community Programs

DMH's field staff, Mental Health Social Services, (MHSS) consists of about 200 psychiatric social workers who provide protective social services and case management services to mentally disabled persons referred by local mental health programs. Clients served are mentally disabled persons in mental health facilities who need planning for community living, and mentally disabled persons released from State hospitals and other 24-hour treatment facilities. Protective social services are provided to the client, family and others. Services include individual and group counseling, case management, advocacy, out-of-home placement and supervision. By agreement with local county mental health programs, DMH provides protective social services in about 17 counties. Forty-one counties have already successfully negotiated with DMH to directly provide this service, and have absorbed (opted out) this function into the county program.

Other community programs include case management, protective social services and conservatorship. These services are provided by local mental health staff or by contract with noncounty providers. Case management is the process of identification and assessment of need, planning, coordination, monitoring, and constant evaluation of clients and available resources to achieve the most efficient and effective resolution to individual needs.

Review and planning by the case management and protective social services system must be provided for individuals who meet one or more of the following criteria:

1. Clients whose disabilities have resulted in the need for acute inpatient services or established community alternatives to inpatient services.
2. Clients who are legally declared to be conservatees, or temporary conservatees, under the provisions of the Lanterman-Petris-Short Act (Conservatorship).
3. Clients whose disabilities and circumstances indicate the need for continuing care intervention to minimize probability of further disability and potential for hospitalization.
4. Clients who require assistance in planning for financial support, medical care, housing, and legal services.

Conservatorship under the Lanterman-Petris-Short (LPS) Act is a legal mechanism for ensuring that needed mental health and related services are provided to persons who are gravely disabled because of mental disorders or chronic alcoholism; and who are unwilling or unable to accept treatment voluntarily. Upon receipt of a referral from an authorized treatment agency, the county conservatorship investigation officer conducts an investigation and prepares a report of findings and recommendations to the court. Conservatorship may be of the person only, of the estate only, or of both. Conservators are responsible for assuring that each conservatee has an appropriate living plan and is receiving necessary services. The conservator of the estate is responsible for assuring that the conservatee's assets and income are protected and disbursed in the best interests of the conservatee.

To bring in-line the remaining 17 counties that continue to receive State operated mental health social/case management services with the 41 counties that self administer their own services, the Mental Health Initiative proposes the transfer of $5,098,472 in General Funds from State Operations to Local Assistance, and the reduction of $1,590,064 in reimbursements and 286.9 personnel years supporting the Department's Mental Health's Social Services activities. Funds represent half year funding which is being transferred to the counties in conjunction with the proposed county assumption of Mental Health Social Services responsibilities.

The budget year includes a 200.3 position adjustment to properly reflect the level of budgeted personnel years.

10.90 Program Administrative Support

The Program Administrative Support component provides state level administration of the 58 community mental health programs.

The 1984–85 budget reflects: 1) an 18 position adjustment to properly reflect the level of budgeted personnel years; 2) a reduction of 35.2 personnel years to reflect the decrease in state operations related to the transfer of community based services control to the counties; 3) a reduction of 12 personnel years related to the economies produced through the consolidation of the service area teams and certain DMH headquarter's work assignments; 4) the reduction of 5 personnel years related to the transfer of DMH's mental health social/case management services to local programs; and 5) the elimination of 6.7 limited term positions authorized within 1983–84.

4440 DEPARTMENT OF MENTAL HEALTH—*Continued*

20 STATE HOSPITAL SERVICES

Program Objectives and Description

Within the Department of Mental Health's overall goal of upgrading, balancing, and integrating community and State-operated services, it is the objective of the State hospital services program to complement the mental health services in the community. The program provides specialized inpatient services which are not available in local communities.

The Department of Mental Health is responsible for the direct operation of Atascadero, Metropolitan and Patton State Hospitals. At Napa and Camarillo State Hospitals, the Department of Mental Health provides direct treatment management and contracts with the Department of Developmental Services (DDS) for administrative support services. A full range of services for the adult mentally disabled, is provided directly by the State at the five hospitals. Services for mentally disabled children and adolescents are provided only at Camarillo and Napa State Hospitals. Ninety-four percent of the population at Atascadero and eighty-eight percent of those at Patton are mentally ill offenders. The in-hospital population count in programs for the mentally disabled in the State hospitals is projected to be 4,947 on June 27, 1984, and is expected to increase to 5,014 by June 26, 1985.

The current and budget years include a reduction of 32 personnel years and $879,000 in Reimbursements to reflect a decrease by Los Angeles County of the drug abuse treatment program services received from Metropolitan State Hospital.

The 1984–85 budget proposes the following adjustments:

—The Mental Health Initiative which includes an additional $2,646,000 in General Funds and reimbursements and 72 personnel years to reduce the budgeted salary savings from 7.1 percent to 5.5 percent. This augmentation is intended to curtail the incidences of prolonged position vacancies that were necessary to meet the unusually high budgeted salary savings level. Of this amount, $2,171,000 is budgeted for the three DMH hospitals and $475,000 is budgeted for mentally disabled clients located in DDS hospitals.

—Reductions of $2,471,000 in General Funds and 123 personnel years in DMH and $788,000 General Funds and 12.7 personnel years in DDS to reflect the projected decline of 236 non-Corrections hospital clients between the budgeted levels for 1983–84 and 1984–85.

—An additional $872,000 in General Funds and Reimbursements to provide half year funding and 52 personnel years to staff a legislatively mandated (Chapter 1529/82) 50-bed program for sex offenders currently housed in the Department of Corrections' facilities.

—An additional $760,000 in reimbursements and 49.5 personnel years to staff an additional 50 beds for psychiatric services to Department of Corrections' inmates.

—An additional $349,000 in General Funds and Reimbursements to meet increasing workers compensation costs resulting from the increased benefits authorized by Chapter 922, Statutes of 1982. Of this amount, $165,000 is budgeted for the DMH hospitals and $184,000 is budgeted for the DDS/DMH mixed hospitals.

—A reduction of $306,000 in General Funds to reflect a decreased expenditure for certain operating expenses and equipment items. Of this total, $191,000 is budgeted for DMH hospitals and $115,000 is budgeted for the DDS/DMH mixed hospitals.

—A reduction of 0.6 personnel years and $6,000 to reflect the decrease in the State's administrative operations resulting from the Mental Health Initiative.

—A 52.2 position reduction adjustment to properly reflect the level of budgeted person years of effort.

—To improve the levels of treatment for State hospital mentally ill patients and to accelerate the hospital patients return to community living, the 1984–85 Mental Health Initiative proposes an augmentation of 198.5 net authorized positions and $5,959,000 in General Funds and reimbursements. Of this amount, $3,580,000 and 118.7 personnel years is budgeted for the three DMH hospitals and $2,379,000 and 79.8 net authorized positions is budgeted for mentally disabled clients within the DDS/DMH mixed hospitals. This augmentation represents the first increment of a three-year implementation of State hospital level-of-care staffing standards. Also, this proposal will: (1) maximize Federal revenues to the State for hospital patients through the certification of qualified programs; and (2) bring national recognition of the quality of the State's mental health care through the accreditation of the State's mental health hospitals.

—An additional $1,188,000 in General Funds is budgeted as a part of the Mental Health Initiative to provide resident furnishings and privacy screens for mentally disabled clients within the DDS/DMH mixed hospitals.

20.10 Lanterman-Petris-Short

The Department projects that there will be a population of 2,543 Lanterman-Petris-Short clients in the State hospitals on June 27, 1984. This population includes clients who have either voluntarily sought admission or been involuntarily detained by local mental health programs for evaluation and treatment.

The 1984–85 budget proposes the following:

—The same level of Lanterman-Petris-Short clients as were budgeted in 1983–84 which will require 928,195 state hospital bed days.

—$1,600,000 in additional General Funds and reimbursements to: (1) reduce budgeted salary savings at the state hospitals; (2) meet increasing workers compensation and IDL/NDI costs; and (3) meet increasing costs associated with Welfare and Institutions Code 4117.

—An augmentation of $1,003,000 in General Funds for DMH and $2,094,000 in General Funds for DDS to implement level of care staffing standards in the state hospitals for mentally disabled clients.

—An augmentation of $1,045,000 in General Funds to provide resident furnishings and privacy screens for mentally disabled clients located within the DDS/DMH mixed hospitals.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

4440 DEPARTMENT OF MENTAL HEALTH—*Continued*

20.20 Penal Code and Judicially Committed

The budget projects that there will be 1,952 judicially committed and Penal Code (JC/PC) clients in the State hospitals on June 26, 1985. This population includes patients that the Superior Court has found to be: (1) not guilty by reason of insanity; (2) unable to understand the nature of the charges sufficiently to cooperate with their legal counsel (incompetent to stand trial); and (3) mentally disordered sex offenders (crimes committed prior to January 1, 1982).

The current year shows a 2,188 budgeted bed capacity by June 30, 1984 for JC/PC clients. The budget year reflects a reduced JC/PC bed capacity of 236 beds. The 1984–85 budget proposes a reduction of $3,259,000 and 135.7 positions in the DMH and DDS mixed hospitals to accomodate these projected hospital population changes. The budget assumes that there will be: (1) a decrease of approximately 280 mentally disordered sex offenders in 1984–85 as a result of Chapter 928, Statutes of 1981 (SB 278); and (2) an increase of approximately 44 other penal code/judicially committed clients.

The budget year includes an additional $1,612,000 in General Funds to: (1) reduce budgeted salary savings at the state hospitals; (2) meet increasing workers compensation and IDL/NDI costs; and (3) meet increasing costs associated with Welfare and Institutions Code 4117.

The 1984–85 budget proposes $1,862,000 in General Funds for DMH and $285,000 in General Funds for DDS to implement level of care hospital staffing standards for mentally disabled clients.

The 1984–85 budget also proposes $143,000 in General Funds to provide resident furnishings and privacy screens for mentally disabled clients located within the DDS/DMH mixed hospitals.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	1,413.3	1,467	1,442.8	$80,715	$83,538	$87,760

20.30 Other State Hospital Services

In addition to the clients admitted to the State hospitals by the county mental health programs and committed by the Superior Court, there is a separate group of clients treated in the State hospitals under various other criteria. For example, Los Angeles County contracts with the mental health program at Camarillo State Hospital for services (approximately 42 beds) to clients with alcoholism problems. Additionally, Los Angeles County contracts with Metropolitan State Hospital for services (approximately 93 beds) to clients with drug abuse problems. DMH also provides mental health services to clients referred by the Departments of Corrections (CDC), Youth Authority, and Developmental Services.

The current and budget years include a reimbursement reduction of $879,000 and 32 positions associated with the Los Angeles County Drug Program at Metropolitan State Hospital.

The 1984–85 budget proposes $3,686,000 in additional General Funds and reimbursements and approximately 101.5 positions to: (1) annualize the support associated with 150 Penal Code beds budgeted for CDC during 1983–84 ($2,054,000); (2) provide half-year funding in 1984–85 for an additional 50 Penal Code beds for CDC ($760,000); and (3) provide half-year funding in 1984–85 for 50 Chapter 1529/82 mentally disordered sex offender beds for CDC ($872,000).

The *State Hospital Inhospital Population Count* chart displays past and projected population levels for hospital clients (excluding those on leave). The chart displays departmental policies and goals with respect to population.

The chart is vertically divided by fiscal year into two parts: "Last Wednesday of the fiscal year" and "Average for the Fiscal Year". Both components display "observed" columns which are composed of actual client count and "estimated" columns which are population projections upon which the budget is built.

Horizontally, it is divided by hospital into three categories: LPS, Penal Code and "other clients".

35 Departmental Administration

Program Objectives and Description

The Administration program provides clinical oversight and administrative support to the Department's programs. It includes the Executive, and General Support elements. The reimbursements and federal funds budgeted under this program have been distributed and displayed under the Community Services Program.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Net Totals, Departmental Administration	253.8	255.3	181.7	–	–	–

35.01.010 Executive

The Executive component includes the Director's Office, legal services, liaison with the Citizens Advisory Council, Legislature and Conference of Local Mental Health Directors, Public Information Office, Patients' Rights Office, Forensics Office, and the Senior Medical Consultant. It also includes the Deputy Director, Clinical Services, which oversees all treatment programs.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	30.3	26.2	21	$1,207	$1,082	$1,269

35.01.020 General Support

The General Support component includes planning, program evaluation, human resources management, external relations, financial and information management.

The current and budget years reflect the following limited term adjustments:

— $480,000 within 1983–84 in Federal funds and 6.0 personnel years in the Manpower Development Branch for the Manpower Development Project.

— $81,000 within 1983–84 and $81,000 within 1984–85 in Federal funds and 6.0 personnel years in the Community Support Systems Section for the Community Support Systems Project.

— $453,000 within 1983–84 and $454,000 within 1984–85 in Federal funds and 9.5 personnel years in various sections for administration of the Federal block grant.

The current and budget years also include the elimination of 4.0 personnel years and $255,499 in reimbursements to reflect the abolishment of the Mental Health Training Center Operation. Three of the 4.0 personnel years were abolished per Section 20 of the Budget Act of 1982.

The 1984–85 budget proposes the following changes:

—The reduction of $15,000 for support of advisory boards and commissions to reflect a decrease to discretionary meetings and the associated expenses.

—The reduction of $64,000 in General funds, $10,000 in federal funds and $2,000 in reimbursements to reflect a reduction to certain low priority operating expense and equipment expenditures.

—The reduction of $281,000 (half year funding) and 7.2 personnel years in the service area teams and DMH's headquarters to reflect the economies produced through the consolidation of the six service area teams into two area teams and the consolidation and elimination of certain work assignments within DMH's headquarter operations.

—The reduction of 7 administrative support personnel years and $172,000 to reflect the transfer of DMH's mental health social/case management services to the local community mental health programs.

—The addition of $78,515 in General funds and three personnel years to establish a Sex Offender Project Evaluation Section to monitor the results of state hospital activities in accordance with Penal Code Sections 1364 and 1365.

—The reduction of $451,000 and 43.2 personnel years to reflect the decrease in the State's administrative operation resulting from the Mental Health Initiative.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	223.5	229.1	160.7	$8,905	$9,458	$9,714

40 LEGISLATIVE MANDATES

This program reflects the cost of reimbursing local governments for (1) new programs and (2) increased levels of existing services mandated on local entities by legislation or executive regulations.

Authority

The State is required to pay the cost of legislative programs mandated on local governmental entities by Chapter 1406, Statutes of 1972 (SB 90) as amended by Chapter 358, Statutes of 1973. These two pieces of legislation apply to mandates effective after January 1, 1973. As added by such legislation, Section 2229 of the Revenue and Taxation Code provides for reimbursement of lost personal property tax revenues, while Section 2231 provides for the reimbursement of costs of legislatively mandated programs.

Mandate: Required Administrative Staff

Chapter 1061, Statutes of 1973: revised provisions for review and submission of county Short-Doyle plans; made changes to the timing of submissions; added language providing for certain precare and after care services; provided that each county mental health program which serves a population in excess of 100,000 shall have one or more staff skilled in the management of administrative support functions supervising such functions; and provided that the Department of Metal Health shall submit a five-year plan for local mental health services by October 1 of each year. This mandate impacts counties in the following manner: (1) Requires a quality control system, a placement directory, and training program in each county Short-Doyle plan. (2) Requires the performance of administrative support functions in local mental health services with staff skilled in those functions.

Mandate: MDSO Commitment Costs

Chapter 991, Statutes of 1979, made the provisions of Section 6316.2 permanent by eliminating the self-repealing provision. This mandate impacts counties in the following manner: provided for the transportation, care, and custody of the patient, and all trial and related costs in accordance with the procedure for extending the committment of dangerous mentally disordered sex offenders.

[a] "Funding for this mandate is provided in the budget for "State-Mandated Local Programs" (Department 9680) in the General Government portion of the Budget. Data shown here in parentheses is for information purposes only."

5100 EMPLOYMENT DEVELOPMENT DEPARTMENT

The Health and Welfare Agency, through the Employment Development Department (EDD) provides comprehensive statewide and local manpower planning, improves the efficiency of and accountability for delivery systems for manpower programs, places job–ready individuals in suitable jobs, provides qualified job applicants to employers, assists potentially employable individuals to become job ready, creates employment opportunities, collects employer and employee contributions to the Unemployment and Disability Insurance Funds, and pays unemployment and disability insurance benefits. It also collects the Personal Income Tax withheld by employers.

The department's overall program is designed to achieve five essential, interrelated and interdependent goals. The goals are:

1. Provide job placements.
2. Furnish job placements and related services to low–income clients.
3. Maintain an unemployment insurance and disability insurance benefit payment system.
4. Provide service to employers.
5. Place welfare recipients in jobs.

EDD offers a broad spectrum of services to employables and their potential employers, including current and localized labor market information, instructions in job and employer requirements, seek–work methods, training and education in demand occupations, job development with employers and industries, placement services and follow–up to improve job retention.

Program performance data for this department may be retrieved from the California Fiscal Information System.

10 EMPLOYMENT AND EMPLOYMENT RELATED SERVICES PROGRAM

Program Objectives and Description

The citizens of the State of California benefit from having a stabilized and growing economy. However, many employer openings remain unfilled with a loss in production of goods and services, and at the same time large numbers of potential job applicants are unable to find employment and suffer wage loss and reduced buying power.

This program's objective is to provide the means to serve employers and applicants by reducing the length of time a person is unemployed and the length of time a job is vacant.

The 1984–85 Governor's Budget proposes a reduction of 34 personnel years ($1,162,000) for redirection to the Tax Collections and Benefit Payments Program for accelerated Personal Income Tax (PIT) Collection activities as mandated in Chapter 323, Statutes of 1983. The reduction of 34 personnel years is accomplished through the realignment and transfer of functions, through the implementation of administrative efficiencies and through decreased workload in this program.

The 1984–85 budget also proposes a reduction of 18 personnel years ($613,000) in the Service Centers by consolidating administrative staff needed for the support of direct service staff; and a reduction of 7 personnel years ($258,000) in the Job Agent area through administrative efficiencies. No reduction in existing levels of services to clients is anticipated to occur as a result of the 25 personnel year reduction.

As an assist in the first year of Job Training and Partnership Act, approximately 213 personnel years of effort will be provided to the Private Industry Councils. The 1984–85 budget proposes a reduction in reimbursements of $7,765,000 and an associated 171.9 personnel years in the Contracted Prime Sponsors Component to reflect the increased involvement of the private and local sector in Job Training and Partnership Act activities. 52 personnel years remain in the budget to assist those service delivery areas which may be unable to find alternatives to State employment and Training Program assistance.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

10.10 General Employment Services

The General Employment Services Element provides a labor exchange whereby employer job openings are obtained and qualified applicants are matched with suitable employer job openings, and labor market information on employment and unemployment in local areas is gathered, analyzed and disseminated to prime sponsors, schools and other interested parties. General services include outreach, interviewing, testing, counseling, referral to placement, training, and other services in readying individuals for employment.

The process of job matching involves much more than the basics of working directly with employers to assist in resolving their work force problems and working directly with jobseekers to assist them in obtaining suitable work. Some staff provide related additional employment services to clients. Some of these services are employment counseling, vocational testing, vocational training and Job Search Workshops.

Before being referred to a job, applicants are carefully screened to match the skills of the individual with the requirements of the job. Screening saves the employer unnecessary interviewing time and it also protects the jobseekers from the discouragement of being referred to jobs for which they are not qualified.

EDD also provides specialized services to select applicant groups. Among these are veterans, handicapped, migrant or seasonal farmworkers, older workers, youth, women, minorities, ex-offenders, and welfare recipients.

These services are provided through 135 field offices in various cities throughout the state.

10.20 Special Group Employment Services

Special Group Employment Services includes a multifaceted array of services designed to assist hard to place persons in securing worthwhile, productive work. These persons may be disadvantaged in the job market for a variety of reasons, including: lack of skill, training or experience; age; physical handicap; social barriers; cultural differences and others. The services are delivered through a number of components which are oriented to specific groups. The objectives of the components for this program are described as follows:

The Work Incentive (WIN) component assists recipients of Aid to Families with Dependent Children (AFDC) to obtain employment.

Employable applicants/recipients of AFDC benefits must register with EDD for employment, employment related services and training. Intensified employment and supportive services are given to employable registrants in order to assist them in obtaining regular, unsubsidized employment. Coordination of employment and supportive services is facilitated by co-location of county social services staff in EDD offices. In an effort to obtain employment for registrants and WIN participants, EDD staff contact employers to develop jobs and orient WIN participants to the local job market through job-finding workshops.

The registration of Food Stamp recipients is to help them to become economically self-sufficient and independent by providing job placement and other employment services. Food stamp applicants must register for work, unless exempt, as a condition of continued eligibility. Those applicants for whom EDD can perform a job placement or employment related service are interviewed and considered for any job openings or services that are available. Applicants who have not been interviewed may be considered for any appropriate services as these services become available.

---

* Dollars in thousands

5100 EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

The service centers in eight economically depressed areas of the State provide employability development and placement services to individuals who need coordinated intensive services to become employable because they are vocationally handicapped due to disability, lack of skills, obsolescence of job skills, limited education, or poor work habits and attitudes. Intensive employment related services provided by the eight service centers concentrate on the removal or control of barriers to employment through a case responsible approach. This approach includes orientation to the world of work, referral to other governmental or nongovernmental agencies for supportive services to address client barriers, referral to or enrollment in educational or vocational training, use of case services funds to obtain goods/services necessary for employment, counseling, testing, providing labor market information, job development, referral and placement.

The Job Agents Component provides intensive employment services above those normally provided by the General Employment Services Element through the efforts of Job Agents located in 34 EDD field offices. This intensive approach includes the provision of job placement and job development activities, guidance and direction in the removal and/or control of barriers to employment, and follow-up services for clients already placed in jobs. Clients served by Job Agents must be registered with EDD, be classified economically disadvantaged, and have one or more of eight specified barriers to employment which include lack of skills, low educational level, health problems and arrest records.

Due to the implementation of new programs including the Employment Training and Job Training Partnership Act Programs which specialize in the fostering of job placement and training to displaced, economically disadvantaged, and unskilled individuals, the CWETA Program is scheduled to end on December 31, 1984. EDD is in the process of reviewing and closing out completed contractual agreements.

Youth Employment Services relates exclusively to those separate efforts which are undertaken to deal with the employment problems of youth. These efforts include developing employment opportunities, assisting in transition from school to work, providing basic and remedial education, training for entry level vocational skills, and teaching the self-discipline of work experience in worthwhile, productive work.

The goal of the Employment Preparation Program established by SB 1476, Chapter 918, Statutes of 1980 is to prevent and reduce welfare dependency by assisting AFDC applicants and recipients to find jobs as quickly as possible. To achieve this objective, EDD implemented an integrated program which includes: providing clients with immediate job services, providing self-help job search skills at the earliest possible time, assisting in direct placement and self placement of AFDC applicants and recipients into permanent private sector and unsubsidized employment and developing effective linkages among all state and local employment and training agencies. In the three pilot counties Lake, Ventura and San Mateo 2,741 clients were served during the first year of operation.

The goal of the Re-employment Assistance for Displaced Workers component was to assist workers in declining industries. Approximately $2 million was used to support collaborative industry, labor, and community efforts to transition displaced workers into new jobs. Included were job services in cases in which private sector resources have been provided, as in the agreement between General Electric Company, the International Brotherhood of Electrical Workers, and the State of California. New legislation authorizing the Job Training Partnership Act (JTPA) includes approximately $20.1 million in 83–84 and $18.1 million in 84–85 for displaced worker assistance. These expenditures are authorized in Program 60.

5100 EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

10.30 Office of Employment and Training (OET)

EDD administered, through the Office of Employment and Training (OET) Comprehensive Employment and Training Act (CETA) Operations Office both the Governor's Special Grant funds provided to the State under federal employment and training legislation (currently CETA) and the Balance of State Prime Sponsorship under CETA. The Governor's Grant funds provided for vocational education services, support for the State Employment and Training Council and statewide employment and training services. Through the State Employment and Training Council provided for participation by local government, community-based organizations and labor, business and client groups in the development of employment and training policy and comprehensive plans. CETA Operations Office was also responsible for coordination of the training-related programs and activities of all State agencies with those of local CETA prime sponsors. The Balance of State Prime Sponsorship provided funds for employment and training programs in the 27 California counties with populations too small to qualify them for direct employment and training funding.

The federal Comprehensive Employment and Training Act (CETA) expired on September 30, 1982. Legislation authorized a new employment and training program, the Job Training Partnership Act (JTPA) to replace CETA beginning in October 1, 1983. (See Program 60.) Beginning October 1, 1983 through March 31, 1984, the CETA Operations Office will be engaged in closing out the subgrants and State CETA Grant, preparing final program and fiscal reports, resolving audits and settlement with the Department of Labor on all fiscal matters.

The Education Linkages component which is General Funded, remains budgeted to encourage coordination and to establish linkages between job training sponsors and appropriate educational entities to better utilize available employment and training funds by minimizing duplication of effort.

These linkages, in the form of Business, Labor, Education and Training Councils, are budgeted to help strengthen business and labor input into local vocational education and training programs. Funding of one million dollars will continue to support pilot efforts to ensure that local vocational education and training funds assist industries with labor shortages and to encourage employment-based training.

10.50 Contracted Job Training Services

Funds for job training programs under the Job Training Partnership Act are allocated to the State of California. Of those funds, 78 percent are allocated to local Service Delivery Areas by formula, while 22 percent is retained by the State for specified purposes. The EDD Job Service bids for contracts in competition with other potential program operators to provide work experience, on-the-job training, vocational education, assessment, placement and related services to target groups of eligible persons identified in the Service Delivery Area plan. The department coordinates with Service Delivery Areas at the local level to effect an overall delivery system which maximizes private and local involvement in Job Training and Partnership Act activities.

20 TAX COLLECTIONS AND BENEFIT PAYMENTS PROGRAM

Program Objectives and Description

The seasonality of certain industries, along with fluctuations in the economy and technological changes, causes unemployment of individuals through no fault of their own. In addition, workers have loss of wages due to nonoccupational illness or injury. To alleviate individual economic problems and to assist in stabilizing the economy, an income maintenance system is desirable.

This program provides a system of income maintenance based upon insurance principles. To accomplish this, the program operates an unemployment insurance tax collection system, benefit payment systems and an appeals process to adjudicate disputed claims. In conjunction, this program operates a disability insurance system for public as well as private sector employees and a Personal Income Tax collection system for all California employers.

The 1984–85 Governor's Budget proposes a workload reduction of 863.7 personnel years and $19,815,000 (FFP) commensurate with Unemployment Insurance economic projections in California and an increase of 277.4 personnel years and $6,676,000 (FFP) to implement Federal Supplemental Compensation and Trade Readjustment Act Benefit Program extensions. Also proposed is a reduction of 44.5 personnel years ($1,392,000 FFP) for redirection to Personal Income Tax withholding activities to partially offset an increase of 96.5 personnel years ($2,654,000 GF) for accelerated Personal Income tax collection, as mandated in Chapter 323, Statutes of 1983, for employee fraudulent withholding activities, and for workload associated with employer growth. The 44.5 personnel year reduction is accomplished through the realignment of functions and through workload reductions in this program. The remaining 52 personnel years needed to accommodate increased workload are identified in the Employment and Employment Related Services Program and in the Administration Program.

20.10 Unemployment Insurance

The Unemployment Insurance Element provides and maintains an employer–funded system to pay benefits to all individuals who become unemployed through no fault of their own to reduce unemployment and the suffering caused thereby to a minimum.

Each year one out of eight protected persons finds that he must use this insurance. Approximately 90 percent of the labor force is covered by state or federal unemployment insurance programs provided by this component. Those persons generally not protected are comprised of new entrants into the labor force, the self–employed, and most domestic employees, and church employees.

Employers subject to the California Unemployment Insurance Code are identified, registered and tax rates are determined by the Employment Development Department, which also makes unemployment insurance tax collections and maintains wage records to establish the monetary eligibility of claimants to unemployment insurance compensation. Weekly benefit payments provide a partial wage replacement for temporary periods of involuntary unemployment. Payments vary from $30 to $166 depending on a claimant's earnings in covered employment during a recent one year base period. Eligibility requires that the individual be unemployed through no fault of his own, register with the Department, be able and available for work and be actively seeking work as instructed. Benefits must be paid promptly when due. Continuing eligibility is reviewed and all eligibility issues are resolved at a determinations interview. Adverse decisions can be appealed by an affected party.

* Dollars in thousands

5100 EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

The state and federal programs in which an appeal or petition may be filed are: unemployment insurance benefits regular and extended, including benefits claimed by federal and state employees, former service persons, and individuals pursuing retraining courses; unemployment benefit hearings for persons living in California but claiming from another state; benefit adjudication for individuals who had their hearing outside California but are claiming benefits based on California wages; unemployment disability insurance appeals, including claims against voluntary plan carriers; California Personal Income Tax activities, Disaster UI Assistance, Trade Act; and determination of tax liability of employers, e.g., transfers of reserve accounts, claims for refunds, and assessments.

A claimant or interested employer may appeal a determination to an Administrative Law Judge (lower authority), and an employer may file a petition to an Administrative Law Judge (lower authority) from an assessment, denial of a claim for refund, or protest to charges to the employer's reserve account, or a transfer of a reserve account. The Administrative Law Judge's decision may be appealed by the interested parties, including the Department, to the Appeals Board itself (higher authority).

20.20 Disability Insurance

The Disability Insurance Element provides and maintains a system of indemnification to compensate in part for wage loss of individuals disabled because of nonoccupational illness or injury. It consists of two components. One (20.20.010) covers private sector employees who have worked in California and certain public employees who elect to be covered, and the other (20.20.020) covers state employees.

The Private Sector Disability Insurance component provides and maintains an employee–funded system of indemnification to compensate in part, wage losses of individuals disabled because of nonoccupational illness, injury, or pregnancy. To accomplish this requires a payment system, tax collection system, a staff support system, an appeals system and certain administrative functions for voluntary disability insurance plans. Employers may substitute a voluntary plan if the benefits are equal to and premiums do not exceed the state plan.

The State Employee Nonindustrial Disability Insurance component maintains a system of wage loss indemnification for state employees disabled because of nonoccupational injury, illness or pregnancy to compensate in part for wage loss when the state employee has exhausted sick leave. Eligible state employees receive one–half of full pay or $125 per week, whichever is less, for a maximum of 26 weeks for any one period of disability. Departments are billed for administrative costs of this program incurred by EDD based on their percentage of claims paid.

5100 EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

20.30 Personal Income Tax withholding (PIT)

All employers are required by law to deduct, report and pay personal income tax. The Personal Income Tax Withholding Element conducts all activities necessary to equitably and promptly collect PIT deducted from workers' wages from all employers in the State, to inform employers of their responsibilities and to ensure compliance with legal provisions of the program. Tax schedules are prepared by the Franchise Tax Board. Contributions are collected by EDD in accordance with these schedules.

20.40 Former Inmates

In most cases, former inmates released from California's correctional institutions are unemployed and face economic uncertainty which contributes to a high recidivism rate. To alleviate economic suffering during the period immediately following release, unemployment and disability insurance are provided. The former inmate may receive a maximum of 26 weeks of unemployment or disability insurance benefits or combination thereof following the filing of the first claim for unemployment insurance after release from an institution under the jurisdiction of the California Department of Corrections. The benefits and administrative costs are reimbursed by the Department of Corrections. Although this program ended October 31, 1983, $970,000 (reimbursements) is budgeted in 1984–85 to fund appeals by benefit recipients and to reflect reimbursable costs by the Department of Corrections not paid in 1983–84 due to payment lags.

This element provides a system of income maintenance for inmates released from California correctional institutions based on insurance principles. Benefits are based on hours worked or hours participated in a vocational training program while serving in one of the Department of Correction's institutions.

Authority

State: Unemployment Insurance Code, Division I. Part 1, Sections 1480–1484.

20.60 Employment Training Fund (ETF)—Collections

This fund was created through the enactment of Chapter 1075, Statutes of 1982 (AB 3154). This fund will divert 0.1 percent of employer Unemployment Insurance Fund (UI) contributions to the ET Fund. As a result, the Employment Tax Branch (ETB) is responsible for the collection of this tax. Approximately, 520,000 employers will be required to report and remit contributions to ETF. Approximately $55 million annually will be diverted to the newly created ET Fund to provide an employer-funded training program for skills in demand by local employers. These positions are limited term to June 30, 1984 at which time the workload justification will be reviewed.

30 GENERAL ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide policy direction, coordination, leadership and staff support services to relieve line managers of routine administrative duties so they may direct their resources toward accomplishment of the department's goals and objectives.

The areas of support provided are executive direction, fiscal management, personnel management, management systems, automatic data processing, reports and analysis, information and public relations, and services such as building maintenance, office services, duplicating, etc.

Separate attendance reporting units are established within the branches of EDD to provide administrative staff and technical support for the Department's programs, as follows:

The Executive Branch includes the Director's Office, which is responsible for the overall administration of EDD; the Legislative Liaison Office is the Department's link to the State Legislature and Congress; Employment Services Board studies problems related to job training and placement; Planning and Policy Development Office's principal functions include development of EDD's policies; Communication's Office develops and maintains public understanding of the Department's policies and publicizes the services available to employers and job applicants; Legal Office provides advice and assistance concerning legal matters affecting the Department; Equal Employment Opportunity (EEO) consults with the Executive Staff on all aspects of EEO and Affirmative Action.

The Management Review and Support Branch includes the following divisions: The Program and Analysis Division which assists all levels of EDD management by studying management and administration concerns and develops recommended solutions; and provides independent, comprehensive, and objective information on the level and quality of the Department's operations; and the Investigation Division, which is designed to detect and prevent internal and external fraud activities committed against the Department.

* Dollars in thousands

5100 EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

The Administration Branch includes: Personnel Programs Division, which provides personnel management support to the Department in service areas related to selection, hiring, employee development, discipline, classification and pay, employer/employee relations and payroll services; Fiscal Programs Division which administers the fiscal accounting, budgeting and fiscal management programs of the Department; Employment Data and Research Division which provides employment data and manpower planning information to the Department, the Legislature, other government agencies and the private sector; Data Processing Division which provides automated processing and data communication services in support of departmental programs; and Business Services Division provides a full range of business and office services for the Department.

Approximately 200 positions in the Operations Branch are devoted to building maintenance activities.

Also included in the element is the Contingent Fund to pay for various charges not funded by the federal government, such as increased rental costs over and above the amount allowable by the federal government.

The 1984–85 Governor's Budget proposes a reduction of 28 personnel years ($665,000) for redirection to the Tax Collections and Benefit Payments Program for accelerated Personal Income Tax (PIT) activities as mandated in Chapter 323, Statutes of 1983. The reduction of the 28 positions are accomplished through the realignment and reorganization of functions and through workload reductions in this program.

50 EMPLOYMENT TRAINING PANEL PROGRAM

Program Objectives and Description

The Employment Training Panel (ETP) was created through the enactment of Chapter 1074, Statutes of 1982 (AB 3461). The Panel is funded by diverting a small fraction of employer taxes that would otherwise have been paid into the Unemployment Insurance Fund. This is a special fund which is not available for any other use. The purpose is to promote economic development of California by providing employers, expanding or locating in California, with the trained workers they need and to minimize UI costs by providing employment opportunities to UI recipients. To accomplish the promotion of economic development, the ETP assists employers and training agencies in the development of projects, negotiates legal agreements, and provides training funds.

60 JOB TRAINING PARTNERSHIP ACT (JTPA)

Program Objectives and Description

EDD Administers, through the Job Training Partnership Office (JTPO), funds provided to the State under the federal Job Training Partnership Act (JTPA). JTPA funds provide for the support of the State Job Training Coordinating Council, Incentive and Technical Assistance to the Service Delivery Area (SDA), Older Workers, Educational Linkages, Administration of the Program, Displaced Worker, Adult and Youth Training Program, Summer Youth Programs, and the support of local Private Industry Councils.

Pursuant to policy direction provided by the State Job Training Coordinating Council, the JTPO administers for the Governor federal funds provided under the JTPA for the purpose of conducting training programs to prepare youth and unskilled adults for entry into the labor force and to afford job training to those economically disadvantaged individuals and other individuals facing serious barriers to employment who are in special need of such training to obtain productive employment.

60.10 JTPA Council

The State Job Training Coordinating Council is mandated by federal legislation and state law to provide policy guidance for the operation of the Job Training Partnership Act and to promote the integration of employment and training programs at the state level, and to further cooperation between government and the private sector in meeting the needs of employers and the labor force. The Council acts in an advisory and policy making and oversight role for the Governor. State regulations permit the Council to employ personnel necessary to carry out its responsibilities.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (support) (*Federal Trust Fund*[f])	–	8.3	11	–	$5,802	$4,072

60.20 Incentive and Technical Assistance

Six percent of the state's JTPA Title IIA allotment for each fiscal year shall be made available to provide incentive grants for programs exceeding performance standards, including incentives for hard to place individuals. Funds not needed to make incentive grants shall be used to provide technical assistance to those Service Delivery Areas not qualifying for incentive grants.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (*Federal Trust Fund*[f])	–	7.5	10	–	$12,107	$12,107

60.30 Older Workers

Three percent of the state's JTPA Title IIA allotment for each fiscal year shall be made available to provide job training programs in each Service Delivery Area to assure training and placement of older individuals.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (support) (*Federal Trust Fund*[f])	–	–	–	–	$6,053	$6,053

60.40 Educational Linkages

Eight percent of the state's Title IIA JTPA allotment for each fiscal year shall be used to provide services for eligible participants, and to facilitate coordination of education and training services. Coordination shall be through the use of cooperative agreements between the state agency, Service Delivery Areas, and local education agencies. All funds granted for the purpose of providing services to eligible participants must be matched with non-JTPA funds.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (support) (*Federal Trust Fund*[f])	–	2.3	3		$16,143	$16,143

60.50 Administration

The Administration component budgets 110.5 personnel years in 1984–85 which are responsible for the establishment of rules, regulations and procedures needed to administer the JTPA Program. Other responsibilities include the review and recommendation of all Service Delivery Area (SDA) plans, the allocation of funds to SDAs for the purposes and requirements of the JTPA and the FESA (Family Economic Security Act), and the development of standards to measure and to evaluate program performance. In addition, the development and maintenance of accounting, auditing and other controls are implemented to ensure the proper disbursal and accounting of JTPA funds.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (support) (*Federal Trust Fund*[f])	–	68.3	110.5	–	$4,287	$6,017

60.60 Displaced Workers

Federal funds for employment and training assistance for displaced workers are appropriated pursuant to Title III, Section 301 of JTPA. All Title III funds allocted to the state on a formula basis require matching funds from a nonfederal source.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (support) (*Federal Trust Fund*[f])	–	9.7	4.8	–	$20,153	$18,153

60.70 Adult and Youth Training Programs

Under JTPA, funds for training services for economically disadvantaged adults and youth are allocated under Title IIA. Such funds are allotted according to the federal formula including the relative number of unemployed individuals and the relative number of economically disadvantaged individuals.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (Local Assistance) (*Federal Trust Fund*[f])	–	–	–	–	$157,390	$157,390

* Dollars in thousands

5100 EMPLOYMENT DEVELOPMENT DEPARTMENT—*Continued*

60.80 Summer Youth Program

The Summer Youth Program is funded under Title IIB of JTPA for the purpose of providing basic and remedial education, employment training, job search assistance, and other services as required for eligible youth.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (Local Assistance) (*Federal Trust Fund*[1])	–	–	–	–	$74,436	$74,436

60.90 Private Industry Council

Under JTPA, each Service Delivery Area is required to establish a Private Industry Council to provide policy guidance for and oversight of the activities under the Service Delivery Area's job training plan. The Private Industry Councils received during FY 1983–84 a one-time planning grant for the purpose of implementing an employment and training system within their Service Delivery Areas.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (support) (*Federal Trust Fund*[1])	–	–	–	–	$2,000	–

5160 DEPARTMENT OF REHABILITATION

The Department of Rehabilitation is the principal State agency that helps people with disabilities reach social and economic independence. The primary goal of the Department is to rehabilitate and place into suitable employment, persons with physical and mental handicaps.

Program Objectives

- Provision of restorative, educational and supportive services to clients through vocational rehabilitation counselors.
- Advocacy for the rights and opportunities of the disabled.
- Development of small business opportunities for the blind and severely disabled.
- Elimination of architectural, transportation and attitudinal barriers to social and economic integration.
- Support for services and programs provided by community rehabilitation facilities and other local level resources.
- Provision of prevocational services to persons with disabilities who are not ready for vocational rehabilitation programs.

10 VOCATIONAL REHABILITATION SERVICES

Program Objectives and Description

The Vocational Rehabilitation Services Program is the Department of Rehabilitation's major service. The Department estimates that for the budget year there will be over 674,000 working age Californians with disabilities who have a need for vocational rehabilitation services in order to obtain or retain employment.

The Department delivers basic vocational rehabilitation services to the general disabled community through district and branch offices throughout the State. A number of formal and informal cooperative agreements between the Department and State and local agencies (educational institutions, hospitals and mental health treatment facilities, and alcoholism treatment programs) assure specialized services to particular target groups among the disabled population. The Department places special emphasis on services to clients with severe functional limitations including the blind, deaf, developmentally disabled, mentally ill and cardiovascular disabled.

The Department provides comprehensive training and supervision, enabling the legally blind to support themselves in the operation of vending stands, snack bars and cafeterias. Prevocational services are provided by the Orientation Center for the Blind to newly blind adults to prepare them for basic rehabilitation services.

Rehabilitation services which support the basic program are also provided to clients, employers, other units of government and the disabled population in general. These services constitute Program Element 10.40, Other Rehabilitation Services.

The Department augmented the program by $530,000 of one time carryover 1982–83 Federal funds (18.0 personnel years) which allowed it to avoid a layoff of incumbents in positions which were terminated effective July 1, 1983 due to reductions of Federal funds for 1983–84.

The 1984–85 budget proposes a reduction in administrative functions by $478,000 and 6.5 personnel years by increasing the span of supervision in the Field Operations Division and by consolidating sanitarian inspection functions in the Program Support Division.

Due to the considerable lessening of inflation over the last year-and-a-half, the 1984–85 budget proposes a 2% cost-of-living adjustment of $4,000.

The 1983–84 budget proposes an increase of $1,125,000 in additional federal funds for alcoholism and business enterprise activities.

10.10 Rehabilitation Counseling and Placement

This program element is the primary service delivery effort of the Department of Rehabilitation. Through rehabilitation counselors, the Department evaluates applicants for rehabilitation services, determines eligibility for services, develops an individualized written rehabilitation plan jointly with the person having a disability, identifies specific services required for rehabilitation, provides such services either by coordination of available community resources or purchase of services from the community, helps the person with a disability upon completion of the plan to find suitable employment, and maintains follow-up contact to assure employment stability.

The general disabled public receives such services through a basic program which is financed 80 percent by federal funds and 20 percent by State and other matching funds. The Department's programs to serve beneficiaries of Social Security Disability Insurance and recipients of Supplemental Security Income benefits are financed with 100 percent federal funds. Special cooperative agreements with other state and local agencies are financed with 80 percent federal funds and 20 percent with funds from the cooperating agency. These programs direct rehabilitation services to particular target groups such as the mentally ill, the mentally retarded, and alcoholics. As a result of Chapter 1435, Statutes of 1974, the Department provides services to individuals with work related injuries through reimbursement from insurance carriers.

In Fiscal Year 1984–85 the Department anticipates the rehabilitation of 13,603 persons with disabilities including 3,400 public assistance recipients. Rehabilitations of this kind represent considerable annual public savings in Welfare, Medi-Cal and Social Security costs, as well as increased tax revenues from the earnings of rehabilitants.

In accordance with the Federal Rehabilitation Act of 1973, the Department has established a priority system of extending services to the severely disabled.

In Fiscal Years 1983–84 and 1984–85, the Department anticipates that 50 percent of the persons rehabilitated will be severely disabled.

10.20 Business Enterprise Program

The Business Enterprise Program for the Blind (BEP) provides training and employment for legally blind persons in the management of food service and vending facilities on public and private properties throughout the State.

The staff promotes and develops new locations in public and private buildings for vending and food service operations. Other services include the design and installation of new operations, remodeling of older facilities, supervision of new vendors, and general business services.

Legally blind persons (vendors) who complete BEP's prescribed training courses are selected on a competitive basis to operate facilities. The vendors retain the profits from the facility they manage except for a percentage prescribed by law. This percentage (fee) is placed in a trust fund account, matched with federal funds and used for the establishment of new facilities and the maintenance of established facilities.

Performance Measures	*1982–83**	*1983–84**	*1984–85**
Business locations (year end)	290	290	295

10.30 Orientation Center for the Blind

The Orientation Center for the Blind trains blind adults, particularly those newly blinded, in skills for adapting to blindness and in building their confidence in their ability to function independently in a sighted society. Instruction is provided in techniques of travel, physical conditioning, home economics and daily living, woodworking and other shop techniques, braille, and business principles and methods.

10.40 Other Rehabilitation Services

The Department provides other complementary rehabilitation services to or on behalf of individuals with disabilities. These services include: (1) development and implementation of new rehabilitation technology and methodology, and (2) representation of the rights and needs of persons with disabilities.

1. Development and implementation includes evaluating the potential of clients having severe disabilities to operate motor vehicles, wheelchair fittings for clients who cannot use commercially available equipment, and fabrication of various assistive devices to expand mobility or scope of independent function for persons with disabilities. Another aspect is development of new counseling techniques, training of counselors and evaluation of results.

2. The Department also operates several programs designed to safeguard or promote the rights of persons with disabilities. The Rehabilitation Appeals Board and Ombudsman Program ensure that clients or prospective clients receive the services to which they are entitled. The Mobility Barriers Section provides expert consultation and assistance to state and local government and to profit and non-profit organizations which are subject to the provisions of Section 504 of the Rehabilitation Act of 1973 and California law, regarding access to public facilities and non-discrimination on the basis of handicap.

20 HABILITATION SERVICES

The Habilitation Services Program addresses the needs of adults with severe handicaps who are currently too disabled to benefit from mainstream vocational rehabilitation programs, but who need and can benefit from a broad range developmental program targeted at increased independence, improved social functioning and, to the extent feasible, development of the individual's potential for mainstream vocational rehabilitation programs.

Under this program the Department purchases habilitation services from community work activity programs for individuals with developmental disabilities referred by the Department of Developmental Services regional center system. The Department also provides services to blind and deaf blind individuals through counselor-teachers, purchase of reader services, and a community-based project to serve the elderly blind.

The 1984–85 budget proposes an additional $2,391,000 to fund projected caseload growth of 730 clients in the Work Activity Program. In conjunction, the 1984–85 budget assumes the continuation of statutory language enacted in 1983–84 which provides the Department the authority to assure that essential services are provided to clients on a prioritized basis within existing resources.

Due to the considerable lessening of inflation over the last year-and-a-half, the 1984–85 budget proposes a 2% cost-of-living adjustment of $820,000.

Authority

20.30 Counselor-Teacher and Reader Services	7.5	7.1	7.1	475	459	482

20.10 Work Activity Program

The Department purchases habilitation services for persons with developmental disabilities. Eligibility for services is determined by a regional center, who prepares an individual program plan for each client. The Department is responsible for the review and approval of client assessments developed by facilities conducting work activity programs to ensure that services are directed toward preparing clients for their highest level of functioning and for the promotion of innovative approaches to the delivery of habilitative services by community-based programs.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Average number of clients served in work activity programs	11,325	11,763	12,493

20.30 Counselor-Teacher and Reader Services

The services of department counselor-teachers are provided to individuals who are blind or deaf-blind. These services include in-the-home counseling, training in independent living and mobility training in the community. Another group of individuals who are blind and who are not vocational rehabilitation clients receive reader services, by law, from the Department enabling them to participate in college programs not necessarily directed toward vocational goals. Also, the Department has a project to serve elderly blind individuals through community-based facilities.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Persons served by counselor-teachers	867	900	950

30 SUPPORT OF COMMUNITY FACILITIES

Program Objectives and Description

The Community Resources Development Section, in conjunction with field office staff, works with government and private nonprofit organizations toward development or improvement of rehabilitation services needed to serve clients of the Department and other people with handicaps at the community level. These community based services are provided by rehabilitation workshops, rehabilitation centers, independent living programs, special facilities for the blind and deaf, halfway houses, and alcoholic recovery homes. Community based rehabilitation facilities are encouraged to place more emphasis on job development and placement of persons with disabilities.

The Department also sets standards for services provided by such resources, inspects and certifies programs to ensure that standards are met, and assists all agencies of State government in establishing fee schedules for services purchased from rehabilitation resources. Each year, the Department inventories rehabilitation facility services throughout the State and publishes the California State Plan for Rehabilitation Facilities.

The Department augmented this program by $70,000 in carryover 82–83 federal funds (2 personnel years) to avoid a layoff of incumbents in positions which were terminated effective July 1, 1983, due to reductions of Federal Funds for 1983–84.

The 1984–85 budget proposes a reduction in administrative functions by $41,000 and one personnel year by increasing the supervisory span of control in the Community Resources Development Section.

Due to the considerable lessening of inflation over the last year-and-a-half, the 1984–85 budget proposes a 2% cost-of-living adjustment of $69,000.

The 1984–85 budget proposes an increase of $1,600,000 in additional federal funds for rehabilitation facilities for the improvement of employment preparation and job placement programs and for the upgrading of client training and production resources.

30.10 Technical Consultation to Rehabilitation Facilities

Community resource specialists and technical consultants provide assistance to local community rehabilitation facilities in general management, program planning, industrial engineering, accounting, public relations, contract procurement, and other technical areas. In the case of workshops, technical consultation enables community agencies to integrate a rehabilitation service program with a production manufacturing operation to create a setting in which realistic evaluation, work adjustment, and a vocational training of people with disabilities can take place. This consultation has enabled over 300 organizations to provide a high level of service to a substantial number of persons with disabilities throughout the State. To help these organizations become self-supporting, a program to encourage the State and other public entities to purchase goods and services from them will continue next year.

Performance Measure	*1982–83*	*1983–84*	*1984–85*

30.30 Grants to Independent Living Centers

State funding is provided to independent living centers (ILC's) to maintain and develop services that assist individuals with disabilities in achieving social and economic independence. Independent living centers are private, nonprofit organizations that provide peer counseling, advocacy, attendant referral, housing assistance and other referrals and services as necessary to individuals with severe disabilities to assist them in their efforts in living fuller and freer lives outside institutions. Program objectives include maintaining existing ILC services, establishing a base of information about these services, and their effectiveness in terms of client gain and determining appropriate role of ILC's in the continuum of services to individuals with severe disabilities.

40 ADMINISTRATION

Program Objectives and Description

The Administrative Program provides executive direction, planning, program support, and administrative services to the Department of Rehabilitation. It is administered through the Director's Office and three divisions.

The Division of Field Operations exercises line administration over 19 district offices providing direct services to persons with disabilities, and administers the Program for the Industrially Injured. The Program Management and Support Division provides direction over ancillary rehabilitation functions such as the Business Enterprise Program, the Community Resources Development activity, the Habilitation Services program, and the program managers for services to the blind, deaf, alcoholics, mentally ill, and SSI/SSDI recipients. The Administrative Services Division provides fiscal and administrative staff services to the Department.

* Dollars in thousands

5160 DEPARTMENT OF REHABILITATION—*Continued*

The Department augmented this program by $600,000 in one-time carryover 1982–83 federal funds (20 personnel years) in order to avoid a layoff of incumbents in positions which were terminated effective July 1, 1983, due to reductions in Federal Funds in 1983–84.

The 1984–85 budget proposes a reduction of $269,000 and 10 personnel years by increasing the span of supervision control and by consolidating clerical support functions in the Administrative Services Division and by consolidating program evaluation activities in the Program Development Division.

5180 DEPARTMENT OF SOCIAL SERVICES

The Department of Social Services administers four major program areas (welfare program operations, social services, community care licensing and disability evaluation) and provides administrative support for them.

The goals of the Department are to:

1. Ensure the delivery of payments and benefits, with human dignity and equity, to welfare recipients, with effectiveness in terms of accuracy of payments and with efficiency in terms of the lowest possible administrative costs.
2. Provide social services to California's elderly, blind, disabled, and other adults and children, to protect them from abuse, neglect, exploitation and to help families stay together.
3. Regulate group homes, nurseries and preschools, foster homes, half-way houses, day care centers and homes to assure the public that all such California facilities meet established standards for health and safety.
4. Evaluate the disability of applicants for various Social Security Act programs and State disability programs, in an efficient, effective, equitable manner, to ensure that eligibility exists.

Authority

Welfare and Institutions Code, Division 9, Part 2, Chapter 2.

10 WELFARE PROGRAM OPERATIONS

Program Objectives and Description

The Department's welfare payment program provides financial assistance to those California residents who are unable to support themselves. The program is comprised of six elements: (1) Payments for children (Aid to Families with Dependent Children (AFDC) Program, Child Support Enforcement Program, and Aid for the Adoption of Children/Adoption Assistance Program); (2) Supplemental Security Income/State Supplementary Program (SSI/SSP, i.e., payments to aged, blind, and disabled); (3) Special Adult Programs; (4) Food Stamps; (5) County Administration; and (6) Refugee Cash Assistance Programs.

The objective of this program is to provide, on behalf of the general public and within the limits of public resources, reasonable financial assistance to eligible needy and dependent children and families and to monitor, assist in administering, and improve the SSI/SSP and Food Stamp Programs. In addition, the Child Support Enforcement Program locates absent parents, establishes paternity and support obligations, and collects child support for both welfare and non-welfare families. Collections made on behalf of AFDC children and families partially offset AFDC grant costs.

In 1983–84, the Department of Social Services estimates the General Fund approved budget for AFDC grants will be approximately $90 million less than the amount needed. Caseload for the Family Groups component of the program, which had been expected to decline as the economy improved, has instead remained high. This, along with increases in basic grants, accounts for $44 million of the estimated deficiency. Other significant changes include the Zapata v. Woods court decision, which extends AFDC eligibility to needy caretaker relatives whose only child(ren) receive SSI/SSP ($5.6 million for prospective and retroactive payments to be made during 1983–84), less-than-budgeted savings from the Welfare Fraud Early Detection/Prevention Program due to program modifications contained in the Budget Act of 1983 ($14.6 million), and lower than anticipated savings from systems designed to verify the amount of Social Security, Unemployment Insurance and Disability Insurance benefits reported by recipients ($9.6 million). In addition, Child Support collections did not grow as much as expected ($9.3 million), and basic caseload and grant costs in the Foster Care component of the program are projected to be $8.4 million higher than budgeted as the effect of Chapter 1166/80 (AB 2749) on reducing the number of voluntary placements has been less than anticipated.

The budget proposes to provide a 2% cost of living adjustment (COLA) in both the AFDC and SSI/SSP programs at a General Fund cost of $68 million in 1984–85. These funds are budgeted separately in the COLA Section (97.10) and are not reflected in the program totals.

[1] Funding for Local Mandates for 1983–84 and 1984–85 is provided in the "State Mandated Local Programs (Department 9680) in the General Government portion of the Budget. Data shown here in parentheses are for information purposes only.

For the list of standard (lettered) footnotes, see the list at the end of the Governor's Budget.

* Dollars in thousands

5180 DEPARTMENT OF SOCIAL SERVICES—*Continued*

In the budget year, continued AFDC caseload changes, particularly in the AFDC-Family Groups component, will increase General Fund costs by $24.7 million over the revised current year estimates. In addition, anticipated retroactive payments to AFDC recipients due to adverse court decisions are expected to increase total costs by $23.9 million. These additional 1984–85 costs will be offset by full year implementation of a revised policy on the effective date of the initial AFDC aid payment ($7.4 million savings) and increased welfare grant savings resulting from full year operation of the Welfare Fraud Early Detection/Prevention Program ($3.4 million), and increased net Child Support collections ($4.4 million).

In the SSI/SSP program, the full year impact of the January 1, 1984 payment standard increase will add $22 million in the budget year over the current year level of General Fund expenditures. Also the amount paid to the State by the Federal Government for federal errors in the administration of the SSI/SSP program will decrease from $16 million in 1983–84 to $9 million in 1984–85. These costs will be offset by Federal cost-of-living adjustments for Title II and SSI/SSP recipients for a net $32 million General Fund decrease between years.

In addition, the Budget proposes to eliminate the Special Circumstances program, effective July 1, 1984. This change will result in General Fund program and administrative savings of $3,014,000 in the Budget Year.

The Budget also proposes to establish the base levels for AFDC and Food Stamp county administrative costs at the actual 1983–84 expenditure level, subject to the provisions of the Cost Control plan. State participation in this base will require an additional $10.9 million General Fund in 1984–85.

10.04 Payments for Children

This payment element provides financial assistance to eligible needy dependent children and their parents, eligible relatives or other caretakers with whom they live.

The AFDC program is divided into three major subgroups: aid to family groups, aid to families with unemployed parents, and aid to children in foster care. In addition, the Adoption Assistance Program (formerly Aid for the Adoption of Children) provides aid to families adopting hard-to-place children. Both programs are administered by the counties in accordance with regulations, standards, and procedures set by the Department as authorized by law.

Under the aid to family groups (AFDC-FG) component, cash grants are provided to children and their parents or guardians if the family's income is insufficient to meet their basic needs. Eligibility is limited to those needy families in which the children are deprived of one or both parents due to the parent's incapacity, death, or other continuing absence. Eligibility is further based on statutory maximums related to the size of the family and the amount of income and real and personal property available to the family.

The amount of AFDC a family receives is established by law based on the number of eligible persons in the family less the family's net nonexempt income. In addition, a family may receive an allowance for recurring special needs such as medical diets and transportation, as well as an allowance for nonrecurring special needs caused by sudden and unusual circumstances beyond the control of the family.

The cost of the AFDC-FG grant is shared by the federal, State and county governments. Fifty percent of the grant cost for federally eligible recipients is paid by federal funds. The remaining program costs are shared 89.2% State, 10.8% county.

Needy children meeting the basic eligibility requirements may receive assistance under the aid to families with unemployed parents (AFDC-U) component if their parent(s) is not fully employed. Additional conditions of eligibility require the parent to be available for and to seek employment. The basic grant standard and program funding are the same as for the aid to family groups program. Before the enactment of Chapter 327, Statutes of 1982 (SB 1326), AFDC-U benefits were available without time limits to recipients who continued to meet program eligibility requirements. As a result of this legislation, aid was limited to three months in any consecutive twelve month period for families who failed to qualify for the federal program. This population was also eligible to receive up to 30 days of benefits under the federal Emergency Assistance program. Subsequent legislation, Chapter 323, Statutes of 1983 (AB 223), and regulations reduced aid provided through the State-Only AFDC-U Program and the Emergency Assistance Program to a total of three months in any twelve month period, effective October 1983.

The AFDC Foster Care (AFDC-FC) component provides cash assistance to children who are in need of protection and care by persons other than their parents, and who require 24-hour out-of-home care in a foster home or institution (group home) as a result of court order, parental consent, relinquishment or guardianship. AFDC-FC consists of both federal and nonfederal cases. Federal financial participation in the cost of care is available for children who are removed from their homes by court order and meet additional federal requirements. Those not qualified for federal financial participation may be eligible for AFDC-FC benefits funded by state and county monies.

The cost of the AFDC-FC grant is shared by federal, State and county governments. Fifty percent of the grant cost for federally eligible children is paid by federal funds. The remaining program costs are shared 95% State and 5% county, pursuant to Chapter 323, Statutes of 1983.

Federal P.L. 96-272 (HR 3434) imposed a ceiling on the amount of federal funds available for the AFDC-FC program conditional on the level of Title IV-B (child welfare services) appropriations and made changes in federal eligibility requirements for the AFDC-FC program. It is assumed that the funding cap will not be imposed in either the current or budget year. The federal law also removed foster care maintenance payments from Title IV-A and combined funding for these payments with subsidies for adoption assistance under a newly established Title IV-E. State legislation implementing the payment provisions of Title IV-E, Chapter 977, Statutes of 1982 (AB 2695), was effective October 1, 1982.

Chapter 977 also mandates the development of statewide systems for setting and controlling AFDC-FC rates. For foster family homes, a schedule of basic rates and a method for achieving standardization was set forth in law. For group homes, the law authorized a state administered rate-setting system based on actual allowable costs. The new rates became effective on July 1, 1983.

* Dollars in thousands

5180 DEPARTMENT OF SOCIAL SERVICES—*Continued*

Beginning in 1984–85, AFDC child care expenditures are expected to increase as a result of Chapter 1282, Statutes of 1983 (AB 1162). This legislation requires providers funded by the Department of Education to charge AFDC recipients a fee for child care, which will later be reimbursed to the recipient through an increased income disregard when computing the amount of the AFDC grant. The State share of the increased cost to the Department of Social Services will be funded through a transfer from the Department of Education.

Regulations will be effective on April 1, 1984 to change the AFDC beginning date of aid. This change was prepared for emergency implementation on October 1, 1983 but was delayed by court action in Miller v. Deukmejian. The regulation revisions are now being processed as a regular change and the anticipated implementation date is April 1, 1984, resulting in estimated General Fund savings of $2.5 million in 1983–84 and $9.9 million in 1984–85.

A Welfare Fraud Early Detection/Prevention Program, modeled after the program developed by Orange County, will be operated in eighteen counties during 1983–84 and one additional county in 1984–85. The programs to be implemented emphasize the early detection of fraud through the immediate referral of suspected fraudulent applications for investigation. In 1984–85, this new approach is expected to reduce AFDC grant costs by $4.2 million General Fund.

A court decision in Zapata v. Woods prohibits the Department of Social Services from denying aid to a family solely because the needy relatives' only child(ren) receive SSI/SSP. This program change is estimated to result in annual General Fund costs of $1.2 million, plus one-time retroactive payments of $5.1 million General Fund in 1983–84.

On July 1, 1982, after receiving federal approval of the state's plan, an Emergency Assistance (EA) program was implemented in California. Funding provided through EA helps to prevent the need for out-of-home care for children and also pays for short-term out-of-home care when necessary. Fifty percent federal participation is available for allowable EA costs.

PL 93-647, signed on January 4, 1975, initiated the Federal Child Support Enforcement Program (Title IV-D). The State enabling legislation, Chapter 924, Statutes of 1975 (AB 2326), became effective on October 1, 1975 and designated the Department of Social Services as the State Title IV-D Agency responsible for administering the program within California. The Department contracts with the Office of the Attorney General to perform specific program functions including interstate enforcement and State locator service.

The Child Support Enforcement Program is a revenue-producing program which locates absent parents, establishes paternity, and obtains and enforces court-ordered child support payments for both welfare and non-welfare families. The program reduces overall AFDC costs as collections made for AFDC families reimburse the federal, State, and county governments for aid paid. Collections made on behalf of non-welfare clients help keep families off AFDC and, consequently, result in significant welfare cost avoidance. The program has continued to be cost effective in that it returns more revenue to State and county general funds than it costs to operate.

Since the beginning of the Child Support Program in California, collections have increased significantly each year. In 1984–85, child support collections are estimated to reach $285,141,000. Of this amount, approximately one-half represents collections made on behalf of families receiving AFDC. Direct net savings to the California taxpayer, just in the form of reduced AFDC State costs, is anticipated to exceed $53 million in the current and budget year. Collections made on behalf of non-welfare families also represent a substantial indirect savings to the taxpayer, since many of those families would otherwise be on welfare.

The following table illustrates estimated savings to the General Fund.

Child Support Program

	Total Collections[3]	*State Costs*	*State Recoupment*	*Net Revenue To State*
FY 76/77	$138,000,000	$3,900,000	$22,900,000	$19,000,000
FY 77/78	156,000,000	5,400,000	27,500,000	22,100,000
FY 78/79	170,000,000	18,000,000[2]	40,600,000	22,600,000
FY 79/80	186,500,000	15,200,000	45,500,000	30,300,000
FY 80/81	199,200,000	14,930,000	47,420,000	32,490,000
FY 81/82	215,834,000	7,336,000[4]	52,242,000	44,906,000
FY 82/83	264,016,000	15,943,000	66,275,000	50,332,000
FY 83/84[1]	274,709,000	16,662,000	69,997,000	53,335,000
FY 84/85[1]	285,141,000	19,173,000	76,722,000	57,549,000

Two incentive funds (the Support Enforcement Incentive Fund, SEIF, and the Interstate Collection Incentive Fund, ICIF) encourage county collection efforts in the Child Support Enforcement Program. Since 1975, the incentive rates and funding structure for the program have changed several times. Counties were receiving, until September 30, 1983, an incentive of 22.5 percent of total collections, comprised of a 15 percent federal incentive and a 7.5 percent state incentive. As a result of the federal Tax Equity and Fiscal Responsibility Act of 1982, the federal incentive was reduced to 12 percent on October 1, 1983, thereby reducing the total incentive payment to 19.5 percent.

In 1984–85, an additional incentive will be available pursuant to Chapter 1151, Statutes of 1983, to encourage county collection efforts in AFDC-related Child Support collections.

The Aid for the Adoption of Children (AAC) program is designed to encourage and promote the placement in adoptive homes of children who, because of their ethnic background, race, color, language, physical, mental, emotional, or medical handicaps or age, or because they are a sibling group who should be placed in the same home, have become difficult to place in adoptive homes. The legislative intent of the program is to encourage placement of these children with families that can provide them with the stability and security of a permanent home. Chapter 977, Statutes of 1982 (AB 2695) established the Adoption Assistance Program which conformed the old AAC program to the requirements of PL 96-272, effective October 1, 1982. Only new cases as of October 1, 1982, are eligible for Federal participation. All other cases are still being provided for through the old AAC program. Also, the five year time limit on adoption assistance has been eliminated; payments can now be made until the child is 18 years of age, or until 21 years of age when certain circumstances exist.

One position which was established for an employee on an Intergovernmental Personnel Act assignment with the Federal Government was abolished in August 1983, when the appointment ended.

---

[1] Estimated.
[2] Large increase caused by State buy-out of county administrative costs.
[3] Amounts do not include collections made by California for children living in other states.
[4] Large decrease caused by changes in the State incentive rate.

10.08 SSI/SSP

The Supplemental Security Income/State Supplementary Program (SSI/SSP) provides cash grant assistance to aged, blind or disabled persons who meet the program's income and resource requirements. SSI/SSP is administered by the Federal Social Security Administration which determines eligibility, computes grants, and disburses the combined monthly payment to recipients. California supplements the federal SSI payment with an additional SSP payment. The combined SSI/SSP grant is intended to cover the recipients' basic needs and living expenses. The state monitors the federal payment operation to determine whether, under the supplemental program, state monies are accurately and properly expended and recipients' payments are properly received.

Effective July 1, 1983, a cost-of-living adjustment increased SSI/SSP payment standards by 2.2% from the June 1983 levels. An additional cost-of-living adjustment of 3.5% was made effective January 1, 1984, to comply with the Social Security Amendments of 1983 (PL 98-21), which shifted annual cost-of-living adjustments from July 1 to January 1.

The Tax Equity and Fiscal Responsibility Act of 1982 (PL 97-248) made programmatic changes in SSI/SSP effective October 1, 1982, that have resulted in significant savings. These changes required (1) the proration of the first month's benefits from the date of entitlement, (2) the rounding of SSI eligibility and benefit amounts to the next lower dollar; (3) the coordination of cost-of-living adjustments under Titles II and XVI of the Social Security Act, and (4) the exclusion from the eligibility determination process of certain resources set aside for burial purposes.

In 1984–85, the full-year impact of the January 1, 1984 payment standard increase and the reduction in federal administrative error payments will add $29 million to the current level of General Fund expenditures.

In addition, a court order in the case of Lopez vs. Heckler is estimated to increase General Fund expenditures by $3.4 million in 1984–85. This estimate is based on the assumption that fewer cases will be discontinued as a result of the order to demonstrate medical improvement prior to medical cessation, and does not include costs associated with the reinstatement or retroactive payment order, which was stayed by the U.S. Supreme Court pending further investigation. Effective October 1, 1983, the Social Security Administration began referring fewer Continuing Disability Review cases to the State for review. This is expected to result in fewer cases being discontinued, for an increased General Fund cost of $3.9 million in 1984–85.

The cost of these changes will be offset by federal cost-of-living adjustments and slight caseload decreases for a net decrease of $32 million General Fund between years.

10.12 Special Adult Programs

In addition to regular SSI/SSP benefits, a program for emergency and special needs established by Chapter 1216, Statutes of 1973 (AB 134), has been available to SSP recipients. The Special Circumstances program is funded by the State and administered by the counties in accordance with regulations, standards, and procedures set by the Department as authorized by law. Special Circumstances provides allowances to eligible recipients for special nonrecurring needs.

Welfare and Institutions Code Section 11212 provides for reimbursement to foster parents for the cost of the burial plot and funeral expenses for a child receiving foster care at the time of death. Funding for this program is included in the Special Circumstances appropriation.

An additional program for blind SSP recipients is the Guide Dog Special Allowance (funded under Special Benefits), which offers recipients with a specially trained guide dog an additional allowance to cover the cost of dog food. The Guide Dog Special Allowance is State administered as well as State funded.

The Repatriated American Program provides temporary help to needy U.S. citizens returning to the U.S. from foreign countries because of destitution, physical or mental illness, or war. Funding is 100 percent federal funds reimbursed to the counties through the Department of Social Services.

The budget proposes to eliminate the Special Circumstances program, except for AFDC-FC burial costs, effective July 1, 1984. The program is utilized by less than one percent of SSP recipients and the administrative cost of the program exceeds the benefits provided.

10.16 Food Stamps

The purpose of the Food Stamp (FS) Program is to provide for improved levels of nutrition among low-income households by offering eligible households food stamps at no cost to them. The amount of food stamps a household receives will depend on their net adjusted income. The cost of the benefit value of food stamps is borne entirely by the United States Department of Agriculture (USDA).

The Department of Agriculture, Food and Nutrition Service (FNS), retains the overall administrative responsibility for the Food Stamp Program. Through a cooperative agreement between FNS and the State, the Department of Social Services directs food stamp operations within California. Household eligibility and certification determinations as well as food stamp issuance have been delegated by law to fifty-eight county welfare departments. Counties are, however, given the option to contract with outside agencies for food stamp issuance.

[1] SSI payments are provided directly to recipients by the Federal Government. This display is shown for information only.

* Dollars in thousands

5180 DEPARTMENT OF SOCIAL SERVICES—*Continued*

Food stamp regulations, consultative services, training and technical services are provided to the counties by the Department's Food Stamp Program Management Branch to ensure the continued efficient, effective and equitable administration of the program at the county level. In addition, federally mandated Management Evaluation (ME) reviews of county operations conducted by the Department provide for an ongoing system for monitoring and improving the program.

Approval has been received from the United States Department of Agriculture, Food and Nutrition Service, for 75 percent Federal funding for the development and installation of on-line Food Stamp issuance systems in Fresno, San Francisco and Los Angeles counties. The budget assumes these pilot systems will be successful and that Federal funding will be approved at the enhanced (75 percent) rate for the cost of installing the systems in other counties where it is cost-beneficial. On-line issuance is expected to reduce both administrative costs and the amount of unauthorized coupon issuances.

10.20 County Administration

County administrative costs are funded by the federal, State, and county governments. AFDC Program administrative costs are subject to 50 percent federal reimbursement with the State contributing 50 percent of the nonfederal share. Both AFDC related and non-AFDC Child Support administrative costs were subject to 75% federal reimbursement until September 30, 1982 when, due to a change in federal law, the reimbursement percentage was reduced to 70%. Food Stamp Program administrative costs are subject to 50 percent federal reimbursement and 25 percent State reimbursement, with the exception of costs for fraud investigation and prosecution, administrative hearings, and data processing development, which are eligible for 75 percent federal/12.5 percent state funding. In addition, the state pays 100 percent of administrative costs associated with the special circumstances and special benefits programs for adult recipients.

County administrative funds are used to pay salaries and benefits of eligibility workers, fraud investigators, clerical support, and administrative support staff. These funds are also used to pay for the typical operating costs of space, utilities, supplies, check writing for recipients, EDP, and other operating costs. Approximately 80 percent of administrative funds are used to pay salaries and employee benefits of welfare department employees, with the remaining 20 percent used for operating costs.

A plan to control county administrative expenditures for the AFDC and Non-Assistance Food Stamp (NAFS) programs has been in effect since 1975–76. Although the basic concept of cost containment has remained unchanged since that time, revisions to improve and enhance some technical aspects of the plan continue to be made. These improvements are geared toward developing more accurate workload measurements to enable counties to better identify and resolve problems in specific areas. The continued effectiveness of the cost control plan in controlling county administrative costs can be attributed to the efforts of both state and county staff to improve the efficiency of program operations.

In 1983–84, the state received $4.6 million in one-time Federal funds to operate an Emergency Food and Shelter Program. These funds have been provided to county boards of supervisors and the United Way to supplement the emergency food and shelter resources available to the State's needy.

The 1984–85 Budget proposes a $10.9 million augmentation to AFDC and Food Stamp County Administration in order to restore State funding of cost-of-living adjustments (COLAs) which have been granted by the counties over the last three years. The general effect of not funding these COLAs has been to force administrative actions, including eligibility staff reductions, which increases the potential for General Fund overpayments, higher quality control error rates and Federal AFDC and Food Stamp sanctions.

County Administrative costs for 1984–85 have been reduced by $1,680,000 to reflect the proposed elimination of the Special Circumstances program.

10.24 Refugee Cash Assistance Programs

Under the Refugee Resettlement Program and the Cuban/Haitian Entrant Program, the state receives 100 percent federal reimbursement for maintenance support and medical costs for needy refugee and Cuban/Haitian entrant recipients only for the first three years the recipient is in the United States. Program costs for refugee recipients who have exceeded the three-year limitation are funded at normal program sharing ratios.

Needy refugees and Cuban/Haitians entrants who meet the same eligibility criteria as non-refugees in the state may receive AFDC, Medi-Cal or SSI/SSP benefits. The state share of these programs is federally reimbursed for the first 36 months that these refugees are in the United States. Refugees and entrants who do not meet AFDC or SSI/SSP eligibility criteria receive assistance through the special programs of Refugee Cash Assistance or Entrant Cash Assistance during their first 18 months in the United States. These programs are 100 percent federally funded for this initial eighteen month period only with an additional eighteen months of federal reimbursement available for RCA and ECA recipients who meet the eligibility criteria of the counties' general assistance programs.

20 SOCIAL SERVICES PROGRAM

Program Objectives and Description

The Department of Social Services monitors and oversees the operational program aspects of social services programs through the development of policy, regulations and procedures for the delivery of services to clients, and the monitoring and evaluation of services delivered.

The Social Services programs are divided into six major categories: (1) Other County Social Services; (2) Specialized Adult Services; (3) Specialized Family and Children's Services; (4) Adoptions; (5) Demonstration Programs; and (6) Refugee Resettlement Program Social Services.

Social Services, as provided to the elderly, blind, disabled, and other adults and children, are designed to meet the five national goals mandated by Title XX of the Social Security Act:

1. Achieve or maintain economic self-support to prevent, reduce, or eliminate dependency.
2. Achieve or maintain self-sufficiency, including reduction or prevention of dependency.
3. Prevent or remedy neglect, abuse, or exploitation of children and adults who are unable to protect their own interests; or preserve, rehabilitate, or reunite families.
4. Prevent or reduce inappropriate institutional care by providing for community-based care, home-based care, or other forms of less intensive care.
5. Secure referral or admission for institutional care when other forms of care are not appropriate, or provide services to individuals in institutions.

Services are provided through county welfare departments and state agencies.

Major federal legislation, the Adoption Assistance and Child Welfare Act of 1980, was signed into law on June 17, 1980. Public Law 96-272 (HR 3434), amended Part B of Title IV of the Social Security Act for the purpose of improving child welfare services by providing fiscal incentives to states which implement services intended to reduce the number of children in foster care. Also, by linking the provision of certain child welfare services to payment eligibility, Public Law 96-272 provides a focus and an emphasis on keeping children in their own homes or providing a stable environment other than the foster care system.

Chapter 978, Statutes of 1982 (SB 14) and Chapter 977 Statutes of 1982 (AB 2695) provided state enabling legislation for implementation of PL 96-272. Both the Adoption Assistance and Social Services Block (OCSS) Programs are affected with the impacts included in the proposed program budgets. These are described more fully in the narrative for the individual elements.

5180 DEPARTMENT OF SOCIAL SERVICES—*Continued*

20.30 Other County Social Services

Other County Social Services (OCSS) include the basic Title XX social services programs, other than In-Home Supportive Services administered by county welfare departments to meet the five national Title XX goals and Title IV-B Child Welfare Services. In addition, a 24-hour emergency response system was initiated in 1979–80 as an augmentation to the basic child protective services program.

At the beginning of the 1982–83 fiscal year, the seven mandated programs and thirteen optional programs under Title XX were as follows:

Mandated Services—(1) Information and Referral, (2) Emergency Response, (3) Family Maintenance, (4) Family Reunification, (5) Permanent Placement, (6) Protective Services for Adults, and (7) Out-of-Home Care for Adults.

Optional Services—(1) Special Care for Children in Their Own Homes, (2) Home Management, (3) Employment Education/Training, (4) Services for Children with Special Problems, (5) Services to Alleviate or Prevent Family Problems, (6) Sustenance, (7) Housing Referral Services, (8) Legal Referral Services, (9) Diagnostic Treatment Services for Children, (10) Special Services for Blind, (11) Special Services for Adults, (12) Services for Disabled Individuals, and (13) Services to County Jail Inmates.

During 1982–83, Phase I of Chapter 978, Statutes of 1982 (SB 14) was implemented, establishing minimum compliance with the federal (Title IV-E) requirements for foster care services under provisions of PL 96-272. Effective October 1, 1982, the previously mandated Out-of-Home Care Program was replaced by the Family Reunification and Permanent Placement Programs. Effective October 1, 1983, Phase II of SB 14 implementation replaced the previously mandated Protective Services for Children Program with the Emergency Response and Family Maintenance programs. These latter two programs comprise the "preplacement preventive services" activity which is a major thrust of SB 14. With full implementation of the PL 96-272 requirements in 1983–84, the State became eligible for Title IV-E funding for certain administrative type activities associated with SB 14 programs. It is estimated that $18.3 million of Title IV-E funds will be available for this purpose in 1984–85.

20.35 Specialized Adult Services

Adult Services programs are those services which have been developed to assist adults to maintain or achieve maximum self-sufficiency in an environment free from abuse, exploitation and neglect.

The In-Home Supportive Services (IHSS) Program provides specified supportive services to enable eligible persons to remain in their own homes as an alternative to out-of-home care. Eligible persons are aged, blind, or disabled recipients of public assistance and similar persons with low incomes. Services include: domestic; meal preparation, laundry, shopping and errands; nonmedical personal care services; assistance while traveling to medical appointments or to other sources of supportive services; protective supervision; teaching and demonstration directed at reducing the need for supportive services; and certain paramedical services ordered by a physician. These services are available statewide.

Effective January 1, 1980, a payrolling system was implemented pursuant to Chapter 463, Statutes of 1978. The contractor generates payroll checks for individual providers, withholds and pays appropriate payroll taxes and files necessary payroll tax returns.

The Pregnancy Freedom of Choice Act (Chapter 1190, Statutes of 1977) established a program to provide residential care and maternity related services to unmarried expectant mothers under the age of 21, domiciled in California, who are living in maternity homes with established contracts with the Department of Social Services.

Chapter 1193, Statutes of 1980 (AB 2980) provides for access assistance to the deaf. Such assistance includes certain types of activities provided for in Welfare & Institutions Code Chapter 2.1 to enable persons with deafness to secure needed public social services.

The In-Home Supportive Services budget levels for 1983–84 and 1984–85 reflect the expanded availability of the protective supervision component of the program required under the Community Services court decision effective January 1, 1984. In addition, the 1984–85 In-Home Supportive Services budget proposes to replace the $11 million in 1983–84 one-time federal funds (Jobs Bill; P.L. 98-8) with General Fund in order to continue established service levels.

Effective July 1, 1983, one position was transferred from In-Home Supportive Services to the Office of the Chief Counsel to establish an attorney position to handle community care licensing cases.

20.40 Specialized Family and Children's Services

The Work Incentive (WIN) program, operated by the Department of Social Services and the Employment Development Department, provides social services, job-seeking skills and training to unemployed recipients of Aid to Families with Dependent Children to assist them in finding jobs and becoming self-supporting.

* Dollars in thousands

5180 DEPARTMENT OF SOCIAL SERVICES—*Continued*

The data base conversion for the Foster Care Information System (FCIS) was completed in September 1982. The system, which was initiated in 1981–82, brought California into compliance with federal requirements to conduct a one-time inventory and to establish a permanent, statewide foster care information system, and qualify for federal funds (PL-96-272). FCIS provides information on the placement status, case plan goal, services and payments, and other demographics on each child in foster care.

Chapter 1282, Statutes of 1983 (AB 1162) requires the Department of Social Services to contract with the Department of Education (DOE) to utilize $6 million in one-time Federal Title XX funds appropriated in the Budget Act of 1983. The monies are to be distributed by DOE to local child care and employment funds for child care services for participants in the Job Training Partnership Act program.

20.40.266 Foster Care Information System				186	–	–

20.42 Adoptions

The adoptions element includes: (1) provision of relinquishment adoption services through five state offices, twenty-eight licensed county adoption agencies, and ten licensed private adoption agencies; (2) conducting studies of all independent adoption placements through six state offices and seven county adoption agencies; (3) completion of home studies for California families applying to international agencies to adopt homeless children living in foreign countries through six state offices, twelve licensed private adoption agencies, and one county adoption agency; (4) reimbursement to licensed private adoption agencies for expenses incurred in placing hard-to-place children; (5) contracting with community organizations for recruitment of ethnic minority homes for adoptive and foster family placement; and (6) administration and regulation of adoptive placements of children, including those between California and other states in accordance with California's interstate compact on the placement of children.

Effective January 1, 1984, provisions of the Adoption Information Act, Chapter 1162, Statutes of 1983 (AB 2096) will be implemented statewide requiring the collection of data on birthparents in order to allow for future contact between the birthparent(s) and adoptee who has reached the age of 21.

A significant increase in adoption casework activity is anticipated in 1984–85 as a result of the full implementation of the permanency planning provisions of Chapter 978, Statutes of 1982 (SB 14). A $5.1 million increase is included in 1984–85 to cover this increased workload.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20.44 Demonstration Programs

Demonstration programs provide a mechanism for public and private organizations to utilize their resources and, through concerted and cooperative actions, contribute to solutions to the economic, social and personal problems which tend to prolong dependency. These programs provide a method of testing ideas that may lead to a more effective and efficient system of public aid and services. The Family Protection Act (FPA) was a demonstration project established by Chapter 21, Statutes of 1976 (SB 30) and extended by Chapter 104, Statutes of 1981 (AB 35) to October 1984. Chapter 978, Statutes of 1982 (SB 14) implemented a program on a statewide basis very similar to FPA. The proposed funding for 1984–85 assumes that FPA will be terminated June 30, 1984 and that all children's welfare services will then be provided through Other County Social Services (OCSS) as implemented by SB 14.

Chapter 1398, Statutes of 1982 (AB 1733) appropriated $10 million to fund Child Abuse Prevention Programs with a provision that up to 5 percent could be used for administrative expenses. The budget year includes sufficient funds to continue the program at the same level in 1984–85. Six child abuse specialist positions which were approved limited-term to June 30, 1984, are proposed to be continued on a permanent basis to handle the AB 1733 workload.

20.45 Refugee Assistance Services

The Department of Social Services provides through contracts and direct allocation of funds to county welfare departments a range of support services to refugees and entrants in California. Services include: (1) English as a Second Language (ESL), (2) Vocational English as a Second Language (VESL), (3) employment services, (4) vocational training, (5) health-related services, (6) social adjustment services, (7) mental health related services, and (8) Title XX-type social services. These services include (a) Information and Referral, (b) Emergency Response Program, (c) Family Maintenance Programs, (d) Protective Services for Adults, (e) Family Reunification Program, (f) Permanent Placement Program, (g) Out-of-Home Care for Adults, and (h) In-Home Supportive Services. In addition, in 1983–84, the Department has interagency agreements with the Department of Health Services and the Department of Developmental Services to provide health-related services. The goal of these services is to assist the refugees in becoming self-sufficient and promote their assimilation into American society. To the extent that Federal funds are available, these services will continue to be provided to refugees in 1984–85.

30 COMMUNITY CARE LICENSING

Program Objectives and Description

The Community Care Licensing Program is responsible for regulating the community care industry, which includes all non-medical children and adult day care homes and centers, adoptions and homefinding agencies, foster family homes, children's family and group homes, adult residential, residential facilities for the elderly and rehabilitation facilities. These licensed facilities number approximately 61,000 statewide serving a client population of approximately 554,000. Of the 23,000 residential care facilities in California, approximately 13,000 are foster homes licensed by forty-seven county welfare departments under contract with DSS. The remaining 10,000 residential facilities are licensed directly by the eleven DSS field offices.

Of the 38,000 day care facilities serving approximately 456,000 clients, about 19,000 are family day care homes licensed by thirty county welfare departments under contract with DSS. The eleven DSS field offices license approximately 19,000 day care facilities including 6,855 day care centers.

Persons served by the program include the mentally disordered, developmentally and physically disabled, aged, and socially dependent children and adults. The objective of the program is to assure that all persons provided community care are served by licensed facilities which meet established standards for health and safety. Licensed facilities are monitored periodically to ensure continued compliance. Corrective action or license revocation is pursued where standards are not met. In 1982–83, Civil Penalties totaling $48,327 were collected from facilities not complying with regulations.

The Community Care Licensing Program has made or is proposing five significant changes affecting the current and/or budget years. First, effective July 1, 1983, one position was transferred from Field Operations Branch to the Office of the Chief Counsel to establish an attorney position to handle community care licensing cases; one position in the Licensing Policy Bureau was abolished to fund the purchase and maintenance of word processing equipment. Second, to meet the mandated workload of the new family day care requirements of Chapter 323, Statutes of 1983, 33 positions have been established in 1983–84 and are proposed to continue in 1984–85. Third, 14.5 positions are proposed in the budget year to handle workload associated with licensing approximately 1,500 child care centers previously licensed by the State Department of Education. Fourth, eleven positions are requested in the budget year to handle caseload growth for State licensed facilities. These positions are proposed to be phased in with six to be established July 1, 1984 and five effective January 1, 1985. Fifth, three positions are proposed to be redirected in the budget year from the Internal Audits Bureau of Management Systems and Evaluation Division to the Office of Audits and Investigations of Community Care Licensing in order to address increased investigative requests.

40 DISABILITY EVALUATION PROGRAM

Program Objectives and Description

The Disability Evaluation Program is responsible for determining the medical eligibility of California residents for benefits under Title XVI (Supplemental Security Income) and Title XIX (Medicaid) of the Social Security Act related to public assistance programs as well as determinations under Title II (Disability Insurance).

All determinations are made under the authority of federal regulations or state contractual agreements. Chapter 328, Statutes of 1982 (AB 799) transferred responsibility for Medically Indigent (MI) adults to the counties. Approximately 22,000 MI adults requested fair hearings to appeal the termination of their Medi-Cal benefits which resulted in increased workload during fiscal years 1982–83 and 1983–84. *Ten and four-tenths limited-term positions established in 1983–84 to process the Medically Indigent Adult temporary fair hearing workload will be eliminated on June 30, 1984.*

The 1984–85 budget proposes to transfer fiscal responsibility to the counties for the General Fund cost of the MIA disability evaluations. The $1,839,000 proposed county share will be reflected as reimbursements.

The main objective of the Disability Evaluation Program is to establish an applicant's medical/vocational eligibility for disability benefits by determining the severity of the individual's physical and/or mental impairment(s) and overall ability to engage in substantial gainful employment. Persons having a disability who are covered by Social Security benefits and/or qualify for public financial assistance may file an application at a Social Security Administration district office or county welfare department. The claim is then forwarded to the Department of Social Services where determinations are made by an adjudicative team composed of an analyst specially trained in medical and vocational factors relevant to disability evaluation and a medical consultant. Medical evidence and pertinent vocational information are obtained from the claimant, physicians, medical facilities, and other sources. Determinations are then made in accordance with strict federal regulations promulgated by the Social Security Administration. The program also refers those claimants with rehabilitation potential to the Department of Rehabilitation.

The 1984–85 budget reflects a net reduction of 54.0 positions consisting of three components. First, the Social Security Administration has projected a workload reduction of approximately 22,000 cases for the Federal fiscal year which began October 1, 1983. This reduces staffing needs in the Federal component of the Disability Evaluation Program by 55 positions. Second, because the Governor's hiring freeze has achieved a reduction in State Government without adversely affecting vital services or programs, an additional reduction of 38 positions is proposed effective July 1, 1984 in order to capture these efficiencies. Third, under provisions of PL 97-455 and effective January 1, 1984, a new requirement to conduct face-to-face evidentiary hearings will result in an additional staffing need of 39 new positions.

50 SERVICES TO OTHER AGENCIES

Program Objectives and Description

The Department, in addition to providing support services for its programs, also provides services to other agencies. General administrative services, such as personnel, accounting, and budgeting are provided to the State Council on Developmental Disabilities and the Area Boards on Developmental Disabilities. The Department also provides services to the Medi-Cal Program in the form of state hearings, public information services, review of county EDP systems, and through consultation and technical assistance to county welfare departments for the Child Health and Disability Prevention (CHDP) program.

Administrative Order No. 79-25, under the authority of Executive Order No. B-48-78, assigns to the Department of Social Services the responsibility of the administration of the Individual and Family Grant Program (Disaster Relief) for disasters proclaimed by the President under the provisions of the Disaster Relief Act of 1974. During 1983, the California Storms, the Coalinga Earthquake and the Colorado River Flood were proclaimed as natural disasters.

Prior to January 1, 1984, the Department provided administrative services for the Governor's Advisory Committee on Child Development Programs and the Health and Welfare Agency. These organizations now receive their supportive services from the Office of Statewide Health Planning and Development. Five positions were abolished from the Administration Division due to the transfer of the workload.

60 ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide sufficient managerial and administrative services as well as planning program support to ensure the most efficient and effective use of available staff and resources in achieving the overall goals of the Department's programs.

Without the proper level of executive leadership and their staff support, the Department of Social Services would not be able to function in an efficient and effective manner. The benefits to be derived from all the various programs carried out by the Department as described elsewhere in the budget would not be realized. Therefore, a program of management and administrative support has been developed and continues to be an integral feature of the Department's programs.

60.01.070 General Management

Functions included in the Department's executive organization comprise this program component. It consists of the Director and immediate staff, including four advisory committees and six offices. The advisory committees report to the Director on issues concerning child abuse, social services, life care contracts and community care facilities. The six offices are (1) Government and Community Relations, (2) Deaf Access, (3) Services to the Blind, (4) Equal Employment Opportunity, (5) Public Information, and (6) Refugee Affairs.

* Dollars in thousands

5180 DEPARTMENT OF SOCIAL SERVICES—*Continued*

Under the authority of PL 96-212, the Department implemented the Refugee and Cuban Haitian Entrant Targeted Assistance Program. This eighteen month project was designed to enhance refugee employment potential and increase the ability of refugees to find and obtain jobs. In 1983–84, seven positions were established limited-term through June 30, 1984 to act as technical consultants to the fourteen counties involved. In 1984–85, three positions are proposed to continue through redirection from Management Systems and Evaluation Division-Internal Audits.

Effective January 1, 1985, the budget proposes to transfer the refugee services contract management responsibilities to the county welfare departments which will result in the elimination of five positions.

Distributed Expenditures	92.8	89.5	80.9	$4,462	$6,819	$5,524

60.01.072 Legal Affairs

Staff of the Department's legal organization comprise this program component. It consists of the Office of the Chief Counsel and the Office of the Chief Referee. The Office of the Chief Counsel provides legal advice to departmental managers and supports the Attorney General in litigating cases affecting the Department. The Office of the Chief Referee is responsible for conducting administrative hearings to determine the fairness of decisions made by county welfare department personnel in handling welfare cases.

As a result of Chapter 328, Statutes of 1982 (AB 799), approximately 22,000 Medically Indigent Adults requested fair hearings to appeal the termination of their Medi-Cal benefits. This resulted in increased workload during fiscal years 1982–83 and 1983–84. Eighteen and seven-tenths positions were established limited term through June 30, 1984 to process the fair hearing appeals.

This program has been increased by one attorney position in the 1983–84 fiscal year as a result of the Family Day Care Licensing Program Expansion. In addition, one position from the Community Care Licensing Division and one position from the Adult and Family Services Division have been transferred to the Office of Chief Counsel to assist in community care licensing cases. The State Hearing Support Section consisting of 33 positions was transferred effective September 1, 1983 from the Administration Division.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	143.8	165.4	151.8	$7,255	$6,750	$6,400

60.01.074 General Administration

This program component reflects costs associated with providing all support functions for the Department of Social Services. The functions include: (1) managing the accounting and budgeting systems of the department, (2) developing estimates of the projected costs and caseloads of the cash assistance and social services programs, (3) collecting and analyzing data regarding the programs administered by the department, (4) processing personnel transactions, and (5) providing various business and office services.

General Administration has made the following changes which affect the current and budget years: (1) The Civil Rights Bureau and Training Bureau each eliminated one position to provide funding for reclassifications in Legal Affairs; (2) Fiscal Policy and Procedures Bureau also eliminated one position to provide funding for a position reclassification within its Bureau; (3) The State Hearing Support Section consisting of 33 positions was transferred to Legal Affairs Office of the Chief Referee, effective September 1, 1983; (4) Five positions were transferred effective January 1, 1984 to the Office of Statewide Health Planning and Development, which assumed the responsibility of providing administrative services to the Health and Welfare Agency and the Governor's Advisory Committee on Child Development Programs; and (5) Twenty-three and three-tenths positions established to process the temporary workload of the Medically Indigent Adult (MIA) fair hearing appeals will be eliminated on June 30, 1984.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	466.4	500.3	445.3	$20,088	$21,611	$21,509

60.01.084 Management Systems and Evaluation

The Department's Management Systems and Evaluation organization has responsibility for an array of data processing, audit, review and evaluation functions. The data processing functions include responsibility for all automated information system activities for the Department. In addition, the functions include establishing policies and procedures to ensure that information systems are used effectively to support Departmental programs and monitor automated systems activities in the 58 counties of California. The organization's audit functions are to perform the financial and compliance audits for providers throughout California. Review and evaluation functions include quality control review of county AFDC, Food Stamp, SSI/SSP and Foster Care cases through the identification of errors which establishes the basis for statewide and local corrective actions. Also, the organization is responsible for the Integrated Review and Improvement Studies of county welfare departments. In addition, the Management System and Evaluation organization is responsible for responding to complaints/inquiries of welfare and social service related problems; providing the Department with a centralized regulation development process and the overall supervision of welfare fraud programs in the 58 county welfare departments.

One Office Assistant I position in the Fraud Program Management Bureau of Management Systems and Evaluation Division was abolished effective July 1, 1983 to fund the purchase and maintenance of word processing equipment.

In an effort to utilize existing resources more effectively, six positions are proposed to be redirected from the Internal Audits Bureau of Management Systems and Evaluation Division effective July 1, 1984. Three positions are proposed for redirection to the Office of Audits and Investigations of the Community Care Licensing Division and three positions are proposed for redirection to the Office of Refugee Services of the Executive Division.

In the budget year, nine positions are proposed to be continued in the Computing Facilities Branch to provide maintenance and support for the multi-county case data systems in Placer, Nevada, Marin and Yolo counties.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

70 LOCAL MANDATES

This program reflects the cost of reimbursing local governments for any new program or increased level of services for an existing program mandated on local entities by legislation or by executive order (regulations) in accordance with Section 2231 of the Revenue and Taxation Code. No funds were appropriated for this purpose in the 1982–83 budget. Beginning in 1983–84, the local mandate appropriation is included in State-Mandated Local Programs (Department 9680). Estimated expenditures are shown here for information only.

Legislative mandates: Chapter 102, Statutes of 1981 (AB 251) requires that, for Medi-Cal recipients, counties inquire about potential alternate medical insurance coverage. This requirement results in increased AFDC administrative costs.

Executive mandates: Regulations which require continuing reimbursement to counties for mandated costs include: (1) AFDC regulations which exempt loans from consideration as income, exempt the value of equipment related to a recipient's employment, and require unemployed parents to register either with WIN or EDD-ES in order to establish deprivation based on unemployment; and require eligibility workers to validate the correctness of recipients' reported Social Security Numbers; and (2) Food stamp regulations that require counties to verify various types of information provided by recipients.

97.10 SPECIAL ADJUSTMENTS—COST OF LIVING ADJUSTMENTS

Cost-of-living increase funds for Department of Social Services programs are reflected separately for the 1984–85 fiscal year. As a result of a considerable lessening of inflation over the last 18 months, the budget proposes a basic 2 percent COLA increase for most programs, including Aid to Families with Dependent Children (AFDC) and Supplemental Security Income/State Supplemental Payment (SSI/SSP).

California already has the highest AFDC and SSI/SSP maximum aid payment standards of any of the 10 most populated states. To provide the full statutory COLA based on CNI would tend to widen this gap even further. Therefore, the budget proposes to move gradually toward bringing California's grant levels nearer to those provided by other states by limiting the annual COLA increase in these programs.

The budget proposes no General Fund COLA in 1984–85 for county administration. However, the County Administration Program (10.20) includes a General Fund increase of $10.9 million which will be used to restore State funding of COLAs which have been granted by the counties over the last three years. The budget does include Federal funds which will be passed through to the counties to fund the Federal share of county COLAs for 1984–85.

The $35.3 million General Fund proposed for the SSI/SSP includes $28.3 million which represents the amount required to maintain the July 1, 1983 SSP payment levels, as required by Federal law. The following is an allocation funding by program for the 1984–85 fiscal year.

5190 CALIFORNIA HEALTH FACILITIES COMMISSION

Program Objectives and Description

The California Health Facilities Commission establishes and maintains uniform systems of accounting and reporting for the disclosure of health facility costs. The purpose of disclosure is to (1) encourage economy and efficiency in the provision of health care services by health facilities, (2) enable public agencies to make informed decisions in purchasing and administering publicly financed health care, (3) encourage public and private providers of health services to establish reasonable and fair reimbursement rates, and (4) inform the public about the cost, availability and other aspects of health care services.

Systems of uniform accounting and reporting are in place in over 600 hospitals and 1,200 long-term care facilities. To date, seven years of hospital and five years of long term care financial and utilization data have been collected and disclosed.

In addition, the Commission has implemented a system of quarterly hospital financial and utilization reporting and developed and implemented a discharge data reporting system. The discharge data system provides demographic and diagnostic information on hospital patients including their diagnoses related groups (DRG). The Commission has developed cost indicators by peer group for hospitals and long-term care facilities. The Commission also provides annual estimates of expenditures for health facility services by Medi-Cal and other health care purchasers within each health systems area. The Commission conducts cost containment research and public information activities.

During 1983–84, the Commission will begin routine auditing of the hospital and long term care financial reports. The audits will be conducted by the Department of Health Services under interagency agreement. One position is proposed for the Commission, beginning January 1, 1984, to conduct audit liaison and follow-up with the health facilities. The 1984–85 budget also reflects funding for a study, to be conducted under interagency agreement, to determine cost-effective means by which the Commission can improve the timeliness and accuracy of the hospital and long-term care financial reports.

In 1984–85, one new position is proposed for auditing the hospital patient discharge data collected by the Commission.

The budget proposes the addition of 0.4 positions, beginning January 1, 1984, to expedite the processing of penalty appeals. The budget also reflects an increase in operating expenses and reimbursements to address the increase in document sales in both 1983–84 and 1984–85. Additionally, the 1984–85 budget includes a reduction of one position to reflect efficiencies achieved during 1983–84.

5200 CALIFORNIA HEALTH FACILITIES AUTHORITY

The California Health Facilities Authority (CHFA) was established by Chapter 1033, Statutes of 1979. The CHFA is composed of nine members: the State Treasurer, the Director of Finance, the State Controller, two public members appointed by the Senate, two public members appointed by the Assembly, and two public members appointed by the Governor.

The Authority was established to issue revenue bonds to assist qualified private nonprofit corporations or associations, counties and hospital districts finance or refinance health facilities construction, equipping, or the acquisition of existing health facilities. The funding or refinancing is accomplished by making secured or unsecured loans to health institutions or by the direct purchase and leaseback of the health facility by the Authority or by a health institution acting as an agent for the Authority. The Authority can determine the location and character of any proposed project and can solicit mortgage insurance (State or Federal) for any funded project. The eligibility criterion for funding under the Act is that the project be a health facility, as defined in the Act, operated by a private nonprofit corporation or association, city, city and county, county or hospital district. *Chapter 1242, Statutes of 1983 made certain administrative changes to and broadened the types of facilities that may be financed under the Authority.*

Through its ability to issue tax exempt bonds, the Authority provides lower cost financing to qualified institutions than they would be able to secure on the open market. Chapter 663, Statutes of 1980 and Chapter 1569, Statutes of 1982 authorize the Authority to issue up to $1.534 billion in revenue bonds for these purposes. Of this authorization, $767 million became effective January 1, 1983. Chapter 633 also mandates that not less than $117 million of the financing be made available to institutions which seek financing for projects providing services predominantly to members of health maintenance organizations which are qualified under Federal law. *As of June 30, 1983, $846.4 million in bonds have been issued for financing of health facilities of which $134.2 million have been defeased, leaving an $821.8 million balance of unissued bonds.* The bonds carry interest which is exempt from income taxes, as provided for in Section 103 of the Internal Revenue Service Regulations. However, the law specifically provides that bonds issued shall not be a debt or liability or a pledge of faith and credit to the taxing power of the State or any of its political subdivisions. The full faith and credit of the participating institutions are pledged to the payment of bonds. This is a trust activity and involves no State revenues or expenditures. All expenses must be paid from revenues and other moneys available to the Authority.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

YOUTH AND ADULT CORRECTIONAL

5240 DEPARTMENT OF CORRECTIONS

The principal objectives of the Department of Corrections are the control, care and treatment of men and women who have been convicted of serious crimes, or those admitted to the civil narcotic program, and committed to State correctional facilities. The department's objectives also include supervision of men and women who have been paroled from correctional facilities and returned to the community.

Headed by a director, the department is organized into five line divisions: Physical Planning and Construction, Administrative Services, Institutions, Policy Operations, and Parole and Community Services, with support of various staff service functions such as legislative liaison, and public information. Within the Institutions Division and located throughout the State are 12 correctional institutions with three of these having reception centers.

Included within the budget is the Narcotic Addict Evaluation Authority which is a separate entity.

The Department of Corrections will require a current year deficiency of $7,826,000 and 633.00 authorized positions (533 personnel year equivalent) necessitated primarily by compression, that is, the staffing required for the placement of higher level inmates in lower level institutions, the increased costs imposed by Chapter 922/82 for Workers' Compensation benefits, the security staffing for the fence and towers constructed at the California Institution for Men, and the staff necessary to implement and assure that the requirements of Chapter 938/83 (SB 422) are met.

The department's population is projected to be 46,695 by the end of the budget year. In recognition of the department's population needs, the Legislature approved Chapter 938/83 (SB 422) which provides for the accelerated construction of 2,400 beds at the California Medical Facility and 1,200 beds at Ione; and Chapter 956/83 (AB 436) which provides for an increase of 1,000 camp beds. Also, an additional 100 inmates will be housed in Department of Mental Health facilities bringing this total to 350 by June, 1985. The above new facilities and camps coupled with additional overcrowding (double-celling) is expected to accommodate the 1984/85 population growth of 5,635 inmates. To accommodate this growth, the budget year includes 1,864.83 authorized positions (1,197.83 personnel year equivalent) and $65,961,000 in the areas of security and program services, new facilities, planning and construction, and administrative support which will be phased in as the increased population materializes. The estimated personnel year equivalent of these authorized positions is a 546 net growth from the current year.

Pursuant to Chapter 1/82 (AB 1403), the department was required to develop a full employment program for inmates. Participation in the program would allow inmates to earn work time credits for sentence reduction provided by Chapter 1234/82 (AB 2954). A reduction in inmate sentences may result in a cost savings in terms of the long range need to construct new facilities. Because of significant increases in inmate population, the department has been able to provide meaningful work assignments for most of, but not all inmates. The department will be advising the Legislature, prior to budget hearings, on a proposal detailing the specific costs and requirements necessary to allow for full employment of all inmates pursuant to AB 1403. Additionally, the department will be working with the Department of Transportation to develop inmate labor plans for maintenance projects which will provide additional work assignments for inmates.

The budget does not include the impact of the Wilson vs. Deukmejian et al. case. This case relates to the conditions of confinement at the State Prison at San Quentin. Specifically, this case addresses double celling, operational and structural deficiencies and the inmate classification system. To the extent that the impact of this case affects either the current or budget year, the department will forward to the Legislature a separate request containing the elements necessary for implementation and court compliance.

21 INSTITUTION PROGRAM

Program Objectives and Description

The Department of Corrections is required by statute to accept convicted felons and civilly committed nonfelon narcotic addicts from California courts when their sentence is imprisonment in a State correctional facility. It is the Department's responsibility to provide safe and secure detention facilities to protect society from further criminal activities and to provide necessary services such as feeding, clothing, medical care, psychiatric and counseling services and training, including academic and vocational education.

The Department has implemented and is now evaluating a new classification system in which each institution has a specific mission based upon a security rating and houses a more homogeneous population of relatively equal security risk inmates. This has allowed the medium custody institutions to operate programs with a minimum amount of time in "Lockdown" status and, at the same time, has provided ample numbers of minimum custody candidates.

The current challenge is to provide housing and a decent level of human care for the unprecedented number of felons being committed to the Department. All institutions capable of overcrowding have now surpassed their design capacity and double celling has become the norm.

SB 422 (Chapter 938/83), approved on September 20, 1983, has provided for the accelerated construction of 3,600 new beds in the budget year. Since the passage of this bill did not allow sufficient time for the department to develop staffing packages, and since the Wilson vs. Deukmejian case may render any plan obsolete, the department used a per capita of $15,151 in proposing an additional 1,652.33 positions (985.33 personnel year equivalent) and $53,500,000 for the security and program services that will be required. The per capita includes providing for medical, dental, academic and vocational education, recreation programs, etc. consistent with existing program levels. The Department will be forwarding as part of the May Revision the specific details necessary to meet our inmate housing needs. At that time, revision, if necessary, of the current year activation schedule, including the impact of compression will be provided. Also included is funding in the amount of $1,520,000 to contract with the Department of Mental Health for an additional 100 psychiatric beds by the end of 1984/85 pursuant to Chapter 928, Statutes of 1981 (SB 278).

The budget purposes a reduction of $483,000 and 47 personnel years to reflect efficiencies achieved in the operations of the Institutions program.

21.05 Reception and Diagnosis

A systematic method of intake, diagnosis, and classification recommendation is an integral part of the California correctional program. A personal history is compiled on each inmate, incorporating information principally from law enforcement agencies, courts, other correctional programs, the military, family, friends, and schools. This information is documented and used in diagnosing institutional custodial and program needs.

In addition to processing new commitments, 90–day diagnostic evaluations and 120–day evaluative reports on convicted offenders are provided to California courts at their request.

Reception centers are located at the California Medical Facility and California Institution for Men for male felon commitments, and the California Institution for Women for female felon commitments. Civilly committed narcotic addicts are received and processed at the California Rehabilitation Center.

21.10 Security

California law requires that the Department of Corrections provide secure and safe facilities to house convicted felons and civilly committed nonfelon narcotic addicts for the term of their sentences. Inmates are housed in the appropriate units equipped with the degree of security needed, based on the inmate's escape risk, violence propensities, and history of assaultive behavior. Custodial personnel are assigned to posts and perform a variety of functions including supervision of inmates in housing units, dining areas, recreation areas, specialized security areas, and on work details.

There are special secure units in some institutions which house prison gang members and other violent prison offenders. These units require additional staff for increased security more intensive searches, supervision and general surveillance.

Federal Trust Fund				*4*	*5*	*4*
Reimbursements				*141*	*215*	*277*

21.20.020 Clothing

Security considerations dictate that inmates wear distinctive clothing for easy identification both in the institution and outside in the event of escape.

The clothing operation provides clean and suitable clothing for the inmates appropriate to the climate at each institution and conducts vocational training in laundering and dry cleaning, sewing skills, and clothing distribution. Most of the basic clothing is made by Prison Industries.

21.20.030 Medical Services

Physicians examine, diagnose and provide treatment services to inmates. Pre-employment physical examinations and emergency treatment is provided to staff. All institutions provide sick call, outpatient and infirmary services. Hospital inpatient care is available at four institutions (San Quentin, California Medical Facility, California Men's Colony and California Institution for Men). Highly specialized and some emergency services are provided through outside physicians and medical facilities.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Average daily number of inmates in sick line	6,323	1,482	1,601

21.20.060 Psychiatric Services

Psychiatric services consist of evaluation and diagnostic services, outpatient treatment, and inpatient hospitalization and rehabilitation programs. Diagnostic and outpatient services provided by psychiatrists and psychologists are available in all institutions. Inpatient services for inmates with major mental illness are concentrated at the California Medical Facility. The California Men's Colony provides most of the psychiatric rehabilitation services.

* Dollars in thousands

5240 DEPARTMENT OF CORRECTIONS—*Continued*

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Psychiatric evaluation and diagnostic services to individual inmates	22,908	25,657	27,710

21.20.070 Counseling Services

The objectives of the Counseling Services program are to assist inmates to make constructive use of their time while incarcerated, to assure that each inmate is processed according to and receives those opportunities specified by departmental policy, and to provide other staff with the necessary information to make the best decisions affecting inmates. Counselors evaluate the behavior, attitude and progress of each inmate and provide information to staff and others who make decisions or engage in activities affecting inmates. Counselors devote most of their time to: classification hearing interviews, program development, parole and pre-release planning, emergency community release, personal and family problems and emergencies and report writing.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
General case contact	38,800	44,620	53,544

21.20.080 Records

Records are maintained on inmates from the time they enter the correctional system. Records are held on a combination of hard copy and microfiche. Records functions include interpreting court commitment orders; initiating the criminal identification process; analyzing inmate legal status; tracking enhancements, limitations and good behavior and work incentive credits, and computing release dates.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements				*130*	*220*	*312*

21.20.090 Leisure-Time Activities

The objectives of Leisure-Time Activities are to improve inmates' physical and emotional well-being and to provide the experience of constructive use of leisure time. Leisure-time activities generally occur in the evening and on weekends and holidays. Activities include various sports and physical conditioning, arts and crafts, reading, television, radio, movies and live entertainment.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Federal Trust Fund				*1*	*1*	*–*
Reimbursements				*24*	*50*	*53*

21.20.110 Inmate Welfare Fund

The Inmate Welfare Fund (IWF) was created in 1945 as a special trust fund for the benefit, education, and welfare of the inmates. IWF is a self-supporting fund totally dependent upon its generated revenues. The largest IWF operation is the inmate canteen. While this is a major source of revenue, income is also derived from photo projects, handicraft sales, and interest on invested surplus IWF and inmate trust funds. Income from IWF is used to provide certain inmate benefits such as the canteens, movie rentals, entertainment, handicraft materials, and equipment, and fiction library books.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Purchase for inmate benefits	$231*	$337*	$350*

21.30.010 Academic Education	167.5	239.34	252.86	$11,009	$14,681	$16,530
21.30.020 Vocational Education	222.84	297.76	318.60	11,878	15,187	18,304
21.30.030 Inmate Employment	246.3	278.17	307.35	13,832	18,191	21,669

21.30.010 Academic Education

The average inmate committed to the Department has a tested grade placement slightly below the eighth grade level but many do not possess even the basic literacy. Academic education is provided on the premise that the inmate's earning potential is increased as is the inmate's awareness and understanding of his or her responsibilities and opportunities.

Primary emphasis is placed on providing the necessary services to eliminate illiteracy, better prepare inmates to function as adults and for on-the-job training entry, to achieve the eighth grade level, and to earn high school diplomas or equivalency certificates. College level courses are also available to qualified inmates.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Average academic enrollment	5,794	6,234	6,634
Elementary diplomas/certificate	837	900	980

21.30.030.020 Work Projects—Cooperating Agencies

The increasing public use of State and federal natural resources has created a demand for available inmate labor to assist primarily in wildfire suppression and to perform allied forestry projects and maintain and protect the natural resources of the State. These work projects involve cooperation with both state and federal agencies.

The conservation program consists of 19 Department of Corrections/Department of Forestry camps and 5 institution-based camps operated by the Department of Corrections in cooperation with the Department of Forestry. In addition, the Department of Corrections operates 4 Los Angeles County camps in cooperation with Los Angeles County.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

5240 DEPARTMENT OF CORRECTIONS—*Continued*

21.40.010 Narcotic Addict Evaluation Authority

The Narcotic Evaluation Authority consists of seven part-time board members.

When a male or female addict in the Civil Addict Program or a parolee under the jurisdiction of the Narcotic Authority who has been returned to the California Rehabilitation Center or branch thereof, shows significant progress as a result of treatment and demonstrates the potential to abstain from narcotic drug use, the superintendent of the facility, where the individual is confined, certifies this progress to the Narcotic Addict Evaluation Authority for release consideration.

In addition, the Authority considers the cases of outpatients and parolees under its jurisdiction who violate their conditions of release/parole and determines whether these individuals should be returned to inpatient status for further treatment. A revocation hearing is held as soon as possible after an outpatient's/parolee's return to the California Rehabilitation Center or branch thereof.

Performance Measures

Narcotic Addict Evaluation Authority:	*1982–83*	*1983–84*	*1984–85*

Distributed Expenditures	9	8.72	8.32	$280	$277	$277

21.40.020 Inmate Benefits

Commencing with January 1, 1977, and pursuant to Labor Code Sections 3370 and 3371 and Penal Code Section 5069, the Department has been required to provide workers' compensation benefits to inmates injured while performing assigned work in departmental institutions. Included in the program, is the cost to maintain proper records, provide medical care and other related costs. In accordance with Chapter 1149/77 (SB 224) qualified inmates are eligible for unemployment benefits upon release.

Chapter 1149, Statutes of 1977 sunsetted November 1, 1983. However, funds are provided in 1984/85 to pay for remaining 1983/84 balances.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	–	–	–	$2,421	$2,420	$2,566

21.40.030 General Administration

Effective administrative leadership, guidance, and support are essential to administer and coordinate all institution program activities. To assure the efficient utilization of available resources, it is imperative that institutions are operated within the framework of departmental goals at the most reasonable cost to the State.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Distributed Expenditures	520.82	734.77	733.97	$31,068	$33,590	$39,563

21.50 Court Costs and County Charges

Penal Code Section 4700 and 4700.5 provide for the reimbursement to counties for court costs and other charges incurred in connection with (A) trials of prisoners charged with escape or with the commission of a crime or crimes while incarcerated in state institution under the jurisdiction of the Department of Corrections, (B) hearings on the return of a writ of habeas corpus prosecuted by or on behalf of a prisoner or on the question of a prisoner's insanity and (C) coroner's services resulting from the death of a prisoner.

Expenditures *(General Fund)*	$2,946	$2,335	$2,271

31 COMMUNITY CORRECTIONAL PROGRAM

Program Objectives and Description

The primary objective of the Community Correctional Program, consistent with the public's safety, is to increase the rate and degree of successful supervision of adult offenders released to the jurisdiction of the Parole and Community Services Division. This is done by providing supportive services and controls, and by enlarging community understanding and assistance.

The department proposes 85.00 personnel years and $5,465,000 to provide for the application of accepted parolee/agent and re-entry/records formulas to population growth. To provide support services for inmates and parolees confined in and released from Atascadero State Hospital per Section 2684 of the Penal Code, 1.00 personnel years and $44,000 is proposed. To provide for the parolee revocation hearing process, 14.50 personnel years and $496,000 is requested.

Authority

Penal Code, Part III, Titles 1 and 7; Part IV, Title 1; Welfare and Institutions Code, Chapter 2.

31.10 Supervision—Case Services

The primary objective of this element, consistent with the public's safety, is to increase the rate and degree of successful transitions by adult offenders under jurisdiction of the Parole and Community Services Division through providing effective supervision and case services.

The element is composed of four components which are: (1) felon supervision with parole agents supervising caseloads averaging 52 cases; (2) nonfelon supervision for civil addicts with parole agents supervising caseloads averaging 47 cases, including cases within 60 days of institutional release and cases where the addicts have been returned for short-term treatment; (3) re-entry supervision for inmates released to special community-based pre-release programs, with parole agents supervising caseloads averaging 65 cases; and (4) work furlough supervision for inmates released to employment training or educational programs shortly before established parole dates, with parole agents supervising caseloads averaging 44 cases.

In 1979, the Parole and Community Services Division implemented a major revision in its method of supervising paroled felons and narcotic addict outpatients (non-felons). In 1981, procedural modifications were incorporated to simplify the operation following a series of systematic statewide management reviews. Differential supervision remains basic to the restructured parole operation. When required case assessments indicate, selected parolees will be placed in a category of supervision intended to prevent, detect or interrupt behavior likely to endanger the community or themselves.

When assessments indicate, other parolees will be placed in a category of supervision intended to lessen the difficulties faced by parolees and enhance their capabilities to adjust to life in the community. Parolees assessed as posing little or no risks to the community, and who have infrequent or low needs for services will be placed in a minimum supervision category. As a parolee's situation changes, scheduled reassessments will result in reclassification from one level of supervision to another, as indicated.

31.20 Community Based Program

The Department of Corrections is responsible for the placement, supervision, treatment and transportation of inmates released to community based facilities shortly before established release dates. These community based efforts include: (1) Community Correctional Centers, (2) community work/residential facilities, (3) transportation, and (4) local detention facilities.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

31.20.010 Community Correctional Centers

The Community Correctional Centers are designed for the gradual re-entry of selected inmates/parolees into the community. The Centers provide housing, supervision, counseling and other re-entry programs in a controlled environment. Other program objectives are to strengthen family and community responsibilities, provide greater access to community resources, enhance employability and generally aid in the transition from the institution to the community. Because parolees and inmates without adequate resources are prone to become involved in new criminal activities, the Community Correctional Centers provide a heavily structured supervision program for a short period of time following release from prison, or in lieu of return to prison.

31.30.030 Casework Services	–	–	–	667	1,004	1,029

31.30.010 Psychiatric Outpatient Services

The primary purpose of Psychiatric Outpatient Services is to offer psychotherapy to parolees and members of their families and to offer consultation and evaluation of special cases for parole agents, the Board of Prison Terms, and the Narcotic Addict Evaluation Authority.

Following institutional psychiatric treatment, inmates with a history of aggravated assaultive crimes, serious sex offenses and offenses with other indications of mental illness are often required to participate in additional psychiatric treatment while on parole. Over 95 percent of parolees receiving psychiatric treatment do so pursuant to a special condition of parole imposed by the Department or by the Board of Prison Terms.

Mandatory psychiatric services are supplemented by clinical evaluation, treatment or consultation to many parolees who require them because of occasional serious mental health problems which may or may not be associated with new criminal acts. Approximately 15 to 20 percent of the parole population requires these services.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Patient average daily population	2,409	2,775	3,070

5240 DEPARTMENT OF CORRECTIONS—*Continued*

31.30.020 Special Narcotic Services

Successful parole programming requires the implementation of the most effective techniques to detect and deter the use of controlled substances and other illegal narcotics by parolees and thereby reduce their incidence of readdiction. Urinalysis, routine physical examinations, and methadone maintenance are used to deter and/or detect opiate and controlled substance abuse.

Urinalysis testing of parolees with histories of controlled substance abuse or other drug addiction is primarily performed by a contract laboratory. The division operates two screening enzyme multiplying immunoassay (EMIT) machines on an experimental basis, one machine in Los Angeles and one machine in Sacramento. Positive evidence of controlled substance abuse detected on these machines are verified by the contract laboratory.

Approximately 170 parolees participate in public or private methadone maintenance programs.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of addicts supervised	6,610	8,004	9,326

31.30.030 Casework Services

Persons released on parole, or to community based programs, are frequently in need of supportive services during periods of unemployment, family disruptions, or for reasons of physical and/or mental disturbance. The department assists such persons in these situations by providing short-term financial support, medical and/or psychological attention, or meaningful residential placement pending establishment of suitable independent residence in the community.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Total clients served	1,887	2,452	2,917

5240 DEPARTMENT OF CORRECTIONS—*Continued*

41 CENTRAL ADMINISTRATION

Program Objectives and Description

The Department of Corrections, in order to successfully achieve the responsibilities charged to it by California law, operates with an administrative organization consisting of the office of the director, five line divisions, and several staff services functions.

The Institutions Division is responsible for all field operations including institutions, classification, medical, education, and related program services.

The Administrative Services Division is responsible for the business affairs of the department including personnel, training, budgeting, feeding, construction and maintenance, statistics, records, and data processing and advises the director on the status of fiscal affairs.

Physical Planning and Construction Division is responsible for the planning of new facilities and the renovation of existing facilities.

Policy Operations Division provides staff services related to development, promulgation and implementation of departmental policy.

The Parole and Community Services Division is responsible for the parole supervision program.

The staff services functions include public information and legislative liaison. These offices are responsible for providing advice and counsel to the director and line administrators in their specialty areas.

To improve departmental operations and meet the requirements of Chapter 938/83 (SB 422) which accelerates new prison construction, 129.00 positions and $2,395,000 are being proposed as follows:

To provide for capital outlay and bond fund accounting, 1.00 position and $33,000 is requested for Accounting Services. To develop a system capable of tracking construction project costs and managing the cash and appropriation balances in the New Prison Construction Fund, 2.00 positions and $57,000 is requested for Accounting Systems. To provide necessary fiscal and analytical work related to new facilities and overcrowding, 2.00 positions and $37,000 is requested for Budgets. To provide technical assistance on staffing, classification and pay analysis and to plan and coordinate recruitment, 2.00 positions and $77,000 is requested for Personnel Selections and Operations. To provide contract management related to new prison construction, 2.00 positions and $75,000 is requested for Contract Services. To identify new prison sites and provide community liaison, coordinate repair of existing physical plants, coordinate all planning functions related to new prison construction, and to provide initial key institution staff for the new San Diego, Ione and Vacaville facilities, 34.00 positions and $349,000 is requested for Physical Planning and Construction. To perform required physical abilities examinations for new Correctional Officers, 13.00 positions and $342,000 is requested for Medical/Physical Abilities Testing. To perform background investigations on Correctional Officer applicants, 31.00 positions and $893,000 is requested. To establish Regional Testing Centers, 9.00 positions and $198,000 is requested. To train new Correctional Officer cadets, 33.00 positions and $334,000 is requested for the Galt Training Academy.

To provide one new and two replacement buses and two crews to transport inmates between facilities, 6.00 positions and $764,000 is requested for the Transportation Unit. To augment the audit function, 2.00 positions and $77,000 is requested. To provide for the continuing updates of the Offender Based Information System, $1,319,000 is requested for increased contract costs. To meet additional records office workload, 20.00 positions and $761,000 is requested. To meet the requirement to classify and assign inmates, 6.00 positions and $217,000 is requested for Classification Staff Services.

The budget also proposes a reduction of $114,000 and 4 positions to reflect efficiencies in administering the headquarters program.

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*

CAPITAL OUTLAY

The California prison system continues to experience serious pressure resulting from the unprecedented growth of inmate population. As increasing numbers of felons are being committed into the custody of the Department of Corrections, a need for inmate housing has developed which drastically exceeds the Department's ability to accommodate prisoners. To meet current and projected housing requirements, the Department of Corrections proposes to continue long-range planning for construction of new facilities. The construction will need to be financed through alternative funding sources such as the New Prison Construction Bond Act of 1981, Chapter 273/81, as approved by the voters on the June 1982 ballot. This measure authorized the issuance of $495 million in state general obligation bonds to finance construction, renovation, remodeling, and deferred maintenance of the State's correctional facilities. Additional funding sources need to be identified to complete the five-year capital outlay program for new construction. By June 1987, 18,500 newly constructed beds and 900 reactivated beds will bring the Department's design bed capacity, excluding community re-entry beds, to 45,600. Additionally, Special Account for Capital Outlay (SAFCO) funding will be required to complete capital outlay projects at existing facilities.

The current year funds for existing institutions and camps, including carryovers, total $23.9 million. This funding renovates CMC-West; increases security at DVI and CTF; completes preliminary plans and working drawings for a kitchen at CTF (South), upgrades sewage systems and completes routine capital outlay projects at various institutions statewide. Current year also includes the continuation of the new construction program funded from the New Prison Construction Fund at $375.6 million, including carryovers. These funds will construct 10 new conservation camps and complete acquisition, preliminary plans, working drawings, or construction at the following facilities: Level IV maximum security facilities at Folsom and Adelanto; Level III medium security facilities at San Diego, Riverside, Los Angeles counties, the Northern California Women's Facility in San Joaquin County, and at CMF-Vacaville; and Level I/II minimum security facilities at CMF-Vacaville, Ione, and Avenal.

The proposed budget for 1984–85 for existing correctional institutions is $18.8 million from the Special Account for Capital Outlay. The budgeted projects primarily are intended to maintain code-required levels of operation and to meet new program and space demands caused by the increasing inmate population. New prison construction in the budget year is proposed for financing from the General Fund in the amount of $94.7 million, the New Prison Construction Fund having been nearly exhausted by prior and current year appropriations. This level of funding, when supplemented by current year legislation, will permit complete construction and equipping of: the Southern Maximum Security Complex at Tehachapi; the new maximum security prison and support services facility at Folsom; the new Level III prison at Vacaville; the Level I/II facilities at Ione and Vacaville; and the Special Housing Unit at the California Institution for Women—a total of 6,350 new beds. The budget also proposes to complete all remaining Master Plan projects through, at minimum, the working drawing and site acquisition stages of development. The balance needed to complete those projects is estimated to be $514 million. Private sector participation in the financing of the remaining projects may be sought; the exploration of such financing was authorized in Chapter 958, Statutes of 1983.

PROGRAM ELEMENTS

Major Projects

61.01 *Statewide*

61.01.002 Acquisition and Construction of Temporary Housing (Modulars)	$1,539 Cc	$649 Cc	–

61.05.034 Security Improvements	–	1,550 Cc	–
61.05.035 Vocational Shops—North Facility	–	–	440 PWCk
This request will provide for preliminary plans, working drawings, and construction to construct a building to house two vocational training shops at the North Facility.			
61.05.036 Academic Classrooms—North Facility	–	–	85 PWk
This request will provide for preliminary plans and working drawings to construct seven additional classrooms at the North Facility.			
61.05.037 Food Processing and Storage, Work Program Facility	–	–	158 PWCk
This request will provide for preliminary plans, working drawings, and construction funding to construct a food processing and storage area at the North Facility.			
61.05.038 Renovate Electrical Systems	–	–	100 PWk
This request will provide for preliminary plans and working drawings to renovate primary and secondary electrical systems for Central and North Facilities.			
61.06 *Deuel Vocational Institution, Tracy*			
61.06.002 Milk Processing Facility	–	24 Wc	–
61.06.004 Remodel Locking Devices Phase I	–	5,450 Cc	–
61.06.005 Rehabilitate Sewage Treatment Plant	–	–	600 PWCk
This request will provide for construction for rehabilitation and/or modifications to the existing wastewater treatment plant at Deuel Vocational Institution. Modifications consist of grit removal, influent and effluent pumping and piping, flow metering controls with design flow of 0.50 mgd.			
61.06.006 Flood Control	–	–	1,000 Ck
This request will provide funds to prevent flooding of the Deuel Vocational Institution as experienced in 1983. This project consists of modifications to six existing temporary 100 HP pumps to provide permanent installation with all appurtenances including earthwork, reinforced concrete, and control systems.			
61.06.007 New Domestic Water Supply	–	–	132 PWk
This request will provide funding for a new water supply for Deuel Vocational Institution. Several alternatives are currently under study.			
61.06.008 Relocatable Prison (EIR, initial studies, preliminary plans, working drawings and construction)	10 Pc	–	–
61.06.041 Security Improvements	–	1,400 PWCc	–
61.07 *California State Prison at Folsom*			
61.07.002 Install 6 Generators for Emergency Lighting (preliminary plans, working drawings and construction)	10 PWkc	259 Cc	–
61.07.004 Maximum and Minimum Security Service Complex (preliminary plans and working drawings, total complex)	520 Pc	3,480 PWc	
61.07.004 Minimum Security Support Services Complex	–	–	30,600 Cb
Project consists of the 150-bed Level I support services housing and associated support buildings. Expected occupancy is April 1986.			
61.07.004.001 Maximum Security Units A, B & C	–	112,000 WCc	–
61.07.005 Construct Site Development and Utilities	88 Cc	8,412 Cc	–
61.07.008 Maximum Security/Minimum Security Support Service Complex (AP, MP & Schematics)	1,075 Pc	–	–
61.07.009 Maximum Security Units and Minimum Security Support Services Complex	–	–	6,700 Eb
This request is for equipment for the total facility.			
61.07.010 Sewer Line Infiltration/Inflow Testing	–	–	150 Pk
This request will provide funding for a field study to test the existing sewage lines for infiltration/inflow at the existing prison at Folsom. This study will consist of smoke and/or dye testing and televising of the existing sewage lines.			
61.08 *California Institution for Men, Chino*			
61.08.004 Milk Processing Facility—PP/WD/Const.	–	939 PWCc	–
61.08.008 Renovate Locking Devices—PP/WD/Const.	26 PWk	2,161 Cc	–
61.08.010 Security Modifications/Installation of Security Fencing	–	500 PWCc	–
61.08.023 Improve Outside Security	161 Ck	–	–
61.08.011 Install Emergency Power	–	–	350 PWCk
This request will provide funding for six emergency generators rated at 20 KW each at the California Institution for Men. These emergency generator sets are for the control rooms, watch commander stations, kitchens, and mess halls.			
61.08.012 Entry Building and Visitor Parking	–	–	410 PWCk
This request will provide funding to construct a new visitor processing center and enlarge the visitor parking area.			

* Dollars in thousands

5240 DEPARTMENT OF CORRECTIONS—*Continued*

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*
61.08.013 Exiting and Corridor Improvements—Bldg. 105	–	–	178 PWk
This request will provide funding for exiting and corridor improvements in Building 105 at the California Institution for Men. Project entails one hour fire walls and additional exits.			
61.08.014 Exiting and Corridor Improvements—Bldg. 374, Admin. & RC West	–	–	35 PWk
This request will provide funding for exiting and corridor improvements in Building 374, Reception Center-West and the Administration Building. Project entails one hour fire walls and modification to exits.			
61.08.015 Exiting and Corridor Improvements—RC Central & Bldg. 204.2	–	–	72 PWk
This request will provide for funding for exiting and corridor improvements for Building 204.2 and Reception Center-Central. Project entails one hour fire walls and new exits.			
61.08.016 Smoke Purge for Bldgs. 204.1, 204.4 & 204.6	–	–	60 PWk
This request will provide funding to correct fire and life safety deficiencies by the installation of a smoke purge system for Buildings 204.1, 204.4 and 204.6.			
61.08.017 Structural Improvements—Bldgs. 204.1, 204.3 & 204.4	–	–	46 PWk
This request will provide funding to correct fire and life safety deficiencies by installation of diagonal bracing to correct the seismic deficiencies in Buildings 204.1, 204.3 and 204.4.			
61.09 *California Medical Facility, Vacaville*			
61.09.002 Hospital Licensing Modifications (preliminary plans, working drawings and construction)	661 PWCkc	–	–
61.09.006 Relocatable Prison (EIR, initial studies, preliminary plans, working drawings and construction)	10 Pc	–	–
61.09.010 1200 Bed Level I/II Facility	–	3,000 PWc	–
61.09.011 1200 Bed Level III Facility	–	67,500 Cc	–
61.09.012 Long Lead Items	–	7,000 Cc	–
61.09.013 Install Emergency Power	–	–	612 PWCk
This request will provide funding to install a 200 KW generator set to furnish emergency power for the Psychiatric Hospital at the California Medical Facility.			
61.09.014 Enlarge Visitor Processing	–	–	340 PWCk
This request will provide funding to enlarge the visitor processing center at the California Medical Facility.			
61.09.015 Vocational Shops	–	–	982 PWCk
This request will provide for funding to construct four additional vocational training shops.			
61.10 *California Men's Colony, San Luis Obispo*			
61.10.002 Install Emergency Generator (preliminary plans, working drawings, and construction)	–	60 PWc	1,386 PWCk
This request will provide construction funds to house and install one 1,100 KW diesel engine driven emergency generator with all appurtenances at the California Men's Colony, and fund preliminary plans and working drawings for complementary cogeneration plant.			
61.10.004.002 Replace Sewage Lines Collector—Testing and Planning	–	150 Pc	–
61.10.005 CMC—West, Phase I—Const and Renovation	–	1,784 Cc	–
61.10.006 CMC—West, Phase II—Const. and Renovation	50 PWc	2,650 PWCc	–
61.10.021 Rebuild Cell Locking Mechanisms	215 Ck	–	–
61.10.022 Fire and Life Safety Improvements	49 Ck	–	–
61.10.043 Sewage Improvements (per Chap. 958/83)	–	450 Cc	–
61.10.044 Construction (per Chap. 958/83)	–	2,400 Cc	–
61.10.045 Replace Sewage Collector Lines	–	–	1,028 PWCk
This request will provide funding to replace, repair, and/or slip line the existing collector system at the California Men's Colony. This project will eliminate the infiltration/inflow problem currently existing at this facility.			
61.10.046 Fire and Life Safety Structural Improvements	–	–	1,461 Ck
This request will provide funding to correct fire and life safety structural deficiencies in Quads A, B, C, & D, dormitories.

5420 PRISON INDUSTRY AUTHORITY

The objectives of the Prison Industry Authority are to provide constructive work for inmates to reduce idleness, improve work habits and skills of inmates to better prepare them for employment after release, and provide reduced cost of maintaining the prison system through the sale of products and services. There are twenty-seven major industrial and eight agricultural enterprises operating at ten institutions. Financial support is through the Prison Industries Revolving Fund, which is maintained by revenues from the sale of products and services to public agencies. Expenditure estimate for the current year is based on the level of sales activity anticipated by management. Changes in economic or market conditions may result in corresponding change in the dollar amounts shown.

Budget year is presented for information only as the Prison Industries Revolving Fund, as authorized by Chapter 956, Statutes of 1983, amending Section 2806 of the Penal Code, is not subject to annual appropriation. Section 2808 of the Penal Code requires submission of a detailed report to the Legislature on or before February 1 of each year.

5430 BOARD OF CORRECTIONS

Program Objectives and Description

The Board of Corrections is charged with the role of coordinating standards for State local corrections, conducting studies in the fields of crime and penology, and reporting its findings, conclusions and recommendations to the Governor and the Legislature as well as administering the County Jail Capital Expenditure Fund and the Standards and Training for Corrections Program.

SUMMARY OF PROGRAM REQUIREMENTS		*1982–83**	*1983–84**	*1984–85**

10 BOARD OF CORRECTIONS

The principal activities of the Board of Corrections relate to the functions of local corrections in the State. The Board is charged with the promulgation of standards relating to conditions of confinement for adults placed in county and city detention facilities with provision for regular inspection of those facilities, technical assistance to those facilities and periodic reporting on conditions of confinement in the State to the Legislature. Standards relate to such issues as design of physical plant, fire and life safety, program activity, food, clothing, bedding, medical care and sanitation. By law, the Board must review plans and specifications for construction and remodeling.

11 STANDARDS FOR DETENTION FACILITIES

Program Objectives and Description

The principal activities of this program relate to the functions of local corrections in the State. The Board is charged with the promulgation of standards relating to conditions of confinement for adults placed in county and city detention facilities with provision for regular inspection of those facilities, technical assistance to those facilities and periodic reporting on conditions of confinement in the State to the Legislature. Standards relate to such issues as design of physical plant, fire and life safety, program activity, food, clothing, bedding, medical care and sanitation. By law, the Board must review plans and specifications for construction and remodeling. In Fiscal Year 1981–82 the Board awarded $40 million to various counties for remodeling or construction of jail facilities. Proposition 2, approved by the voters on the 1982 November ballot, provides up to $280 million in general obligation bonds for further remodeling or construction of county jails. *For the 1984–85 fiscal year, $100,000,000 is proposed from bond funds to provide financial assistance to local government for the construction or remodeling of jail facilities which do not meet state standards. These funds will be awarded to local government according to regulations established by the Board. One position for contract monitoring and one-half clerical position have been proposed for continuing workload in the County Jail Capital Construction Program.*

20 SPECIAL ITEMS OF EXPENSE

For the purpose of improving the performance of local corrections and probation officers Chapter 1148/79 (SB 924) requires the Board of Corrections to adopt rules establishing minimum standards for the selection and training of all local corrections and probation officers. The legislation also established a Corrections Training Fund which derives its revenue by levying an assessment upon fines imposed and collected by the courts for violations of certain sections of the Vehicle Code. These revenues provide state aid to any county or city which adheres to the selection and training standards established by the Board.

Through Chapter 1003/80 (AB 3296), the Board of Corrections was mandated to contract for research on validated selection standards for entry-level corrections and probation personnel. The bill also expanded the program to include city jails and required annual reports to the Legislature.

Three distinct functional areas of responsibility can be identified within the mandates of Chapters 1148 and 1003: (1) operations functions; (2) assistance to cities and counties; and (3) administration of the program.

The operations function will conduct detailed research analyses of tasks associated with all local corrections and probation positions, establish selection standards, establish training standards, and coordinate efforts to increase effectiveness by stimulating the development of education and training courses to meet identified needs.

Assistance to cities and counties will be provided to encourage and assist local corrections and probation agencies to comply with the minimum selection and training standards. Each local jurisdiction participating in the program will be reimbursed from the Corrections Training Fund in proportion to the number of corrections or probation officers trained and to the extent funds are available.

The administrative function will provide direction and control over the local assistance program so that the overall objective may be realized in the most efficient and economical manner possible. This function will include close supervision of training to maintain quality control, certifying training attendance and completion, processing local government claims for payment, and establishing equivalencies for training requirements.

In Fiscal Year 1981–82 the Board awarded $40 million to various counties for remodeling or construction of jail facilities. Proposition 2, approved by the voters on the 1982 November ballot, provides up to $280 million in general obligation bonds for further remodeling or construction of county jails. For the 1983–84 fiscal year, $25,000,000 is proposed from bond funds to provide financial assistance to local government for the construction or remodeling of jail facilities which do not meet minimum state standards. These funds will be awarded to local government according to regulations established by the Board.

21 STANDARDS AND TRAINING FOR LOCAL OFFICERS

Program Objectives and Description

For the purpose of improving the performance of local corrections and probation officers Chapter 1148/79 (SB924) requires the Board of Corrections to adopt rules establishing minimum standards for the selection and training of all local corrections and probation officers. The legislation also established a Corrections Training Fund which derives its revenue by levying an assessment upon fines imposed and collected by the courts for violations of certain sections of the Vehicle Code. These revenues provide state aid to any county or city which adheres to the selection and training standards established by the Board.

Through Chapter 1003/80 (AB 3296), the Board of Corrections was mandated to contract for research on validated selection standards for entry-level corrections and probation personnel. The bill also expanded the program to include city jails and required annual reports to the Legislature.

Three distinct functional areas of responsibility can be identified within the mandates of Chapters 1148 and 1003: (1) operations functions; (2) assistance to cities and counties; and (3) administration of the program.

The operations function will conduct detailed research analyses of tasks associated with all local corrections and probation positions, establish selection standards, establish training standards, and coordinate efforts to increase effectiveness by stimulating the development of education and training courses to meet identified needs.

Assistance to cities and counties will be provided to encourage and assist local corrections and probation agencies to comply with the minimum selection and training standards. Each local jurisdiction participating in the program will be reimbursed from the Corrections Training Fund in proportion to the number of corrections or probation officers trained and to the extent funds are available.

The administrative function will provide direction and control over the local assistance program so that the overall objective may be realized in the most efficient and economical manner possible. This function will include close supervision of training to maintain quality control, certifying training attendance and completion, processing local government claims for payment, and establishing equivalencies for training requirements.

31 Administration

Program Objectives and Description

The Board of Corrections, in order to successfully fulfill its mandated responsibilities, operates with an administrative organization consisting of the Executive Officer, an Assistant Executive Officer, Executive Secretary, and an 11 member Board. The Executive Officer and Assistant Executive Officer implement the policies established by the Board of Corrections, provide leadership and direction for the Board's functions and ensure efficient and effective use of available resources.

Addition of 1.0 position to administration is proposed in 1984–85 to provide the many budget, accounting, personnel, business services, contracts, and technical writing services needed by the Board.

5440 BOARD OF PRISON TERMS

Program Objectives and Description

The Community Release Board was established with the enactment of Chapter 1139/76 (SB 42), July 1, 1977. Subsequently its name was changed to the Board of Prison Terms effective January 1, 1980 with the enactment of Chapter 255/79 (SB 281). The Board considers parole release and establishes the length and conditions of parole for all persons sentenced to prison under the Indeterminate Sentence Law, persons sentenced to prison for a term of less than life under Penal Code section 1168 (b), and for persons serving a sentence for life with possibility of parole. The Board also reviews the sentences of all determinately sentenced (DSL) prisoners and may recommend to the court that the sentence be recalled and the prisoner resentenced.

The Board may suspend or revoke the parole of any prisoner who has violated parole. The Board determines the necessity for rescission or postponement of parole dates for persons sentenced to prison for life, persons sentenced under Penal Code section 1168, and persons sentenced to prison under the Indeterminate Sentence Law. The Board may waive parole for any prisoner and may discharge any prisoner prior to the expiration of the statutory maximum parole period. Upon request of persons determinately sentenced, the Board reviews the length and conditions of parole imposed by the Department of Corrections and the Department's denial of good time credit, and may modify the Department's decision. The Board also advises the Governor on applications for clemency.

The Board is composed of nine members appointed by the Governor and confirmed by the Senate for terms of four years each. The terms are staggered and members are eligible for reappointment. A chairperson of the Board is designated by the Governor. Hearing representatives are employed by the Board in civil service positions. Their duties include hearing and deciding cases. An executive officer is appointed by the Board, who is responsible for the ongoing operation of the Board in accordance with Board policies. Other civil service staff include management, investigative, stenographic and clerical personnel to facilitate the performance of the Board of Prison Terms duties. The Board of Prison Terms maintains its headquarters in Sacramento. *One office assistant is proposed in the budget year for increased scheduling workload related to lifer and parole revocation hearings. Additionally 3 hearing representatives are being reduced to accommodate efficiencies relating to the hearing screening process.*

5450 YOUTHFUL OFFENDER PAROLE BOARD

The Youthful Offender Parole Board is mandated by statutes to make decisions as to persons committed to the Department of the Youth Authority. These decisions involve setting the youthful offender's date for appearance before the Board; determining the person's readiness for return to the community on parole; establishing conditions relating to the person's conduct on parole; determining violation and revocation of the person's parole; returning the person to the committing court for redisposition by the court; and discharging the person from the jurisdiction of the Youth Authority.

Support services for the Board, such as budgeting, accounting, personnel, business services, etc., continue to be provided by the Department of the Youth Authority under a contractual agreement. *The budget proposes a current year deficiency authorization ($186,000) for attrition purposes due to position reductions based on revised hearing workload standards. The 1983–84 fiscal year reflects the transfer of two half-time clerical positions to the Youth Authority through an interagency agreement to consolidate the workload in jointly operated field offices. These positions are abolished in the budget year, as an efficiency measure, with the workload to be redistributed and absorbed by existing Board staff. An attrition blanket ($16,000) is continued in the budget year to complete the personnel reductions.*

The objectives of the Youthful Offender Parole Board are:

1. To protect the public.
2. To assure the rehabilitation of the youthful offender.

In June 1978, the Youthful Offender Parole Board made a major policy change in the classification of cases committed to the Youth Authority, categorizing cases by seriousness of the offense and assigning a level of decision making commensurate with the seriousness and the decisions required. Levels of decision making graduate from a referee (one person) to a two-person panel, to a three-person panel and to the highest level, the Full Board en banc, consisting of all seven Members of the Board. The purpose of the policy change was to afford a higher level of protection to the public.

Recognizing the involvement of more persons in the hearing process of individual cases would impact the Board's workload and, in turn, have budgetary implications, the Board, by policy, increased the delegation to referees for certain kinds of decisions under specified guidelines.

The number of commitments to the Youth Authority for serious offenses consistently increased each fiscal year between 1978–79 through 1980–81. However, based on a new policy of the Youth Authority to reject the more serious offenders the 1981–82 figures noted below reflect a decrease. This figure should remain constant as a result of Proposition 8, the Victims Bill of Rights, approved by the voters of California on June 8, 1982. Although Proposition 8 will essentially result in a reduction in the number of criminal court commitments to the Youth Authority, the hearing workload of the Youthful Offender Parole Board remains constant due to increased length of stay for the more serious offenders and for increased parole violators returning to the Youth Authority system.

Four of the serious type offenses are used for illustration:

	79–80	*80–81*	*81–82*	*82–83*
Murder	105	139	110	86
Manslaugher (non-vehicle)	70	79	52	42

5460 DEPARTMENT OF THE YOUTH AUTHORITY

The primary mission of the Youth Authority is to protect society from the consequences of criminal activity by: (1) providing a broad range of services to youthful offenders committed to the Department, directed towards the permanent reduction of criminal behavior; (2) assisting local criminal justice agencies with efforts to combat crime and delinquency; (3) encouraging the development of local crime and delinquency prevention programs.

Goals

Delinquency Reduction: *Reduce probability of illegal behavior* by youth not yet involved in the justice system, but who have exhibited antisocial characteristics.

Offender Rehabilitation: *Reduce continuing illegal behavior* by offenders.

Research: *Systematically develop knowledge* about delinquency reduction and offender rehabilitation.

The Department is organized into four branches: Institutions and Camps; Parole Services; Prevention and Community Corrections, and Administrative Services. Programs are managed by the branches under direction of the Director of the Youth Authority.

10 PREVENTION AND COMMUNITY CORRECTIONS

Program Objectives and Description

The goal of the Prevention and Community Corrections Branch is to enable local communities to reduce the incidence and severity of delinquent and criminal behavior. Staff work cooperatively with county probation and other governmental and private agencies and organizations concerned with corrections, juvenile law enforcement, and delinquency prevention at the local level. The major responsibilities of this program include County Justice System Subvention Program, local juvenile detention facility standard setting and enforcement, delinquency prevention, and local justice training. These responsibilities are divided into two major program areas: Support Services and Field Services. The current year reflects the legislatively approved $329,000 augmentation for four additional Youth Service Bureaus, for a total of twelve.

Youth Service Bureaus serve as a diversion resource for local law enforcement, schools and probation, in diverting the less serious young offenders from the juvenile justice system. In an effort to minimize population pressures on local correctional facilities which correspondingly impact state correctional facilities, the budget year proposes a $348,000 augmentation to fund four additional Youth Service Bureaus, for a total of sixteen in FY 84–85. Additionally, the budget year reflects the redirection of one Administrator position to the Institutions and Camps branch to develop the Institution Industries Program. The budget also reflects the reduction of one clerical position ($17,000) to capture operating efficiencies, for a net reduction of two positions in FY 84–85. A 2 percent increase of $1,256,000 is also proposed for the County Justice System Subvention Program to allow counties to maintain or expand existing delinquency treatment and prevention programs, or to fund new programs.

5460 DEPARTMENT OF THE YOUTH AUTHORITY—*Continued*

10.10 Support Services

The Division of Support Services provides statewide leadership on issues relative to delinquency prevention, community corrections, and training. The Division has responsibility for meeting the Department's statutory mandate to develop standards for juvenile halls, camps, ranches, schools, and jails detaining minors in excess of 24 hours; youth service bureaus; and other community-based prevention and correctional programs. Policies and procedures for the County Justice System Subvention Program and procedures for reviewing, monitoring, and evaluating funded programs are also developed. A separate delinquency prevention appropriation is made available for locally sponsored projects through a competitive process. Funding is provided for Youth Service Bureaus which provide services to help young people to lead socially productive lives. Delinquency prevention and community corrections information is developed and disseminated statewide to strengthen the capacity of local jurisdictions to effectively mount efforts to reduce crime and delinquency. Supportive services are provided to the State Advisory Commission on Juvenile Justice and Delinquency Prevention which is established to advise the Department on matters pertaining to crime and delinquency prevention and juvenile justice practices. Training is also provided for local justice agency personnel.

10.20 Field Services

The Division of Field Services is organized into three regional offices statewide. Responsibilities include administering and monitoring funds authorized by the Legislature for prevention programs and Youth Service Bureaus. The Division is also responsible for enforcing standards for local prevention and correctional programs, including annual inspections of juvenile halls, county camps, ranches, schools, and jails confining minors; and providing technical assistance and consultation to local justice agencies designated to prevent or reduce delinquency, and enhance local law enforcement and corrections programs.

20 INSTITUTIONS AND CAMPS

Program Objectives and Description

The objective of this program is to reduce the incidence and severity of delinquent and criminal behavior of juveniles and youthful offenders under Youth Authority jurisdiction in institutions. This is achieved by:

1. Accurately evaluating referrals and commitments.
2. Providing appropriate care, custody and treatment programs consistent with ward needs.

Trends—Youth Authority Population:

1. Ethnic group composition of wards first committed to the Youth Authority has undergone a significant change in recent years. In 1975, minority group members constituted 59.3 percent of Youth Authority's commitments. In 1982, 68 percent of the total first commitments were from minority groups.
2. Since 1975, the juvenile court-criminal court "mix" of first commitments to the Youth Authority has shifted significantly. The 1975 ratio was 54 percent juvenile and 46 percent criminal court commitments. The 1982 ratio was 67 percent juvenile and 33 percent criminal court cases.
3. The age of youths first commitments to the Youth Authority is declining. The median age of first commitments in 1975 was 18.0 years while in 1982 it was 17.5 years. The median age of those housed in Youth Authority facilities has decreased. The median age on June 30, 1975 was 19.0 while on June 30, 1982 it was 18.6.
4. A comparison of 1975 to 1982 shows attacks on staff down from 127 to 103 and attacks by wards on other wards up from 444 to 731.
5. First commitments to the Youth Authority have decreased from 3,404 in 1975 to 3,316 in 1982. The number of more serious offenders has increased length of stay, from an average of 12.7 months in 1975 to 14.2 months in 1982.

The 1983–84 budget contains funding for a population of 5,613 by June 30, 1983. Revised estimates as of September 30, 1983, indicate a population of 5,840 by June 30, 1984, for an increase of 227 wards. The increased ward population will be accommodated at the Youth Training School ($774,000), the Northern and Southern Reception Center Clinics ($888,000) and a new 50 bed living unit at Preston ($368,000) for a total cost of $2,030,000. However, the cost of the Preston Unit will be offset by redirecting funding for the Parole Transition Program from 60 to 36 beds for a savings of $374,000, and by $356,000 in efficiency related savings, for a net deficiency adjustment of $1.3 million. Additionally, the current year reflects the net reduction of 36.2 grant related positions, the re-establishment of 4 positions reduced pursuant to Section 20 of the 1983 Budget Act, and the establishment of 10.7 institutional program positions for a new 50 bed living unit at Preston, for a net current year reduction of 21.5 positions.

The 1984–85 budget proposes the continuation of the current year population adjustments at a cost of $1,073,000 and 10.7 positions to accommodate the projected 5,860 ward population level. The budget year also reflects the establishment of a Public Service Program at Fred C. Nelles School ($107,000 and 2.0 positions) and the implementation of an Energy Conservation Program ($104,000) for a total cost of $1,284,000. This cost will be offset by a corresponding General Fund savings of $1.2 million in personal services efficiencies. Budget year changes also include the redirection of existing resources ($60,000 and 1.0 positions) to fund planning efforts for the Institutional Industries Program and expansion of the M-2 Sponsors Program ($74,000). Additionally, the budget includes the reduction of 52 positions and $1,033,000 from institutions statewide to capture operating efficiencies, a reduction of 36.2 grant related positions, and the establishment of 4.0 positions reduced pursuant to Section 20 of the 1983 Budget Act, for a net budget year reduction of 70.5 positions.

Youth Authority institution populations for 1982–83 through 1984–85 fiscal years are shown in the table entitled Statement of Population—Institution.

20.10 Case Planning

Case planning within the Youth Authority operates to assist wards in their eventual reintegration into the community by evaluating and assessing ward needs and assisting wards to obtain appropriate programming which prepares them for their release. The case planning process begins at the time a youthful offender is first referred to the Department and continues throughout his institutional stay, culminating in reentry planning at the time of release. There are four programs included within the case planning category. These are: case services; need determination; goal setting and evaluation; and reentry planning.

5460 DEPARTMENT OF THE YOUTH AUTHORITY—*Continued*

20.20 Program Operations

Program operations has responsibility for the routine day-to-day operations of institutions and camps, and providing wards with appropriate care and opportunities for rehabilitation. In keeping with the Department's mandate for and commitment to rehabilitation, and public safety, each ward is assigned to programs based on his/her individualized needs.

A wide range of rehabilitative services are made available to wards including counseling, therapy, academic education, vocational training, work experience, religious services, and recreational and cultural activities. In addition, wards are provided a nutritious, well-balanced diet, appropriate clothing, personal care items and medical and dental care as needed. There are seven programs in the program operations category. They are: counseling and therapy; education; vocational training; work experience; personal and social development; feeding and personal care; and medical services. The Youth Authority has identified wards who need psychiatric treatment services. These emotionally disturbed, often violent, youth create severe problems for the treatment programs in which they are placed and jeopardize the safety of staff and wards. The Youth Authority presently has 115 beds providing psychiatric services and 105 specialized counseling beds. Two fifty-bed Planned Reentry Programs have been established, at Karl Holton and Ventura Schools, which provide intensive rehabilitative services within a shorter treatment period, thus reducing the length of stay.

20.30 Custody and Surveillance

The custody and surveillance program has responsibility for maintaining appropriate security in all institutions and camps. Security measures include perimeter fencing, interior and exterior lighting, personal alarm security systems, ward movement accountability, security sound systems, periodic shakedowns of the grounds and wards for contraband, electronic screening devices, temporary detention of wards who are in need of immediate confinement, and a special transportation unit to transport wards. There are three programs in the custody and surveillance category. They are: institutional security; detention; and transportation.

30 PAROLE SERVICES

Program Objectives and Description

The objective of this program is to protect the public from further criminal activity by Youth Authority wards and to increase the likelihood of their successful reintegration into the community. The major activities of the Parole Services Program are individual and community assessment on new commitments, supervision and surveillance of wards after release on parole, intervention to prevent violation behavior, taking corrective actions when necessary, liaison with community agencies, the operation of two residential programs, the purchase or contracting of services for wards on parole, and administering the interstate compacts.

Youth Authority parole caseloads for 1982–83 through 1984–85 fiscal years are shown in the table entitled Statement of Parole Caseload.

The current year reflects a 24 bed reduction in the Parole Transition Program for a savings of $374,000. These funds are transferred to the Institutions and Camps Program for a 50 bed living unit at Preston School of Industry. Also reflected is the transfer of two half-time clerical positions from the Youthful Offender Parole Board through an interagency agreement to consolidate the workload in jointly operated field offices.

The redirection of Parole Transition Program funds ($397,000) is continued in the budget year for 60 beds at Preston School of Industry. Additionally, the budget year reflects the reduction of 6.5 positions and $175,000 to capture operating efficiencies.

30.30 Interstate Services	5.3	4.9	4.8	311	323	336

30.10 Ward Program Services

The ward program services program has primary responsibility for assisting wards in making a succesful reintegration back into the community after their institutional release. Beginning at the time of commitment, ward program service works with wards until their discharge from parole. As soon as a ward is accepted for commitment to the Youth Authority, the local parole office is sent the case file, the parole agent makes a visit to the ward's family, and prepares a community assessment report for use by clinic staff in the diagnostic process.

For the first 90 days after a ward is released, intensive reentry services are provided. The parole agent has frequent contact with the ward and provides needed brokerage with community agencies. Direct and brokerage services continue to be offered after the reentry period, however, the level and intensity gradually diminishes as the ward becomes increasingly self-sufficient.

Parolees with medical, psychiatric, vocational, educational and personal needs can be provided financial help if other resources are not available and if such assistance is required to implement a parole plan or to assure a successful reintegration into the community.

Reimbursements				*64*	*52*	*37*

30.20 Public Protective Services

The emphasis of this program is the protection of the public from further criminal behavior by Youth Authority parolees. This is accomplished through preventive actions which focus on solving problems before a law violation occurs and corrective actions which focus on ward accountability after a violation has occurred. The activities of the violation process may include investigations, searches, possible arrest and/or detention, probable cause/detention hearings and violation/disposition hearings.

30.30 Interstate Services

The Interstate Services Program is a specialized unit that has the responsibility for administration of interstate compacts on juveniles and adults which provides for prior notification of possible probation and parole releases among the various states, investigation of plans and mutual arrangements for supervision, caseload supervision of Youth Authority parolees placed in other states, reporting and return of parole violators, resolving reported violation of interstate juvenile and adult probation cases to insure the court of jurisdiction is notified so appropriate action can be taken. The unit also coordinates the return of runaway juveniles to their state of residence, and all movement of adult probation cases in and out of the state.

40 PLANNING, RESEARCH, EVALUATION AND DEVELOPMENT

Program Objectives and Description

The objective of this program was to enhance effective policy and program decision making on the part of Youth Authority managers by conducting and facilitating systematic analysis, short-term program reviews, and appraisal of new and existing policies and programs, by providing timely and sound program information, and by obtaining supplemental resources to test new concepts and programs. This program was eliminated in January, 1983 due to budget reductions in the 1982–83 budget. The Program Research and Review Division was established in the Administration Program to provide a reduced level of on-going research, evaluation, and short-term program reviews, of new and existing policies and programs.

50 ADMINISTRATION

Program Objectives and Description

The Department of the Youth Authority, in order to successfully fulfill the responsibilities charged to it by California law, operates with an administrative organization consisting of the Office of the Director, four line branches, and several staff functions.

The Director and Chief Deputy Director have overall administrative and program responsibility, provide leadership and coordination for departmental programs, and ensure the most efficient and effective use of the available manpower and resources.

The current and budget year reflect the addition of 2.0 positions to accommodate increased workload as a result of an interagency agreement with the Board of Corrections to provide administrative support services including budgeting, personnel and accounting.

Additionally, the budget year reflects a redirection of 0.5 positions within Administration to staff the Management Development Training Program and the reduction of $66,000 and 3.5 positions to capture operating efficiencies.

50.01.010 Executive

The Director of the Youth Authority is the chief administrative officer of the Department.

The Office of the Director, including the Chief Deputy Director, combines with the Branch Deputy Directors to constitute the central administrative core within which the responsibility for all major policy determinations, program planning and implementation, and evaluation are centered.

The Director's office also assures the coordination of policy and procedures between the program operation arms of the Department and the Youthful Offender Parole Board. A mutually supportive relationship between these two entities is essential to the effective operation of both.

50.01.020 Support Services

The Administrative Services Branch provides support services to the various program operations of the Youth Authority and is composed of six divisions and two offices. The Program Support Division is responsible for management analysis, facility construction and maintenance, food and nutrition, program planning and evaluation, and business services. The Financial Management Division is responsible for fiscal and efficiency analysis, resource development, accounting services, and budget services. The Information Management Division provides data processing services, word processing services and statistical analyses. The Program Research and Review Division includes the parole and institutions bureau, the prevention and community corrections research bureau and the program review bureau. Staff services functions for personnel and training are provided by the Division of Personnel Management and the Division of Training. The Safety Office is responsible for the department IDL/Workers' Compensation program and the Branch Administration office is responsible for the coordination of all the services provided by the Administrative Services Branch.

EDUCATION

6100 DEPARTMENT OF EDUCATION

California's public education system is administered at the State level by the Department of Education, under the direction of the State Board of Education and the Superintendent of Public Instruction, for the education of more than 4 million students from preschool age to adulthood. In 1983–84, $10,983 million will be spent from State and local revenue sources for the State's public school pupils. In 1984–85, those expenditures are expected to increase to $11,902 million. The State administration aspects of the programs are managed through three branches of the Department: the Executive Branch, the Educational Programs Branch, and the Administration Branch.

The functions of the State staff in administering the programs described in this budget extend across six principal areas which include:

Policy development and coordination—promulgating regulations, implementing statutes, interpreting legislative intent, developing program goals, and coordinating with other agencies within the executive and legislative branches.

Curriculum and management assistance—assisting local educational agencies through the dissemination of information, conduct of workshops and providing other in-service training, and performance of other leadership functions.

Fund and product distribution—allocating to local educational agencies funds appropriated by the State or federal government and distributing surplus property or donated commodities.

Program and plan review—assessing the quality of operating educational programs and adherence to implementing requirements.

Regulatory action—resolving compliance issues identified through the program and plan review functions.

Consumer protection—following up on and resolving parent, student, or community group complaints unresolved by local agencies.

The Department of Education, with a staff of approximately 2,715 employees (including 1,370 employees in the State Special Schools, State Library and Office of Surplus Property), is responsible for providing leadership to California's public schools and for disbursing over $9 billion in funds, materials, and supplies to local educational agencies.

During 1983–84, the department was reorganized into five major areas: (a) Executive Management; (b) Department Administration; (c) Governmental and Public Affairs; (d) School Field Services; and (e) Curriculum and Instructional Leadership—including Program Evaluation, Research, and State Assessment and Special Services. The reorganization was designed to streamline department operations, insure better internal management, simplify compliance monitoring, and provide higher quality products and services for districts and schools. In addition, the reorganization resulted in the reduction of approximately 154 positions.

The primary goal of the Superintendent and the Department is to work with the educational community to restore academic excellence to the schools and to regain public confidence in education. Some of the major objectives the Department is working toward are: (a) to provide sufficient time for learning to occur and to ensure that available time is used well; (b) to upgrade both the quality and quantity of the content of schooling; (c) to provide a comprehensive testing/monitoring program to enhance instructional/curriculum planning; (d) to upgrade the quality of the teaching force through training and other incentives; (e) to provide for higher quality instructional leadership for districts and schools; and (f) to promote safe and orderly learning environments for our schools.

SIGNIFICANT PROGRAM CHANGES

Chapter 498, Statutes of 1983, made significant changes to many K–12 education programs. The following table and program descriptions highlight those program changes and indicate the funds budgeted for the new programs.

Program Description:

Incentives for a Longer Instructional Day/Year. Districts operating school for at least 180 days will receive $35/ADA. Districts would receive $20/ADA in grades K–8 and $40/ADA in grades 9–12 to increase the number of instructional minutes one-third of the distance per year toward the goal defined in Sections 46142–200 of the Education Code. This change is expected to increase the quality of students' education by increasing their "time on task" and offering additional course work.

Beginning Teacher Salaries. Continuation of the current year program which offers districts State support for the additional cost of increasing by 10 percent annually for three years the lowest salary on the schedule applicable to certificated teachers. This program should assist districts in offering more competitive salaries in their recruitment efforts.

Summer School Program. Since enactment of Proposition 13, State funding for summer school has been limited to remedial instruction for students not meeting proficiency or graduation standards. This program will expand State funding for summer school to include supplemental instruction in math, science, and other core academic courses.

Small School District Funding. This program reinstates the necessary small school funding formula effective prior to enactment of Proposition 13 in June 1978.

Education Improvement Incentive Program. The Governor's Budget provides $15 million to implement the Education Improvement Incentive Program, which is designed to reward schools whose students improve their California Assessment Program examination scores.

Specialized Secondary Programs. The Governor's Budget contains $2.0 million for grants to districts or consortia of districts to establish schools with specialized curricula in high technology, performing arts, or other special curricular areas for pupils in grades 9 to 12. The establishment of such schools will provide students with enhanced learning opportunities and help to meet industry demand for workers trained in high technology fields.

Tenth Grade Counseling. The 1984–85 Governor's Budget provides $6,600,000 to allow districts to establish counseling programs for pupils who are 16 or in the 10th grade. This funding will supplement existing services and is intended to provide an individualized review of each pupil's academic progress and educational options.

[1] Personnel year to be used by Administrator Training and Evaluation Program, Pilot Project for Administrative Personnel and Pilot Projects to Strengthen Personnel and Management.

* Dollars in thousands

6100 DEPARTMENT OF EDUCATION—*Continued*

Expansion of Opportunity Classes. The 1984–85 Governor's Budget provides $4,100,000 for this program. For each additional pupil enrolled, $400 is given to the district. This program is intended to assist pupils with attendance problems to resolve their problems and return to regular classes.

Year-round School Incentives. The 1984–85 Governor's Budget provides $7,687,000 for this program. Districts are provided incentives to serve pupils in year-round schools, the operation of which is necessitated by overcrowding.

School Improvement Program (SIP). The 1984–85 Governor's Budget provides $10,300,000 additional SIP funding for K–6 pupils at $106/pupil.

Increased Funding for Instructional Materials. The 1984–85 Governor's Budget continues $36,100,000 of the additional funds added by SB813 in 1983–84 for textbooks and other instructional materials.

Teacher Instructional Improvement Grants. The 1984–85 Governor's Budget provides $17,100,000 for grants to 5 percent of the State's teachers with acceptable projects designed to improve the quality of instruction in the State's schools.

Mentor Teacher Program. The 1984–85 Governor's Budget provides $30,800,000 in local assistance funds for this program. The program is designed to compensate excellent teachers for additional work they perform in developing curriculum and assisting new teachers.

Teacher Education and Computer Centers (TEC). The 1984–85 Governor's Budget provides $5,100,000 for expansion of this program. The TEC Centers provide training for classroom teachers and school staff in teaching skills, assist school-site implementation for local school staff development programs, and provide training for school personnel in the instructional use of computers.

Administrator Training and Evaluation Program. The 1984–85 Governor's Budget provides $2,000,000 for support and development activities designed to improve clinical supervision skills of school administrators.

Pilot Projects—Administrative Personnel and Strengthening Personnel and Management. The 1984–85 Governor's Budget provides $500,000 for pilot programs to assist school districts in the recruitment, selection, training, and evaluation of administrative and management personnel.

Urban Impact Aid Program. The 1984–85 Governor's Budget provides $9,216,000 for expansion of this program. The program is designed to provide additional funding to urban school districts that incur greater expenses than non-urban districts because of their greater enrollment of disadvantaged pupils.

California Assessment Program. The 1984–85 Governor's Budget provides $650,000 to implement testing of eighth-grade students and to develop the tests for tenth-grade students.

Adult Education Growth. SB 813 provided $4,000,000 in 1983–84 for growth in Adult Education ADA. The 1984–85 Governor's Budget provides an additional $4,000,000 to fund a 2.5 percent annual increase in adult education ADA.

Serrano Equalization. SB 813 provided $23,500,000 in 1983–84 to continue the equalization of district revenue limits consistent with the Serrano v. Priest decision. The 1984–85 Governor's Budget provides an additional $145,100,000 to increase compliance with Serrano to 90 percent.

Education Technology. SB 813 provided $500,000 in 1983–84 to implement this program. The 1984–85 Governor's Budget provides $5,500,000 for local assistance and $124,000 for 3 personnel years in state operations to support the Education Technology Local Assistance program. This program is designed to assist schools in using computers to enhance the quality of instruction.

School Bus Replacement. The 1984–85 Governor's Budget provides $3,000,000 to assist small school districts in reconditioning or replacing school buses.

Local Assistance Bureau Staffing. In recognition of the increased workload resulting from the programs initiated by SB 813, the Governor's Budget provides $171,000 and 5 additional positions for Local Assistance Bureau.

The Administration believes that Senate Bill 813 was a step in the right direction toward K–12 education reform. However, if the State truly is to revitalize its system of K–12 education, additional reforms are necessary. Consequently, the Administration will be proposing legislation early in 1984 to complete the efforts initiated by Senate Bill 813.

10 INSTRUCTION

Program Objectives and Description

Instruction is the process of communicating knowledge and intellectual, vocational and personal skills to California public school students (including adults) primarily through formal schooling. This program includes those funding sources which provide direct educational services to children and adults in the State's public elementary and secondary school system. The Department of Education administers the funding and assures that instructional programs conducted by California's 1,029 public school districts conform to applicable State statutes and administrative rules and regulations.

10.10 School Apportionments

Support for California's K–12 public school system is a shared responsibility, with funding provided from local property taxes, State general-purpose aid, and Federal subventions. School apportionments supplement local resources to fund the general education programs of California's 1,029 K–12 school districts and 58 county offices of education. Local property taxes and other local revenue will provide about $2.7 billion to districts and county offices in 1984–85. The remaining $6.5 billion of local assistance aid for K–12 general education will be provided by the State.

In the 1984–85 fiscal year, $469.1 million in local assistance funding is being provided for school district summer school programs providing instruction in math, science and other core curricula; to bring low-wealth school districts up to the statewide average of general purpose revenue per pupil; for increasing entry-level salaries for teachers; for increasing the total instructional time provided for students; for small school aid; for small school district bus replacement; and for year-round school incentive payments. In recognition of the increased workload resulting from the management and administration of these programs, the budget provides $171,000 in additional State operations funding for 5 personnel years. These and other programs initiated by Chapter 498, Statutes of 1983 (SB 813) are described in the narrative, beginning on page E-2, under Significant Program Changes.

Changes in local revenue for school districts and county offices of education result in a dollar-for-dollar change in State general fund requirements for K–12 apportionments. In 1984–85, local property tax revenues are estimated to grow by 8.5 percent, according to a Department of Finance survey completed by county assessors. This growth, along with the effects of the New Partnership proposal that all local jurisdictions share in the allocation of the revenues generated from the supplemental property tax roll in 1984–85, contributes to net local revenue growth for K–12 education programs of $92.9 million—an $84.0 million increase for K–12 district and county office general education programs and an $8.9 million increase for county office special education programs. (Refer to page E-7 for Special Education programs, and the Local Government section of the A-pages for additional information regarding the New Partnership proposal.)

10.20 Consolidated Programs

The department initiated the consolidated application process in 1973 to reduce the administrative burden for school districts and to allow for effective program planning at the school level. This process includes the allocation of resources for the School Improvement Program and the Economic Impact Aid program. It also provides the allocations for the Miller-Unruh Reading Program which partially subsidizes approximately 975 reading specialist positions. The objective of this program is to prevent and correct reading disabilities at the earliest possible time for pupils in kindergarten through grade 6. Also under the consolidated application process is the Native American Indian Education Program which is aimed at reducing the high drop out rate of American Indian students. Additionally, ECIA Chapter 1 (formerly ESEA Title I) funds are allocated through the consolidated application process which provides programs for economically disadvantaged students.

In the past, expenditures have been displayed in the Consolidated Programs Element because programs have been included in the consolidated applications process. Effective 1983–84, however, a new program structure has been adopted and these program expenditures are now reported in other elements to better reflect program costs. (Refer to Element 10.30 for the Economic Impact Aid, Native American Indian, and ECIA—Chapter I programs, Element 10.90 for the ECIA—Chapter II program, Element 20.10 for the Miller-Unruh program, and Element 20.60 for the School Improvement program.)

10.30 Other Compensatory Programs

The State Department of Education aims to achieve the goals of five other compensatory programs directly through local assistance to school districts or through regional units for migrant education and indirectly through activities administered by the State, such as assistance and training, program review, policy development, and coordination. These programs include:

Migrant Education—ECIA Chapter I—meets the needs of California's migrant children through the provision of health and welfare services, pre-service and in-service education for staff, transportation, child development activities and active parent involvement. During 1983–84 a total of 1,400 schools in 359 districts enrolled approximately 138,000 migrant children.

Educational programs for migrant students are administered by the department's Office of Migrant Education. The programs include many migrant support services in addition to the basic educational program. These services are coordinated with the State Health and Welfare Agency's Office of Rural and Migrant Affairs.

The objectives of the ECIA I migrant component for 1984–85 are:

a. To ensure that all eligible migrant children are identified, recruited, and entered into the Migrant Student Record Transfer System.
b. To provide all migrant children with supplementary instructional services on the basis of identified need in language development, reading, and mathematics.
c. To provide migrant children with health screening and supplemental treatment as needed.
d. To provide necessary training for all staff serving migrant children in order to ensure appropriate services to the children.
e. To provide the opportunity for parents to participate on advisory committees and become actively involved in their children's education.

Demonstration Programs in Reading and Math—provides exemplary programs for intensive instruction in reading and mathematics.

American Indian Education Centers—The objectives of the 12 community based centers are: (a) to provide opportunities to American Indian students which permit them to raise their academic achievements, with particular emphasis on reading and mathematics; and (b) to improve the self-concept of both American Indian students and adults.

Compensatory Education, ECIA Chapter I—coordinates the delivery of ECIA Chapter 1, formally ESEA Title I, services with other related state and federal programs.

Native American Indian Education—provides services to help reduce the high dropout rate of American Indian students.

10.30.070 Economic Impact Aid

Economic Impact Aid (EIA) was established by Chapter 894/77 and became operative on July 1, 1979. EIA funds support supplementary educational services to educationally disadvantaged students and limited and non-English-speaking students through State Compensatory Education (EIA-SCE) and Bilingual Education programs (EIA-LES/NES). School districts allocate EIA-SCE funds to schools selected on the basis of above average poverty concentrations; selected schools, in turn, serve students with achievement levels which are below average. EIA-LES/NES funds are distributed by districts directly to schools for supplementary bilingual services.

10.40 Special Bilingual Programs

This program element consolidates the Federally-funded State administrative resources in support of bilingual programs, including local assistance funding for grades K–12 for eligible refugees. State bilingual education support is provided primarily through the Economic Impact Aid program (10.30.070). Support also comes from the Federal ECIA Chapter I program (10.30.060).

The Department of Education aims to achieve the objectives of programs designed to meet the needs of limited-English-proficient (LEP) students both through direct local assistance to school districts and indirectly through State administration of curriculum, management, and policy-oriented activities. To meet these objectives, the Special Bilingual Program element includes the following components:

Bilingual Bicultural Education (ESEA Title VII)—Provides grants for the dissemination of information, the coordination of technical assistance and the pursuit of research for the improvement of bilingual education programs.

Transition Program for Refugee Children—Provides supplemental educational services to eligible refugee children. These services include testing to determine needs, bilingual education, English language instruction, and special materials and supplies.

National Origin Desegregation Assistance—Provides technical assistance to school districts undergoing national origin desegregation, and has as its primary responsibility the assurance that national origin minority students participate equitably in California public schools.

10.50 Adult Education

Adult education programs are designed to involve adults served by public high school and unified districts in relevant general education programs which will improve their literacy skills, employability, parenting abilities, and meet special needs of individuals such as the handicapped, older persons, and non- and limited-English speaking adults.

In 1981–82, there were 1,536,318 enrollments which included 624,359 in Adult Basic Education classes, 254,164 in vocational training, 85,685 in parent education courses, 187,383 in high school subjects, including General Education Development (GED) Test preparation, 7,557 in Americanization, 40,321 in homemaking, 105,510 in older adult programs, 105,048 in programs for handicapped adults and 212,301 in other programs including safety education, health education, physical education, driver education/training and other civic education courses.

The state provides technical assistance to schools, approves all adult programs and classes, supervises the General Education Development (GED) testing centers, and issues the California High School Equivalency Certificate.

In the 1984–85 fiscal year $4,000,000 is being provided for adult education growth pursuant to Chapter 498, Statutes of 1983. Refer to the narrative under Significant Program Changes on page E-2 for further description.

10.60 Special Education Programs for Exceptional Children

Under both Federal and State statutes, individuals with exceptional needs are entitled to free, appropriate public education. California's special education delivery system was established by Chapter 1247/77 (AB 1250) and refined by Chapter 797/80 (SB 1870). Approximately 370,000 individuals with exceptional needs are expected to be enrolled in special education programs in both 1983–84 and 1984–85. In recognition that pupils with exceptional needs require specialized educational services, California provides a full range of special education programs that meet the individual needs of such pupils. Pupils with handicapping conditions are provided individual or small-group instruction, or, where necessary, are provided with full-time special classes operated at the school site. Indirect services provided under special education programs include consultation with the teachers and parents of the students, and special alterations of facilities, equipment, and learning materials. Services also are provided for blind, multihandicapped blind, deaf-blind, deaf, multihandicapped deaf pupils, and neurologically handicapped pupils through the State Special Schools when their educational and related services needs cannot be met in the public local educational agencies. In addition to providing educational programs through local educational agencies and the State Special Schools, the Special Education Programs for Exceptional Children element includes the following components:

State Administration—The objective of the State administration component is to make resources and services available to public schools so that all students with exceptional needs can receive special education and related services.

The State's special consultants will: 1) conduct annual program reviews in representative schools of approximately one-third of the Special Education Local Planning Areas of the state which offer educational services to individuals with exceptional needs; 2) review annually approximately one-third of the nonpublic schools and agencies offering educational services to individuals with exceptional needs; 3) determine compliance with applicable State and federal laws and regulations; 4) review, negotiate, and approve annually all local comprehensive plans for special education and various program applications as required by law, such as personnel development, special studies, preschool/infant, vocational education, development centers, and in-service training; and 5) provide technical assistance to local educational agencies and other state agencies in attaining full educational opportunities for all individuals with exceptional needs from birth through 21 years of age.

Clearinghouse Depository for Handicapped Students—The objective of the Clearinghouse Depository for Handicapped Students (CDHS) is to maintain a central clearinghouse-depository and duplication center for specialized textbooks, reference books, recordings, study materials, tangible apparatus, equipment and other similar items for the use of handicapped students. As a necessary adjunct, CDHS also provides information to educational institutions (preschool through college) and individuals regarding the production, selection, and acquisition of such items.

Region 6 Deaf-Blind Center—The objective of the Region 6 Deaf-Blind Center is to secure the provision of medical, educational, psychological, or other appropriate services to any identified deaf-blind child in California, Alaska, Oregon, Washington, Arizona, Hawaii, Nevada, Guam, American Samoa, or the Trust Territories of the Pacific. This activity is fully funded by a Federal grant. The center: (a) annually allocates Federal funds to contractors who provide appropriate services to deaf-blind students; and (b) periodically monitors and reviews those agencies for compliance with applicable laws and directives. The State administers this program under grant from the Federal Government at no cost to the State.

10.60.040 State Special Schools

The Department of Education operates six special schools for handicapped children. The objective of the State school for the blind and two schools for the deaf is to provide an appropriate education to those blind, multihandicapped blind, deaf-blind, deaf and multihandicapped deaf pupils who, because of their severe sensory loss and educational needs, cannot be provided an appropriate education program and related services in regular public schools. These schools provide highly specialized services including educational assessments and individual educational recommendations for individuals referred for such service and a comprehensive residential and nonresidential educational program composed of academic, nonacademic and extracurricular activities. These schools will provide educational opportunities to approximately 1,030 deaf and multihandicapped deaf students and 125 blind and multihandicapped students in 1984–85.

The objectives of the three diagnostic schools are to: (a) serve as a regional educational resource to educators and parents; (b) provide assessment and educational planning services for seriously handicapped children referred by special education programs in local educational agencies, including, but not limited to, the severely, emotionally and neurologically handicapped; and (c) provide unique extended assessment and diagnostic services on a short-term residential basis. These schools will provide services to approximately 564 students in 1984–85.

10.60.050 Special Education—Local Assistance

The objectives of the local assistance component are to apportion funds to local educational agencies to carry out the program objectives at the school level and to assess the special education funding requirements of the State's school districts and county offices of education. Local assistance funds include those appropriated from the General Fund for the Master Plan for Special Education and funds available under Title VI of the Federal Education for All Handicapped Children Act (Public Law 94-142).

The Governor's Budget provides $15,186,000 in PL 94-142 funds in 1984–85 to continue the current level of funding for direct and indirect instructional services approved in the State Plan. In addition, the Budget is proposing Budget Act language to authorize the Department of Education to use 25 percent of any increase in PL 94-142 funds (up to a maximum of $2 million) to fund growth in Licensed Children Institutions population and infant programs pursuant to Section 56425 of the Education Code.

As in 1983–84, the Budget proposes no additional funding for enrollment growth in 1984–85.

In 1983–84, district and county office General Fund entitlements are expected to exceed available State, Federal and local revenues by an estimated $7 million. Due to the lack of cost standards and criteria for the computation of program costs, the cost data reported by local education agencies for the purpose of claiming State aid are of questionable validity. For this reason, the Governor's Budget provides no funding for the estimated deficiency. The Administration will propose legislation to require the Superintendent of Public Instruction, with the approval of the Department of Finance and the advice of the Legislative Analyst, to issue standards and criteria for the computation of special education costs reported for funding purposes. These standards and criteria would be used by local education agencies to recompute their cost of special education programs for State funding purposes.

The 1984–85 General Fund baseline amount for Special Education reflects a reduction of $3,893,000 due to an increase in local revenues to county offices of education. The increase results from the Administration's New Partnership proposal to allocate revenues generated from the supplemental property tax roll to all local jurisdictions in 1984–85.

10.70 Vocational Education Programs

The objective of the Vocational Education element is to provide vocational education students with marketable job skills. Federal Vocational Education funds are used to improve, expand and maintain existing vocational education programs; develop new programs; and eliminate sex discrimination and stereotyping in vocational education. State funds for vocational education are used to fund vocational and technical education programs in regional occupational centers and programs to prepare students for an increasingly technological society. The Department of Education also administers the State Education Coordination and Grants Funds which provide funding for occupational preparation in service delivery areas funded by the Job Training Partnership Act (JTPA).

10.80 Special Instructional Programs

The Special Instructional Programs element consists of four major components:

Gifted and Talented Education Program—The objective of this program is to offer special services to gifted and talented pupils, including pupils from economically disadvantaged and varying cultural backgrounds.

Driver Training—The primary objective of the program is to provide appropriate knowledge and skill training to regular and handicapped students prior to obtaining a driver's license.

University and College Opportunity Program (UCO)—The goal of this component is to assist secondary schools with high minority populations in an effort to increase the eligibility pool of qualified students for universities and state colleges.

10.90 Education Consolidation and Improvement Chapter II

Pursuant to the Education Consolidation and Improvement Act of 1981, as of July 1, 1982, approximately 29 federal categorical programs were consolidated into a new federal block grant. Funds for the new block grant are allocated to states on the basis of each state's share of the school age population. Out of the funds received by each state, the State Educational Agency may retain up to 20% for projects which are authorized under the Act and for state administration. The remainder, which must be at least 80% of the state's grant, is to be allocated to Local Educational Agencies (LEAs) on the basis of a formula which uses enrollment as its primary factor. In general, funds appropriated under the Act may be used for any of the purposes which were formerly authorized by the programs now included in the block grant. The enabling legislation also creates a state advisory committee which is appointed by the Governor and charged with advising the State Educational Agency on the percentage and use of funds retained for state use, and the formula for distributing the remaining allocation to Local Educational Agencies.

Expenditures of the federal block grant are reflected in program 10 ($33,637,000), program 20 ($2,081,000) and program 40 ($30,000).

20.10 Curriculum Services

The objective of the curriculum services element is to assist school districts and other appropriate agencies in improving the quality of educational instruction. To meet this objective, the element includes six major components.

Mathematics and Science Education—The primary objective of this component is to: 1) support the development of effective mathematics programs in elementary and secondary schools through new curriculum, recruitment and preparation of teachers and technical assistance to districts and schools; and 2) improve the amount and quality of science teaching in California through information dissemination, staff development, research on and recognition of exemplary programs, and curriculum reform.

Technology Education—The primary objective of this component is to improve the effective use of computers and video forms of technology in instruction by accomplishing the following: 1) provide materials and resources for curriculum planning and development to infuse the use of computers throughout the K-12 curriculum; 2) make available high quality software which is relevant to the educational needs of students and which taps the unique properties of computers; 3) make available adequate hardware to ensure equitable access geographically, across gender and socioeconomic status, and for students at every level of achievement; 4) make available sufficient training to ensure that available hardware and software can be used effectively in the classroom; and 5) develop a statewide technology constituency which can help promote improvement and support funding necessary to effect improvement.

Social Science and Humanities Education—This component is responsible for upgrading the quality of the curriculum and course content in the subject areas of History and Social Science.

Health and Physical Education—This component is responsible for assisting school districts and their staffs to initiate and upgrade programs of physical education and athletics, and to administer the state school health program including health instruction, health services, and a healthful school environment.

Environmental/Energy Education—This component encourages the development of effective local school-community programs at all grade levels in areas relating to the conservation of energy and other natural resources, and the improvement of environmental quality.

The Resource Delivery Component was established to develop and support a statewide delivery system focusing on efficiency and maximum utilization of local and regional resources. The overall mission of this component is to improve the quality, delivery, utilization, and sharing of services and resources by facilitating the success of California's educational reform policies and laws.

In the 1984–85 fiscal year $5,624,000 and 3 positions are being provided to implement the Educational Technology Local Assistance program as authorized by Chapter 498, Statutes 1983 (SB 813). Refer to the narrative under Significant Program Changes on page E-2 for further description.

20.20 Instructional Materials Management and Distribution

The primary objectives of the Instructional Materials Management and Distribution element are to assist in the state adoption of instructional materials for use in California's elementary schools and to ensure complete delivery of all materials to the schools before the start of the school year. To meet these objectives the department assists the State Board of Education and the Curriculum Development and Supplemental Materials Commission in the evaluation of material content and selection criteria. The department also processes the contracts for the adopted material and ensures compliance with the terms of the contracts.

Chapter 498, Statutes of 1983 (SB 813) provides an additional $36.9 million for the Instructional Materials Program during 1983–84. The purpose of the augmentation was to increase the per pupil instructional materials allocation rates for kindergarten through grade 8 and establish an allocation for grades 9 through 12. In the 1984–85 fiscal year, $36.1 million is provided to maintain the allocation rates provided in SB 813. Refer to the narrative under Significant Program Changes on Page E-2 for further description.

20.30 Administrative Services to Local Educational Agencies

Local educational agencies look to the State for leadership, guidance, and technical expertise to manage operations consistent with all requirements. Further, by virtue of broad exposure, staff can provide consultant services to aid in improving operations and more efficiently using scarce resources.

Such services are particularly required in attendance accounting, district governance and organization, transportation, insurance, accounting/budgeting, maintenance and operations and other areas of planning and administration.

Staff are also available to conduct management reviews covering a broad range of business services operations and organizational concerns. This area also includes publishing of required documents such as attendance registers and other materials such as manuals for budgeting, accounting, transportation, attendance, maintenance and operations, student body funds and other advisory handbooks and materials.

Federal Asbestos Health Standards require school districts' compliance by June 28, 1983. Given the potential health hazard, the budget proposes one additional position and $75,000 to monitor statewide compliance.

20.40 Supplementary Program Services

The objectives of this element encompass identification and development of innovative programs and the dissemination of exemplary programs and practices to local educational agencies and nonpublic school systems; assistance in development of alternative educational programs; and compliance, audit and other monitoring activities.

To meet these objectives, the Supplementary Program Services element includes the following components:

National Diffusion Network—The goal of this component is to assist local schools in improving their instructional programs through the adoption/adaption of validated practices. Local school staffs are assisted through the no cost or low cost training and technical assistance provided by exemplary program personnel.

Sex Equity in Education—This program provides and develops information and conducts in-service training workshops and on-site visitations to assist schools in eliminating sex discrimination.

Foster Youth Services—this component provides direct reimbursement to school districts operating Foster Youth Services programs.

Alternative Educational Programs—this component provides leadership and technical assistance to school districts and schools for 1) development of summer, year round, continuation and opportunity schools; and 2) options for achieving quality instruction through alternative/independent study.

In the 1984–85 fiscal year $2 million is being provided for Specialized Secondary Programs and $4.1 million for the expansion of opportunity classes and programs initiated by Chapter 498, Statutes of 1983 (SB 813). Refer to the narrative under Significant Program Changes on page E-2 for further description.

Compliance and Grants Management—this component streamlines administration for all categorical programs, ensures that LEA's are in compliance with requisite laws or have State Board approved waivers, and ensure that agencies receiving child deveopment/nutrition funds will not have paybacks after required audits.

20.40.080 Compliance and Grants Management

To provide efficiency as well as quality in assessing LEA compliance, this component has instituted the following major activities:

1) Development of a coordinated compliance monitoring review process and manual which standardizes the compliance reviews of adult education, consolidated programs, gifted and talented education (GATE), migrant education, special education, child development, child nutrition and surplus property.

2) Development of departmentwide resources such as a compliance tracking system, consolidated programs description database, consolidated programs complaint investigation file, and the consolidated application.

3) Provides centralized processing of consolidated applications and reviews and provides management assistance on compliance issues to LEA's.

4) Coordinates compliance reviews for all applicable program areas through the use of consolidated compliance review teams.

5) Provides centralized coordination of all audits and audit reviews.

20.60 Improving School Effectiveness

The Improving School Effectiveness element consists of the following components:

School Leadership—The primary objective of this component is to create more effective schools through more effective leadership by local school boards, superintendents and principals.

School Climate—The primary objective of this component is to assist school districts in providing a learning environment that encourages effective academic achievement. Major efforts are directed toward assisting local districts in improving attendance, providing safe orderly environments for students, developing student responsibility and encouraging students to take strong academic programs.

School Improvement—The primary objective of this component is aimed at reforming elementary and secondary schools through the development of a school-level program which addresses the assessment, implementation and evaluation of curriculum, instructional methodology, staff development and school climate. Local School Site Councils comprised of school personnel; parents; and in secondary schools, students to design and evaluate the improvement plan for their schools. The focus of the School Improvement Program is the achievement of proficiency in basic skills, including math, reading, English language arts, and writing. The program is further designed to provide opportunities for students to develop skills and knowledge in a wide variety of other curriculum areas, including science, the humanities, computer literacy and other disciplines. The district master plan outlines the policies and procedures for phasing in, developing, and reviewing school plans and programs for schools participating in the School Improvement Program.

Parental Involvement—The primary objective of this component is to assist local education agencies in promoting and increasing parental involvement in the educational process as a means of improving student achievement and student success in education.

Staff Development—The primary objective of this component is to provide assistance and leadership in the areas of staff development, training and retraining. The staff development components are designed to: 1) provide curricular instructional methodology training programs to overcome current shortages of qualified teachers; 2) provide training for school faculty to improve the instructional use of computers; 3) improve curriculum and instruction; 4) provide teacher mentors to work with new and experienced teachers and develop special curricula; 5) provide training in early interventions for students not performing up to their potential in schools. To meet these objectives, staff development provides for the following:

Student Study Teams, which provide training for teachers and other school personnel in early interventions for students not performing up to their potential in school; Mentor Teacher Program, which provides staff development for new and experienced teachers, and development of special curriculum by district-designated mentor teachers who receive an annual stipend over and above their regular salary; and Telecommunications, which provides for installation and use of computerized telecommunications system to provide information and retrieval among state staff development agencies.

School Personnel Staff Development—The primary objective of this component is to develop a comprehensive statewide program for the in-service training of local school personnel.

Teacher Education and Computer (TEC) Centers—The primary purpose of the regional TEC Centers is to provide training for classroom teachers and school staff in teaching skills, assist school-site implementation for local school staff development programs, and provide training for school personnel in the instructional use of computers.

Federal Teacher Centers—This program is now included with the federal educational block grant.

Bilingual Teacher Training—This program provides competency training for teachers in Bilingual Education in the areas of language culture and methodology, so that teachers can obtain a Bilingual Bicultural Certificate of Competence.

The Governor's Budget includes $315,000 to implement Chapter 750, Statutes of 1983 (SB 947) which established two demonstration youth suicide prevention school programs designed to prevent youth suicide.

In the 1984–85 fiscal year, an additional $10.3 million is provided to commence the equalization of kindergarten through grade 6 School Improvement Program funds, as proposed by Chapter 498, Statutes of 1983 (SB 813).

In addition $55.6 million and 3 positions are being provided for various school effectiveness programs initiated by Chapter 498, Statutes of 1983 (SB 813). The programs and their amounts are as follows: Administrator Training and Evaluation Program $2 million; Pilot Projects to strengthen Personnel and Management $.5 million and one position; Mentor Teacher Program $30.9 million and 2 positions; Teacher Instructional Improvement Grants $17.1 million; and Teacher Education and Computer Centers $5.1 million. Refer to the narrative under Significant Program Changes on page E-2 for further description.

20.70 Evaluations and Assessment

The Department is responsible for evaluating all state and federal education programs. Special evaluation studies of selected education programs are conducted at the request of the Legislature and assistance in evaluation and research to Department and local agency personnel is provided. The California Assessment Program (CAP), the Education Improvement Incentive Program, the California High School Proficiency Examination (CHSPE), and the Golden State Examination are also administered by the Department.

The California Assessment Program is a set of achievement tests in reading, English usage, spelling, and mathematics administered each year to students in Grades 3, 6, and 12, and beginning in 1984, Grade 8, and in 1985, Grade 10. This is the only comprehensive measure for assessing the performance of the State's public schools system. Scores are computed relative to past years and to national norms. During 1982–83, the scores of third grade students continued a sixteen-year upward trend in all content areas tested. Sixth graders declined slightly in reading, but continued to improve in written language and mathematics. Seniors held steady in two areas, spelling and mathematics, but declined in reading and written language.

The Education Improvement Incentive Program provides incentive funding for schools who demonstrate improved performance on the CAP examinations.

The California High School Proficiency Examination provides an opportunity for persons 16 years or older to earn a Certificate of Proficiency equivalent to a high school diploma, by examination.

The Golden State Examination measures high school student achievement in academic subjects for the purpose of special honors designation upon graduation.

For 1984–85, $15 million is provided to implement the Education Improvement Incentive Program initiated by Chapter 498, Statutes of 1983 (SB 813). For 1984–85, SB 813 also provides $650,000 to expand the California Assessment Program (CAP) exam. Refer to the narrative under Significant Program changes on Page E-2 for further description.

30 SPECIAL PROGRAMS

Program Objectives and Description

Within special programs are several elements serving particular education, child care, nutritional, and other needs from preschool age through adulthood. Included are the following elements:

a. Child development, which provides a full range of preschool education and child care services.
b. Child nutrition, which distributes funds supporting a variety of child nutrition entities.
c. Postsecondary education, which ensures that private institutions comply with educational standards mandated by statutes.
d. Urban impact aid, a form of general aid to specific districts which meet criteria of size and concentration of disadvantaged pupils.
e. Surplus property, which makes materials and commodities available to local agencies.

30.10 Child Development

The child development element provides part-time and full-time child care and educational services, including supportive services, to children from low income and other families with special needs. Several different program structures have been established over the years to target resources to specific populations and/or to address specific types of needs.

30.10.010 Preschool Education

The preschool education component provides (a) a wide range of educational and related experiences and services in part-day settings for prekindergarten (four-year-old) children from low-income families; and (b) parent education and training for the parents of eligible children.

The objective of the component is to help ensure a child's later success in formal school programs. Preschool programs are administered by 115 school districts which enroll 11,300 children, and by 73 private nonprofit agencies and institutions of higher education which enroll 8,000 children.

The preschool scholarship incentive program (Chapter 795, Statutes of 1975) provides scholarships for preschool teachers and aides to assist them in continuing their professional development toward the attainment of full credentials.

This budget does not include funds for the Headstart Program administered directly by the federal government. However, in terms of program objectives, the two programs serve similar target populations with approximately the same type of program.

30.10.020 Child Care Services

Child care services assist families in becoming self-sufficient by enabling parents to work or receive training leading to employment. There are 574 publicly subsidized child care programs in California which provide service to 142,947 children per year (See Table 6). The estimated average cost in 1983–84 for these programs is $4,145 per average daily enrollment (full-time equivalent slot). Also, 55 Resource and Referral Programs provide parents with information on existing child care services and provide technical assistance to child care provider agencies.

The major program goals are (a) to assist families in becoming self-sufficient by enabling parents to work or receive training leading to employment by providing safe, appropriate, and stimulating environments for their children; (b) to enhance the physical, emotional, and developmental growth of participant children; and (c) to refer families in need of medical or family support services to appropriate agencies.

The Office of Child Development administers a variety of child care programs. The principal program types, along with specific program goals and outputs, are listed below:

a. General child care—Provides comprehensive child development services for low-income parents in work or training situations.

b. School-age parenting and infant development (SAPID)—Provides supervised infant care to allow eligible parents to complete high school and training of high school students in parenting skills.

c. Campus—Provides child care for infants and children of low-income student parents who are working toward a degree.

d. Migrant—Provides child care and related services to children of migrant families working in the fields or agriculture-related industries.

e. Alternative payment—Provides reimbursement to private agencies for child care services for low-income families.

f. Resource and Referral—Provides information to parents regarding child care placement.

Chapter 1282, Statutes of 1983 (AB1162) creates the Child Care and Employment Act to provide child care services for participants in federal job training and placement programs. The Department of Education is required to adopt regulations and procedures to administer this act which is estimated to become operative July 1, 1984. The statute specifies various funding sources to support the increased child care services, including revenue equivalent to families' income disregard for child care for grants under the Aid to Families with Dependent Children (AFDC) program. The AFDC program is administered by the Department of Social Services which estimate an equivalent of $9,293,000 from child care income disregard would be generated during 1984–85. AB1162 provides that increased General Fund costs to the AFDC program resulting from the bill's provisions be transferred from the Department of Education to the Department of Social Services. It is estimated that this will amount to $3,334,000 during 1984–85.

30.20 Child Nutrition

The objective of the child nutrition element is to assist participating school districts and private, nonprofit agencies in providing nutritious meals and nutrition education to children.

This objective is met through subsidies received from the United States Department of Agriculture (USDA) to fund the National School Lunch Program (NSLP), School Breakfast Program (SBP), Special Milk Program (SMP), Child Care Food Program (CCFP) Nutrition Education and Training Program (NETP) and from the State through the State Mandated Child Nutrition Programs (SMCNP).

These programs provide meals and nutrition educational opportunities to children in public and non-profit private schools and residential and non-residential child care institutions, including family and group child care homes.

The following programs are offered to assist participants in providing nutritious meals to children:

State-Mandated Child Nutrition Programs (SMCNP)

The State-Mandated Child Nutrition Programs (State-funded meal reimbursement) provide free and reduced price nutritious meals for children enrolled in public and non-profit private schools and family and group child care homes. This subsidy supplements the Federal National School Lunch, School Breakfast, and Child Care Food Programs.

SMCNP was created by Senate Bill 2020 (Chapter 1487/74) and Senate Bill 120 (Chapter 1277/75). Administered by the department, the program will provide a basic per meal reimbursement for breakfasts and lunches served in public and non-profit private institutions to eligible needy children who qualify for free and reduced price meals. Section 49550 of the Education Code requires that all school districts offer at least one nutritious meal to needy students each school day.

* Dollars in thousands

6100 DEPARTMENT OF EDUCATION—*Continued*

National School Lunch Program (NSLP)

The National School Lunch Program is designed to provide all eligible school-aged children and residents of residential child care programs with a daily nutritious meal. In 1983–84 it is anticipated that over 1,193 public and private school districts and residential child care institutions will participate in the NSLP.

School Breakfast Program (SBP)

The School Breakfast Program provides nutritious low-priced breakfasts to eligible school-aged children in public and non-profit private schools, including residents of residential child care institutions. In 1983–84, it is anticipated that over 445 public and private school districts and residential child care institutions will particpate in the SBP.

Child Care Food Program (CCFP)

The Child Care Food Program provides nutritious meals to children in non-residential child care institutions, including family and group child care homes. The objective of the CCFP is to extend services to non-participating eligible institutions, placing priority on reaching institutions in low-income areas. In 1983–84 it is anticipated that over 650 additional sponsors will participate in the CCFP.

Special Milk Program (SMP) [1]

The Special Milk Program provides milk to public and private non-profit school children (kindergarten through grade 12), and children in non-profit child care institutions. Milk is also provided to children who choose to bring a lunch from home rather than participate in the lunch program. Participation in the SMP is restricted to those sponsors who do not participate in any other food program. In 1983–84 approximately 566 sponsors are expected to participate in the SMP.

[1] Federally funded program only.

Nutrition Education and Training Projects (NETP)

Nutrition Education and Training projects provide training for school food service personnel and assists in providing nutrition education programs in the classroom.

30.30 Postsecondary Education

Objective and Description

The objectives of the Postsecondary Education element are:

a. To ensure that privately supported institutions conferring academic degrees have been (1) accredited by a national or regional accrediting agency; (2) approved by the Superintendent of Public Instruction; or (3) authorized by the Superintendent of Public Instruction.
b. To approve courses offered by private and public schools for the training of veterans.
c. To reimburse from the Student Tuition Recovery Fund the prepaid but unused tuition of a student enrolled in a private postsecondary school which closes prior to completion of the student's instructional program.

30.40 Urban Impact Aid

The urban impact aid provisions of Chapter 894/77 (AB 65) provide general aid to school districts with high concentrations of educationally disadvantaged pupils. Funds for this purpose are provided through two programs—Urban Impact Aid and Chapter 323/77 (Meade) Aid. Eligibility for aid under these programs is determined by a combination of factors, including minority student ADA, poverty index, percentage of students on AFDC, and pupil transiency.

In the 1984–85 fiscal year, $9,216,000 is provided for the expansion of the Urban Impact Aid program initiated by Chapter 498, Statutes of 1983 (SB 813). Refer to the narrative under "Significant Program Changes" on page E-2 for further description.

30.50 Surplus Property

Objective and Description

Surplus property from the Federal Government is available to certain California public and private, non-profit agencies. California law provides that the State Department of Education is designated as the California State Agency for Surplus Property (Educ. Code Section 12110). The two major programs are the Federal personal property (hardware) and the Federal donated commodities (food) distribution program. The Office of Surplus Property was established within the Department of Education for the distribution of these goods; the goal of this agency is to acquire and distribute efficiently to eligible agencies, all personal property and commodities donated by the Federal Government that can be used effectively by these agencies. In addition, the agency coordinates the processing of surplus items into other usable products (examples: surplus copper wire segments into copper tubing; surplus peanuts and peanut butter, flour, vegetable oil into peanut butter cookies; and surplus vegetable oil into mayonnaise). The total number of agencies served in 1984–85 will be approximately 3,000. The fair market value of the personal property and food commodities distributed will be approximately $100 million.

To gain efficiency in the operations of their respective programs, the Department of Education and the Department of General Services have agreed to the transfer of the Federal Personal Property (hardware) program to the Department of General Services where it will be incorporated into the Materials Services Program. Accordingly, the Budget reflects the reduction of 56 positions associated with the transfer of the Hardware Program to the Department of General Services. A corresponding increase in personnel is identified in the Department of General Services.

In addition, the Office of Surplus Property assumed responsibilities for distribution of Federal food donations made to "food banks" in accordance with PL 98-8 (the Jobs Act) and PL 98-92. The estimated annual value of the food distributed to food banks within California is $120,000,000.

The 1984–85 budget also contains $800,000 from the Surplus Property Revolving Fund to convert existing warehouse space in Southern California to cool storage. These modifications will reduce the need to rent space from private vendors thereby resulting in significant future program savings.

40 DEPARTMENT MANAGEMENT AND SPECIAL SERVICES

Program Objectives and Description

The Department of Education, with a staff of approximately 2,715 employees, including employees in the State special schools, is responsible for providing leadership to California's public schools and for disbursing approximately $9 billion in funds, materials, and supplies to local educational agencies. The management of these resources and the achievement of education program objectives depend on the leadership, policy direction, and support services provided by the department management and administrative services program.

In the past, Program 40—Department Management and Special Services has reflected both distributed and undistributed management costs. Beginning in 1983–84 to more clearly display the distribution of costs, Program 40 is being eliminated and Programs 41 and 42 are established to separately reflect distributed and undistributed costs.

41 EXECUTIVE MANAGEMENT AND SPECIAL SERVICES

Program Objectives and Description

Executive Management and Special Services consists of the offices of the Superintendent of Public Instruction, his deputies and assistants as well as a centralized staff assigned to governmental affairs, public information and external affairs, higher education, business and community liaison and legal services. Staff is also assigned to provide assistance to the State Board of Education, its commissions and committees.

41.10 Executive Management

The objectives of this element are to provide leadership, policy direction and support services in the management of available resources for California public schools. Executive Management is composed of the following components:

Superintendent of Public Instruction—consists of the Superintendent and his key administrative assistants.

Executive Staff—consists of the Executive and Chief Deputies and the key management staff for each of the operating divisions.

42 DEPARTMENT MANAGEMENT AND ADMINISTRATIVE SERVICES

Program Objectives and Description

Department Management and Administrative Services provides effective management systems within the Department to ensure the delivery of responsive and accountable educational services to students in California.

The Budget proposes the addition of five auditor positions and $305,000 in Federal Funds to reduce the audit cycle of Child Nutrition Programs to two years in compliance with Federal Audit guidelines.

The Budget contains one position for the purpose of development and coordination of a Departmental Management Training Program.

The Budget proposes one additional position in the Contracts office to meet workload increases.

50 LIBRARY SERVICES

The goal of the State Library is to make information available to users in a coordinated, effective, and efficient manner. The State Library assists other California public libraries in providing timely, excellent, free library service for all state residents.

The library services program elements include: (a) reference and research for the Legislature and State agencies; (b) statewide library support and development; (c) special clientele services; and (d) State Library support services.

50.40 State Library Support Services	66.5	72.9	72.9	3,540	3,474	3,837

50.10 Reference and Research for the Legislature and State Agencies

The State Library locates information for the Legislature and State agencies. Centralized library resources and services reduce costly duplication in other agencies. However, when on-site library services are required in State Agencies, the State Library provides back up materials and services.

The State Library: will continue to a) links users to library materials and sources of information to support the decision-making functions of State government and b) provide access to sources of information, published and unpublished, which is available in state administrative and legislative agencies.

50.20 Statewide Library Support and Development

The California State Library provides assistance for California Public Libraries to extend and improve local library services, as well as promote library resource sharing to enhance access to needed information by all citizens. The Library support and development element includes:

(1) Government Depository Program—The State Library acts as a coordinating authority for distribution of State and Federal publications to libraries so local library users may have ready access to official government publications.

(2) Interlibrary Loan and Reference—Provides interlibrary services to supplement the collections of California Public Libraries and assists local libraries by answering reference questions and supplying information.

(3) Consultant and Research Services—Provides advisory and technical assistance to California Libraries.

(4) State Grants Program—The State Library administers the California Library Services Act which provides grants and reimbursements to local libraries and Cooperative Public Library Systems to assist in the sharing and coordination of library resources and services.

(5) Federal Grants Program—The State Library administers the Federal Library Services and Construction Act which provides funding to libraries and public library systems for the purposes encouraging demonstration programs for extending and improving public library service.

(6) Public Library Foundation Program—Provides state assistance for a foundation program of support for local libraries.

The 1983–84 budget provides $6 million for initial funding of the Public Library Foundation Program as authorized by Chapter 1498, Statutes of 1982 (SB 358). The Foundation Program provides direct assistance to local public libraries which serve the citizens of California.

The Budget provides an increase of $1.3 million for the State Grants Program due to increased loan activity within cooperative library systems. The Budget also proposes $12 million for the Library Foundation Program during 1984–85 which is twice the amount provided during 1983–84.

50.30 Special Clientele Services

The federal government produces talking books (recorded on tape or record) and braille books for those unable to use conventional printed materials. Both types of books are made available by the Library of Congress to designated agencies, which then lend them to eligible patrons who are blind or physically handicapped. The State Library is the agency responsible for this service in northern California.

Funds are also provided in this element to the Braille Institute of America in Los Angeles to operate the Southern California Regional Library.

50.40 State Library Support Services

Support Services include (a) Collection Management and Control component and (b) Administrative Services component. The objectives of Collection Management and Control component are to gather and catalog material so that they may be used easily, and to preserve and to protect the materials. The objectives of Administrative Services component are to maintain leadership in planning library services at the local, State and national levels; administer the State Library and its programs efficiently; and coordinate State and Federal grants for libraries according to law.

The Budget provides $504,000 (Federal Funds) for the purchase of rare genealogical material and for the microfilming and preservation of endangered rare and historic materials.

60 LEGISLATIVE MANDATES

Program Objectives and Description

Chapter 1406, Statutes of 1972 (SB 90) first established the statutory requirement for the State to reimburse units of local government for the costs of State-mandated programs. Such costs may result from either legislative acts or executive regulations which impose a new program or demand an increased level of service in an existing program. The "SB 90 Law" also requires the State to reimburse local government for any revenue losses which result from legislation which either exempts certain property from taxation or reclassifies such property and thereby reduces sales, use or property tax revenue. The approval of Proposition 4, the "Gann Initiative," at the November 6, 1979 election elevated this program of reimbursing State-mandated costs to a constitutional requirement. The Initiative is silent, however, on the issue of reimbursing revenue losses.

Section 2231(b) of the Revenue and Taxation Code requires the Governor's Budget and the Budget Bill to carry an appropriation for the ongoing costs of mandates determined through the Board of Control SB 90 process and for mandates recognized by initial legislation. Within the program area of the Department of Education, there are several legislative mandates for which school districts may claim reimbursement. The 1984–85 Governor's Budget proposes a $16 million appropriation for reimbursement of school district costs associated with those mandates.

Funding for these mandates in 1983–84 and 1984–85 is provided in the "State-Mandated Local Programs" (Department 9680) in the General Government portion of the Budget. Data shown here in parentheses are for information purposes only.

Authority

Revenue and Taxation Code, Section 2231 et seq.

97.10 Special Adjustments—Cost-of-Living Adjustments

Cost-of-living increase funds for Department of Education programs are reflected separately for the 1984–85 fiscal year. The proposed funding provides a 3 percent cost-of-living increase for most K–12 programs.

Program	*1984–85*
School Apportionments:	
K–12 Districts	$250,880
Small School District Transportation	557
Meals for Needy Pupils	604
Apprentice Programs	123
Summer School	1,758
Transportation	7,415
K–12 County Offices of Education	4,907

SURPLUS PROPERTY [1]

Objective and Description

Surplus property from the Federal Government is available to certain California public and private, nonprofit agencies. California law provides that the State Department of Education is designated as the California State Agency for Surplus Property (Educ. Code Section 12110). The two major programs are the Federal personal property (hardware) and the Federal donated commodities (food) distribution program. The Office of Surplus Property was established within the Department of Education for the distribution of these goods; the goal of this agency is to acquire and distribute efficiently to eligible agencies, all personal property and commodities donated by the Federal Government that can be used effectively by these agencies. In addition, the agency coordinates the processing of surplus items into other usable products (examples: surplus copper wire segments into copper tubing; surplus peanuts and peanut butter, flour and vegetable shortening into peanut butter cookies; and surplus vegetable oil into mayonnaise). The total number of agencies served in 1983–84 will be approximately 3,000. The fair market value of the personal property and food commodities distributed will be approximately $100 million.

To gain efficiency in the operations of their respective programs, the Department of Education and the Department of General Services have agreed to the transfer of the Federal Personal Property (hardware) program to the Department of General Services where it will be incorporated into the Materials Services Program. Accordingly, the Budget reflects the reduction of 56 positions associated with the transfer of the Hardware Program to the Department of General Services. A corresponding increase in personnel is identified in the Department of General Services budget.

In addition, the Office of Surplus Property assumed responsibilities for distribution of Federal food donations made to "food banks" in accordance with PL 98-8 (the Jobs Act) and PL 98-92. The estimated annual value of the food distributed to food banks within California is $120,000,000.

[1] The *Supplemental Report of the Committee of Conference on the Budget Bill for 1981–82* added language to require a separate display of the Surplus Property Program within the same area as the Department of Education. This program display is to reflect Surplus Property as an informational item with actual expenditures being reflected and recorded in the Department of Education's program budget.

* Dollars in thousands, excluding salary range.

LIBRARY SERVICES [1]

The goal of the State Library is to make information available to users in a coordinated, effective, and efficient manner. The State Library assists other California public libraries in providing timely, excellent, free library service for all state residents.

The library services program elements include (a) reference and research for the Legislature and State agencies; (b) Statewide Library Support and Development; (c) Special clientele services; and (d) State Library support services.

Authority:

Education Code 19320(k).

[1] *The Supplemental Report of the Committee of Conference on the Budget Bill* for 1982–83 added language to require a separate display of the California State Library. This program display is to reflect the State Library as an informational item with actual expenditures being reflected and recorded in the Department of Education's program budget.

50.10 Reference and Research for the Legislature and State Agencies

The State Library locates information for the Legislature and State agencies. Centralized library resources and services reduce costly duplication in other agencies. However, when on-site library services are required in State Agencies, the State Library provides back up materials and services.

The State Library: (1) links users to library materials and sources of information to support the decision making functions of State government, and (2) provides access to sources of information published and unpublished which is available to state administrative and legislative agencies.

Authority:

Education Code Section 19320(k).

50.20 Statewide Library Support and Development

The California State Library provides assistance for California Public Libraries to extend and improve local library services, as well as promote library resources sharing to enhance access to needed information by all citizens. The Library support and development element includes:

(1) Government Depository Program—The State Library acts as a coordinating authority for distribution of State and Federal publications to libraries so local library users may have ready access to official government publications.

(2) Interlibrary Loan and Reference—The State Library provides interlibrary services to supplement the collections of California Public Libraries and assists local libraries by answering reference questions and supplying information.

[1] *Program excludes Library Administration positions which are displayed in the Department of Education Budget in programs 40 and 41 (Administration). The funding is distributed to all elements of the Library.*

* Dollars in thousands

6100 DEPARTMENT OF EDUCATION—*Continued*

(3) Consultant and Research Services—The Library provides advisory and technical assistance to California Libraries.
(4) State Grants Program—The State Library administers the California Library Services Act which provides grants and reimbursements to local libraries and Cooperative Public Library Systems to assist in the sharing and coordination of library resources and services.
(5) Federal Grants Program—The State Library administers the Federal Library Services and Construction Act which provides funding to libraries and public library systems for demonstration programs intended to extend and improve public library service.
(6) Public Library Foundation Program—Provides State assistance for a Foundation program of support for local libraries. The 1983–84 budget provides $6 million for initial funding of the Public Library Foundation Program as authorized by Chapter 1498, Statutes of 1982 (SB 358). The Foundation Program provides direct assistance to local public libraries which serve the citizens of California.

The Budget provides an increase of $1.3 million for the State Grants Program due to increased loan activity within cooperative library systems. The Budget also proposes $12 million for the Library Foundation Program during 1984–85 which is twice the amount provided during 1983–84.

50.30 Special Clientele Services

The federal government talking books (recorded on tape or record) and braille books for those unable to use conventional printed materials. Both types of books are made available by the Library of Congress to designated agencies. The State Library is the agency responsible for this service. Funds are also provided in this element for the Braille Institute of America in Los Angeles to operate the Southern California Regional Library.

50.40 State Library Support Services

Support Services include (a) Collection Management and Control Component and (b) Administrative Services Component. The objectives of Collection Management and Control Component are to gather and catalog material so that they may be used easily and to preserve and protect the material. The objectives of Administrative Services Component are to maintain leadership in planning library services at the local, State and national levels; administer the State Library and it's programs efficiently; and coordinate State and Federal grants for libraries according to law.
The Budget provides $504,000 (Federal Funds) for the purchase of rare genealogical material and for the microfilming and preservation of endangered rare and historic materials.

6300 CONTRIBUTIONS TO TEACHERS' RETIREMENT FUND

The objective of this program is to provide State financing of teacher retirement benefits which are not funded by employer and employee contributions and income from investments.

Funding for the Teachers' Retirement Fund is derived from four separate sources: teacher members who contribute 8 percent of their salary; employing school districts who contribute 8 percent of teachers payroll income from investments, and subsidies from the General Fund. From 1972 to 1976 the State contributed $135 million annually for the purpose of funding retirement benefits which were in effect on June 30, 1972. Chapter 323, Statutes of 1976, as amended by Chapter 991, Statutes of 1976, provided an additional amount of $9.3 million to fund a one-time cost of living increase in benefits. The State has continued to contribute $144.3 million through fiscal year 1979–80.

Effective July 1, 1980, Chapter 282, Statutes of 1979, annually appropriates $144.3 million from the General Fund, cumulatively increased or decreased by the change in the California Consumer Price Index (CCPI) for the preceding year. This statute also contains a schedule which calls for an additional appropriation of $10 million in Fiscal Year 1980–81, $20 million in Fiscal Year 1981–82, and annually increased by $20 million until the General Fund appropriation reaches $280 million in Fiscal Year 1994–1995. Thereafter this amount will be indexed to the CCPI.

Due to the fiscal crises facing the General Fund for the 1982–83 fiscal year, funding for this budget was held at the 1981–82 contribution level, and in 1983–84, the Governor vetoed the subsidy appropriation to $1.

Chapter 1606, Statutes of 1982, added Section 24701 to the Education Code which requires the Governor to include a budget item equal to 5 percent of the average annualized statewide increase in payroll for certificated personnel over the three previous school years as a General Fund appropriation to be placed in a Retiree's Purchasing Power Protection Account. This is to be used to provide single-year supplemental payments to benefit recipients who have experienced the greatest loss in purchasing power due to inflation, with the intent to restore benefits to 75 percent of original purchasing power.

Chapter 1213, Statutes of 1983, provides that, effective July 1, 1984, revenues received by the state from excess lands will no longer go to the General Fund but will instead be continuously appropriated to the State Teachers' Retirement Fund to be used exclusively for the purpose of being distributed on a prorated basis to all retirees who are below 75 percent of their original purchasing power.

Funds withheld in the 1983–84 fiscal year due to the shortfall in the General Fund are proposed for restoration in 1984–85 in the amount of $211,313,000.

Legislative Mandates

Beginning with the 1981–82 Governor's Budget, legislative mandates for STRS have been included within the Contributions to the State Teachers' Retirement Fund budget. Section 2231(a) of the Revenue and Taxation Code requires the state to pay to local governmental units the costs of any new program or increased level of service of a program mandated by legislation enacted after January 1, 1973. These mandates are made directly to the State Teachers' Retirement System by the State Controller in lieu of claims filed by local government units.

The funding for local mandates after 1983–84 will be provided in the budget for "State Mandated Local Programs" (Dept. 9680) in the General Government portion of the budget. Data shown here is for information purposes only.

6320 CALIFORNIA ADVISORY COUNCIL ON VOCATIONAL EDUCATION

Program Objectives and Description

The Council is responsible for: (1) evaluating the administration, quality and effectiveness of statewide vocational education programs and services; (2) advising the State Board of Education, the Board of Governors of the California Community Colleges, the Legislature, and other agencies on matters relevant to vocational education policy, programs, and plans; and (3) consulting with the Comprehensive Employment and Training Advisory Council to determine whether the vocational education and employment training needs of the State are being met.

The budget proposes 0.2 position to increase a position to a full-time level, and an increase of 0.1 position to establish a temporary help blanket for additional clerical support.

6330 CALIFORNIA OCCUPATIONAL INFORMATION COORDINATING COMMITTEE

Program Objectives and Description

The California Occupational Information Coordinating Committee is funded annually by the National Occupational Information Coordinating Committee, which is responsible for improving and coordinating the development and implementation of occupational information systems at the national and state levels.

The California Occupational Information Coordinating Committee (COICC) was established by AB 2020 (Chapter 972/78). COICC consists of representatives of the State Department of Education, Chancellor's Office of the Community Colleges, State Job Training Coordinating Council, Council for Private Postsecondary Education Institutions, Employment Development Department and Department of Rehabilitation. COICC is responsible for fostering coordination between users and producers of occupational information and for developing the California Occupational Information System (COIS), which provides labor market information to educators, counselors, and others involved in making career choices.

The budget proposes the transfer of 1 position from the Department of Education to COICC in both the current and budget year to provide clerical support for COICC.

6340 STATE SCHOOL BUILDING SAFETY PROGRAM

Chapter 500, Statutes of 1972, appropriated thirty million dollars to the School Building Safety Fund for the repair and replacement of local school buildings in compliance with Field Act requirements.

Chapter 22, Statutes of 1973 authorized apportionment loans totaling fifteen million dollars from the State School Building Aid Bond Law of 1966 to assist school districts which lack matching funds in order to qualify for State loans to comply with Field Act safety requirements. Chapter 383, Statutes of 1974 authorized an additional twelve million dollars from the State School Building Aid Fund for loans to school districts for matching funds to provide for the safety features required in active school buildings under the Field Act.

Chapter 122, Statutes of 1975, provided an additional seven million dollars to the twelve million dollars available from the State School Building Aid Fund for loans to school districts.

The available School Building Safety Funds were fully expended by June 30, 1980. Accordingly, the only remaining fiscal administrative responsibility is the repayment of the above mentioned loans by school districts.

6350 SCHOOL FACILITIES AID PROGRAM

The objective of this program is to provide financing for construction and maintenance of classrooms for kindergarten through grade 12 public school pupils. With the passage of Proposition 13, the property tax is no longer a sufficient source of revenue for the construction and maintenance of school facilities.

Recognizing that school districts' current fiscal constraints pose a serious fiscal threat to the multibillion dollar taxpayer investment in school facilities, the Legislature enacted Chapter 899, Statutes of 1980, to provide:

(1) A General Fund transfer of $208,000,000 in 1979–80, and a transfer of $100,000,000 in 1980–81 and $200,000,000 in 1981–82 and thereafter, from offshore oil revenues for K–12 school facilities capital outlay and deferred maintenance, and

(2) An appropriation of $15 million from the Special Account for Capital Outlay in 1980–81 for the purchase of additional portable/relocatable classrooms for districts experiencing high growth.

Due to a significant decline in the 1981–82 General Fund revenues and the corresponding increase in expenditures, $200,000,000 originally intended for school construction was transferred to the General Fund pursuant to Section 19.91 of Chapter 99, Statutes of 1981. In addition, due to a shortfall in Tideland Oil Revenues, Chapter 998, Statutes of 1981 (AB 114), transferred $47.2 million to the State School Building Lease/Purchase Program (SSBL/PP) to the Special Account for Capital Outlay and the Energy Resources Fund. Chapter 998, Statutes of 1981 also provided that the $47.2 million be repaid to the SSBL/PP from Tidelands Oil Revenue in 1982–83. Also, in anticipation of potential General Fund revenue/expenditure deficits, the Governor signed Executive Order #B-87-81 which unalloted $200 million from funds appropriated for school construction in 1981–82 which were subsequently reverted by the Budget Act of 1982.

In order to balance the 1982–83 State Budget, the Tidelands Oil Revenues scheduled for transfer to the State School Building Lease-Purchase Program pursuant to Section 6217 of the Public Resources Code was limited to $100,000,000, which included $47.2 million repayment from Tidelands revenues of the loan authorized by Chapter 998, Statutes of 1981. In addition the budget limited the transfer of funds, as provided by Section 17780 of the Education Code, in 1982–83 to $65,000,000, for deferred maintenance. However, because anticipated revenues continued to decline, Chapter 10X Statutes of 1983 (AB 28X) further reduced the transfer for deferred maintenance to approximately $37 million for 1983–84. In addition, Chapter 10X, Statutes of 1983, transferred $50 million from the State School Building Lease-Purchase Fund to the General Fund during 1983–84. Chapter 10X, Statutes of 1983 also authorized the transfer of an additional $75 million to the General Fund once bond revenue was available to provide resources for school construction.

Due to a decrease in anticipated revenues, the need to prioritize the allocation of limited funds and the availability of other resources for school construction, the scheduled transfer of Tidelands Oil Revenues to the State School Building Lease-Purchase Program was deferred for the 1983–84 fiscal year.

Chapter 168, Statutes of 1981 (SB 840) provides an appropriation of $200 million from Tidelands Oil for school construction in fiscal year 1984–85. However, due to limitations in anticipated Tidelands Oil revenue for 1984–85, it has been found necessary to reallocate the anticipated resources among those capital outlay programs normally supported from this source. Although revenues will not be sufficient to allow the State School Building Lease/Purchase Fund to receive the full amount scheduled by statute, it is recognized that there is an ongoing need for funds for school construction. Therefore, it is proposed that $100 million in Tidelands Oil revenue be provided in lieu of the $200 million scheduled by Chapter 168, Statutes of 1981 and that the Public Resources Code be amended to provide $125 million per year through Fiscal Year 1988–1989.

Chapter 1302, Statutes of 1983, Section 35 appropriates $1.1 million from the Special Account for Capital Outlay for the renovation, repair, acquisition or lease of relocatable child care facilities. These funds will be administered by the State Allocation Board and will be expended within the 1983–84 Fiscal Year.

The State School Building Lease-Purchase Bond Act of 1982 (Proposition 1) was approved by the electorate in the November, 1982 General election. Proposition 1 authorizes the sale of $500 million in general obligation bonds to provide funds for school construction in accordance with the State School Building Lease-Purchase Program of 1976. The State Treasurer sold $125 million of these bonds in 1982–83 and is expected to sell $150 million in 1983–84. The remaining $225 million are scheduled for sale in 1984–85.

In total, this Budget is proposing $412.9 million for School Facilities Aid in 1984–85. The proposed expenditures include $325 million for school construction in accordance with the State School Building Lease-Purchase Program and $87.9 million for the State School Deferred Maintenance Program.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

6360 COMMISSION ON TEACHER CREDENTIALING

10 STANDARDS FOR THE PREPARATION AND LICENSING OF TEACHERS

Chapter 698, Statutes of 1982, (AB 2530) changed the title of the Commission for Teacher Preparation and Licensing to the Commission on Teacher Credentialing.

The Commission was established in 1970, with the specific charge of insuring excellence in education by encouraging high standards of quality and diversity. The Commission carries out its program of standards for the preparation and licensing of teachers through six program elements: elementary and pre-school professional personnel; secondary, adult and vocational professional personnel; instructional specialists for all grades; professional administrative and support service personnel for all grades; professional standards for certificated personnel; and agency administration.

SIGNIFICANT PROGRAM CHANGES

Program Requirements	*Dollars**
1. Increased expenditures associated with development of assessment instruments focusing on bilingual assessment of special education professionals	$57
2. Completion of uniform bilingual competence assessment instruments for teacher credential holders	119
3. One-time augmentation for purchase of additional EDP equipment	15

10.10 Elementary and Pre-School Professional Personnel

Element Description and Objectives

- To determine needs, establish training standards, approve and evaluate preparation programs, maintain an examination system, and issue credentials to multiple-subject teachers.
- To determine needs, establish training standards, and issue permits for children's center and other pre-school and child care facilities.
- To monitor and study evolving educational issues in the elementary and pre-school areas for impact on the preparation, training and utilization of school personnel, and to cooperate with other educational entities in serving the educational needs of the State.

The basic objectives of this element provide for minimum standards for professional personnel in pre-school through grade 6. Research is being carried out on the need for special preparation of individuals working with young children (birth to 4 years–9 months) with special needs, and with those who are limited-English proficient.

New funds ($4,000) for additional EDP equipment to complete Commission's approved EDP plan are being provided in 1984–85. One position is being eliminated in recognition of an estimated reduction in the number of certificates to be issued.

Element Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

10.20 Secondary, Adult and Vocational Professional Personnel

Element Description and Objectives

- To determine needs, establish training standards, approve and evaluate preparation programs, maintain an examination system, and issue credentials to single subject, adult and vocational teachers.
- To monitor and study evolving educational issues in the secondary, adult and vocational school areas for impact on the preparation, training and utilization of school personnel, and to cooperate with other educational entities in serving the educational needs of the State.
- To conduct data collection, research, and planning supportive of this area.

The basic objectives of this program provide for minimum standards for professional personnel in subject-matter-specific classrooms. In grades seven through twelve, the preparation and competency of teachers to teach specific subject matter play an important part in the readiness of adolescents to assume adult responsibilities and to either enter a vocation directly after graduation or successfully continue their education.

New funds ($2,000) for additional EDP equipment to complete the Commission's EDP plan are being provided in 1984–85. One position is being eliminated in recognition of an estimated reduction in the number of certificates to be issued.

Element Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

6360 COMMISSION ON TEACHER CREDENTIALING—*Continued*

10.30 Instructional Specialists for All Grades

Element Description and Objectives

- To determine needs, establish training standards, approve and evaluate preparation programs, maintain examination systems when legislatively mandated, and issue credentials to instructional specialists.
- To monitor and study evolving educational issues in specialist areas for impact on the preparation, training and utilization of specialist personnel, and to cooperate with other educational entities in serving the educational needs of the State.
- To conduct data collection, research, and planning supportive of this area.

The basic objectives of this element provide for minimum standards for professional personnel who are credentialed as instructional specialists. Specialists serve as resource persons to teachers and students in a particular subject area, or with a particular population, e.g., reading specialists, special education specialists. Bilingual and special education specialists are in increasing demand as school districts move toward compliance with State and Federal requirements. Although the number of credentials and certificates of competence issued each year does not yet meet the demand, the agency activities in these areas account for a significant share of the workload. Staff resources are being focused on the identification of requirements for the special education specialist credential to serve limited-English proficient students with special needs.

New funds for EDP equipment ($1,000), exam development pursuant to Chapter 866, Statutes of 1982 ($34,000), and development of uniform bilingual competence assessment of teachers pursuant to Chapter 1339, Statutes of 1980 ($119,000) are being provided in 1984–85. One position is being eliminated in recognition of an estimated reduction in the number of certificates to be issued.

Element Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing element costs	13.8	14.2	14.2	$466	$531	$715
Workload and administrative adjustments	–	–	−1	–	–	−15
Totals, Instructional Specialists for All Grades (*Teacher Credentials Fund*)	13.8	14.2	13.2	$466	$531	$700

10.40 Professional Administrative and Support Service Personnel for All Schools

Element Description and Objectives

- To determine needs, establish training standards, approve and evaluate preparation programs, and issue credentials to professional administrative and support service personnel.
- To monitor and study evolving educational issues in administrative and support service areas for impact on the preparation, training and utilization of such personnel, and to cooperate with other educational entities in serving the educational needs of the state.
- To conduct data collection, research, and planning supportive of this area.

The basic objectives of this element provide for minimum standards for school administrators and other support service personnel. The leadership and support provided to the classroom teachers by the school administrator and other support service personnel has a critical impact on the success of both teachers and students.

Work is continuing, in response to an Assembly Task Force on School Counseling, on the development of legislation for new, specialized pupil personnel services credentials.

New funds for EDP equipment ($1,000) and exam development pursuant to Chapter 866, Statutes of 1982 ($23,000) are being provided in 1984–85. Three-tenths of a position is being eliminated in recognition of an estimated reduction in the number of certificates to be issued.

Element Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing element costs	9.5	9.8	9.8	$303	$342	$385
Workload and administrative adjustments	–	–	−0.3	–	–	−8
Totals, Professional Administrative and Support Service (*Teacher Credentials Fund*)	9.5	9.8	9.5	$303	$342	$377

10.50 Professional Standards for Certificated Personnel

Element Description and Objectives

- To initiate proceedings to suspend and revoke certification documents or to privately admonish credential holders for cause in accordance with the policies of the Commission on Teacher Credentialing and under authority of the Education Code.
- To recommend to the Commission the termination of suspension orders and reissuance of certification documents when satisfactory evidence of rehabilitation has been presented.

Professional standards in concert with the committee of credentials reviews the personal and professional conduct of individual applicants and credential holders. Such reviews occur when there are allegations relating to arrest records, unprofessional conduct, mental health problems, or physical health problems.

The basic objective of this element is to investigate allegations against applications for and holders of credentials, relating to immoral or unprofessional conduct or for persistent defiance of and refusal to obey the laws regulating the duties of persons serving in the public schools, and to determine whether probable cause exists for private admonition, denial, suspension, or revocation of the credentials of such persons.

New funds for EDP equipment ($3,000) are being provided in 1984–85.

Element Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

6360 COMMISSION ON TEACHER CREDENTIALING—*Continued*

10.60 Administration

Element Description and Objectives

- To provide sound leadership in effectively meeting current and future challenges in the preparation and licensing of professional personnel for California's public schools.
- To provide for governmental relations, planning, research, budgeting, personnel, affirmative action, employee relations, training, safety, management analysis, and business services.
- To provide for technical assistance in the collection and analysis of information from agency records and constituencies.

The basic objectives of this element provide leadership to the agency, through the Office of the Executive Secretary and the seventeen-member commission, in carrying out the mission of the agency. Administrative and business management services to support agency activities are included in this element.

New funds for EDP equipment ($3,000) are being provided in 1984–85.

6380 DEBT SERVICE ON PUBLIC SCHOOL BUILDING BONDS

Program Objectives and Description

The electorate of California has previously authorized State school building general obligation bonds totaling $2,390,000,000 of which $345,000,000 is available for earthquake construction, and $2,045,000,000 for construction related to growth. Of the authorized bonds, $2,350,000,000 has been issued and sold as of January 1983.

The repayment of loans from the school districts will amount to $2,003,954,853 as of June 30, 1983.

The school districts of the State of California are required to first utilize their individual maximum bond-borrowing capacity to within 95 percent, or be within $25,000 of total bond-borrowing capacity, or sell local bonds equivalent to the cost of the project, before the district is eligible for a State loan in this program. School districts with an unpaid outstanding loan balance repay the State General Fund on a formula basis which involves the district-assessed property valuations and a partially offsetting local district bonded indebtedness payment of the fiscal year with the net amount due for repayment each year over a period of 30 years. If a district during the 30-year repayment period requests a one-year deferral of its annual repayment, then under existing statutes an additional 10 years is added making a 40-year repayment period for that district's outstanding loan. If after the prescribed period there is still a district loan balance outstanding, then the statutes permit the unpaid balance to be canceled.

Chapter 282, Statutes of 1979 (AB 8) appropriated the amount of repayments on loans that is in excess of the amount required to reimburse the General Fund for debt service for outstanding bonded indebtedness to the State School Deferred Maintenance Fund and the Leroy F. Greene State School Building Lease-Purchase Law of 1976.

In order to balance the State budget and provide cost-of-living adjustments for a significant number of on-going education programs, it was found necessary during 1982–83 to limit the transfer of "excess repayments," from the General Fund to the State School Deferred Maintenance Fund as provided pursuant to Section 17780 of the Education Code to $65 million. However, because anticipated revenues continued to decline, Chapter 10X, Statutes of 1983 (AB 28X) further reduced the transfer for Deferred Maintenance to approximately $37 million for 1983–84.

6420 CALIFORNIA POSTSECONDARY EDUCATION COMMISSION

The California Postsecondary Education Commission is responsible for planning for and coordinating education beyond high school. The Commission provides policy analyses, advice, and recommendations to the Legislature and the Governor on statewide policy and funding regarding colleges, universities and other postsecondary institutions. Among its major responsibilities are the review of proposed new academic and vocational education facilities and programs, the development and operation of a statewide postsecondary information system, selective evaluation of segmental budget requests, the development and annual update of a five-year plan for postsecondary education, publication of reports on the condition of independent institutions, and other issues.

10 ACADEMIC AFFAIRS

Program Objectives and Description

The Academic Affairs area is responsible for conducting research on postsecondary education, reviewing proposals for new programs and facilities by public institutions, and administering certain federal programs.

Authority

Education Code Section 66903, 66904, 67002.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements				*6*	–	–

Program Elements

10.10 Academic Research Programs and Projects

The Academic Research Programs and Projects Unit is responsible for preparing a five-year plan to make most effective use of State resources in providing opportunities for postsecondary education. It also conducts and monitors special studies requested by the Legislature. In the current year, it will complete or continue studies on equal educational opportunity, remediation, accreditation, recruitment of students, lifelong learning, and other issues. In addition, it has the responsibility of reviewing and reacting to segmental and institutional plans for new programs, organized research units, and off-campus facilities.

10.20 Federal Programs

Education Code Section 67002 designates the Commission as the federal "1202 Commission" for California in order to comply with the federal requirement that one agency be designated to receive all planning funds. The Commission is responsible for planning and administering the Higher Education Facilities Act of 1965 and accepts other responsibilities required by the U.S. Department of Education. The staff of this unit also reviews proposals for federal grants submitted by California institutions to the Fund for the Improvement of Postsecondary Education, administered by the U.S. Department of Education. CPEC has received a three year grant commencing in 1983–84, from the fund for improvement of postsecondary education for the development of an evaluation program for remedial courses and the identification of exemplary remedial programs.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

20 ANALYTIC STUDIES

Program Objectives and Description

The Analytic Studies Unit serves as the primary source of postsecondary education information for the Legislature, the Governor and other agencies and ensures comparability of postsecondary education data from diverse sources. *The 1984–85 Budget includes $25,000 for the continuation of the eligibility study initiated in 1982–83. The third part of the study is to determine causal relationships between student theoretical eligibility to enroll in public postsecondary educational institutions, and their actual post-high school behavior patterns.*

Authority

Education Code Section 66903.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Program Elements

20.10 Data Base Development and Maintenance

This unit has responsibility for maintaining a state-level computer-based information system to collect, store, and retrieve information relevant for analyzing postsecondary educational policy issues.

20.20 Informational Services

This unit has responsibility to analyze and disseminate information relevant for decision making about postsecondary education. The Commission receives federal Title II-A College Library Resource funds to acquire additional materials for its library.

30 ADMINISTRATION

The Administration area consists of the Executive unit, Commission members, and the Staff Services unit. *The 1984–85 Budget proposes the purchase of an office automation network that integrates its word processing, data processing and research writing functions. The final design and configuration will be based on a feasibility study.*

Reimbursements				*25*	*20*	–

Program Elements

30.10 Executive

The Executive Unit provides leadership to the staff in the primary long-range planning and coordinating efforts of the Commission. At the direction of the Commission, the Director advises the Governor, the Legislature, and other state agencies concerning policies and funding for California postsecondary education. The Director also works with a statutory advisory committee composed of the chief executive officers of each of the public education segments, the State Superintendent of Public Instruction, and other representatives of postsecondary segments in reviewing Commission agenda items and associated documents.

30.20 Commission

The Commission has 15 members: one representative each of the Regents of the University of California, the Trustees of the California State University and Colleges, and the Board of Governors of the California Community Colleges, one representative of the independent colleges and universities, appointed by the Governor, the chairperson of the Council for Private Postsecondary Educational Institutions; the President of the State Board of Education or his/her designee and nine representatives of the general public. Three of the nine public representatives are appointed by the Governor, three by the Senate Rules Committee, and three by the Speaker of the Assembly. The Commission selects its chairperson from among the public members.

The budget provides for stipends to Commission members of $50 per day as authorized, together with necessary travel and expenses for Commission meetings.

30.30 Staff Services

The Staff Services unit is responsible for the Commission's budget, personnel, Commission agenda, preparation and distribution of reports, and general housekeeping functions.

40 WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION

The Western Interstate Commission for Higher Education (WICHE) is a nonprofit regional organization which helps California and 12 other member states cooperate in providing high quality cost-effective programs to meet the education and personnel needs of the West. Member states, in addition to California, are Alaska, Arizona, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming. Governors appoint three Commissioners from each state to govern the agency. California's annual assessment for organizational operations for 1983–84 will be $50,200.

WICHE has three primary goals: (1) to work toward improving access to higher education for students, (2) to assist member states to meet their technical and professional personnel needs, and (3) to improve the quality of higher education through greater effectiveness and efficiency. These goals are achieved through seven general program areas: student exchange, health resources, nursing education, mental health and human services, minority education, economic development, and student internships.

WICHE activities of particular interest to California include its efforts to regionalize optometric education and to assist member states in making maximum use of their resources in providing postgraduate education.

WICHE is assuming administration of the Western Name Exchange, an association of 25 universities that circulates the names of senior-level minority students for recruitment into graduate programs in the West. Many schools within the exchange are located in California.

6430 CALIFORNIA EDUCATIONAL FACILITIES AUTHORITY

The California Educational Facilities Authority is a public instrumentality of the State composed of five members: the Director of Finance, the State Controller, the State Treasurer, and two public members appointed by the Governor to serve for terms of four years.

The Authority was created for the purpose of issuing revenue bonds to assist private educational institutions of higher learning in the expansion and construction of nonsectarian educational facilities. Through its ability to issue tax exempt bonds, the Authority provides lower cost financing to these institutions than they would be able to secure on the open market.

Facilities used for sectarian instruction or as a place of religious worship are not eligible.

The law specifically provides that bonds issued shall not be a debt or liability or a pledge of the faith and credit nor the taxing power of the State or any of its political subdivisions. The full faith and credit of the participating institutions are pledged to the payment of bonds.

A total of $150,000,000 of bonds was authorized by the Educational Facilities Act. Chapter 537, Statutes of 1979, increased this initial bond authorization to $300,000,000 and Chapter 874, Statutes of 1982, further raised the authorization to $500,000,000.

As of June 30, 1983, bonds and notes in the amount of $350,690,000 have been sold as follows: Harvey Mudd College $6,000,000; California Lutheran College $6,750,000; Loyola Marymount University $5,860,000; Pepperdine University $32,600,000; San Francisco Conservatory of Music $1,200,000; Santa Clara University $36,000,000; Southwestern University $3,000,000; Stanford University $102,550,000; University of the Pacific $21,520,000; University of San Diego $22,860,000; Pomona College $7,350,000; Westmont College $5,000,000; the University of Southern California $88,000,000; Los Angeles College of Chiropractic $12,000,000.

This is a trust activity and involves no State revenues or expenditures. All expenses must be paid from revenues and other moneys available to the Authority.

The California Educational Facilities Act is contained in Sections 94100 through 94213 of the Education Code.

6440 UNIVERSITY OF CALIFORNIA

The University of California was founded in 1868 as a public, State-supported land-grant institution. It was written into the State Constitution of 1879 as a public trust, to be administered under the authority of an independent governing board—the regents of the University of California. Presently, the board of regents includes 28 members, seven ex officio, 20 appointed by the Governor with the approval of the Senate for staggered terms, and one student appointed by the board.

A master plan for the development of higher education in California, enacted in 1960 and referred to as the "Donahoe Higher Eduction Act," designates the University of California as the primary State-supported academic agency for research with exclusive jurisdiction in public higher education over instruction in the professions of law, medicine, dentistry, and veterinary medicine. Sole authority is also vested in the university to award doctoral degrees in all fields, except that joint doctoral degrees with the California State University may be awarded.

The administrative structure of the university is headed by a president who is responsible for overall policy development, planning, and resource allocations. Chancellors have primary responsibility for the management of campus resource allocations as well as campus administrative activities.

The regents have delegated authority to the academic senate to determine conditions for admission (subject to constraints of the Master Plan for Higher Education), degree requirements, and approval of courses and curricula. Special faculty committees serve in an advisory capacity to the regents, the president, and the chancellors in a variety of matters. There are nine university campuses. Eight of them offer undergraduate and graduate instruction and professional education; the ninth is devoted exclusively to the health sciences. The university owns and operates teaching hospitals and clinics on the Los Angeles and San Francisco campuses, and in Sacramento, San Diego, and Orange counties. Approximately 150 university institutes, bureaus, centers, and laboratories operate in all parts of the state. The university's Agricultural Experiment Station, Cooperative Extension Offices in 54 counties, and the Natural Land and Water Reserves System serve people in all areas of California.

The University of California conducts higher education programs in four major areas:

1. Instruction of qualified individuals, by sharing with them knowledge and skills and by helping them to experience with their instructors the processes of developing and testing new hypotheses and fresh interpretations of knowledge. The university offers lower division, upper division, graduate, professional, and postdoctoral programs on each of its general campuses.
2. Research directed toward advancing the understanding of arts and sciences and the interpretation of human history. The university provides faculty time and the essential libraries, laboratories, and other resources necessary to further faculty research, which is intimately connected with teaching in the university—especially at the advanced graduate level.
3. Education for professional careers—education grounded in the understanding of relevant sciences, literature, and research methods by which the boundaries of knowledge are pushed back. Individuals are provided with the tools to continue intellectual development over a lifetime and to contribute to the needs of a changing society.
4. Public service contributing to the fulfillment of the university's obligation to disseminate knowledge and bringing to faculty and students the stimulation of applying their knowledge and special skills to the problems of modern life.

1984–85 Expenditure Plan

The budget for 1984–85 proposes an overall State support expenditure of $1,447.7 million—which represents a $126.6 million increase (11.2 percent) for normal program expenditures and an additional $82.9 million increase to reflect the resumption of the State's actuarially required contribution to the University's retirement system, which was deferred in 1983–84. The expenditure level also includes an augmentation of $113.7 million for employee compensation.

SIGNIFICANT PROGRAM CHANGES

Program	*Description*	*Dollars**
05	Enrollment Related	$10,340
05	Instructional Equipment Replacement	12,300
05	Instructional Use of Computers	4,000
10	Faculty Research	500
10	Microelectronics Research	2,000
35	Student Affirmative Action	500
40	Deferred Maintenance	6,500
40	Building Maintenance	4,000
45	Student Fee Reduction of $70	6,969
60	Employee Compensation—Faculty and Staff	113,670

HIGHLIGHTED PROGRAM CONTINUATIONS

Program	*Description*	*Dollars**
05	Undergraduate Teaching Excellence	$1,849
05	C. R. Drew Medical Education Program	5,179
10	Integrated Pest Management	1,907
10	Space Related Research	1,221
10	AIDS Research	2,900

Totals	129,643	128,484	131,157	2,673

[1] Reflects reduction of 140 health sciences students being phased over four years beginning in 1982–83 necessitated by an unfunded $2 million reduction of Federal capitation funds. Enrollments are being reduced in schools of medicine, dentistry, optometry, pharmacy and veterinary medicine. Also reflects reduction of 388 students related to the reduction in the University's budget for 1982–83. Enrollment reductions are being phased over four years beginning in 1982–83.

05 INSTRUCTION AND DEPARTMENTAL RESEARCH

Program Objectives and Description

General Campuses

General Campus instruction includes most of the direct instructional resources associated with the schools and colleges located on the eight general campuses. These resources include faculty, teaching assistants, and various instructional support staff, supplies, and equipment needed to provide the breadth of courses and degree programs necessary to achieve the University's diverse instructional responsibilities. Included are classroom and laboratory instruction as well as joint scholarly research activities of students and faculty.

The University experienced a 2,254 FTE undergraduate overenrollment in the current year over the budgeted 1983–84 level of 91,725 undergraduate FTE. Section 24.4 of the Budget Act of 1983 provides for a supplementary State appropriation if the actual undergraduate enrollment of the University exceeds the budgeted undergraduate enrollment by more than two percent. For 1983–84, $1,618,000 has been included to partially finance the instructional costs associated with the 1983–84 overenrollment. In 1984–85, the revised enrollment projections are estimated at 118,842 FTE, an increase of 2,510 undergraduate FTE and 200 graduate FTE over the 1983–84 budgeted FTE. The graduate increase will enable the University to expand programs in areas of student and societal demand, such as engineering and computer science and other scientific fields. For 1984–85, an increase of $9,781,000 over the 1983–84 budget is provided to fund the instructional costs associated with the 2,710 FTE enrollment increase, including 153.89 FTE faculty and 56.79 FTE teaching assistants.

The budget has also been increased by $12,300,000 for instructional equipment replacement to fully fund the University's estimated annual depreciation in State funded instructional equipment. An additional $4,000,000 has been provided for instructional computing to expand student access to computers, to provide course-oriented software, and provide support staff to aid students and faculty in the most effective use of the latest computer technology.

Health Sciences

The instructional program in the health sciences is carried on in 14 schools which provide education in various health fields to students preparing for careers in health care, teaching and research. The health science schools are located on six campuses and include five schools of medicine, two schools of dentistry, two schools of nursing, two schools of public health, one school of pharmacy, one school of veterinary medicine, and one school of optometry. In addition, four innovative programs in medical education are being conducted at Berkeley, Fresno, and Riverside, and the Charles R. Drew School in Los Angeles. The physical, biological, and behavioral science programs of the general campuses complement the programs of the health science schools. Professional students, residents, fellows, students in allied health and public health programs, and graduate students who will become teachers and researchers are participating in these programs.

Additional State funds totaling $525,000 are proposed for the health sciences instructional program. This amount will provide (1) full year funding for the new faculty positions provided in the 1983 Budget Act for the Charles R. Drew/UCLA undergraduate medical education program in preparation for the enrollment of 170 residents and 48 third- and fourth-year students in 1984–85 and (2) operation and maintenance of the medical education center and the clinical sciences center, both located at Drew.

Summer Sessions

University of California summer sessions are self-supporting instructional programs offering courses for both degree credit and in selected specialized programs. The summer programs provide a broad spectrum of instructional offerings. The specialized programs include intensive courses conducted at several campuses which enable students to accelerate their progress toward degrees, and serve as refresher courses for new and continuing students and for teachers. Programs in education are offered to improve instruction in California's schools and colleges. Some courses to prepare prospective students are also offered.

University Extension

University Extension is the largest institution of its kind—the nation's leading "noncampus university"—with an annual projected 1984–85 enrollment of 383,899 students participating in classes, short courses, seminars, field studies, and similar activities throughout in California and in several foreign countries. It has open admissions, optional credit and free student selection of curriculum. University Extension is a self-supporting instructional unit and its offerings depend entirely on student fees.

Program organization varies from campus, depending on the size of the program and the characteristics of the campus. Normally, programs have a disciplinary orientation; for example, arts and humanities, business administration, dentistry, education, engineering, health sciences, medicine, nursing, physical sciences, social sciences, and public affairs. Statewide programs, such as Continuing Education of the Bar, are established when there are valid reasons (e.g., when a single university unit can more effectively and economically serve the entire State).

[1] Reflects reduction of 140 health sciences students being phased over four years, beginning in 1982–83, necessitated by an unfunded $2 million reduction of Federal capitation funds. Enrollments are being reduced in schools of medicine, dentistry, optometry, pharmacy and veterinary medicine. Also reflects reduction of 388 students related to the reduction in the University's budget for 1982–83. Enrollment reductions are being phased over four years, beginning in 1982–83.

Instructional Costs and Faculty Productivity

Tables 11 and 12 present a display of instructional cost and student credit units per faculty. The cost data reflect all state general funded costs of instruction including a pro rata share of libraries, maintenance of plant and other institutional services. Unit costs by level are derived from faculty workload by level of instruction and from student loads by level of student. Table 11 displays unit costs data for all four levels of students and reveals a significant difference in cost per unit of credit between levels. Table 12 displays student credit units per faculty according to the three levels of instruction and provides cost at each level. Interpretations of these data are only meaningful in the context of a full understanding of the differentiation of function among segments of public higher education in California and the resulting differences in educational approaches.

10 RESEARCH

Program Objectives and Description

The University is designated by the Donahoe Act as ". . . the primary State-supported academic agency for research." Its research activities, both basic and applied, contribute to the social, economic, and technological progress of the State and the nation. More specifically, the university, through its research toward the solution of complex problems facing society, enables individuals to control their environment more effectively. In addition, the research process is essential to the training of scholars in the methodology of inquiry and the nature of the creative scholarly process, especially in the advanced graduate and professional instructional programs.

An increase of $500,000 is proposed for individual faculty research to provide funding for the special needs encountered by individual faculty members in the conduct of research, such as equipment and supplies, and field work; to provide seed money, facilitating the acquisition of additional extramural research grants; and, to provide support for faculty in fields where there is little or no possibility of extramural funding.

The 1984–85 budget also includes an increase of $2.0 million to provide for basic research and graduate education in microelectronics, computer sciences, and related fields. These funds are to be matched by private industry contributions.

15 PUBLIC SERVICE

Program Objectives and Description

Activities funded within this function are campus public service, Cooperative Extension, the contract with the Charles R. Drew Postgraduate Medical School, and the California College of Podiatric Medicine program conducted cooperatively with the UC San Francisco School of Medicine. Campus public service programs include the California Mathematics Project, California Writing Project, EQUALS, Mesa-like Academic Enrichment, Scripps Aquarium-Museum and the Teratogen Registry. These programs account for most of the State funds for public service, but the University also offers many activities which are almost completely supported by user fees and other non-State fund sources. Such activities include the Lawrence Hall of Science, arts and lecture programs, vocational education, and community service projects.

Cooperative Extension, previously known as Agricultural Extension, provides to the citizens of California information and educational programs in agriculture and natural resources, family and consumer sciences, community resource development, and 4-H youth development. Its programs are designed to deliver the results of research and new knowledge to people located in communities beyond the campuses of the University and to bring problems and issues from individuals and communities back to campuses for exploration and research. The California Mathematics Project is a staff development program which strengthens the mathematics problem-solving skills and teaching techniques of K–14 teachers. The California Writing Project is a program designed to improve the writing skills of students from elementary school through community college levels. The program offers tenured teachers in-service training in the teaching of writing skills to students. EQUALS is a training program to provide classroom teachers, counselors, and administrators with the tools to promote the participation of women and minority students in mathematics courses, thereby improving their opportunities for entry into math-based fields of study and employment.

The 1984–85 Budget includes a $2.6 million appropriation to the University for support of a program of clinical health sciences education, research, and public service at the Charles R. Drew Postgraduate Medical School, conducted with UCLA. Programs which are specified by the act to provide the greatest public benefits are: (1) continuing education of physicians and other health professionals and consumers of health services; (2) community medicine, designed to improve the health status of the citizenry, the health care delivery system and health sciences education; (3) residencies, including a family practice residency program at the Martin Luther King Hospital and other appropriate facilities and clinics; and (4) such other programs of clinical health sciences education, research, and public service as the Regents and the Charles R. Drew Postgraduate Medical School deem in the public interest, provided that the above specified programs are first funded. State funding was originally authorized by the Legislature in 1973 (Chapter 1140/73—SB 1026).

Chapter 1497/74 appropriated $541,000 to the University for the support of an educational program in podiatry operated in conjunction with the California College of Podiatric Medicine in San Francisco. The State has continued to support this program each year at its 1974–75 level, adjusted for inflation.

20 ACADEMIC SUPPORT—LIBRARIES

Program Objectives and Description

The university libraries provide ready access to books, documents, and other scholarly materials for the university's students, faculty, staff, and faculty from other California colleges and universities. In addition, the libraries may grant borrowing privileges to any California adult. University libraries serve both instructional and research needs and thus must be diverse in nature and maintain comprehensive information about man's knowledge. The rapid expansion of knowledge requires an extensive effort to keep materials current. *In 1984–85, an increase of $559,000 for 21 FTE reference-circulation staff is provided to fund an increase in enrollment-related workload.*

20.10 Academic Support—Other

Program Objectives and Description

Academic Support—General Campus Programs: Other academic support on the general campuses is comprised of a number of partially self-supporting activities organized and operated in connection with educational departments and conducted as a basic support for the departments educational programs. These supporting services contribute greatly to the quality and effectiveness of the instructional programs.

Many diversified programs are included, the largest being the demonstration of new schools (university elementary schools, nursery schools, and a psychology clinic school) which serve as interdepartmental teaching laboratories for experimentation, research and teacher training. These programs receive part of their support from state funds. The demonstration schools not only educate hundreds of children, but contribute to the advancement of education through research efforts and application of results; through development of new programs of teacher education, and dissemination of new knowledge to public schools.

Academic Support—Health Sciences Programs: In support of programs in the health sciences, the University operates dental clinics and neuropsychiatric institutes at Los Angeles and San Francisco, a veterinary medicine teaching facility at Davis and one in the San Joaquin Valley (near Tulare), an optometry clinic at Berkeley and two occupational health centers: one in the northern part of the state and one located in the southern part of the state. These facilities are extensions of the health sciences schools, and provide clinical experience essential to the educational process as well as valuable community health services.

Other activities supporting both general campus and health sciences programs include vivaria, which provide centralized facilities for ordering, receiving and care of all animals necessary for teaching and research in the biological sciences; support for arts by direct sponsorship of performances and exhibits and funding for galleries and museums; support of specialized physical science and engineering projects which are of service to academic departments and to industry, support for intercollegiate athletics at the smaller campuses, and support for professional journals.

25 TEACHING HOSPITALS

Program Objectives and Description

The University operates five human medicine teaching hospitals that are located on the Los Angeles and San Francisco campuses and in the counties of Orange, Sacramento, and San Diego. These hospitals provide inpatient and ancillary diagnostic and therapeutic services and extensive outpatient ambulatory care services (both clinics and emergency services) at the hospital site. In addition, two community clinics are operated in Orange County as part of the academic program of the California College of Medicine at Irvine. The primary mission of these hospitals and clinics is training of new physicians and other health care professionals, plus continuing education of practicing health care professionals. By providing patient care while training thousands of health care professionals, the teaching hospitals and clinics offer a major public service in California. Through affiliations with other clinical care centers, such as Veterans' Administration hospitals, county hospitals, and private community hospitals, University students receive instruction in a full range of clinical diagnostic and therapeutic techniques.

* Dollars in thousands

6440 UNIVERSITY OF CALIFORNIA—*Continued*

State support at the University-operated teaching hospitals and clinics, called clinical teaching support (CTS), is provided in order to pay for the care of patients who are essential to the clinical instruction of students, but who are unable to pay for care either through third-party sponsorship or their own resources. No increase in CTS is provided for increased patient workload. Augmentation of CTS for inflationary increases is provided elsewhere in the budget.

In addition to CTS, State loan funds are made available for Medicare/Medi-Cal inpatient reimbursement shortfalls. In the 1976–77 and 1977–78 years, Sections 28.11 and 28.92, respectively, of the Budget Acts authorized a $5 million loan for projected Medicare/Medi-Cal inpatient reimbursement shortfalls. These sections required an annual report on the status of the University's appeals to Medi-Cal and Medicare cost reimbursement limits. The University reported on the financial condition of each hospital and the status of their appeals to the Medicare and Medi-Cal programs in November, 1976. Based on this report and on additional information provided by the University at subsequent legislative hearings, an appropriation of $4.1 million was made as a loan to the University for 1976–77 through Senate Bill 335. The University utilized $3,187,000 of the $4.1 million loan/appropriation for estimated 1976–77 shortfalls and the remainder was returned to the State. In 1977–78 only $3,326,000 of the $5 million loan authorized was made available to the University because of State fiscal problems. Of the $6.5 million State loan advanced in 1976–77 and 1977–78, $575,000 was repaid by the University in 1978–79 from funds derived through successful appeals to the reimbursement limits and the $5,938,000 remainder was repaid in 1979–80 when an appellate court decision became final on the Medi-Cal fixed percentage limits. State loan funds of $3.9 million were made available in the Budget Act of 1978 and the same amount was available for 1979–80. However, the University reverted these funds to the State for both fiscal years. The Budget Act of 1980 made available $4.1 million in State loan funds for these shortfalls, however as a result of the passage of AB 2231, which provided funds for the purchase of the University of California Medical Center, San Diego, and the availability of hospital reserve funds, no loan funds were made available by the State for 1980–81. For 1981–82 and 1982–83, State loan funds of $2.3 million and $2.45 million respectively, were available for Medicare/Medi-Cal inpatient reimbursement shortfalls through Control Sections of the Budget Act of each year. However, the reimbursement short-fall in both years was funded from other sources of hospital operating revenue. For 1983–84, $2,450,000 in loan funds are again available through a Control Section of the Budget Act. Determination of the need for appropriation of these funds will be made during the 1983–84 fiscal year. *Authorization for the availability of $2,450,000 in State loan funds for 1984–85 is proposed through a control section of the Budget Act of 1984.*

30 STUDENT SERVICES

Program Objectives and Description

Student Services Programs support those activities whose primary purpose is to contribute to the student's emotional and physical well-being and to his or her intellectual, cultural and social development outside the context of the formal instruction program. It includes expenditures for organized Student Service administrative activities that provide assistance and support for the needs of students.

Student Affirmative Action

The Student Affirmative Action Program is a comprehensive effort designed to increase the enrollment of academically qualified students from underrepresented ethnic and economic groups and to provide the necessary support to ensure academic success for these students. Funds are allocated to outreach programs, academic support services, central administration, and student aid. The program supports the movement of students from junior high school through high school into the completion of University degree programs and career placement. The Student Affirmative Action Program is currently supported by State funds (75 percent) and University funds (25 percent).

The 1984–85 Budget proposes that the Student Affirmative Action program receive full State support in 1984–85, requiring a shift of $1,469,000 from student fee financing to General Fund support. This shift acknowledges the State's responsibility to fund programs designed to increase the opportunities of underrepresented groups in higher education, a responsibility already recognized in the California State University and the California Community Colleges.

Expenditures:	*1982–83**	*1983–84**	*1984–85**

35 INSTITUTIONAL SUPPORT

Program Objectives and Description

Activities funded within this function include planning, policy making, and coordination within the offices of the Chancellors, President, and the Regents. Also included for funding are a wide variety of supporting activities such as police, accounting, payroll, personnel, materials management, publications, and federal program administration, as well as self-supporting services such as telephones, garages, and equipment pools.

The 1984–85 Budget proposes an augmentation of $500,000 to expand the Graduate and Professional Student Affirmative Action program. Funds will be used to motivate and prepare promising minority and women students as well as provide increased opportunities for teaching and research experiences once they are enrolled so they are better able to qualify for careers in academically related fields. In addition, the University will provide $500,000 from Non-State funds for the Faculty Affirmative Action Program. This program will provide assistance for minority and women graduate students or faculty who demonstrate promise for a career in university teaching and research.

40 OPERATION AND MAINTENANCE OF PLANT

Program Objectives and Description

This function includes resources for the maintenance, preservation, and renewal of the University's State and Educational Fee supported physical plant which comprises land areas totaling 7,032 acres and over 34.8 million gross square feet of buildings and related fixed equipment with a current replacement value in excess of $4.0 billion (@ ENR Construction Cost Index 4100). Major component elements include utilities, building and grounds maintenance, and janitorial services, with additional administrative and support services. *The proposed 1984–85 increase provides a total of $11,347,000, including $847,000 for program maintenance and $10,500,000 for program improvement. Program maintenance funds will provide basic workload support for 207,688 square feet of additional State-maintained building area and includes $163,700 for building maintenance, $482,100 for utilities purchases and operations, $165,100 for janitorial services, and $36,500 for administration, refuse disposal, and fire protection.*

* Dollars in thousands

6440 UNIVERSITY OF CALIFORNIA—*Continued*

An increase of $4 million is provided as a first step in improving ongoing building maintenance support, which has been chronically underfunded for fifteen years. The funds will allow more frequent preventive maintenance, prolonging the useful life of facilities and reducing the number of costly breakdowns. In addition, $6.5 million is provided as an initial step to reducing a backlog of identified, critical deferred maintenance projects now exceeding $50 million. The funds will assist in beginning to return University facilities to a reasonable state of repair and functional capability.

45 STUDENT FINANCIAL AID

Program Objectives and Description

There are four major sources of financial aid available to University of California students—the Federal Government, University Resources, Private Donors and Outside Agencies and the State of California. In 1982–83 approximately 62,900 students received assistance from one or more of these sources, at a total cost of $217 million.

The major sources for University program funds are student fee income and Regents' sources, including private gifts and scholarships and loan funds. The Federal government provides for loans, veterans benefits, and grants through various programs. In addition, graduate students receive traineeships and fellowships from numerous Federal sources. The California Student Aid Commission provides scholarships and grants directly to students. Private and outside agencies provide the remaining amounts of scholarships, grants, and loans available to University of California students.

The 1984–85 Budget proposes a shift of $5,500,000 in the Educational Opportunity Program financial aid component from student fee support to General Fund support. This shift, together with the shift of Student Affirmative Action from student fee to State support, will allow a decrease of $1,394,000 in the level of financial aid needed to cover student fees and an overall fee reduction of $70. This action recognizes the State's responsibility to fund programs designed to increase the opportunities of underrepresented groups in higher education, a State responsibility already acknowledged in the California State University and the California Community Colleges.

50 AUXILIARY ENTERPRISES

Program Objectives and Description

Auxiliary enterprises are those noninstructional services provided to individuals, primarily students, in return for specific user charges. The organizational units providing these services, such as student housing, parking, intercollegiate athletics, food services, parking operations, and various others, are largely self-supporting and are not subsidized by the State. The 7 percent expenditure increase for 1984–85 will accommodate general inflation and operating costs for an additional 400 apartments and 1000 parking spaces.

55 PROVISIONS FOR ALLOCATION

Program Objectives and Description

These budgetary provisions serve as a temporary repository for lump sum appropriations which are destined for allocation (1) from Systemwide provisions to campus provisions, and (2) campus provision to operating programs and subprograms where expenditures will occur. The major provisions for allocation include funds for salary merit increases, academic position upgradings, staff reclassifications, price increases, employee benefits, and unallocated endowment income. These provisions are partially offset by the University budgetary savings target.

The 1983 Budget Act reduced the University's 1983–84 appropriation by $101.4 million to defer the entire General Fund employer contribution to the University of California Retirement System. This was a one-time reduction. It is also the intent of the Legislature and the Governor that this reduction be considered a deferral of the employer contribution, to be amortized by supplemental appropriations to be included in the Budget Act for the 1984–85 fiscal year and in each subsequent year thereafter, for a period not to exceed 30 years. These supplemental appropriations are to be in addition to other appropriations for the support of the University and in amounts which, in total, will be the actuarial equivalent of the amount deferred. The $82.9 million which has been provided in 1984–85 includes $76.5 million to continue employer contributions at the level required by the recently revised actuarial assumptions and $6.4 million as the first installment for the repayment of the deferral. For 1983–84, the University borrowed $101.4 million from UCRS funds to meet the General Fund's obligation to UCRS.

60 PROGRAM MAINTENANCE: FIXED COSTS, ECONOMIC FACTORS, AND ACTIONS REQUIRED AS A RESULT OF 1983–84 DECISIONS

Program Objectives and Description

The element of program maintenance includes funds for 1) merit increases for eligible academic and staff employees, 2) price increases for utilities, library purchases, supplies, equipment, insurance and other nonsalary items, and 3) rate and enrollment-related increases in employee benefit costs, and 4) the 1984–85 cost of salary and employee benefit changes implemented in 1983–84 and 5) the 1984–85 cost of salary and employee benefit changes to be implemented in 1984–85. The $113.7 provided for 1984–85 salary and employee benefit increases includes funds for both academic and staff employees. The portion for academic employees is sufficient to allow the University to fund estimated cost increases for health and dental insurance and increase faculty salaries by a total of 13 percent in 1984–85, with the first part of this two-part increase to be effective July 1, 1984 and the final part on January 1, 1985. This amount will also allow nonacademic University employees up to a 10 percent salary and benefit increase for 1984–85. A total increase of $195.1 million is proposed for these purposes in 1984–85. The University will abolish 1,364 authorized positions on July 1, 1984 and in addition another 144 authorized positions will be abolished during 1984–85.

65 SPECIAL REGENTS' PROGRAMS

After provision for certain administrative costs, 55 percent of the Federal overhead on contracts and grants is used as part of the funding for the University's Budget for Current Operations; the other 45 percent supports special programs established by action of The Regents. For 1984–85, The Regents have allocated $39,027,000 for the special Regents' programs.

66 UNSPECIFIED PROGRAM REDUCTIONS IN THE HEALTH SCIENCES

Pursuant to decisions regarding the 1983–84 and 1984–85 budgets, and in order to fund fixed cost items, $7.2 million of reductions to health sciences instructional programs and organized activities, along with associated enrollment reductions, will be phased in over several years. Details on the impact of the reductions on various programs, including related enrollment reductions, will be provided to the legislative budget committees prior to hearings on the University's budget. Enrollment tables in the 1984–85 Governor's Budget do not reflect these reductions in the health sciences; adjustments will be submitted later.

General Analysis

The 1984–85 budget for the University of California focuses on the development of new instruction and research facilities, including laboratory and high technology facilities in the fields of biological sciences and engineering. The budget gives the highest priority to the completion of partially funded projects, including completion of working drawings and construction for the Southern Regional Library Compact Shelving Facility. The needs for alterations and life-safety corrections in existing buildings are also addressed.

* Dollars in thousands

6440 UNIVERSITY OF CALIFORNIA—*Continued*

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*
Objectives			
The University of California is a statewide institution of higher education with the following major functions:			
1. Instruction			
a. Broadly based instruction leading to the baccalaureate degree,			
b. Graduate programs leading to master's degrees and doctoral degrees, and programs of postdoctoral instruction,			
c. Instruction in professional fields,			
d. Programs for the preparation of teachers, and			
e. Joint doctoral programs with the State university and colleges.			
2. Research			
The University is designated by the Master Plan for Higher Education in California as the primary state-supported academic agency for research, both basic and applied, and as the primary public repository for scarce documents and other unique library resources needed for the doctor's degree and for research programs.			
3. Public Service			
Provide public service in areas related to the University's programs of instruction and research.			
UNIVERSITYWIDE			
Major Projects			
Project programming and preliminary plans	—	—	$200 [gP]
	$500 [iP]	$500 [iP]	500 [iP]
These funds are to be used to prepare programs and preliminary plans for those 1985–86 projects not large enough to warrant a line item appropriation for this purpose and for the development of cost/benefit analyses of planning alternatives for projects in future capital budgets.			
Southern regional library compact shelving facility	—	—	13,997 [gWC]
	100 [iP]	—	—
This project will provide a facility of approximately 102,500 asf for the supplemental shelving of 3.7 million volumes from the libraries of five southern campuses of the University and other libraries in the southern part of the State. The building will be located on the Los Angeles campus.			
General and advance planning studies	300 [iP]	300 [iP]	500 [iP]
Nonstate funded projects	500 [iC]	500 [iC]	2,000 [iC]
Totals, Major Projects	$1,400	$1,300	$17,197
Minor Projects			
Minor capital improvements	$1,709 [gPWC]	$1,009 [gPWC]	$8,000 [gPWC]
	−380 [gPWC]		
Minor capital improvements, nonstate	2,500 [iPWCE]	3,000 [iPWCE]	2,500 [iPWCE]
Totals, Minor Projects	$3,829	$4,009	$10,500
TOTALS, EXPENDITURES, CAPITAL OUTLAY	$5,229	$5,309	$27,697
Capital Outlay Fund for Public Higher Education [g]	*1,329*	*1,009*	*22,197*
Nonstate funds [i]	*3,900*	*4,300*	*5,500*
BERKELEY CAMPUS			
Major Projects			
Life Sciences building addition	$550 [gP]	$200 [gP]	$39,919 [cWC]
	—	693 [iP]	—
This project will provide approximately 119,800 asf which will house 46 faculty offices and research laboratories in the areas of ethology, neurobiology and behavior, cell and developmental biology, immunology and endocrinology, animal facilities, and support space.			
Animal facilities corrections, step 1	—	—	619 [gWC]
Emergency electrical generators will be installed in seven buildings which house animals. The generators would maintain power to the heating, cooling, ventilating and lighting systems in the animal quarters in the event of a power failure.			
California Administrative Code deficiencies, elevators, step 2	—	—	785 [gC]
Funds are requested to correct fire and life safety and handicapped access code deficiencies in elevators in 26 buildings. Emergency alarms and fire sensing devices must be provided, one elevator per building made accessible, and safety stops installed.			

* Dollars in thousands

6440 UNIVERSITY OF CALIFORNIA—*Continued*

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*
School of Law building, California Administrative Code deficiencies	–	–	489 [gC]
Funds are requested to construct code corrections in the School of Law building. Fire dampers, exit signs, panic hardware, sprinklers, and emergency lighting will be provided. Restrooms and entrance doors will be remodeled to accommodate the handicapped. Elevators will be modified to comply with code requirements.			
Life Sciences building renovation	–	–	550 [gP]
The facility will be altered to provide laboratories and offices for faculty and graduate students (48,400 asf), teaching laboratories (34,110 asf), classrooms and conference rooms (11,240 asf), a biology library (34,000 asf), biological herbaria and museums (76,400 asf), and related administrative and support space (15,900 asf), for a total of 220,050 asf.			
Cory Hall utilities systems improvements	–	–	1,059 [gC]
Funds are requested to construct improvements to the utilities related to the needs of the Electrical Engineering and Computer Sciences programs in Cory Hall. Fire, life safety, and handicapped access deficiencies will be corrected.			
California Administrative Code deficiencies, asbestos hazards, State-funded buildings, step 1	–	–	1,200 [gWC]
Funds are requested in 1984–85 to remove or encapsulate asbestos in State-funded facilities, including mechanical rooms, utility tunnels, attic spaces, fan rooms, ceilings, crawl spaces, and other heavily contaminated areas.			
California Administrative Code deficiencies, elevators, step 3	–	–	436 [gWC]
Funds are requested to continue the program of code corrections to elevators in campus buildings. The campus has been cited for non-compliance and has been given a compliance date of February 1, 1984.			
Campus energy conservation, air recirculation	– 269 [hWC] −254 [hC]	– – –	279 [gC] – –
Funds are requested in 1984–85 to construct alterations to the exhaust air duct work in five buildings to reduce energy consumption by recirculating heated air.			
Campus energy conservation, variable speed fans, step 1	– 85 [hPW] −10 [hPW]	– – –	801 [gC] – –
Funds are requested in 1984–85 to install variable speed motor drives on the fan motors of five buildings to facilitate the computerized adjustment of speeds so that the building ventilation will match the needs of the climate automatically, providing a considerable savings in gas and electricity.			
Central control system, step 2	–	–	418 [gWC]
Funds are requested for construction of a project which will add approximately 420 control points to the central control system. Construction will include the installation of sensors, flowmeters, transducers, and relays to monitor and control building utility systems to reduce the consumption of gas and electricity.			
California Administrative Code deficiencies, handicapped, step 2	–	–	130 [gC]
Funds are requested to construct primary access to the physically handicapped in six major buildings in accordance with code requirements. One entrance, one elevator and one set of restrooms will be made accessible. Other modifications will be made as required.			
California Administrative Code deficiencies, step 3	–	–	479 [gWC]
Funds are requested for construction of the third step of a program to remove architectural barriers to the physically handicapped. The project includes corrections in 18 buildings.			
California Administrative Code deficiencies, high-rise fire and life safety	38 [gW]	790 [gC]	–
Nonstate funded projects	15,716 [iPWCE]	94,483 [iPWCE]	1,410 [iPWCE]

DAVIS CAMPUS			
Major Projects—General Campus			
Energy conservation, step 1	–	–	$257 [gWC]
Funds are requested in 1984–85 for construction of a project to replace approximately 150 existing electrical motors with high efficiency motors. The motors will be replaced on a priority basis, depending upon the period of operation and the level of modification required.			
California Administrative Code deficiencies, handicapped, step 2	–	–	490 [gC]
Funds are requested for the construction of modifications to campus facilities to comply with code requirements. The project includes the installation of an elevator in North Hall, now completely inaccessible to the handicapped, and the construction of ramps, curb cuts, and modifications of restrooms.

Major Projects—General Campus			
Engineering laboratory facility	–	–	$223 [gPW]
Funds are requested for a specialized laboratory of approximately 22,200 asf to provide for the teaching and research programs in mechanical and civil engineering. These special laboratories require high ceilings and large floor areas to contain out-sized equipment which cannot be housed in existing facilities.			
Main library alterations	–	–	465 [gWC]
Funds are requested for alterations to 15,628 asf in the main library. The project includes alterations for the reallocation of service areas and departmental functions in order to achieve maximum efficiency and utilization of the facility. Compact shelving will be installed at the basement level where floor rails for this shelving have been installed.

LOS ANGELES CAMPUS			
Major Projects—General Campus			
Schoenberg Hall alterations	–	–	$1,126 gC
Funds are requested to remodel the basement of Schoenberg Hall to provide performance laboratories, storage space, and media labs. A portion of the basement will be developed into an electronic music studio, the recording lab will be expanded, and a stair constructed to connect the lab areas with the performance studios on the first floor. Code modifications will be constructed as required.			
Law School addition and related alterations	–	–	300 gP
To restructure and expand the existing Law School to respond to curriculum needs. The project would add 19,420 asf to the Law building, alter the existing facility and upgrade the mechanical/electrical system.			
School of Engineering and Applied Science expansion	–	–	220 gP
Study funds are requested to develop a specific proposal for new construction and renovation of existing facilities to meet the changing program needs of Engineering and Applied Sciences. The space shortage is largely due to a shift in emphasis from theoretical to applied science programs.			
Multi-media learning laboratory	–	–	150 gPW
Funds are requested to develop a multi-media learning laboratory to support the instructional program. The project involves alterations to three rooms in Powell Library, the existing audio-visual learning center, to provide more effective use of the space and to increase user capacity. Code requirements will be met.			
California Administrative Code deficiencies, high-rise fire	–	–	660 gWC
Alterations to five high-rise buildings to bring them into compliance with high-rise fire code requirements. Automatic fire sprinklers, manual air handling systems, exit signs, alarm boxes and a zoned manual fire alarm system will be installed.			
California Administrative Code deficiencies, elevators	–	–	218 gPW
Funds are requested to correct code deficiencies in 12 elevators in the Medical Center and 41 on the general campus. Minimal corrections for the handicapped will be included.			
Nonstate funded projects	$22,510 iPWCE	$4,148 iPWCE	11,000 iPWCE

RIVERSIDE CAMPUS			
Major Projects			
Nematode isolation and quarantine facility	–	–	$743 [gCE]
Funds are requested to provide a specialized facility for conducting research on quarantine nematode pests which attack tropical and subtropical crops, on biological control of nematodes and other invertebrate pests, and on the development of germplasms tolerant of, or resistant to, soil borne pathogens.			
Energy conservation building retrofit, phase 1	–	–	634 [gWC]
This project will provide modifications to the heating, ventilating, and air conditioning systems in fourteen campus buildings.			
Handicapped access, step 1	–	–	302 [gC]
Funds are requested to construct basic handicapped access, including automatic door openers in eight buildings, altering restrooms, modifications in the physical education building, and providing ramps and curb cuts.			
Nonstate funded projects.....	$55 [iPW]	$482 [iWC]	–

SAN DIEGO CAMPUS			
Major Projects–General Campus			
Engineering unit 1	–	–	$575 [gP]
	–	$100 [iP]	–
Funds are requested for a facility of approximately 120,000 asf to provide instruction and research space for engineering and computer science programs. The project would provide teaching and research laboratories, and offices and support space for existing academic programs which now have only about half the space justified by current State standards.			
California Administrative Code deficiencies, handicapped, step 1.....	–	–	200 [gC]
This project will provide alterations for primary access to campus buildings for the handicapped.			
Muir College building elevators	–	–	505 [gWC]
Funds are requested to provide a free-standing elevator tower in the Muir College biology building. The single elevator in the building fails consistently from overuse in spite of efforts to maintain and repair it.

SAN DIEGO—SCRIPPS INSTITUTION OF OCEANOGRAPHY—MARINE SCIENCES			
Major Projects			
Scripps Institution of Oceanography seawater supply system and pier replacement	–	–	$185 [gPW]
Funds are requested to provide a new seawater supply system and concrete pier at SIO, replacing the existing 65 year old pier. The new pier will be 1,050 feet long and 25 feet wide, with a concrete deck supported by concrete piles and would support a flume to carry seawater which is vital to the research programs at SIO.

SAN FRANCISCO—HEALTH SCIENCES			
Major Projects			
Animal care facility improvements	–	–	$1,560 [gWC]
Funds are requested to bring the animal care facility into conformance with standards established by the American Association of Accreditation for Laboratory Animal Care. A maximum security containment area, new animal care rooms, and outside dog pens will be provided. The utility system serving the animal tower will be renovated.			
California Administrative Code deficiencies, high-rise fire protection	–	$266 [gW]	2,440 [gC]
Funds are requested to construct code corrections in four buildings to comply with requirements of the State Fire Marshal. The project includes work on building exits; smoke and fire controls; communications systems; fire warning, detection, and extinguishing systems, and other code corrections.			
California Administrative Code deficiencies, elevators	$85 [gW]	–	1,250 [gC]
Funds are requested to construct modifications to campus elevators to comply with code requirements. The seismic corrections include changes to the shaft and hoisting equipment. Fire protection work includes detectors and car operating devices. Handicapped access includes changes to call buttons and signals, and the installation of handrails.			
Energy conservation, step 1	–	–	703 [gWC]
To modify the heating and ventilating systems in the health sciences towers and the school of nursing building. The project involves fan and constant volume regulator modifications and the installation of economizer dampers and automatic controls to reduce energy consumption.			
Hospital and clinics funded projects under $150,000, 1984–85	–	–	2,600 [iPWC]

SANTA BARBARA CAMPUS			
Major Projects			
Sewage treatment plant improvements	–	–	$570 [gC]
Funds are requested to provide the University's share of construction costs for improvements to the Goleta Sanitary District's sewage treatment plant. The improvements have been mandated by the State and the Federal Government and are required to meet waste water treatment criteria established by the Environmental Protection Agency. The University is one of five public agencies sharing use of the facility and must pay its share of the cost.			
Engineering unit 2	$426 [gP]	$250 [gW]	18,226 [ccC]
	–	309 [iW]	–
Funds are requested to construct an 84,000 asf engineering facility mainly for teaching and research laboratories for the Departments of Chemical and Nuclear Engineering and Mechanical and Environmental Engineering. The college has only about 55 percent of the space required to carry out its programs as measured by State standards and cannot accommodate specialized laboratory functions and instruction activities in existing facilities.			
Energy conservation improvements, step 3	–	–	28 [gWC]
Funds are requested to modify the heating, ventilating and air conditioning systems, utility system and water pumping station.			
California Administrative Code deficiencies, elevators, handicapped, step 2	–	–	392 [gWC]
Funds are requested for a project to construct two new and modify two existing elevators to provide access to the physically handicapped.

6600 HASTINGS COLLEGE OF THE LAW

University of California

The college was founded in 1878 by Serranus Clinton Hastings, the first Chief Justice of the Supreme Court of the State of California. On March 26, 1878, the Legislature provided for affiliation with the University of California. The college board of directors has the primary responsibility through its executive officers for the administration of all affairs of the institution. Chapter 1155, Statutes of 1980, provides that after January 1, 1981 vacancies in the Board, other than the position held by the heir or representative of S. C. Hastings, shall be filled by the Governor and approved by a majority of the Senate. Directors so appointed shall serve for a term of twelve years. The juris doctor degree is granted by The Regents of the University of California and is signed by the President of the University.

The overall objectives of the College are:

1. To provide students an excellent education about the law and professional practices so they will achieve a high level of professional competency.
2. To provide the legal profession with promising young men and women who can meet the needs of an increasingly interrelated and interdependent society and be prepared for the various private and public roles performed by the legal profession.
3. To ensure that its graduates are sensitive to the problems of the administration of justice, have an appreciation of the technological-social-economic context in which legal institutions are shaped, and understand the responsibilities of the law as a means of deliberate change.

To accomplish the objective of providing an excellent education, the college has adopted a faculty recruitment policy which features a balance between a distinguished group of senior professors known as the 'Sixty-five Club', and very talented and experienced younger faculty. Since 1940, the college has deliberately sought out members of other prestigious law school faculties who, after achieving national reputations as legal scholars and teachers, have reached the customary retirement age. These individuals bring the advantage of a broad perspective of experience in their chosen field, and the instructional skills unmatched by any law school in the nation. In addition, other distinguished faculty, adjunct faculty (comprised of outstanding legal specialists in specific fields of practice), and administrative faculty (dean, academic dean, director of clinical programs, director of legal writing and research, and law librarian), provide instruction to Hastings' students. In 1983–84, it is planned to continue the enrollment level of 1,500 students.

SUMMARY OF PROGRAM REQUIREMENTS

		*1982–83**	*1983–84**	*1984–85**

Number of graduates	476	480	480

10 INSTRUCTION PROGRAM

Program Objectives and Description

The principal objectives are:

1. Develop in the students the required competency in substantive law demanded by the legal profession.
2. Develop students' skills in research and writing.
3. Provide students with an adequate background in the law through the study of comparative law, legal history, and jurisprudence.
4. Instill in students, through theory-practice

SIGNIFICANT PROGRAM CHANGES

Program	*Description*	*Dollars**
30	Law Library Collection Development and Technical Services	$248
40	Legal Education Opportunity Program Student Grants Fund shift (and related student fee reduction of $185 per student per year)	277

The 1984–85 Budget proposes full funding of the current faculty salary lag of 13 percent.

The Budget also reflects the Administration's commitment to maintain reasonable student fee levels. Because the long-term goal of the Administration is to ensure that students do not bear financial responsibility to fund student financial aid for other student through the payment of student fees, the Budget proposes a buy-out by the state of funding for the Legal Education Opportunity Program Student Grants at a cost of $277,000 in 1984–85. This will allow the current student fee charge to be reduced by $185 per student per year in 1984–85.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

6600 HASTINGS COLLEGE OF THE LAW—*Continued*

Student Enrollment:	*1982–83*	*1983–84*	*1984–85*
Regular students	1,466	1,494	1,500
Net General Fund cost per student	$4,802	$4,576	$5,906
Number of graduates	476	480	480

10 INSTRUCTION PROGRAM

Program Objectives and Description

The principal objectives are:

1. Develop in the students the required competency in substantive law demanded by the legal profession.
2. Develop students' skills in research and writing.
3. Provide students with an adequate background in the law through the study of comparative law, legal history, and jurisprudence.
4. Instill in students, through theory-practice clinical courses, a level of professional competence and skill that will shorten the period of training in the law office.
5. Develop special skills in advocacy for trial lawyers.

The instruction program is designed to provide thorough and systematic instruction in those branches of the law which will best prepare students for their responsibilities to the community as members of the legal profession. It is composed of three elements including the classroom, theory-practice, and instructional support. Through these elements it is planned that the student will receive a combination of theoretical instruction, practical experience, specialized training as lawyers, and necessary support services.

Attempts by the college to maintain comparable compensation levels with other University of California law school faculty, while inadvertently not requesting additional State support, has led to an erosion of available funds for authorized faculty. To remedy this condition, a two-year plan to fully fund the currently authorized faculty is proposed. In 1984–85, the cost of the first phase of the plan is $211,000.

To increase the college's wordprocessing capabilities, thereby improving the utilization of the faculty support staff and effecting savings in the operational costs of the scholarly publications, a one-time augmentation of $46,000 is proposed for 1984–85.

10.10 Classroom

In this element, students receive instruction in classroom seminar, lecture, and discussion sessions which are conducted by regular faculty members supplemented by an adjunct faculty comprised of outstanding legal specialists in special fields of practice.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	57.9	56.5	56.5	$2,984	$3,117	$3,565
General Fund				*2,715*	*2,784*	*3,215*
Federal Trust Fund[1]				*6*	–	–
Reimbursements				*263*	*333*	*350*

10.20 Theory-Practice

In this element students receive training in the basic skills of legal practice. This includes most major aspects of the legal process from client interview and case preparation through the conduct of the trial and the management of an appeal. This training in the practical aspects of the law assists students in achieving proficiency in the skills of trial and appellate advocacy and gives students greater insight into and appreciation for the substantive law taught in the traditional lecture method.

1. All second-year students, except those working on scholarly publications such as the Hastings Law Journal or the Constitutional Law Quarterly, are required to participate in the largest and most comprehensive moot court experience in the country. The course is operated under the supervision of the Director of Moot Court with the assistance of a student moot court board. This board selects and edits cases involving controversial issues which are assigned to the students. Two students, working as a team, brief and argue their assigned case. At oral presentation of argument, prominent members of the judiciary, practicing attorneys, and selected students serve as judges.

---

* Dollars in thousands

6600 HASTINGS COLLEGE OF THE LAW—*Continued*

2. A wide variety of trial advocacy courses are offered to students who wish to become acquainted with the practical application of the rules of procedure and evidence in a trial court context. Students are taught the skills of jury selection, opening statement, the presentation of evidence, including direct and cross examination of witnesses, and closing argument. Courses are offered with emphasis in business, personal injury, criminal, or a variety of these subjects. At the conclusion of the course students are required to participate as lawyers in a complete mock jury trial in a local courtroom.

3. The Legal Writing and Research program consists of a course in legal argument which introduces students to research techniques and legal writing. The course is considerably more comprehensive and rigorous than most legal writing and research courses. It covers two semesters; students receive three units of credit for the year and must complete six to eight assignments. Successful completion of Legal Writing and Research is a prerequisite for graduation from Hastings College of the Law.

For the second time, Hastings first-year class will be taught in five sections of 100 students. Each section will have at least five Legal Writing and Research subsections in order to limit the number of students in each Legal Writing and Research class to twenty. The small class size is required to ensure thorough evaluation of students' writing and to ensure individual student-instructor contact. The small class size helps to develop an intimacy which is lacking in the larger, 100 student classes.

4. In this portion of the budget, provision is made to keep students, graduates, and members of the bench and bar informed of current developments in the law and problems related to the legal profession. This is accomplished by preparing four scholarly publications including the Hastings Law Journal, the International Law Review, the Hastings Constitutional Law Quarterly, and COMM/ENT, the communications and entertainment law journal. The Law Journal is devoted to in-depth analysis and discussion of significant legal problems and the Constitutional Law Quarterly concentrates on the constitutional legal aspects of the problems. The articles range from exhaustive discussion by eminent scholars and members of the legal profession to notes and comments by students on recent development in the law. Students selected to participate in the work of these publications find it a rewarding and valuable educational experience.The benefits of this experience are realized not only during the formal legal education, but also are apparent in the advantage the student has when seeking a position after graduation.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20 PUBLIC AND PROFESSIONAL SERVICES PROGRAM

Trial and Appellate Advocacy

Program Objectives and Description

The trial and appellate advocacy program is designed to provide specialized training to lawyers, legal educators, and judges through short-term intensified courses. It is estimated that 400 attorneys will be registrants in 1983–84. In addition, an estimated 250 attorneys will register for the criminal justice advocacy program which was initiated in 1977–78. Both programs are entirely self-supporting.

30 ACADEMIC SUPPORT PROGRAM—LAW LIBRARY

Program Objectives and Description

The principal objective is to provide reference material so that students and faculty members can prepare for various aspects in the learning and teaching of law.

In the law library, provision is made to maintain a carefully selected collection of legal reference material sufficient in number and scope to allow students and faculty members to research questions of law in preparation for classroom presentations and assignments, and for moot court, trial practice, and legal clinic assignments. At the present time, Hastings Law Library consists of approximately 263,000 volumes and 85,000 volume-equivalents on microfilm. Budgeted acquisitions add to this at the approximate rate of 10,000 volumes per year. The library is open 102 hours per week to maximize the availability of reference material.

To provide for an increase in the library collection in 1984–85, $168,000 is proposed for the acquisition of an appropriate combination of printed materials ($114,000—one-time) and automated legal reference services ($54,000—ongoing). Additionally, a one-time augmentation of $80,000 is proposed in 1984–85 to acquire an automated acquisition and serial control system, thereby improving the efficiency of current library operations.

40 STUDENT SERVICES PROGRAM

Program Objectives and Description

The Student Services Program includes the six (6) elements of Health Services, Financial Aid, Placement, Admissions, Records and the Legal Education Opportunity Program. Through these offices, students are provided a fair system for admittance to the law school and information about academic performance during their three years at the College. Students are also assisted in securing necessary financial assistance to complete the instructional program, and in identifying employment opportunities during and upon completion of their instruction. Supportive services include tutoring, counseling and academic advising, summer transitional programs, and special courses supplementing regular instructional activities for the educationally, socially or economically disadvantaged, in recognition of the need to provide equal legal educational opportunities.

In 1984–85, the Budget reflects a funding shift from student fees to the General Fund for the costs of the Legal Education Opportunity Program student grants. The cost of this buy-out is $277,000 in 1984–85. Of this amount, $266,000 is reflected in the Student Services Program and $11,000 is reflected as related price increase in Program 60—Provisions for Allocation.

40.10 Student Health Services

The student health service provides on-campus dispensary care including services of nurses and physicians four hours a day, five days a week. Emergency care and hospitalization are provided through a comprehensive Medical Insurance Program made available to all students.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Reimbursements)*	1.9	3.1	1.9	$197	$210	$212

40.20 Student Financial Aid

The financial aid office is responsible for planning, developing, and providing financial assistance for students who would not be given the opportunity for legal education without additional resources. The functions of the office are divided into four groups: (1) information dissemination and applications processing, (2) need analysis and award distribution, (3) financial, loan, and work counseling, and (4) reports and program development.

All financial aid applicants are required to file the college scholarship service "Graduate and Professional Students' Financial Statement" which gathers, processes, and evaluates information concerning family and student assets and liabilities. These statements combined with student interviews determine the type and amount of financial aid for which the applicant is eligible. The financial aid office also assists students in the securing of financial resources from external programs. Financial Aid associated with the Legal Education Opportunity Program is included in financial aid expenditures, but program output data is reported with the LEOP program element.

40.30 Student Placement

The extensive placement program serves three functions: providing on-campus interviews with firms, legal departments of public agencies and corporations, and various branches of the judiciary; providing, through its summer observation program, law practice experience during the summer months for the second-year students; and fitting students into part-time employment with law firms, government agencies, public law offices, the judiciary and special poverty law office programs that will provide not only valuable law experience but ensure some financial remuneration enabling the student to continue school.

Expenditures *(Reimbursements)*	3	2.9	2.9	$115	$83	$86

40.45 Admissions

Students are accepted through a screening process so that students most highly qualified and with the greatest aptitude for the law are accepted. Special attention is devoted to student applicants under the legal education opportunity program. Selection is based on the applicants' undergraduate record, the law school admission test score and other information submitted.

40.50 Records Office

The Records Office is responsible for all student academic records, both manual and computerized (including registration, personal data, academic achievement, honors, etc.), and is responsible for maintaining related statistical information. The Office administers a full complement of student academic services, including registration, course enrollment and drop/add, monitoring academic progress, graduation clearance and certification to State Bars, examinations, grade processing, transcript maintenance and production, and vertification of enrollment to government agencies and lending institutions.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Reimbursements)*	6	5.9	5.9	$260	$166	$173

40.60 Legal Education Opportunity Program (LEOP)

This program was established in recognition of the need to equalize educational opportunities in the field of law for those who are motivated to serve in the legal profession, have the talent to do so, and have been unable to accomplish the normal and traditional pre-law preparation because of serious educational, social, or economic disadvantages.

The College initiated this program in 1969 and has made significant progress in providing legal educational opportunities for the disadvantaged. The LEOP representation in the entering class for 1982–83 was approximately 20%.

** Student Financial Aid Programs and expenditures not reflected (totally or partially) in overall budget totals.

[1] The balance of student work-study expenditures are reflected in the programs/elements which employ the students. For total program expenditures, refer to 40.21—Student Financial Aid.

50 INSTITUTIONAL SUPPORT PROGRAM

Program Objectives and Description

The principal objectives are:
1. Provide active leadership in meeting current administrative problems.
2. To provide personnel and other administrative services such as purchasing.
3. To provide management with fiscal information on resources used in relation to resources available and to provide business services.
4. To foster a continuing relationship between the alumni and the college including the involvement of alumni in campus community affairs.

This program is carried out through the activities of executive management, fiscal operations, personnel, administrative services, and community relations offices.

55 OPERATION AND MAINTENANCE OF PLANT

Program Objectives and Description

This function consists of the management of the physical environment, as well as the planning and administration of renovation and maintenance activities of the College. *In order to preclude further deterioration of the physical plant and provide sufficient maintenance funding, $90,000 is proposed in 1984–85 to fund the College's highest priority special repair and maintenance projects.*

60 PROVISIONS FOR ALLOCATION

Program Objectives and Description

These budgetary provisions serve as a temporary repository for funds destined for allocation to specific programs and subprograms where expenditures will occur. Major provisions for allocation include funds for employee compensation increases, employee benefits and price increases for nonsalary items.

Effective July 1, 1984, the College will reduce their authorized positions by a total of 6.3 in the following programs: Instruction, Public and Professional Services, Student Services and Institutional Support.

Input	*1982–83**	*1983–84**	*1984–85**

[1] In 1983–84, $678,000, which would have been transferred to the University of California Retirement System (UCRS), was vetoed by the Governor. Of this amount, $580,000 is proposed in 1984–85, based on a change in actuarial assumptions.

[2] Transferred from Personal Services to Special Items of Expense in 1983–84.

6610 THE CALIFORNIA STATE UNIVERSITY

Introduction

The individual California State Colleges were brought together as a system by the Donahue Higher Education Act of 1960. In 1972, the system became the California State University and Colleges (CSUC), and since then 16 of the 19 campuses have received the title of "university". Effective January 1982, the name of the system changed to the California State University.

The oldest campus, San Jose State University, was founded in 1857 and became the first institution of public higher education in California. The newest campus, California State College, Bakersfield, began instruction in 1970.

Responsibility for the California State University is vested in the Board of Trustees, whose members are appointed by the Governor.

The trustees appoint the Chancellor, who is the chief executive officer of the system, and the presidents, who are the chief executive officers on the respective campuses.

The Trustees, the Chancellor, and the presidents develop systemwide policy, with actual implementation at the campus level taking place through broadly based consultative procedures. The Academic Senate of the California State University, made up of elected representatives of the faculty from each campus, recommends academic policy to the Board of Trustees through the Chancellor.

Academic excellence has been achieved by the California State University through a distinguished faculty, whose primary responsibility is superior teaching. While each campus in the system has its own unique geographic and curricular character, all campuses, as multipurpose institutions, offer undergraduate and graduate instruction for professional and occupational goals as well as broad liberal education programs. Each campus requires, for graduation, a basic program of "general education—breadth requirements" regardless of the type of bachelor's degree or major field selected by the student. A limited number of doctoral degrees are offered jointly with the University of California and with Claremont Graduate School.

The program objectives of the California State University are:

1. To provide instruction in the liberal arts and sciences, the professions, applied fields which require more than two years of college education, and teacher education—both for undergraduate students and graduate students through the master's degree
2. To provide public services to the people of the State of California
3. To provide services to students enrolled in the California State University
4. To provide institutional services to support the primary functions of instruction, research, public services, and student services in the California State University and to ensure that legal obligations related to executive and business affairs are met

The locations of the 19 campuses show the statewide coverage of this, one of the largest baccalaureate degree higher education systems in the nation.

SIGNIFICANT PROGRAM CHANGES

The 1984–85 budget proposes a General Fund expenditure level of $1,149,014,000 representing a $201,019,000 increase (21.2%) over the 1983–84 operating budget. This expenditure level includes $99,961,000 in General Fund salary increase funds proposed for the 1984–85 budget year. Overall expenditures are proposed to increase to $1,792,369,000. The following table identifies the more significant budgetary changes included in the 1984–85 Governor's Budget for CSU:

Highlights of the 1984–85 Governor's Budget for the California State University [3]

Program	*Description*	*1984–85**
01	Instructional equipment	$9,000
01	Technical staffing for instructional programs	3,425
01	Supplies and services for instructional programs	2,000
04	Instructional computing	5,000
06	Faculty development, recruitment and retention	1,046
06	Deferred maintenance and special repairs	6,562
06	Student fee reduction	11,908
10	Unallocated salary increase funds	99,961

The 1984 Budget Bill further proposes to provide CSU with the authority to expend any 1983–84 General Fund budgetary savings in 1984–85 for deferred maintenance, special repairs or instructional equipment. This will allow CSU to more rapidly reduce the backlog in these areas.

01 INSTRUCTION

Program Objectives and Description

The California State University (CSU) educational program is designed to educate and grant degrees, credentials, or certificates to qualifed students in the liberal arts and sciences, and certain applied fields and professions. Through regular classroom efforts and special supplemental programs, the CSU program attempts to prepare students for a profession, occupation, or advanced study, or to update knowledge and upgrade skills. Although teaching activity may take place in other programs (e.g., the academic support program), formal study for credit toward a degree or certificate at higher education institutions usually falls within the instruction program.

Currently, the instruction program consists of three subprograms: regular instruction, special session instruction, and extension instruction.

Table I displays the changes in FTE and head count students on each campus for the past, current, and budget years. Table II provides similar information for other instruction program components: special session instruction (including summer session, external degree programs and special sessions) and extension instruction under the title Continuing Education. Table III displays the number of students involved in off-campus instruction.

In 1984–85, the budget proposes an increase of $2,069,000 for costs associated with the increase of 280 FTEs and enrollment changes.

Because of the budget constraints the last several years, several instructional areas have been underfunded. The 1984–85 budget proposes $9,000,000 for instructional equipment, $3,425,000 and 170.4 personnel years for technical staffing for instructional programs, and $2,000,000 for supplies and services for instructional programs. CSU will be developing a multi-year plan to address these problems, as well as identifying their magnitude.

The 1984–85 budget also reflects $23,000 in General Fund Revenues due to the third party financing of a cogeneration facility at San Jose State University. These revenues are a result of a unique benefit sharing agreement between San Jose State University and a non-governmental entity. This third party financing arrangement allows the State of California to take advantage of alternative financing for plant facilities and at the same time share in the savings that occur due to the more efficient cogeneration systems. While the revenues projected for 1984–85 are relatively small due to the recent start-up, more significant revenues are expected in future years from this project and several other projects in various stages of planning. In addition, site development and an energy management system costing $348,000 was provided to the campus by the private developer in 1983–84.

[1] Programs 01, 04, 05, and 06 are partially nonstate funded; programs 03, 07, and 09 are fully self-supporting.
[2] This summary includes expenditures, but not personnel years for auxiliary organizations.

01.01 Regular Instruction

The primary function of the California State University is the instruction of undergraduate and graduate students, through the master's degree level, in the liberal arts and sciences, applied fields, and certain professions. The regular instruction subprogram includes those instructional programs operating during the academic year that are part of a formal degree or certificate curriculum and are managed by the regular academic departments.

01.02 Special Session Instruction

The California State University operates summer sessions on all campuses except for the Pomona campus. (The Pomona campus is one of four campuses offering a state-supported summer quarter.) The special session instruction subprogram includes all programs that offer residence credit toward a formal degree or certificate. This is an essentially self-supported institutional term. Special Session Instruction and Extension Instruction (below) together form the continuing education instruction program. Table II displays total continuing education full-time equivalent students and enrollments.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

01.03 Extension Instruction

Extension instruction, primarily a nonstate-supported function and designed to serve a variety of needs, is offered year-round by the California State University. Within the field of continuing education, teacher education provides access for teachers to new techniques to improve instructional expertise. Courses are concentrated at the upper-division and graduate levels and are designed to satisfy school district and state credential requirements. The extension instruction subprogram includes all program elements that are managed separately by an extension division or similar agency within the system.

03 PUBLIC SERVICE

Program Objectives and Description

The public service program contains all the program elements within the institution that are directed toward the benefit of the general public. Programs that are controlled or operated by outside agencies but are housed or otherwise supported by the institution fall within the public service program.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements	–	–	–	*781*	*810*	*875*

04 ACADEMIC SUPPORT

Program Objectives and Description

The academic support program provides the library, audiovisual, data processing, and ancillary (e.g., college farms, marine science facilities) activities that are required to display, retain, and preserve materials and in other ways to assist the academic functions of the system.

In 1984–85, the budget proposes an increase of $5,000,000 in instructional computing, primarily to meet the increasing demand for student access to instructional computing facilities. Included is $643,000 and 8.7 personnel years to expand the computer aided design/computer aided manufacturing (CAD/CAM) facility at San Luis Obispo to serve six other campuses via a multi-campus network.

The $5,000,000 also includes $500,498 for replacement of local timesharing, $160,335 for related maintenance and $596,809 for local timesharing replacement software. Before any expenditure of these funds is made, CSU will submit its systemwide Information Systems Plan and Feasibility Study Reports for each campus replacement, and obtain Department of Finance approval.

Also included is $598,644 for microcomputers to support campus instruction. CSU will submit Feasibility Study Reports for the individual campuses and obtain Department of Finance approval before expending any of these funds.

Included in 1984–85 is $250,000 proposed for consultant and limited data center services to improve administrative computing. By March 1, 1984, CSU will submit a plan which identifies the total dollars needed to assist with establishment of improved planning, identification of general functional administrative systems requirements and determination of required changes in the Division of Information System. The plan will include clear checkpoints and deliverables, and evidence of high level interest and control.

In addition, the 1984–85 budget proposes to restore $1,126,000 and 31.4 personnel years reduced in the current year for library circulation activities.

04.01 Libraries

Library services consist of all activities which directly support the libraries of the 19 CSU campuses. The libraries provide the bibliographic and informational resources necessary to help carry out the teaching and research functions of the CSU. The expenditures required to support the library system include:

1. Collection, purchasing, processing (including cataloging and classifying), preserving, and exhibiting library materials which include: books, periodicals, kits, models, microforms, art objects, and a host of other items which comprise today's academic library.
2. Services—reference and referral services to students, faculty, and other system users, including institutions, i.e., interlibrary loans and other resource sharing.
3. Operations—management, supervision, training, planning, and equipment maintenance.

04.03 Audiovisual Services

Audiovisual services facilitate use of such resources as communication satellites and instructional television by the primary programs of instruction, research, and public service. Audiovisual services include materials preparation, and technical services.

Television is being used in some form at nearly all of the CSU campuses in a variety of applications and for professional curricula in broadcasting.

Continuing Education Revenue Fund	*2.6*	*1.8*	*1.8*	*65*	*38*	*38*

04.05 Computing Support

Although support to instruction is the principal responsibility of this element, funds are included to support both academic and administrative computing activities. Students are the largest users of CSU computing facilities. Computer support for instruction takes two forms: (1) training in computer and information sciences; and (2) using the computer as a tool for instruction and research in a number of academic programs.

The demand for specialists in computing technologies affords The California State University full opportunity to offer curricular programs in computer and information sciences at selected institutions serving large geographic areas. The goal of computing programs is to produce individuals both at the undergraduate and graduate level sufficiently competent in computer technology to meet the demand in this field.

Recognizing that computer support increases the quality of instruction in all fields, and that nearly all students need some knowledge of computing in order to enter a variety of occupations, CSU campuses will continue to provide exposure to the largest possible number of students. The goal of instructional usage in CSU is to make students especially knowledgeable in the use of modern information systems technology.

04.06 Ancillary Support

Certain professional instructional programs are much more effective when there are facilities for practical application of the principles taught in the classroom. There are several clinics, bureaus, centers and institutes that provide for such practical experience. For example, there are nursery schools at San Diego and San Francisco and campus farms at Fresno, Chico, San Luis Obispo, and Pomona, operated in conjunction with campus instructional programs.

05 STUDENT SERVICE

Program Objectives and Description

The student service program includes all activities related to the student body except for degree–related activities and student records. Activities in this program are designed to contribute to the student's physical well-being and to his or her intellectual, cultural, and social development outside of the context of the formal instruction program. Student service programs are supported by the General Fund (EOP and Disabled Students), the CSU student services fee, and through the self-supporting organizations. The self-supporting organizations provide food service, housing, and bookstores.

Continuing the policy that financial aid be provided for financially needy students, the 1984–85 budget proposes a General Fund appropriation of $13,441,000 for financial assistance to meet the needs resulting from the State University Fee first imposed in the Fall 1982 semester. Due to the $42 fee reduction proposed for 1984–85, the need for financial assistance is reduced by $1,559,000 from that proposed in the current year.

Special Adjustment—Cost of Living Increase						

05.01 Social and Cultural Development

Student activity programs in The California State University reflect the conviction that development of student potential in the social and cultural aspects of their lives is an important part of the overall educational objective. Opportunities are provided for students to educate themselves through active participation in college–sponsored activities. Informal programs of a cultural, social or recreational nature that complement and supplement academic disciplines are considered an essential part of this educational program because they foster an acceptance of responsibility and the development of effective human relations skills. Student self–government for example provides an opportunity to participate in representative government and obtain leadership training. Coordination of various student–sponsored events and special services to students is also a part of this program.

05.02 Supplementary Educational Services—Educational Opportunity Program

The State-funded CSU Educational Opportunity Program provides grants and support assistance for disadvantaged students as authorized by Chapter 1336, Statutes of 1969.

The 1984–85 Educational Opportunity Program enrollment level projection is 21,103. The staffing level for the Educational Opportunity Program is consistent with normal student enrollment changes.

Table V displays details of grants and of students served for the state-supported Educational Opportunity Program for 1982–83 through 1984–85.

05.03 Counseling and Career Guidance

Students needing professional counseling services may be aided in evaluating their educational objectives, strength of motivation, intellectual potential, and vocational and professional goals through this program.

The placement program provides occupational information and placement of students in professions for which they have been prepared. This responsibility includes the careful articulation between instructional programs and the changing professional needs of the business and government communities and follow-up on the placement of graduates. The placement office provides services to the student from the time he or she enters college until he or she is ready to enter full-time employment. The Testing Office administers and interprets and, when necessary, develops tests used by Counseling, Career Planning and Placement, and other student support services. It also administers academic placement and advance placement tests and conducts student profile surveys used in assessing the need for specific student support programs.

05.04 Financial Aid

Financial aid consists of information dissemination and counseling services, analyses of financial need, awarding and disbursement of funds, and other services established to provide financial assistance to students. This program reflects not only the cost of administering aid programs but also the amount of financial aid disbursed to students.

Financial aid offices provide information regarding the costs of college attendance, sources of availability of financial aid and students' rights and responsibilities under various financial aid programs. They are responsible for the administration of a complex program of student awards including scholarships, grants, fellowships, loans and employment designed to make it possible for students with financial need to initiate or continue their academic programs.

05.05 Student Support

Each campus maintains facilities for parking which are totally self-supporting. In addition, housing facilities are provided on 16 campuses. The special revenue funds are Dormitory Revenue-Housing and Dormitory Revenue-Parking.

As in all special fund operations, the parking program is maintained through the collection of revenue for the use of the facilities. Additional revenues are available from fines and forfeitures collected on the campuses. Construction is financed by special revenue bond issues which are liquidated from operating revenues.

The health services element of student support is concerned with the health and medical needs of students. Accordingly, the campus health centers are part of a total approach to the provision of comprehensive medical and health care.

Basic on–campus health services include: outpatient medical services; X–ray services; a clinical laboratory; physician–prescribed medicines; immunizations; first aid and emergency care; personal health supervision and counseling; health evaluation, and review; campus public health service; plus educational, and advisory, administrative, and supplementary services.

The Disabled Student program assists disabled students to realize educational goals and participate fully in campus programs and activities while maximizing their independence.

Included also within student support are special services such as the operation of bookstores, cafeterias, vending machines and other retail services which are provided to the student body. These services are tailored to the campus community and provide for student employment as well as contribute to the students' overall campus experience. All such services are provided on a self–supporting basis, at minimal cost to the students and others.

05.06 Cost of Living Adjustment

This budget contains $207,000 for the Cost of Living Adjustment for the Student Services Program. This amounts to a 3.0 percent increase for this program.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	–	–	$207

06 INSTITUTIONAL SUPPORT

Program Objectives and Description

The institutional support program consists of those activities within the institution that provide institutionwide support to the other programs for the day–to–day functioning of the organization. Activities within this program maintain the institution's effectiveness and continuity and ensure that the CSU system's operations are consistent with the public higher education policy as developed by the Legislature, amplified and interpreted by the Governor, administered by the Board of Trustees, and implemented by the Chancellor and the campus presidents.

Development of management policies and provisions of communication, personnel, payroll, purchasing and inventory control, accounting, budgeting, legal, and other services are provided in this program.

Because of the sharp fee increases the past few years and the improving State economic and revenue situation, the 1984–85 budget proposes to reduce the State University Fee to $650 per full-time student. The General Fund will be assuming responsibility for funding the financial aid currently provided by student fees. This $42 fee reduction will reduce fee reimbursements by $11,908,000 and thereby increase General Fund costs. This fee proposal is consistent with fee policies recommended by the California Postsecondary Education Commission and Chapter 785, Statutes of 1983 (AB 1251).

In addition, the 1984–85 budget proposes an increase of $6,600,000 for deferred maintenance and special repairs. This augmentation is the first year of a five-year plan to eliminate the current backlog of deferred projects.

The 1984–85 budget also proposes $1,046,000 for faculty development, recruitment and retention.

06.01 Executive Management

This subprogram consists of all central executive-level activities concerned with the management and long-range planning of the entire system. Campus presidents, appointed by the Board of Trustees, have responsibility over all campus matters. The trustees' audit staff reports directly to the Board and is responsible for ongoing independent audit operations. Physical planning and development includes programming, planning, direction and operation of a statewide plan for the development of physical facilities. Budgeting is concerned with the planning, coordination, preparation and review of support budgets. Also included is legal services, the Academic Senate (faculty representation) and the institutional research unit.

06.04 Logistical Services

Purchasing, inventory, and property control involve preparation of specifications, preliminary negotiation of contracts and leases, preparation of procurement documents, receiving and checking deliveries, preparing stock-received reports, identifying and labeling all equipment, maintaining adequate supply inventories, taking periodic physical inventories, and providing for the maintenance and repair of equipment. Also included is the maintenance and operation of campus utilities and motor vehicles and the environmental health and safety of the staff and students.

06.05 Physical Plant Operations

The plant operation and maintenance element includes all activities necessary to maintain the physical facilities of the campuses. The total existing building square footage under custodial care for the system is 24.4 million square feet. Maintenance of electrical, heating, and plumbing systems, making repairs, painting, grounds maintenance and janitorial services are required for support.

06.06 Faculty and Staff Services

This program element consists of the budget allotments for overtime, evening and night shift differential, and nonfaculty reclassifications and related faculty and staff service items. This also includes the staff benefits of OASDI, Retirement, Health and Welfare, Workers' Compensation, unemployment compensation, Industrial Disability Leave and Nonindustrial Disability Insurance. Identification of these expenditures facilitates budgetary control.

07 INDEPENDENT OPERATIONS

Program Objectives and Description

This program contains special projects that are sponsored and financed by agencies of the federal government, state government, local community, private and public foundations, and business and industry. The objectives of these projects are prescribed by the sponsoring agency and are independent of the education mission of The California State University. However, significant benefits do accrue to the campus community and the instructional program. These specialized services are provided on a fully reimbursed basis.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	1,142.4	1,644.2	1,065.2	$48,213	$50,691	$53,709
General Fund	–	–	–	*–722*		
Reimbursements	*1,114.7*	*1,627.2*	*1,048.2*	*43,919*	*49,753*	*52,544*
Federal Trust Fund[1]				*4,028*	–	
Parking Account, Dormitory Revenue Fund	*27.7*	*17*	*17*	*850*	*938*	*1,165*
Continuing Education revenue Fund	–	–	–	*138*	–	–

In 1984–85, the budget proposes to reduce Independent Operations by 579 personnel years. This reduction reflects a reduced level of Federal grants and contracts, and a trend of using personal contracts to perform grant related work. An appropriate dollar reduction will be incorporated later when actual experience can be better assessed and accurately reflected.

09 AUXILIARY ORGANIZATIONS

Program Objectives and Description

Auxiliary organizations are campus-based separate legal entities authorized by the Legislature to perform functions that contribute to the educational mission of the university or college, as well as provide essential services to students and employees.

These organizations are governed by applicable laws and regulations of the federal and state governments. In addition, they operate within the policies established by the Board of Trustees, the Chancellor and campuses. There are 60 auxiliary organizations with two to five per campus. Most of these organizations can be grouped into four major functional categories:

a) Associated student organizations
b) Special educational projects which are typically administered by foundations
c) Student union operations
d) Commercial activities

The auxiliary organizations must be self-supporting and do not receive funding from General Fund sources. They derive revenue from various non-state sources such as contractual arrangements (e.g., federal government), general assessments (e.g., student body fees) and commercial operations (e.g., bookstore). Pursuant to existing laws and policy, materials, facilities, or services provided by the campus to these separate entities are paid for by the auxiliary organization. Revenue in excess of expenditures for a given fiscal period is used to establish working capital and reserves, and pay for capital expenditures or special campus programs.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	$229,300	$240,700	$253,100

10 UNALLOCATED SALARY INCREASE

This Program is to provide the CSU Board of Trustees funding which will allow a 10 percent increase in salaries and benefits for CSU employees. This program also proposes a January 1, 1985 salary adjustment for CSU faculty which will provide a 1984–85 ten percent increase in salaries, with the first part of this two-part increase to be effective July 1, 1984 and the final part on January 1, 1985.

Major Projects			
06.86.074 Moss Landing Marine Laboratories	$1,863 [Cg]	$114 [Cg]	$148 [WCEg]
Project will provide construction of site development, soil erosion, dune restoration and parking as required by the California Coastal Commission in its issuance of a permit to construct the Moss Landing Marine Laboratory Facility. Also, the project provides the first and only phase of equipment to equip the increment of expansion of the facility. The construction of the laboratory is scheduled for completion in December 1983.			
06.48.312 Architectural and Engineering Planning and Studies	143 [Wg]	–	–
06.48.313 Preliminary Planning	10 [Wg]	–	200 [Pg]
Funds are requested for preparation of schematic plans for projects scheduled for working drawing or construction funds in 1985–86.			
06.48.136 Remove Architectural Barriers to the Handicapped	–	–	2,634 [WCg]
These funds will be used to remove architectural barriers to the handicapped as mandated by the requirements of Section 504 of the Rehabilitation Act of 1973 and Chapter 2 of Title 24, California Administrative Code. The request includes projects carried forward from the 1981–82, 1982–83 and 1983–84 Capital Outlay Programs.			
Minor Projects

06.48.137 Matching Funds for Federal Schools and Hospitals Grant Program	–	–	500 [WCg]
Funds are requested for matching anticipated federal grants for energy conservation projects identified in the technical energy audits funded by the federal Department of Energy under Grant Cycles II, III and IV. These funds will allow eight campuses to participate in Grant Cycles V and VI anticipated in fiscal year 1984–85.			
06.48.138 Studies for Cogeneration, Energy Management Systems and Other Energy Projects	–	–	120 [Pg]
Funds are requested for economic feasibility studies for cogeneration, energy management systems, alternate energy projects, building energy efficiency improvement projects, central plant efficiency projects and utility distribution efficiency improvement projects. The studies will determine the most advantageous program for the implementation of the projects and will produce payback information necessary for the future funding of the projects.			
06.48.139 Systemwide Library Study	–	–	100
Funds are requested for a comprehensive study of library utilization, space use and operations to establish criteria which will permit evaluation of capital outlay proposals related to new facilities, remodeling of existing space and equipment needs.

06.64.060 Modify Fine Arts Laboratory Ventilation System	$11 Cg	$6 Cg	$268 Cg
This project will provide exhaust hoods and modify the existing ventilation systems in the welding laboratory and related areas to meet code requirements.			
06.64.061 Energy Management System	11 Ph	458 PWCf	503 PWCg
This project will provide a computer coupled with one or more data printers to control all utility systems on campus. The system will have the capability to turn on and shut down heating, ventilating and air conditioning, irrigation, lighting and other energy systems on a predetermined basis. It will control the firing rates of high pressure boilers for the most economical utilization of fuel.

06.67.062 Remodel Engineering Building (Van Matre Hall)	$37 WCg	$669 Cg	$110 Eg
This project completes the remodeling of the existing engineering building to provide a laboratory capacity of 28 FTE for Geology and expansion for the Computer Center and at the same time, eliminate conditions which do not comply with present safety requirements. Included was miscellaneous remodeling in Founders Hall. The project remodeled approximately 16,500 gross square feet.			
06.67.070 Remodel Science Building	–	–	764 PWCEg
Project will remodel approximately 4,800 square feet in the Science Building vacated by Biology to provide 28 laboratory FTE for Chemistry, a general science laboratory with 8 FTE capacity, as well as minor remodeling for Biology. The net increase in laboratory capacity is 22 FTE.			
06.67.063 Stabilize Founders Hall Slope	17 PWg	–	–

06.80.093 Old Library Rehabilitation	$114 Wg	–	$2,765 Cg
This project will bring the Old Library Building up to current building code standards, modernize the facilities, and convert it to permanent instructional facilities for the Engineering, Public Health and Nursing disciplines. The completed project will include a capacity of 54 FTE in laboratory space, 144 lecture FTE and 52 faculty offices. The project contains 22,075 assignable square feet and 35,734 gross square feet.			
06.80.101 Modify HVAC System in Computer Center for Energy Conservation	–	–	258 WCg
Installation of a 40-ton independent air conditioning system to service the computer center instructional laboratories will permit an additional 2,700 hours per year shutdown of the main 350-ton steam absorber chiller in the Business Administration/Mathematics Building. The project will return its original investment in approximately 3 years by a reduction in the utility expenditures.			
06.80.058 Physical Science Building Rehabilitation	–	–	159 PWg
Project will rehabilitate the Physical Science Building and bring it up to current building standards including seismic and modernize the existing instructional space and faculty offices. After rehabilitation, it will accommodate 722 FTE in lecture, 42 FTE lower division laboratories, 17 FTE in upper division laboratories and 25 faculty offices. The project contains 21,300 assignable square feet with a gross area of 34,750 square feet.

Major Projects			
06.84.057 Modify Nine Academic Buildings to Meet Fire Code Requirements	$48 Wg	$1,000 Cg	–
06.84.070 Fire Suppression System and Unsafe Structure Demolition to Meet Fire Marshal Requirements at Tiburon Center	–	–	$395 WCg
This project will provide a water system for adequate fire protection of the 35 acre site and improvements. Also, the project will demolish building Nos. 12, 51, 55, 58, 60, 66, 70 and the north docks. These structures have no potential use and have been cited by the Fire Marshal as safety hazards.			
06.84.042 Convert Science Building	1 Cg	9 Cg	1,320 Cg
Project will convert and remodel obsolete and surplus space in the Old Science building to laboratories for Nursing, Anthropology, Journalism, Art and Archeology. The project replaces 60 faculty office stations from the Business Building and renovates mechanical systems. The building contains 76,904 assignable square feet and 114,638 gross square feet.			
06.84.073 Remodel Business Building	–	–	84 PWg
Project will remodel 15,500 square feet of the existing Business and Social Science Building to provide laboratories and other specialized facilities for the School of Business. A major part of the architectural work consists of rearranging interior partitions and constructing eight tiered seminar and laboratory rooms. Mechanical and electrical systems will be adjusted to accommodate the partition changes.

Major Projects			
06.96.072 Convert Library	–	–	$2,425
Project will convert the existing library to 170 FTE in laboratory capacity for Architecture and Environmental Design and Art, 256 lecture FTE and 51 faculty offices. The building will contain 54,277 assignable square feet when converted and has a gross area of 84,100 square feet.			
06.96.093 Agriculture Science Building	–	–	360 [PWg]
The project will provide lecture capacity for 122 FTE students, laboratory capacity for 103 FTE students in Agricultural Science (Crop Sciences, Animal Science, Natural Resources and Ornamental Horticulture) and 50 faculty offices. The building will contain 28,320 assignable square feet and 46,000 gross square feet.			
06.96.000 Engineering South	$287 [Cg]	$8,622 [Cg]	–
06.96.082 Energy Management System	4 [PWh]	300 [PWCf]	323 [PWCg]
This project (Phase I) will provide a computer coupled with data printers to control all utility systems on campus. The system will have the capability to turn on and shut down heating, ventilating and air conditioning, lighting and other energy systems on a predetermined basis.

6860 CALIFORNIA MARITIME ACADEMY

The California Maritime Academy was established in 1929 to educate officers for the United States Merchant Marine. The program has been broadened to provide well-trained, college-educated officers for the maritime industry.

The Academy offers a four-year program attended by students 11 months per year including an annual three-month dockside exercise and cruise aboard the Golden Bear training ship. The students operate the ship under the supervision of the licensed merchant marine officers who comprise the majority of the faculty. These cruises enable students to meet U. S. Coast Guard regulations for time required at sea, and learn actual ship handling under operating conditions.

Responsibility for the Adademy is vested in the Board of Governors who are appointed by the Governor. The Board has adopted the following statement as the goal of the Academy:

". . . To provide instruction in the nautical sciences, marine engineering and related fields, including all those necessary to provide the highest quality officer for the American Merchant Marine and California industries and licensing therein."

Inherent in the goal of the Academy are the following objectives:

1. To educate each student in an accredited college program in nautical science, marine engineering and related fields.
2. To train each student in the skills and knowledge essential to licensing in the American Merchant Marine.

SIGNIFICANT PROGRAM CHANGES

The 1984–85 Budget proposes an overall expenditure level of $7,068,000 representing a $553,000 increase (8.5%) over the 1983–84 operating budget. This proposed expenditure level does not include any 1984–85 salary increase funds which are reflected in the Employee Compensation Budget (9800).

General Fund expenditures proposed for 1984–85 reflect a $572,000 increase (18.4%) over 1983–84. This increase is primarily attributable to the change in the funding source for instructional equipment, special repairs and deferred maintenance projects from the Capital Outlay Fund for Public Higher Education (COFPHE) to the General Fund. The following table identifies the more significant budgetary changes included in the 1984–85 Governor's Budget for CMA:

Highlights of the 1984–85 Governor's Budget for the California Maritime Academy

Program	*Description*	*1984–85* *
01	Establishment of the Continuing Education Revenue Fund	$127
40	Rehabilitate Main Pier	$205

10 INSTRUCTION

Program Objectives and Description

The instruction program provides general education classes and specialized courses to prepare students for careers as licensed officers in the merchant marine and the maritime industry. The curriculum provides for specialization in either nautical industrial technology or marine engineering technology. A list of options in related fields is available covering: Marine Business Management, Maritime Specialities, Computer Science, Instrumentation and Automation, Ocean Technology, Naval Architecture Technology, Nuclear Technology and Naval Science. Satisfactory completion of the academic program and successful performance on the U. S. Coast Guard license examination enables a student to graduate from the four-year program with a Bachelor of Science degree in one of the specialities. Graduates are eligible for reserve commissions in the U. S. Navy or U. S. Coast Guard and, after passing U. S. Coast Guard examinations, are licensed as third mates or third assistant engineers in the merchant marine.

The Academy has been granted academic accreditation by the Western Association of Schools and Colleges and professional accreditation by the Accreditation Board for Engineering and Technology and the National Association of Industrial Technology.

Chapter 1181 of 1983 (SB 443) established the California Maritime Academy Continuing Education Revenue Fund. The legislation requires that all revenues received by the Board of Governors of the California Maritime Academy from extension programs and other self-supporting instructional programs be deposited in this Fund and used for the support and improvement of these programs.

The 1984–85 Governor's Budget reflects this legislation under Continuing Maritime Education. The expenditures for these self-supporting instruction activities have previously been included in reimbursements. Accordingly, reimbursements in Continuing Maritime Education have been shifted to the Continuing Education Revenue Fund.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

20 ACADEMIC SUPPORT

Program Objectives and Description

To provide professional admissions and registration services in support of the Academy's instructional program. Support services also include operation of the library and routine maintenance of the training ship in port and at sea. A staff of skilled technical personnel instruct and assist students in performing the tasks required to operate and maintain the ship.

Reimbursements						

20.20 Ship Operations

Ship operations provides the basis for practical seamanship, navigation and marine engineering instruction to all students. This includes daily operation and maintenance of the training ship, waterfront facilities, and all assigned small craft. An annual training-at-sea trimester is normally conducted in the months of January, February and March to provide the practical shipboard training necessary to meet Coast Guard licensing requirements. Annual shipyard overhaul and repair of the vessel is paid by the U.S. Maritime Administration (MARAD) and is not included in this budget.

30 STUDENT SERVICES

Program Objectives and Description

Included in this program are financial aid, health support, housing, and food. These are needed to support students, all of whom are required to live on campus.

The Academy's daily routine provides residence facilities and meals for the students on nearly a year-round basis. This continuing requirement is interrupted three times during the year: winter recess (two weeks); spring recess (one week); and summer recess (three weeks). Fourth-class students remain on campus during the sea training trimester to receive additional academic instruction.

Beginning July 1, 1982, Maritime Administration subsidies payable to students are provided directly to students rather than flowing thru the Academy. The phased in approach to this change in program which is anticipated to be completed in 1984–85 results in a $135,600 annual reduction of payments from the Federal Trust Fund.

Elimination of the Public Health Service by the Federal Government prompted the Academy to institute a health insurance plan. The cost of the program is covered through student fees.

Authority

Education Code Sections 26054, 26055.

40 ADMINISTRATION

Program Objectives and Description

The institution requires executive management to direct the activities of the various departments. The administrative staff and plant operation personnel provide the necessary ancillary services in support of the training program provided for students. The 67-acre campus contains one classroom building, faculty office building, two residence halls, student commons building, engineering and laboratory building, combination auditorium/lecture hall, dining hall, gymnasium, seamanship building, library and administration building, radar simulation laboratory, and a corporation yard, which require continuous maintenance and upkeep.

The 1984–85 Budget proposes $205,000 to provide funding for the rehabilitation of the main pier which provides anchorage berthing facilities for the CMA training ship.

6870 BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES

The Board of Governors of the California Community Colleges was established by Chapter 1549, Statutes of 1967, to provide statewide leadership to the public community college segment of California higher education.

The Board has 15 members appointed to four-year terms by the Governor with the advice and consent of the Senate. The Board's headquarters is in Sacramento, headed by a chancellor appointed by the Board. The agency operates with administrative, professional, and clerical staff.

The objectives of the Board are:

1. To give direction, coordination, planning, and leadership to California's Community Colleges.
2. To promote quality education in community colleges.
3. To improve district and campus programs through informational and technical services on a statewide basis, while recognizing the community oriented aspect of California's network of 107 community colleges.
4. To seek adequate financial support while ensuring the most prudent use of public funds.

Program performance data for this department may be retrieved from the California Fiscal Information System.

SIGNIFICANT PROGRAM CHANGES

Program	*Description*	*Personnel Years*	*Dollars**
	1984–85		
10	Adjustments for increased prices for apportionments	–	$9,961
20	Financial aid	–	10,000
	Deferred maintenance	–	4,000
	Adjustments for increased prices for categorical programs	–	1,428
	Improve monitoring of college programs	7	340
	1983–84		
10	Restore spring semester funding 1984	–	50,000

As a result of a disagreement between the legislature and the administration regarding implementation of a general student fee for those students financially able to pay, the community college districts funding in 1983–84 was approximately $97 million below their 1982–83 level. In order to prevent an educational hardship on all community college students the administration will be proposing special legislation early in the 1984 session to provide $50 million which is the estimated amount required to meet funding needs of the districts in the spring 1984 semester. This amount is included as a proposed general fund expenditure in 1983–84.

10 COMMUNITY COLLEGE APPORTIONMENTS

Apportionments of State Aid

Program Objectives and Description

This program includes the preparation of reports and the collection of a wide range of data from California Community Colleges for certification of the apportionments to be paid to each district. The largest apportionment of State funds is based on units of average daily attendance (ADA) of students in each community college district. An ADA in community colleges represents 525 hours of classroom or related instruction. Major State funding of community colleges is achieved through the transfer of funds from the General Fund to Section B of the State School Fund.

State aid for community colleges during 1981–82 and 1982–83 was determined by AB 1626 and AB 1369 (Chapters 103 and 1178, respectively, Statutes of 1981) formula calculations which superseded the procedures established by AB 8 (Chapter 282, Statutes of 1979). The 1981–82 budget appropriated $1,036 million to fund community college finance legislation including up to $9.9 million for apprenticeship training. This amount, when combined with the 1981–82 property tax receipts of community college districts funded a 5% COLA for regular apportionments and a 1.9% increase in ADA. Included in the 1981–82 estimated property tax receipts of community college districts was $60.1 million in one-time 1978–79 unsecured roll property tax revenues which previously had been "frozen" by Chapter 1354/80.

In 1982–83, the Budget replaced the $60.1 million property tax revenues from the 1978–79 unsecured roll with General Fund aid but reduced apportionments by $38.3 million to offset anticipated increased district property tax revenue. Because of severe limitations on General Fund resources, no funds were provided for general ADA growth in 1982–83. However, $1.9 million was included in 1982–83 for targeted funding of growth ADA in employment-based job training programs. In addition, the 1982–83 Budget eliminated funding for $30 million worth of avocational, recreational and self-improvement courses more appropriately supported solely by fees.

AB 1626 and AB 1369 sunsetted on June 30, 1983 and no succeeding community college finance law had yet been enacted when the 1983–84 Governor's Budget was introduced in January of 1983. Prior to enactment of the Budget, however, the Legislature passed to the Governor SB 851 which prescribed a system for allocating funds apportioned for community colleges in 1983–84 and beyond.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

6870 BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*

For 1983–84, the Governor's Budget proposed the funding level provided in 1982–83 from a combination of State General Fund, local property tax revenues and a new community college fee charged to all community college students. The fee proposed was $50 per semester for students enrolled in six or more units and $30 per semester for those enrolled in fewer than six units. Although that $100 annual fee was substantially less than the $500 annual national average fee charged by comparable two year public institutions, it would have ensured that community college students share in the cost of their education. In addition, the Governor included $10 million in additional student aid funds to offset the impact of a fee on needy students.

The Legislature rejected the proposed fee, however, and augmented the Budget Bill by $230.4 million to replace the proposed fee revenue, provide a six percent cost-of-living adjustment, funded a two percent growth in ADA and fund equalization as provided for in SB 851. This augmentation was subsequently vetoed by the Governor because the Governor believed that it was reasonable and proper to expect financially able students to make a nominal contribution toward the funding of their education in return for the expense being borne by the State's taxpayers.

In discussing the total community college program both State and local revenues must be taken into consideration. Refer to the Program Summary Table below. The 1984–85 Governor's budget recommends a program increase in financial terms of $191.9 million over the approved 1983–84 budget which is an increase of approximately 15 percent.

Funds currently available for Community College apportionment consist of $923 million in State funds ($919.5 million General Fund and $3.9 million State School Fund) and $392 million in local revenues for a total of $1,315.4 million. The Governor is proposing an immediate augmentation of $50 million from the General Fund through special legislation in 1983–84 to raise total 1983–84 funding to $1,365.4 million. In the Governor's 1984–85 Budget it is further augmented by $141.9 million for a program total of $1,507.3 million. The source of funding for the 1984–85 augmentation of $141.9 million is: increase in local revenues of $58 million; decrease in General Fund of $11.1 million and imposition of a general student fee which is estimated by the Chancelor's Office to provide $95.0 million.

In the Chancellor's Office two auditors and a half-time office assistant are proposed to improve State audit review and resolution at a cost of $85,000.

20.10 Student Services

This element serves the needs of the economically, culturally, or physically disadvantaged students who require assistance to participate more fully in, and benefit from, a college education. This assistance includes financial aid, and mobility and educational aids for the disabled among other services.

Element Components		82–83	83–84	84–85	1982–83*	1983–84*	1984–85*

20.10.010 Extended Opportunity Programs and Services

The EOPS program provides assistance to students who are disadvantaged because of social, language or cultural background, or because of economics. The primary objective of the program is to help disadvantaged students reach full potential and build persistence and grade-point averages sufficiently to enable them to compete equally with others for jobs or to transfer to a four-year institution. EOPS funds are used for a variety of purposes including student financial aid, counseling and in-service training for instructors.

AB 3103, Chapter 1029, Statutes of 1982 transferred $250,000 from the Employment Development Department to the Chancellor's Office for funding of the Cooperative Agencies Resources for Education (CARE) program beginning in 1982–83. Through the joint participation of the Chancellor's Office, the Employment Development Department, the Department of Social Services, county welfare departments and community college districts, the CARE program coordinates and targets the services of these agencies for welfare recipients who wish to become self-supporting through the acquisition of a job-related education. The 1984–85 Budget includes $475,000 for the CARE program. Of that amount, $25,000 has been allocated to fund expenses incurred by the Chancellor's Office in administering the program and $450,000 has been allocated for local assistance through the EOPS program.

This component also administers the Chancellor's Office Tax Offset Program (COTOP), which works with the Franchise Tax Board to offset State income tax refunds against defaulted student loans. A service fee is deducted from the proceeds remitted to the districts. *For 1984–85 the Governor's Budget proposes to add $10,000,000 for student financial aid and $747,000 for a 3% cost of living adjustment.*

6870 BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*

20.10.020 Disabled Students

The goal of the Disabled Students component is to assist persons who are handicapped by a physical, communication or learning disability to gain access to and persist in acquiring the training needed to succeed in college and in productive employment. State funds over and above regular apportionments are allocated to community colleges to cover the direct excess costs of providing special facilities and services. *The Governor's Budget proposes a 3% cost of living adjustment totaling $656,000 for 1984–85.*

20.10.030 Student Affirmative Action

In order to ensure that all persons, regardless of gender, ethnicity, disability or other minority status are provided equal opportunity in obtaining an education at the community college level, Chancellor's Office staff provides guidelines to the districts in developing and implementing affirmative action policies and procedures. In addition, districts are monitored and advised on the operation of their affirmative action program. Chapter 1179/81 appropriated $254,556 for 1981–82 and $111,000 for 1982–83 from the Fund for Instructional Improvement for the purpose of financing three student affirmative action projects designed to increase the transfer rate among underrepresented students attending community colleges. That legislation also required the California Postsecondary Education Commission to report to the Legislature by December 31, 1983 on the effectiveness of the pilot projects.

20.20.010 Faculty and Administrative Credentials

Administrators and teachers in California Community Colleges are required to obtain teaching credentials. The credentials office administers this program which involves the review and processing of applications, as well as the revocation and reinstatement of credentials as prescribed by law. An application fee is charged for this service and the revenue collected is used only to fund the credentialing operation. Because of inflationary increases in the cost of operations, Chapter 1374/80 raised the maximum fee from $20 to $30 per application, effective October 1, 1980.

20.30.010 Program Curriculum Evaluation and Approval

This component concerns the approval of educational master plans and programs and guidance to community colleges in developing and implementing quality instructional programs.

To improve monitoring of college course offerings, two specialists costing $108,000 are proposed for 1984–85.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	7.4	7.3	8.2	$573	$656	$905

Reimbursements				*28*	*42*	*44*

20.30.020 Instructional Improvement and Innovation

This component provides grants and loans to community colleges engaged in projects of innovative and nontraditional methods of instruction as authorized by Chapter 714, Statutes of 1977. The program began as an instructional improvement project in 1977–78.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	2	1.9	1.9	$1,096	$1,062	$1,074
General Fund				*885*	*878*	*890*
Community College Fund for Instructional Improvement				*211*	*184*	*184*

20.30.030 Vocational Education

The activity of this component is conducted in accordance with an interagency agreement with the State Department of Education, recipient of Federal Vocational Education Act funds. The objectives are to plan, coordinate and service occupational and technical programs in the colleges and to administer allocations of federal funds to districts on an entitlement basis.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

6870 BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES—*Continued*

20.40 Physical Plant Planning, Operations and Development

To ensure that adequate space is provided for the instruction and administrative activities of the community colleges, staff of this element assist in providing for the necessary construction and maintenance of facilities.

Element Components	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
20.40.010 Facilities Operations	7.3	6.8	6.3	$604	$386	$486

Reimbursements				*69*	*28*	*28*

20.40.010 Facilities Planning

Facilities Planning maintains and annually updates the five-year capital outlay program for the 107 community colleges. The staff reviews plans and assists in programming and planning construction projects, reviews new campus site proposals and updates facilities inventories for all community colleges.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	7.3	6.8	6.3	$604	$386	$486
General Fund				*535*	*358*	*458*
Reimbursements				*69*	*28*	*28*

20.40.020 Deferred Maintenance

Frequently, community colleges' budgets are insufficient to cover certain maintenance and repair items. In such situations, the state may provide financial assistance to applicant districts to ensure the continuing integrity and usability of their buildings. Applicant districts must, however, match State funds to be eligible for State deferred maintenance assistance. *For 1984–85 one construction analyst, costing $39,000, is proposed to help monitor this function in addition to a $4 million augmentation for deferred maintenance.*

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

General Fund						*8,000*
Capital Outlay Fund for Public Higher Education				*4,572*	*4,000*	–

30 ADMINISTRATION

Program Objectives and Description

The Administrative unit carries out the decisions of the Board of Governors, represents the interest of all California Community Colleges and informs State and local government as well as the public about status and goals of statewide planning.

The Board of Governors establishes policy direction for the Chancellor and his staff, the 70 Community College districts and the 107 colleges they maintain. The Board's headquarters is in Sacramento, but its meetings are held in locations throughout the State.

The Chancellor's Office is responsible for carrying out all laws which establish the responsibilities for the Chancellor, and for carrying out the policy of the Board of Governors. These functions are supported by a legislative and public affairs unit, a legal unit, a policy analysis and research unit as well as the usual budgeting, accounting, personnel, affirmative action and business services units.

For 1984–85, additional Teale Data Center services totaling $17,000 and a half-time intermittent key data operator costing $12,000 will provide for increasing informational demands by the Legislature, the Administration and the Board of Governors. And $25,000 is proposed for needs analysis for office system enhancements. Provision is also made for $21,000 in contract services to monitor pending federal legislation in community college program areas.

6870 BOARD OF GOVERNORS OF THE CALIFORNIA COMMUNITY COLLEGES

STATE BUILDING PROGRAM EXPENDITURES	Actual 1982–83*	Estimated 1983–84*	Proposed 1984–85*

General Analysis

There are 106 community colleges organized into 70 districts serving the entire State of California from Eureka and Weed in the north to Chula Vista and Imperial in the south, from San Francisco in the west to Lake Tahoe and Blythe in the east. Classes are also offered at close to 3,000 different off-campus locations.

In prior years, money for state support of the Community College Capital Outlay Program came from voted bond issues, 1965 through 1974–75, and the Capital Outlay Fund for Public Higher Education (COFPHE), 1975–76 through 1983–84. Matching shares, as required by the Community College Construction Act of 1967 were raised by the districts through permissive taxes and local voted bonds or tax overrides. Proposition 13, approved by the electorate June 6, 1978, has virtually eliminated the ability of a district to raise its matching share of a project, and money to continue projects already begun came from reserves or special legislation. District funds for capital outlay are now in short supply.

In recognition of the need to provide a varying percentage (up to 100%) of state funding of a community college capital outlay project, the Legislature enacted the new Community College Construction Act of 1980. This new Act requires the Chancellor of the California Community Colleges to determine respective state and district shares of a project, as prescribed by formula, with the provision that if the district funds available are insufficient to provide the district matching share for the cost of a project or one or more of its phases, the district is to provide the monies available, as defined by provision of the Act, and state funds may be requested to provide the balance of funds, up to 100%, of funds required.

The 1984–85 Capital Outlay Program is designed to correct health and life safety deficiencies, including projects to remove critical architectural barriers to the physically disabled in keeping with State and Federal requirements, to make existing state funded facilities operable, and projects to meet the critical capacity and program space deficiencies at existing campuses and the planning and development of emerging new campuses.

40.21.010 Imperial Valley College			
40.21.010.020 Nursing education and health technology building	–	–	74 [Wg]
This project will provide teaching laboratories and offices for nursing. The building will contain 5,846 assignable square feet.			
40.22 Kern Community College District	3,529 [g]	347 [g]	
40.23 Lake Tahoe Community College District	–	–	1,246 [g]
40.23.010 Lake Tahoe College			
40.23.010.010 Site development	–	–	933 [WCg]
This project will provide the rough and finish grading, utilities including sewer, gas, water, and electrical, main entry road and bike path, and road and path lighting for the permanent campus.			
40.23.010.020 Permanent buildings, Phase I	–	–	313 [Wg]
This project will provide classrooms, offices, and teaching laboratories for business, mathematics, computer sciences, and fine arts. Will also include library student, stack, and service areas audio visual distribution and service areas, and administrative offices. The building will contain 40,670 assignable square feet.			
40.25 Long Beach Community College District	122 [g]	–	–
40.26 Los Angeles Community College District	–	–	4,682 [g]
40.26.010 East Los Angeles College			
40.26.010.010 Removal of architectural barriers to the physically handicapped, phase II	–	–	158 [Cg]
This project will provide an elevator, a chair lift, three minor ramps with handrails, curb cuts, drinking fountains and modifications of doors and restrooms for the physically handicapped.			
40.26.020 Los Angeles City College			
40.26.020.010 Removal of architectural barriers to the physically handicapped, phase II	–	–	304 [Cg]
This project will provide an elevator, modification of two other elevators, five minor ramps, and modifications to restroom and shower facilities for the physically handicapped.			
40.26.020.010 Removal of architectural barriers to the physically handicapped, phase III	–	–	187 [Cg]
This project will provide two elevators for the physically handicapped.			
40.26.030 Los Angeles Harbor College			
40.26.030.010 Removal of architectural barriers to the physically handicapped, phase II	–	–	82 [Cg]
This project will provide three minor ramps and eight pairs of automatic doors for the physically handicapped.			
40.26.060 Los Angeles Pierce College			
40.26.060.010 Removal of architectural barriers to the physically handicapped, phase II	–	–	132 [Cg]
This project will provide sixteen minor ramps, a power-assisted door closer, and the modification of one restroom.			
40.26.060.010 Removal of architectural barriers to the physically handicapped, phase III	–	–	146 [Cg]
This project will provide an elevator for the physically handicapped.			
40.26.060.020 Alterations and additions to auto shop	–	–	828 [WCEg]
This project will provide teaching laboratories and an office for auto mechanics. The addition will contain 4,248 assignable square feet.			
40.26.070 Los Angeles Southwest College			
40.26.070.010 Removal of architectural barriers to the physically handicapped, phase II	–	–	245 [Cg]
This project will provide a chair lift, sixteen minor ramps with handrails, two drinking fountains, and modifications to eleven restrooms for the physically handicapped.			
40.26.070.010 Removal of architectural barriers to the physically handicapped, phase III	–	–	183 [Cg]
This project will provide an elevator for the physically handicapped.			
40.26.080 Los Angeles Trade-Tech College			
40.26.080.010 Removal of architectural barriers to the physically handicapped, phase II	–	–	334 [Cg]
This project will provide two elevators, four minor ramps, a chair lift, curb cuts, new handrails, and modifications to thirteen restrooms for the physically handicapped.			
40.26.080.010 Removal of architectural barriers to the physically handicapped, phase III	–	–	149 [Cg]
This project will provide an elevator for the physically handicapped.

7970 CALIFORNIA STUDENT LOAN AUTHORITY

The California Student Loan Authority was created with the passage of AB 1942 (Chapter 1357, Statutes of 1980). The Authority is a public instrumentality of the State composed of three voting members (the State Treasurer, the State Controller, and the Director of Finance) and two ex officio non-voting members (the Directors of the California Postsecondary Education Commission and the Student Aid Commission).

The Authority was established for the purpose of issuing revenue bonds to purchase federally reinsured student loan notes from eligible lending institutions, thereby assisting in the expansion of student access to these low-cost federally reinsured educational loans. For this purpose, the Authority was authorized to issue tax exempt revenue bonds in an initial amount of $150,000,000. *Chapter 1303, Statutes of 1983 subsequently increased the Authority's debt limit to $300,000,000.*

The law specifically provides that bonds issued shall not be a debt or liability or a pledge of the faith and credit nor the taxing power of the State or any of its political subdivisions. This is a trust activity and involves no State revenues or expenditures. All expenses must be paid from revenues and other moneys available to the Authority.

In December 1981, a $10,000 General Fund loan was made to the Student Loan Authority to finance startup operations. This loan was repaid in January 1982 when Chapter 1091, Statutes of 1981, became effective and empowered the Student Loan Authority to borrow from the California Pollution Control Financing Authority. The proceeds of this second loan were used to repay the General Fund loan and provide for ongoing implementation costs of the authority.

The Student Loan Authority issued its first bonds in January 1983. That initial issuance was $121.4 million. Proceeds from that issuance were used to repay the outstanding loans from the Pollution Control Authority and provide self-supporting funding of the Student Loan Authority's operation.

The Authority is purchasing student loans through a forward commitment program under the authority of Sections 69905–69946 of the State Education Code.

* Dollars in thousands

7980 STUDENT AID COMMISSION

The Student Aid Commission, is composed of eleven members who are appointed by the Governor and confirmed by the Senate. Terms are for four years except for two student members whose terms are for two years.

Specific program responsibilities of the Commission include:

1. A grant program designed (a.) to enable needy students to attend the California college of their choice, (b.) to increase the availability of education in California colleges for disadvantaged students; and (c.) to provide grants for needy students to train in critical skilled occupations.
2. A fellowship program for needy graduate and professional students.
3. A grant program to prepare bilingual elementary and secondary classroom teachers.
4. A college education aid program for needy children of law enforcement officers killed or permanently disabled in the line of duty.
5. A program of guaranteeing federally reinsured loans to undergraduates, graduate, and professional students.

The Commission is also responsible for (1) collections under the State Guaranteed Loan Program, (2) research to consolidate information on student aid, (3) a statewide program providing information dissemination about student financial aid, (4) reporting to the Legislature, the Governor, and postsecondary education institutions concerning certain aspects of student financial aid in California, (5) developing with the segments a common application form for public funded student aid and approving institutional supplements, and (6) an experimental program to increase accessibility to postsecondary educational opportunities for financially disadvantaged students. The increase in number and maximum amount of awards, as reflected in this budget, represents the first year of a three year plan to improve educational opportunities in California.

10 CAL GRANT PROGRAM

This program assists academically able, financially needy, undergraduate students to pursue postsecondary educational opportunities. The components of the Cal Grant program are: (a) Scholarships which assist needy students to attend the California college or university of their choice; (b) College Opportunity Grants which assist disadvantaged, low-income students seeking a postsecondary education; and (c) Occupational Education and Training Grants which assist needy students preparing for vocational or occupational careers. Cal Grant awards are coordinated with other available award sources including Federal Basic Educational Opportunity Grants. (Pell Grants).

10.10 Scholarships

This program assists academically able, financially needy students to complete educational programs. It also assists students who wish to attend independent colleges but are not financially able to do so. The funds are distributed directly to schools in the names of the students.

The average State scholarship is estimated at $1,397 for 1983–84. The scholarships are coordinated with other awards, including Federal Basic Educational Opportunity Grants (Pell Grants). Federal-State Student Incentive Grant funds of $6,419,000 are included in the 1984–85 budget. Federal fund participation approved in the 1983–84 budget is $5,170,000.

Chapter 1270, Statutes of 1975, increased the number of new awards to a total of 14,900 and the maximum award from $2,500 to $2,700. Subsequently, Chapter 1215, Statutes of 1978, established a procedure for annual review of the maximum authorized award amount with consideration being given to available Federal-State Student Incentive Grant funds. The maximum award was increased in 1980–81 to $3,200, and to $3,400 in 1981–82. The maximum award has been reduced to $3,330 in 1982–83 and increased to $3,400 in 1983–84 for new winners and renewal recipients.

The budget for 1984–85 proposes to increase the number of new awards from 14,900 to 16,400 (10%) which will add 1,500 new recipients each year. In addition, provision is made to increase the maximum amount of awards 10 percent.

10.20 College Opportunity Grants

Over the years, the number of disadvantaged students in higher education has been disproportionately low. College Opportunity Grants program assists disadvantaged students who have a potential for college success and community leadership. Selection is made on the basis of need, grades, and student and school recommendations. Grants awarded include funds for tuition (after the first year) and living allowances (subsistence). Federal-State Student Incentive Grant funds of $4,668,000 are included in the 1984–85 budget. The level of federal participation approved in 1983–84 is $3,760,000.

Chapter 343, Statutes of 1976, increased the number of college opportunity grants to provide 6,825 new grants annually with a maximum grant of $3,600. Subsequently, Chapter 1215, Statutes of 1978, established a procedure for annual review of the maximum authorized award number and award amount with consideration being given to available Federal-State Student Incentive Grant funds. An additional 170 new awards were authorized in both 1979–80 and 1980–81. The maximum award amount was increased in 1979–80 to $3,800, in 1980–81 to $4,100, and to $4,300 in 1981–82. The maximum award has been reduced to $4,230 in 1982–83 and increased to $4,300 in 1983–84 for new winners and renewal recipients.

The budget for 1984–85 proposes to increase the number of new awards from 6,825 to 7,500 which will add 675 new recipients each year. In addition, provision is made to increase the maximum amount of awards by 10 percent.

10.30 Occupational Education and Training Grants

This Cal Grant program is designed to provide skilled workers for critical occupations by supplying postsecondary occupational education aid to needy and talented students. Grants up to $2,000 for tuition and $500 for related training costs may be awarded pursuant to Education Code Section 69542. Selection is made on the basis of need, grades, recommendation, and demonstrated skill. The budget includes Federal-State Student Incentive Grant funds of $583,000 in 1984–85. The level of Federal fund participation approved in the 1983–84 budget is $470,000.

Chapter 983, Statutes of 1976, increased the number of new awards to a total of 1,337 annually. Subsequently, Chapter 1215, Statutes of 1978, established a procedure for annual review of the maximum number of authorized awards with consideration being given to available Federal-State Student Incentive Grant funds. For 1983–84, the number of new awards is anticipated to be 1,337.

The budget for 1984–85 proposes to increase the number of new awards from 1,337 to 1,420 (6%) which will add 83 new recipients each year. In addition, provision is made to increase the maximum amount of awards by 6 percent.

7980 STUDENT AID COMMISSION—*Continued*

20 GRADUATE FELLOWSHIP PROGRAM

This program, established to assist needy graduate and professional students, emphasizes fields where there are personnel shortages. Chapter 375 Statutes of 1974 requires that consideration be given to academically able students who are disadvantaged and that the parents' income be a factor in determining need. As a result the program has been successful in identifying and assisting able students with financial need, most of whom come from disadvantaged backgrounds. Fellowships are coordinated with awards made by colleges and private groups.

The budget for 1984–85 proposes to increase the number of new awards from 450 to 477 (6%) which will add 27 new recipients each year. In addition, provision is made to increase the maximum amount of awards by 6 percent.

30 BILINGUAL TEACHER GRANT PROGRAM

Pursuant to Chapter 1261, Statutes of 1980, the Bilingual Teacher Development Grant Program administered by the Student Aid Commission and the Bilingual Teacher Corps Program administered by the Department of Education terminated as of July 1, 1981, and a new single Bilingual Teacher Grant Program was established. The purpose of this new program is to provide financial assistance to low-income undergraduate, graduate and certified teachers attending two or four-year colleges who are pursuing bilingual teaching certification through an approved program and who upon entry to an educational institution demonstrate oral proficiency in a non-English target language. Grants, not to exceed $3,600 per year, may be used for tuition, fees, books and subsistence. The maximum award was reduced to $3,565 in 1982–83 and increased to $3,600 in 1983–84. First priority for such grants shall be given to renewal Bilingual Teacher Development Grant and Bilingual Teacher Corps recipients and bilingual teacher aides. Each participating educational institution is prescribed various duties and institutions having 10 or more recipients shall receive an 8% administrative allowance for specified services.

There has been no increase in the number of new awards since the program's inception in 1981–82. The budget for 1984–85 proposes to increase the number of new awards twenty percent (340 to 408). In addition, provision is made to increase the maximum amount of awards by 6 percent.

50 GUARANTEED STUDENT LOAN PROGRAM

This program assists students in meeting postsecondary educational expenses through low-cost, federally reinsured, educational loans which are made available to students through conventional lenders at no cost to the State. These guaranteed loans are an important supplement to other Federal, State, institutional and private sources of student financial assistance. Components of this program are: (a) the Guaranteed Loan Program which supervises collections on outstanding loans made prior to November 1967 and (b) the California Educational Loan Programs—which include the State Guaranteed Student Loan Program (through which the State has guaranteed federally reinsured student loans since April, 1979) and the California Loans to Assist Students Program (through which the State guarantees federally reinsured loans to parents and students) which became operational in 1982–83.

50.10 Guaranteed Loan Program Collections (Old Program)

From November 1967 to the enactment of Chapter 1201, Statutes of 1977, the federal government had direct control over the Guaranteed Loan Program, leaving the State with the single responsibility of providing administrative services for collecting outstanding loans made before November 1967. Collection activities are performed by contract with a private collection agency and are funded from the reserve created by previous collections. For 1984–85, funding is proposed at the level requested by the Commission.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	1	1	1	$39	$65	$68

50.21 State Guaranteed Loan Operations (GSL/CLAS)

This Element consists of two components: contract services for and administration of the loan programs and the purchase of defaulted loans.

50.21.10 State Guaranteed Loan Administration

Chapter 1201, Statutes of 1977, authorized the State Guaranteed Loan Program, a California guarantee agency for the Federal Guaranteed Student Loan Program pursuant to the Federal Education amendments of 1976. This program is funded entirely from available resources in the State Guaranteed Loan Reserve Fund.

In this component day-to-day processing is performed, under contract, by a private sector loan servicer while program administration and policy direction are provided by Commission staff. In 1982–83, a new loan servicer contract was bid which resulted in contract services cost reductions of $1,540,000 in that year and $4,577,000 for 1983–84. In 1983–84 it is proposed to augment this contract by $420,000 to provide additional reports to management.

In 1979–80, the first full year of operation of this program, 73,483 student loans totaling $168,330,661 were guaranteed through this program. In 1980–81, the loan volume was $469,593,688 which served 142,341 students and, in 1981–82, the corresponding volumes were $654,352,000 and 237,825, and for 1982–83 $567,310,000 and 193,683 respectively. For 1983–84 $640,000,000 in loans are projected to serve an estimated 232,727 students. For 1984–85 loan volume is estimated to be $640,000,000 for 236,364 students.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	30.7	37	40	$7,092	$4,815	$5,895

50.21.20 State Guaranteed Loan Purchase of Defaulted Loans

Funds are budgeted in this component to purchase defaulted student loans. This special item of expense is for the purpose of purchasing death, disability, bankruptcy, and default accounts from lenders after they have exercised due diligence in attempting to place delinquent borrowers into repayment status. Such purchases are required under the programs' guarantee obligation and, for the most part, are fully reinsured by the federal government.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	–	–	$20,000	$68,371	$79,421

60 FINANCIAL AID INFORMATION AND SPECIAL PROJECTS PROGRAM

The purpose of this program is to provide students with information on all student financial aid resources to ensure that financially needy students understand and take advantage of available resources. Program activities also include experimental and pilot projects undertaken from time to time to test different approaches for purposes of enhancing student accessibility to postsecondary educational opportunities and financial assistance.

60.10 Student Financial Aid Information Program

Chapter 1270, Statutes of 1975, assigned a new function to the Commission directing it to disseminate information about all institutional, state, and federal programs to potential applicants, with the primary focus on potential applicants with the greatest financial need. For 1984–85 major activities include dissemination of informational materials to students, parents, schools, community agencies, and the media. A major publication is the student consumer handbook—the California Student Financial Aid Workbook.

70 RESEARCH AND REPORT PROGRAM

a. The Research component furnishes the Governor, the Legislature and others with specific information and data on student aid. Primary areas of research involve the different types of student financial aid programs, educational opportunities for disadvantaged students, and patterns of payment of college costs.

b. The Report component collects and disseminates various data concerning student financial aid including reporting to the Legislature since January 1, 1978 and every two years thereafter, on the impact and effectiveness of state-funded programs. Reports will also be developed on the criteria utilized in distributing available student aid funds. In addition to the Legislature, this report will be made available to the Governor, postsecondary educational institutions, and the California Postsecondary Education Commission.

Expenditures *(General Fund)*	–	2	2	–	$118	$116

80 ADMINISTRATION AND SUPPORT SERVICES

The administrative program establishes its policies and priorities for all Commission activities and is responsible for maintaining compliance with various State and federal requirements. It also provides administrative support services to the direct programs. Administrative services include fiscal management, personnel management, business services, data processing and word processing services, and contract services. Administrative costs are charged back to the direct programs on a pro-rata basis. The Administration and Support Services program has become increasingly complex due to the continuing rapid growth of existing programs and to the addition of new legislatively mandated programs.

One budget analyst position is proposed for 1984–85.

GENERAL GOVERNMENT

8100 OFFICE OF CRIMINAL JUSTICE PLANNING

The Office of Criminal Justice Planning (OCJP) is responsible for improving the criminal justice system in California through research, evaluation, and financial and technical assistance to local government, private agencies, state agencies and the Legislature. OCJP administers a variety of criminal and juvenile justice grant programs: community crime prevention; career criminal apprehension and prosecution; victim/witness assistance; rape crisis centers; child sexual abuse centers; gang violence suppression; district attorney and public defender training; gang violence reduction; drug suppression in the schools; and juvenile delinquency prevention. OCJP provides staff services to several advisory committees associated with these programs as well as to the California Council on Criminal Justice and the Advisory Committee on Juvenile Justice and Delinquency Prevention.

In addition to the foregoing, OCJP prepares and submits plans and applications for federal funds and annually receives about $4 million in federal juvenile justice and delinquency prevention funds. The office is completing the phase out of a small amount of remaining Federal Law Enforcement Assistance Administration (LEAA) funds.

Effective January 1, 1984, Chapter 1092, Statutes of 1983 (AB 1485), and Chapter 1312, Statutes of 1983 (SB 1084), substantially revised funding available for community services and for cash restitution to victims of crimes. AB 1485 increased the penalty surcharge on most fines from $4 per $10 of fine to $5. These surcharges are deposited in the Assessment Fund and, under AB 1485, the distribution of these revenues is revised to include allocations not only to the original five funds (Indemnity Fund, Corrections Training Fund, Peace Officers Training Fund, Drivers' Training Penalty Assessment Fund, and Fish and Game Preservation Fund), but also to two new funds: the Local Public Prosecutors and Public Defenders Training Fund, created by AB 1485; and the Victim/Witness Assistance Fund, created by SB 1084.

In addition, AB 1485 renames the Indemnity Fund as the Restitution Fund and dedicates it solely to the Board of Control's program for indemnification of victims of crime. OCJP's victim services programs, formerly supported by the Indemnity Fund, are transferred effective January 1, 1984, to the Victim/Witness Assistance Fund. That fund will receive 10 percent of revenues deposited in the Assessment Fund, compared with the approximately 8 percent share of penalty assessments that OCJP received through the Indemnity Fund under previous law. However, because penalty assessments have been substantially increased under AB 1485, funding proposed for victim services for 1984–85 is 70 percent higher than new appropriations provided for victim services in 1983–84.

Funding for training programs for public prosecutors and defenders, formerly appropriated directly from the Assessment Fund, will now be provided from the Local Public Prosecutors and Public Defenders Training Fund pursuant to AB 1485.

Authority

Penal Code, Section 13800 et sequitur.

10 PLANNING AND OPERATIONS

Program Description

This program provides the management of and direct services for the various criminal justice grant programs. Staff support includes: field services which deliver technical assistance to local agencies; state grants assistance in order to directly administer and monitor state-funded grants; a legislative unit which tracks and coordinates legislative liaison; audit resolution; and juvenile justice grants assistance for administration of the federally funded Juvenile Justice and Delinquency Prevention Act Program. Local assistance programs which receive staff support through this unit include: Career Criminal Apprehension and Prosecution; Victim/Witness Assistance; Community Crime Resistance; Sexual Assault Counseling Centers; Drug Suppression; and Gang Violence Suppression. Staff support is also provided to advisory committees established for several of the listed programs.

The budget year proposes three new positions as workload adjustments for the office's victim services programs (victim/witness centers, rape crisis counseling, child sexual abuse counseling centers). These positions are required because the number of grant awards made under these programs will be increasing in 1984–85 due to the new funding mechanism provided pursuant to AB 1485 and SB 1084.

The budget also proposes three new positions to establish a technical assistance unit for the Crime Resistance Program (50.50), as authorized by Section 13840 of the Penal Code. The difference between the six positions noted above and the 5.7 shown below is salary savings.

20 ADMINISTRATION

Program Description

This program provides executive leadership and management services. Staff support includes; administrative services, audits; accounting and control; and executive positions. Administrative Services includes personnel support, which includes affirmative action guidance; budget development and tracking, and research/evaluation services. Audits carries out fiscal grant disposition. Accounting is responsible for fiscal grant tracking. The executive function provides policy direction.

The 1984–85 administrative budget proposes one new associate deputy director to oversee administration, one support position related to the major expansion of victim services programs, and a half-time programmer position to meet workload increases. Also included in the budget year is $173,000 for a media and graphic arts consultant to upgrade the quality of the office's publications and $60,000 for data processing terminals and a phototypesetter. The difference between the 2.5 positions and 2.4 shown below is salary savings.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40 STATE AND PRIVATE AGENCY AWARDS

Program Description

This program reflects federal and state funds which are awarded by OCJP in the form of grants to state and private agencies to conduct criminal and juvenile justice programs and services. These funds come from the Juvenile Justice and Delinquency Prevention Act of 1974 (JJDP), as amended.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs (*Federal Trust Fund*[f])	$2,982	$1,500	$1,500

50 LOCAL PROJECT AWARDS

Program Description

This program awards state and federal funds to local government for criminal and juvenile justice projects. State statutory programs funded from the General Fund are the Career Criminal Prosecution Program, the Career Criminal Apprehension Program, the Community Crime Resistance Program, Gang Violence Suppression Program, and the Suppression of Drug Abuse in Schools Program. The Victim/Witness Assistance Program and Rape Victim Counseling Center Program, as of January 1, 1984, are funded from the Victim/Witness Assistance Fund. The Local Public Prosecutor and Public Defender Education and Training Program are state statutory programs funded from the Local Public Prosecutors and Public Defenders Training Fund. Both funds receive revenue from penalty assessments added to fines for criminal offenses.

In 1984–85, local projects will receive federal grant funds through OCJP from the Juvenile Justice and Delinquency Prevention (JJDP) Act. OCJP receives these federal funds in the form of an annual formula grant.

The 1984–85 budget proposes an additional $4.25 million from the Victim/Witness Assistance Fund, including $2,550,000 for the Victim/Witness Assistance Program and $1,700,000 for increased allocations to the Rape Victim Counseling Center Program.

Program Requirements	*1982–83**	*1983–84**	*1984–85**

8105 COMMISSION FOR THE REVISION OF THE JUVENILE COURT LAW

In the past few years, the Legislature has taken a new direction in dealing with the serious violent juvenile offender. More of these offenders are being waived from the juvenile court to the adult court. The Legislature determined that there is a need to examine the total juvenile court law including, but not limited to, an examination of our philosophy and policy of handling serious violent juvenile offenders.

Chapter 170, Statutes of 1982, established the Commission for the Revision of the Juvenile Court Law effective for one year beginning January 1, 1983. The Commission held hearings throughout the State to prepare recommendations for juvenile court law revision and must submit a written report to the Governor and the Legislature detailing those recommendations. The Commission is composed of nine persons: four appointed by the Governor, one by the Speaker of the Assembly, one by the Senate Rules Committee, and three by the Attorney General.

The Commission terminated December 30, 1983; therefore, no costs are displayed for the 1984–85 fiscal year.

8120 COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING

The Commission on Peace Officer Standards and Training (POST) is responsible for improving the level of competence of law enforcement officials in California by setting standards for selection and training, developing training courses, and providing salary reimbursement during the training of law enforcement officers throughout the State.

SUMMARY OF PROGRAM REQUIREMENTS

	*1982–83**	*1983–84**	*1984–85**

8120 COMMISSION ON PEACE OFFICER STANDARDS AND TRAINING—*Continued*

10 STANDARDS

Program Objectives and Description

The Standards program establishes job-related selection standards for peace officers which are enforced through compliance procedures, provides management consultation to local agencies, and issues professional certificates to qualifying persons. Activities include development of examinations, inspection of local agency selection and training practices, and counseling local law enforcement agencies on ways to improve management practices. Inspections are conducted to determine if law enforcement agencies which receive state aid are adhering to state standards for selection and training.

Applied research is conducted in the areas of peace officer selection and training, operational procedures, and program evaluation in order to meet statutory requirements and to provide management guidance to local law enforcement agencies. The program also provides local agencies with information and technical expertise in the development and installation of new programs.

The budget year includes $118,000 for a 6-month extension of 4.5 limited term positions for standards research; the redirection of $40,000 from contract services to establish one position to provide computer programming and statistical analysis services; and $50,000 for one new position for two new statewide reading and writing testing programs. Annualized, these adjustments total 4.6 personnel years.

20 TRAINING

Program Objectives and Description

POST's Training program increases the effectiveness of law enforcement personnel by developing courses that meet identified training needs, by providing scheduling and quality control of such courses, and by assisting law enforcement agencies in providing necessary training and career development programs. POST assesses training on a continuing basis to assure that emerging needs are met. Courses are offered through local community colleges, four-year colleges, universities, police academies, and other institutions and training centers. The curricula cover a wide variety of technical and special courses necessary for effectiveness in police work and address the training needs of the recruit, officer, advanced officer, supervisor, management, and executive-level law enforcement personnel. Curricula content is updated regularly.

Training consultants establish the basic criteria that must be met by each course in order to obtain POST's certification. Assistance is given to local educators and police trainers in preparing and implementing courses and training plans. Periodic field inspections ensure that training instructors and coordinators are adhering to established course outlines and are meeting all instruction standards. Failure to meet these standards may cause revocation of course certification.

The budget year includes the redirection of $48,000 for contract services to establish a resource center on innovative forms of training delivery and an adjustment of salary savings equivalent to 0.7 personnel years.

Authority

Section 13503, Penal Code.

30 PEACE OFFICER TRAINING REIMBURSEMENT

Program Objectives and Description

The enforcement of laws and the protection of life and property without infringement on individual liberties is one of modern government's most pressing problems. Carefully selected, highly trained and properly motivated peace officers are important factors in the solution of this problem. To encourage and assist local law enforcement agencies to meet and maintain minimum standards in the selection and training of law enforcement officers, financial assistance is provided to those cities and counties which qualify for state aid for peace officer training. Each jurisdiction participating in the program is reimbursed from the Peace Officers' Training Fund in proportion to the number of officers who participate in reimbursable training.

Chapter 1092, Statutes of 1983, raises fines, penalties, and surcharges on fines and penalties, resulting in an increase in revenue to the Assessment Fund and the funds it supports (e.g. Peace Officer Training Fund). The percent of distribution of the Assessment Fund to the Peace Officer Training Fund changes from 30.83 to 27.75 percent effective January 1, 1984. However, the projected revenue increase due to the change in the surcharge rate will still permit a $6 million augmentation to the reimbursement level provided to local governments for the salaries of peace officers who participate in POST's training programs.

40 ADMINISTRATION

Administration executes POST's policies and assures the organization's compliance with state regulations. Included within Administration is the Commission, its Executive Director, and budget, accounting, personnel, and management information staff.

The 1984–85 base program for administration is lower than the 1983–84 base because the current year includes three limited term positions and 2.3 contractual positions. As a workload adjustment, the budget year proposes the redirection of $64,000 from contract services for the permanent extension of 2.5 of the current year limited term positions for key data entry and computer programming. The budget also includes as a technical adjustment the transfer of $1,874,000 from local assistance to state operations for contracts: $314,000 for administrative contracts, included now in Item 8120-001-268; and $1,560,000 for training contracts, established in a new state operations item, Item 8120-011-268. This transfer has been made because these expenditures properly should be reflected under state operations. However, the Budget Bill provides inter-item transfer authority between the commission's local assistance appropriation and its new state operations appropriation for training contracts to ensure that the commission continues to have the same administrative discretion to meet the training needs of peace officers that it had prior to this technical adjustment.

Authority
Section 13500, Penal Code.

8140 STATE PUBLIC DEFENDER

Program Objectives and Description

The Office of the State Public Defender was established in July 1976 by Chapter 1125, Statutes of 1975, to represent those entitled to representation at public expense. The State Public Defender has offices in Sacramento, San Francisco, and Los Angeles to provide a statewide capability to represent indigents in the state appellate courts.

The State Public Defender, in conjunction with court appointed legal counsel, represents persons who are not financially able to employ counsel in the following matters:

(a) An appeal, petition for hearing or rehearing to an appellate court or petition for certiorari to the United States Supreme Court or a petition for executive clemency from a judgment relating to criminal or juvenile court proceedings;
(b) Petitions for an extraordinary writ or action for relief relating to a final judgment of conviction or wardship;
(c) Proceedings after a judgment of death;
(d) Proceedings in which an inmate of a state prison is charged with an offense where the county public defender has declined to represent the inmate;
(e) Any proceeding where a person is entitled to representation at public expense.

In addition, the Legislature has designated the State Public Defender to represent indigents at hearings to extend their commitments as persons found not guilty by reason of insanity.

The enabling legislation specifically provides that the State Public Defender: (1) may employ such deputies and other employees and establish and operate such offices as he may need for the proper performance of his duties, (2) may contract with county public defenders, private attorneys, and nonprofit corporations, (3) may enter into reciprocal or mutual assistance agreements with the board of supervisors of one or more counties to provide for exchange of personnel, and (4) shall formulate plans for representation of indigents in the Supreme Court and in each appellate district.

The Office of the State Public Defender was scaled back by 77.2 positions beginning in 1983–84 and directed to focus its resources on the most complex and sensitive cases. This change will allow the State to design a more cost-effective system which capitalizes on the use of lower cost court appointed attorneys for the routine cases. A one-time temporary help blanket of $662,000, along with related benefits and operating expenses, was provided in the current year to assist the office in effecting an orderly transition to a lower staffing level.

8140 STATE PUBLIC DEFENDER—*Continued*

Performance Measures

Pursuant to supplemental language for the 1983–84 budget, the department is required to review its performance and workload data. As a result of this requirement as well as of the restructuring of the office, the State Public Defender will address performance measures and objectives for the office will be addressed by the State Public Defender during the legislative process.

8160 ASSISTANCE TO COUNTIES FOR DEFENSE OF INDIGENTS

Program Objectives and Description

Section 987.6 of the Penal Code provides that the State shall pay to the counties an amount not to exceed ten percent of the amount actually expended by counties in providing legal assistance to indigents charged with violation of State criminal law or involuntarily detained under the Lanterman-Petris-Short Act, Division 5 of the Welfare and Institutions Code. The subvention in the amount of $775,000 in the 1982–83 year represents the traditional level of State assistance to counties for public defenders.

Because the amount of State funding provided through this subvention represents less than one percent of the amount expended annually by Public Defenders, it is proposed that funding for this activity be considered in the broad context of total fiscal relief for counties. Accordingly, no specific funding for this activity was provided in 1983–84, and none is proposed in 1984–85.

Section 987.9 of the Penal Code provides that indigent defendants in capital cases may request the court for funds for payment of investigators, experts, and others for the preparation or presentation of the defense in capital cases. Under the present system, the State General Fund reimburses counties for all court-ordered expenditures, but has no control over costs. This system has contributed to expenditures which have escalated rapidly from $791,000 in 1980–81 to $4,286,000 in 1983–84, and to a proposed program level of $4 million in 1984–85. Costs are expected to continue growing rapidly even after the State Controller issues regulations in June 1984.

The Administration believes that this problem can be alleviated by having counties share in the financial burden. While local governments cannot (and should not) directly control trial costs, input from the Board of Supervisors will influence the judiciary to appropriately consider program costs without causing judges to neglect our need for fair and adequate trials. A twenty percent county matching requirement is proposed.

This proposal is not intended to shift costs from the State to local governments but is instead designed to reduce total program costs. The proposed county cost should be considered as part of the total fiscal burden carried by county governments.

8170 SUBVENTION FOR GUARDIANSHIP/CONSERVATORSHIP PROCEEDINGS

Program Objectives and Description

The purpose of this budget is to provide for state reimbursement of the costs to counties resulting from the enactment into law of Chapter 1357, Statutes of 1976 (AB 1417). That legislation substantially revised the law regarding procedures for the establishment of guardianships and conservatorships in instances where an adult person by reason of advanced age, illness, injury, mental weakness, intemperance, addiction to drugs or other disability or other cause is unable to properly care for himself or his property.

This budget contains funds for:

1. Court appointment of legal counsel for indigent persons for whom guardianship or conservatorship is sought.
2. Court appointment of legal counsel for indigent persons who wish to petition the court for termination of guardianship or conservatorship proceedings, for restoration to capacity or for removal of an existing guardian or conservator.
3. Court appointment of an investigator to interview a proposed ward or conservatee who is unable to attend a court hearing where the determination of the need to appoint a guardian or conservator is made.
4. A court investigator to review each guardianship or conservatorship one year after its initiation and biennially thereafter.
5. A trial by jury when demanded by a person for whom a guardianship or conservatorship is proposed.

Chapter 327, Statutes of 1982, requires the State Controller to determine the statewide average cost of each investigation or review.

Counties will thereafter assess the estate of each ward and each conservatee for any investigation or review conducted. Upon termination of the guardianship or conservatorship by death or court order, the county may collect all of an assessment against the estate. A county may waive any or all of an assessment on the basis of hardship when the guardianship or conservatorship is terminated by court order.

It is anticipated the amount budgeted for this subvention will be reduced in future years due to reimbursements from guardianship and conservatorship estates.

Unexpended balance, estimated savings	−100	–	–
TOTALS, EXPENDITURES *(Local Assistance)*	$4,279	($4,300)	($4,300)

[1] Funding for this mandate in 1983–84 and 1984–85 is provided in the budget for "State-Mandated Local Programs" (Department 9680) in the General Government portion of the Budget. Data shown here in parentheses is for information purposes only.

8180 PAYMENT TO COUNTIES FOR COSTS OF HOMICIDE TRIALS

Sections 15200 through 15204 of the Government Code provide that the State shall reimburse the costs incurred by counties for conducting homicide trials where the cost is in excess of the amount of money derived by the county from a tax of 0.0125 of one percent of full value of property assessed for purposes of taxation within the county. Once a county has expended the amount required the State reimburses the county for all authorized expenditures above the statutory floor. Costs for Defense of Indigents (other than Section 987.6) are funded in a similar manner, but without the county share of base costs.

The Administration believes that this method for funding program costs has contributed to rapid escalation of costs for the combined programs from $1.9 million in 1980–81 to a proposed expenditure level of $5 million in 1984–85. This problem can be alleviated by having counties share in the financial burden. While local governments cannot (and should not) directly control trial costs, input from the Board of Supervisors will influence judges to appropriately consider program costs without causing judges to neglect our need for fair and adequate trials. A twenty percent county share is proposed by the Administration.

This proposal is not intended to shift costs from the State to local governments but is instead designed to reduce total program costs. The proposed county cost should be considered as part of the total fiscal burden carried by county governments.

8190 ADMINISTRATION AND PAYMENT OF TORT LIABILITY CLAIMS

Program Objectives and Description

Chapter 1681, Statutes of 1963, established the liability and nonliability of the State for tort actions of its officers and employees.

In the past, the State assumed liability for all losses up to $5 million and purchased insurance covering losses from $5 million to $50 million. The State's general insurance policy was discontinued in 1977–78 based on a cost/benefit study made by the Department of Finance. A small number of agencies with unique liability problems are covered under special insurance policies.

The amounts of settlements and awards vary, sometimes significantly, from year to year depending upon the cases in litigation and the amounts estimated to be awarded in each instance. The budget is expected to cover those expenses which reasonably can be anticipated.

Government Code Section 948 provides that the head of any state agency, upon recommendation of the Attorney General, may settle, adjust or compromise any pending action with approval of the Director of Finance. Current administrative policy delegates Finance's approval authority to the Attorney General for actions not exceeding $25,000. Claims with principal amounts up to $50,000 approved by the Director of Finance are paid from the appropriation in the Budget Act, while claims exceeding $50,000 are paid through special appropriation legislation.

In order to provide a comprehensive statement of statewide costs for the tort program, the format below includes a statewide display of tort-related expenditures. Special fund program expenditures are reflected in the department or agency budgets in which the costs are incurred unless paid through special appropriation legislation.

8200 COMMISSION FOR ECONOMIC DEVELOPMENT

Program Objectives and Description

The Commission was created by Chapter 1230, Statutes of 1971, as amended by Chapter 168, Statutes of 1977. This law, which went into effect March 4, 1972, provides that the Commission shall consist of 17 members: the Lieutenant Governor as Chairman, ten public members appointed by the Governor (only six of whom may be of the same political party), three Senators appointed by the Senate Rules Committee, and three Assemblymen appointed by the Speaker.

The enabling legislation specifically provides that the Commission shall: (1) make recommendations concerning legislation affecting the economic development of the State, (2) consider programs to further the economic development of the State, study laws and programs of other states relating to economic development and confer with governmental officials and representatives of business and industry and any other persons or organizations interested in the promotion of economic development, (3) appoint advisory committees.

8220 MOTION PICTURE COUNCIL

Program Objectives and Description

The objective of the Council is to prepare and implement a program to promote the production of motion picture films, and other motion picture and television film products within the State of California.

The council will:

1. Prepare and distribute appropriate promotional materials pointing out desirable locations within the State of California for the production of motion pictures.
2. Prepare and distribute appropriate promotional materials which illustrate and stress the advantages and possibilities of filming within the State of California those scenes and/or films which are ostensibly set elsewhere.
3. Assist film companies in securing permits for location filming, and offer other appropriate services connected with motion picture production.
4. Under the provisions of the law appointing the Motion Picture Council the sole permit-granting authority for commercial filmmaking use of State-owned or State-operated properties, refine the mechanisms for granting such permits, and implement this program.
5. Facilitate cooperation from local government, State and Federal Government agencies and private sector groups in the location and production of motion pictures in the State of California.

The Motion Picture Council will perform these duties as an economic development office of State Government.

The Motion Picture Council was statutorily established by Chapter 1226, Statutes of 1974.

Chapter 1395, Statutes of 1976, provides the Motion Picture Council with the authority to establish fees for the use of State-owned property for the purpose of making commercial motion pictures. These revenues are to be used as reimbursement to operating departments for their actual additional costs and for support of the council.

Chapter 730, Statutes of 1983, provides for the expansion of the Motion Picture Council from fourteen to seventeen members. The increase of three members represents an additional appointee by the Governor, Senate Rules and the Speaker of the Assembly.

8260 CALIFORNIA ARTS COUNCIL

The California Arts Council was established by Chapter 1192, Statutes of 1975. Major statutory mandates to this agency are:
(1) To encourage artistic awareness, participation, and expression among the citizens of California.
(2) To help independent local groups develop their own arts programs.
(3) To promote the employment of artists and those skilled in crafts in both the public and private sector.
(4) To provide for the exhibition of art works in public buildings throughout California.
(5) To enlist the aid of all state agencies in the task of ensuring the fullest expression of our artistic potential.

The eleven-member Council is appointed by the Governor. The Council establishes general policy and approves program allocations. Panels of experts independent of the Council advise the Council in each grant program.

The Council stresses the development of community-based cultural activities in rural areas as well as in major metropolitan cultural centers. Almost all Arts Council grants programs require that the grantee provide a match equal to the amount of the grant.

The 1984–85 budget proposes an increase in grants of $780,000 ($670,000 GF, $110,000 FF). This augmentation is designed to increase the number of awards and the amounts granted in the Artists in Residence, Artistic and Administrative Development, Support to Prominent Organizations, Art in Public Buildings, and State-Local Partnership elements. In addition, the budget proposes to increase funds for support services $157,000 (GF) to administer these grants and provide services to grantees and applicants.

The budget also reflects the termination of the Exemplary Arts Education element. This effort was funded by Chapter 1258, Statutes of 1980 and provided $750,000 (GF) annually to the Council in 1981–82, 1982–83, and 1983–84.

10 CULTURAL PARTICIPATION PROGRAM

Program Objectives and Description

The Cultural Participation Program brings performing, literary, and visual arts experiences to schools, social institutions and community organizations for persons who would not otherwise be exposed to or participate actively in the arts, and expands the use of the arts as a tool for learning and problem solving.

In addition, this program encourages institutions, schools, and organizations to provide facilities and resources necessary for cultural activities, and helps provide artists with opportunities to serve the public. The Arts Council provides information, consultation, and expertise to foster the development of such cultural activities.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

10.20 Artists in Social Institutions	1.7	–	–	463	–	–

10.10 Artists in Residence

This program helps place professional artists in elementary and secondary schools, neighborhood centers, municipal agencies, treatment and special learning centers, correctional facilities, homes for children and frail elderly, art and cultural centers and other eligible non-profit organizations. Artists promote active public participation in the creative process through classes, workshops, demonstrations, performances and exhibitions. Program objectives are a) to serve the broad and diverse communities of the state, b) to develop the artistic abilities and creativity of the participants, c) to promote the use of the arts as a tool for learning and problem solving, d) to use existing arts resources, and e) to expand professional artists' participation in society. (The Council receives matching funds from the Artists in Education Program of the National Endowment for the Arts for this program.)

The 1984–85 budget proposes an increase of $210,000 (GF) in the Artists in Residence element. These funds are designed to augment artists' fees, which have remained constant since 1976.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

10.20 Artists in Social Institutions

The Artists in Residence instruct, demonstrate and facilitate participatory arts activity in all media of expression. Participants are residents and clients of treatment and special learning centers, correctional facilities, and homes for children, youth, and frail elderly. The 1984–85 budget proposes inclusion of the Artists in Social Institutions budget in the Artists in Residence program.

8260 CALIFORNIA ARTS COUNCIL—*Continued*

20 ORGANIZATIONAL GRANTS

Program Objectives and Description

In providing grants to organizations, the California Arts Council's objectives are to help non-profit arts organizations strengthen their internal management and employ professional staff, and to extend arts programs and performances more broadly to the general public. Grant guidelines are established by the Council and each application is initially screened for guideline compliance to assure that the state's program objectives are met. Applications which meet all technical requirements are reviewed by volunteer panels of professionals in the arts who rate the proposals' relative merits and recommend grant awards to the Council for final confirmation. All grant awards in this program require a dollar-for-dollar cash match.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20.50 Technical Assistance	0.7	1.2	1.2	336	62	62
20.60 Statewide Arts Service Organization	0.7	–	–	115	–	–

20.10 Artistic and Administrative Development

Artistic and Administrative Development supports the diverse needs of arts organizations and other nonprofit entities which utilize the arts by providing grants to strengthen organizations, administrative and artistic capabilities.

Proposals in this category must demonstrate service to the community. Types of organizations which the Council has assisted under this program include theater companies, public museums and galleries, public colleges and universities, governmental entities, community arts organizations, small presses, musical companies, dance companies, local and regional arts councils, neighborhood arts organizations, film/video organizations, public radio and television stations, and public parks. Schools and school districts are not eligible under this program.

Program objectives are: a) to assist local organizations in the development of administrative skills; b) to expand the number and quality of artistic performances; c) to assist organizations in increasing audiences; d) to provide employment opportunities for artistic personnel; e) to provide rental facilities for local organizations; f) to assist organizations in performing new or otherwise significant works of art; and g) to support instructional programs run by local arts organizations.

The 1984–85 budget proposes an increase of $231,000 ($71,000 GF, $160,000 FF) for Artistic and Administrative Development. In 1983–84 the Arts Council funded 42 percent of the proposals considered to be excellent by the selection panel. This increase will raise the number funded to 47 percent in 1984–85.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

Local Assistance	–	–	–	271	–	–
Totals, Public Participation *(General Fund)*	0.9	–	–	$332	–	–

20.30 Touring Programs

The California Arts Council subsidizes up to 30% of performing artist's fees paid by non-profit organizations which provide public performances and programs in communities, schools, senior citizen centers, fairs and festivals, colleges and universities. The Council assesses the ability of performing groups and their potential sponsors who participate in the program, promotes the touring program statewide to facilitate contact between potential community sponsors and the touring roster; provides assistance to sponsoring organizations and artists in the areas of booking contracts, promotion, marketing, publicity, producing and planning arts engagements; maintains a calendar of events, a published directory of touring artists and sponsors; conducts on-site evaluations of performing engagements; reviews and approves artist-sponsor contracts and performances.

The Touring Program reimburses sponsors of the selected artists to encourage public performances and programs throughout the state's large and small communities, which would not ordinarily take place. Additionally, the Touring Program assists touring artists and arts sponsors to develop earned income more effectively through service workshops in booking, production, audience development, group sales, fundraising, graphics and image development and budget planning.

The 1984–85 budget proposes a reduction of $12,000 in grants for the touring element.

20.40 Support to Prominent Organizations

Support to Prominent Organizations is designed to assist California's outstanding arts institutions in maintaining and expanding their community service programs. These organizations have annual budgets of at least two million dollars and enjoy national and international reputations for artistic excellence. This program brings these organizations into direct contact with special or new audiences through 1) discount tickets to senior citizens, the handicapped, and low-income or minority citizens; 2) free performances in schools, social institutions, and community agencies; 3) exchange programs; and 4) touring or other programs of service to the community.

The 1984–85 budget proposes an increase of $173,000 (GF) in Support to Prominent Organizations. These funds wil increase the proportion of prominent organizations' budgets supported by the Arts Council.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of organizations served	19	19	19

20.50 Technical Assistance

The California Arts Council will provide assistance services to those Council grantee arts organizations designated by the peer review panel process as needing technical assistance—services which will improve their artistic, managerial or fiscal skills.

The program objectives are to strengthen Council funded arts organizations by developing their expertise in all areas critical to successful artistic and administrative management, and to make more effective use of the funds granted by the Council so that the arts are more accessible to persons throughout California.

Program funds will be used to provide consultant services to designated recipients. The consultations will be related to artistic development, arts management or earned income and fiscal expertise. Services will be tailored to the needs of the grantee.

The 1984–85 budget proposes to reduce this element $19,000 (GF) and to combine it with the State/Local Partnership element (40.40). This will focus technical assistance on local government programs in order to increase their revenue-generating capabilities.

40 STATEWIDE PROJECTS

Program Objectives and Description

The objective of the California Arts Council's statewide projects is to encourage and enhance communication among artists and between artists and arts organizations, governmental agencies, and the general public. Statewide organizations receive support to provide services to cultural institutions, individual artists, and the general public.

The California Arts Council works with federal, State, and local agencies to provide information, resources, and technical and support services for community arts organizations, to provide employment for artists, and to expand public participation in cultural programs.

40.70 Art in Public Buildings	0.2	0.2	0.2	225	42	128

40.40 State-Local Partnership

The State/Local Partnership element is designed to promote local cultural planning and decision-making and to reach previously underserved regions of the State of California with arts programs. Program objectives are: a) to encourage rural and suburban areas to participate more fully in arts programs by decentralizing arts planning; b) to facilitate local arts planning through the availability of state-funded planning grants; c) to promote implementation of local arts planning through the availability of matched state program grants; d) to expand private sector support for the arts at the local level; e) to promote communication between state and local governments on arts programming; f) to help provide a more stable base of support for the arts at the local level and simultaneously to stimulate the local economy; g) to prevent duplication and overlap between state and federal grants programs; and h) to provide employment for artists.

The 1984–85 budget proposes an increase of $100,000 (GF) in the State-Local Partnership element. This augmentation, combined with the Council's technical assistance activities, will focus the program on improving the revenue development capabilities of local arts organizations.

40.50 Interagency Arts Coordination

The Interagency Arts element coordinates various arts programs in conjunction with other state departments. These arts programs assist both the California Arts Council and the co-sponsoring state departments in achieving their goals.

The 1984–85 budget proposes an increase of $12,000 (GF) for Interagency Arts Coordination.

40.60 Exemplary Arts Education

The Exemplary Arts Education element was created by Chapter 1258 of the Statutes of 1980 to encourage and assist in the establishment, conduct, or improvement of elementary and secondary educational programs which integrate the arts into the curricula for all academic disciplines. Chapter 1258 requires the California Arts Council to administer the program in conjunction with the Department of Education.

40.70 Art in Public Buildings

Chapter 493 of the Statutes of 1980 transferred the appropriation for the Art in Public Buildings Element from the Department of General Services to the California Arts Council. That chapter requires the Council and the State Architect's Office to select state-owned facilities as sites for original works of art. The Council will use its panel process to select art projects for placement in state buildings.

The 1984–85 budget proposes an increase of $85,000 (GF) for Art in Public Buildings. This will allow the Council to fund six projects.

50 ADMINISTRATION

Program Objectives and Description

The Arts Council administers its programs by providing support services in the following areas: grants management, contract and fiscal control, evaluation, personnel services, program planning and federal funds use allocation. This division is divided into three primary areas: 1) Administration—The Administration section is primarily responsible for Accounting, Budgeting, Data Processing, Contracts, Office Administration, Personnel and Program Analysis, 2) Information Services—The Information section provides information services to the general public as well as the arts community and the press. This unit publishes and distributes a bi-monthly newsletter, the Council's guide to programs, and the annual report, 3) Evaluation Services—The Grant Evaluation section allows the Council to assure program accountability and refine program objectives or methodology. Evaluation occurs through site visits, self-evaluation forms and consultant contracts.

The 1984–85 budget proposes an increase of $157,000 (GF) in administrative support. Of this, $130,000 is redirected from grants to provide on-going services. The budget also proposes 1 position and $27,000 to increase clerical support.

8280 NATIVE AMERICAN HERITAGE COMMISSION

Program Objectives and Description

The Native American Heritage Commission was created by Chapter 1332, Statutes of 1976 (AB 4239). On June 21, 1977, the Governor, with the advice and consent of the Senate, appointed nine Commissioners and an Executive Secretary, all of whom are California Indians. The Commission is the single governmental unit legislatively mandated to preserve and enhance Native American heritage and to protect California Indian historic and cultural resources located within the State.

The specific powers and duties of the Commission include identifying and cataloging places of special religious or social significance to Native California tribes; making recommendations to the Legislature relative to the protection and preservation of cultural and historic resources; taking action to ensure access to sacred sites for Native Americans; making recommendations to the Department of Parks and Recreation and the California Arts Council relative to Indian matters; where necessary, bringing legal actions to prevent severe or irreparable damage to sacred or sanctified places; establishing working relationships with various State and federal agencies and departments; and, participating with State agencies in any negotiations with federal agencies relating to the protection of Native American sacred places located on federal lands.

The major objectives of this program are as follows:

1. To establish intergovernmental relations. Fulfillment of the Commission's functions and obligations is a continuing program requiring swift reactions to, or participation with, the actions of other State, federal, or regional agencies. Because of the unique fiduciary relationship which exists between Native Americans and the federal government, it is important for the Commission to work with federal agencies.
2. To conduct a review of current statutory and administrative protections applicable to cultural and historic properties with recommendations for amendment or consolidation.
3. To engage in continuous proceedings calculated to protect cultural or historic resources from severe or irreparable damage. This involves on-site inspection and investigation, public hearings, project redesign or mitigation recommendations, and, where necessary, initiating appropriate legal action through the Attorney General's Office.
4. To develop public awareness and information programs designed to educate the public about the State's important and fragile non-renewable cultural resources. This program will be accomplished primarily by printed literature and visual displays.
5. To conduct a survey and inventory of cultural resources and historic properties which are significant to Native Americans and are located on public land within the State, and to conduct a survey and inventory of Native American cemeteries on private property. The data recovered by this program are intended to facilitate long-range planning by State and federal project proponents. Without this program a project undertaking may have to be delayed or reassigned because of its impact on a significant cultural site. This program will preserve valuable cultural resources while avoiding costly construction delays.

Chapter 1492, Statutes of 1982 gave the Commission an additional responsibility for assisting Native Americans to make known their concerns regarding the need for sensitive treatment of Indian graves and cemeteries. This chapter also makes the Commission responsible for the identification of Native American burial sites on private property and for mediation of disputes arising between landowners and known descendants relating to burial sites.

We are proposing that temporary help be reduced 0.3 positions. Two new positions are added in this budget including a Resource Coordinator to provide staff support for the Director, and a Research Assistant III to compile sacred site data.

8290 CALIFORNIA PUBLIC BROADCASTING COMMISSION

Program Objectives and Description

The California Public Broadcasting Commission was created in 1975 by Chapter 1227 as an independent agency of State government.

Funding for the California Public Broadcasting Commission was reduced to an amount necessary to phase out operations in 1983–84. No funding is proposed for 1984–85. Public radio and television stations are encouraged to seek additional funding from viewers, foundations and other private sources. Language has been included in the Budget Trailer Bill to abolish the Commission.

8300 AGRICULTURAL LABOR RELATIONS BOARD

The Agricultural Labor Relations Board (ALRB), which was created by the Agricultural Labor Relations Act of 1975 (Chapter 1), is responsible for conducting secret ballot elections to determine collective bargaining representation in agriculture, and for investigating and resolving unfair labor practice disputes. The ALRB is patterned after the National Labor Relations Board and is divided into two major programs: (1) Board Administration of the Agricultural Labor Relations Act, and (2) General Counsel Administration of the Agricultural Labor Relations Act.

The workload of the Agricultural Labor Relations Board is dependent upon the number of election petitions and unfair labor practice charges filed, the number of elections objected to, the ability of the Board to settle unfair labor practice charges and complaints, the number of hearings, the number of appeals to the Board from these hearings, and the number of appeals to the courts from Board decisions. Exhibit I on the following page provides a graphic display of the Board's operation.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

10 BOARD ADMINISTRATION

Program Objectives and Description

Board Administration consists of a five-member Board. The Board establishes policies and procedures for all activities related to the conduct of elections, the investigation and resolution of unfair labor practices, and the conduct of hearings on elections and unfair labor practices. It also conducts and/or reviews these hearings on elections, determines whether the results of such elections should be certified, and adjudicates complaints issued in unfair labor practices.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	65.1	46.3	56.2	$3,359	$2,951	$3,596

10.40 Office of the Solicitor	–	–	10	–	–	539

10.10 Representation Cases

Hearings may be conducted by the Board to determine whether particular union representation elections are to be certified; these hearings must be held in all cases where conduct which might warrant setting aside the election is shown in declarations. The Board rules on the statements of objections and whether or not the facts of the case warrant setting aside the election. In order to refine the process so that certification is not unduly delayed, the Executive Secretary's office screens all objections to assure that hearings are limited to only those points and issues which are pertinent to the case and which have not previously been held to be non-objectionable. The Board acts as an appellate body to which any of the parties involved may appeal the decision of a hearing officer and the Board must consider all appeals. Hearings are also held to consider challenged ballot issues, unit clarification issues and access issues, and these are appealed to the Board through the same process.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Elections objected to	21	39	39
Hearings opened	11	20	20
Hearing officer decisions issued	7	15	15

Board decisions issued	13	12	12

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	12.6	9	8.6	$652	$573	$593

10.20 Unfair Labor Practices

The Agricultural Labor Relations Act defines unfair labor practices and authorizes the Board, if the preponderance of the evidence taken warrants such a decision, to issue orders to prevent or remedy such practices. Hearings on unfair labor practices are conducted before an administrative law officer according to the rules of evidence. Parties are represented by counsel, and a transcript is made of the proceedings. The administrative law officer writes a decision; if any party files exceptions, the decision is reviewed by the Board. While an unfair labor practice case is pending, the Board has the authority to petition the courts for appropriate temporary relief or restraining orders.

Expenditures *(General Fund)*	49	34.8	35.2	$2,529	$2,222	$2,302

10.30 Policies, Procedures and Motions

Board Administration is responsible for the overall policy direction of the agency, and the establishment of procedures to implement that policy. This involves the development and promulgation of regulations required to implement, interpret, and make specific the provisions of the Agricultural Labor Relations Act. This process involves the formulation of regulations, the solicitation and analysis of public comments, the holding of public hearings and meetings, and the final adoption of regulations. Further, policy and procedure development is required internally to deal with any legal and practical problems in the administration of the Agricultural Labor Relations Act.

Ongoing administration of the Board's caseload requires the disposition of numerous and varied procedural and substantive motions. Executive Secretary staff reviews motions to extend certification and deny access, as well as continuance and extension motions, and other miscellaneous motions related to the conduct of hearings or the progress of cases before the Board.

Performance Measures

Output consists of the rules and regulations, internal policy decisions and rulings on motions.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	3.5	2.5	2.4	$178	$156	$162

10.40 Office of the Solicitor

ALRB court litigation falls into two categories:

1. Review and Enforcement of Final ALRB Decisions.

Section 1160.8 of the act provides for judicial review of Board orders in unfair labor practice decisions. In those cases where a respondent seeks judicial review in the appropriate court of appeals, attorneys appear on behalf of the Board and defend its decisions. If the respondent has not filed a petition for review but refuses to comply with the Board's order, the Board will seek enforcement of its order in the appropriate superior court.

2. Suits Against the Board.

This litigation involves suits against the Board by employers and labor organizations seeking to enjoin the Board from conducting elections, counting ballots, proceeding with unfair labor practice trials or challenging Board regulations, policies or procedures. These suits are in the nature of petitions for declaratory and injunctive relief, writs of mandate, and writs of prohibition. They usually necessitate the Board appearing on a few hours' notice to defend against the issuance of a temporary restraining order and then, perhaps a week later, appearing in a hearing on an order to show cause. These suits have also resulted in appellate litigation where it has been necessary to seek extraordinary appellate review in the appropriate Court of Appeal or the California Supreme Court in order to stay the effect of an adverse ruling in a superior court.

20 GENERAL COUNSEL ADMINISTRATION

Program Objectives and Description

The objectives of the General Counsel Administration are to conduct fair, secret ballot elections; to investigate and bring resolution or prosecution in unfair labor practices. The General Counsel is responsible for implementing the provisions of the act and rules and regulations of the Board in the conduct of elections, challenges to ballots, court litigation, and investigation, issuance of complaints and prosecution before the Board of unfair labor practice charges. The staff of the regional offices has primary responsibility, under the direction and coordination of the General Counsel, for the activities related to elections and unfair labor practices, and for seeking temporary injunctive relief in unfair labor practice cases.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

* Dollars in thousands

8300 AGRICULTURAL LABOR RELATIONS BOARD—*Continued*

20.10 Representation Cases

The ALRB conducts secret ballot elections in which agricultural employees can vote to designate a collective bargaining unit. The election process begins with the filing in a regional office of a petition for election, the petition is then investigated to determine whether it meets all the requirements of the act and the Board's rules and regulations. If the petition meets all requirements of sufficiency and if there is reasonable cause to believe that a question of representation exists, arrangements must be made with the participating labor organization(s) and with the employer to conduct an election within seven days of the date of filing. If no choice on the ballot receives a majority of the ballots cast, a runoff election is conducted. If the election cannot be certified, another election may be held.

Elements that may be required in the investigation of petitions during the seven days subsequent to filing include determining whether a valid election was conducted among the employees of the employer within the 12 months immediately preceding filing, whether a labor organization is currently certified as the exclusive collective bargaining representative of the employees affected, and whether the petition is barred by an existing collective bargaining agreement negotiated by a certified labor organization and an employer. In addition to the filing of petitions for certification by labor organizations, the statute also permits the filing of petitions for decertification by an agricultural employee or group of agricultural employees. The same additional elements may also be required in the investigation of such petitions during the seven days subsequent to filing.

During an election, a board agent or an observer of any party may challenge the eligibility of any person to cast a ballot. The ballots of challenged voters are set aside and if upon completion of the election, the tally of ballots discloses that the challenged ballots are sufficient in number to affect the results of the election, an investigation may be conducted to determine the challenged voters' eligibility and a report issued containing recommendations and conclusions. In the alternative, a hearing may be held on some or all of the challenged ballots.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Petitions closed	66	75	75
Elections held	36	50	50

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	6.8	5.1	5	$314	$278	$285

20.20 Unfair Labor Practices

An unfair labor practice charge may be filed by an individual, an employer, or a labor organization alleging that an agricultural employer or a labor organization is engaging in an unfair labor practice in violation of Section 1153 or 1154 of the act. The charge is filed in a regional office and a copy is served on the charged party. The charge is then assigned to a team comprised of a field examiner and an attorney in the regional office to conduct an investigation of the charge. Initially, the field examiner interviews the charging party's witnesses and where it appears that there is evidence of a violation, the charged party is requested to provide witnesses relevant to the investigation. After an investigation, the regional office determines whether the investigation has established sufficient evidence to warrant issuance of a complaint. If the determination is made to issue a complaint, the charged party is contacted and requested to enter into a settlement agreement to resolve the alleged unfair labor practices. In the absence of settlement, the matter is set for hearing before an administrative law officer. An attorney in the regional office then prepares the appropriate witnesses for trial and litigates the case. These hearings have ranged from one day to several months in duration, depending upon the complexity of the issues. A legal brief is ordinarily written by the trial attorney and submitted to the administrative law officer after the close of the hearing. Exceptions to the administrative law officer's decision may be taken by either party. In this circumstance another legal brief, arguing the points on review by the board, is prepared by the trial attorney.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Unfair labor practice charges closed	782	1,000	1,000
Complaints closed	137	130	130

Expenditures *(General Fund)*	89.1	66.1	64.9	$4,110	$3,636	$3,729

20.30 Court Litigation

ALRB court litigation falls into two categories:

1. Review and Enforcement of Final ALRB Decisions.

Section 1160.8 of the act provides for judicial review of Board orders in unfair labor practice decisions. In those cases where a respondent seeks judicial review in the appropriate court of appeals, attorneys appeal on behalf of the Board and defend its decisions. If the respondent has not filed a petition for review but refuses to comply with the Board's order, the Board will seek enforcement of its order in the appropriate superior court.

2. Suits Against the Board.

This litigation involves suits against the Board by employers and labor organizations seeking to enjoin the Board from conducting elections, counting ballots, proceeding with unfair labor practice trials or challenging Board regulations, policies or procedures. These suits are in the nature of petitions for declaratory and injunctive relief, writs of mandate, and writs of prohibition. They usually necessitate the Board appearing on a few hour's notice to defend against the issuance of a temporary restraining order and then, perhaps a week later, appearing in a hearing on an order to show cause. These suits have also resulted in appellate litigation where it has been necessary to seek extraordinary appellate review in the appropriate Court of Appeal or the California Supreme Court in order to stay the effect of an adverse ruling in a superior court.

The Court Litigation element is being transferred to the Board Administration Program and is being renamed the Office of the Solicitor for the 1984–85 fiscal year.

8320 PUBLIC EMPLOYMENT RELATIONS BOARD—*Continued*

10 DISPUTE RESOLUTION

Program Objectives and Description

The objective of this program is to provide a reasonable method of resolving disputes regarding unlawful acts and wages, hours, and other terms and conditions of employment.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs *(General Fund)* ..	70.7	76.2	76.2	$3,565	$3,848	$4,045
Program Elements						
10.10 Violations of Statute	59.9	64.8	64.8	3,015	3,185	3,330
10.20 Impasse	3.1	3.1	3.1	166	188	217
10.30 Litigation	7.7	8.3	8.3	384	475	498

10.10 Violations of Statute

An employer, an employee organization, or an employee may file a charge alleging that an employer or employee organization has committed an unlawful act as defined in the Educational Employment Relations Act (EERA), the State Employer-Employee Relations Act (SEERA), and the Higher Education Employer-Employee Relations Act (HEERA). PERB reviews the charge to determine if a prima facie case has been established. If the charge states a prima facie case, PERB issues a complaint. Next, PERB calls an informal conference to attempt to settle the matter by mutual agreement. If settlement does not occur, either party may request a formal hearing and the administrative law judge issues a proposed decision. Proposed decisions that are not appealed are binding on the parties to the case. Cases that are appealed go before the Board.

A similar process is utilized in resolution of conflicts regarding violations of public notice and other provisions of statute.

All final decisions of the Board are assigned to regional office staff to monitor and ensure compliance. This includes resolution of disputes regarding exactly what actions constitute compliance.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Unfair practice charges	654	660	660
Public notice complaints	4	15	15
Administrative appeals/rulings on motions	4	5	5
Compliance with Board orders	49	60	60

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	59.9	64.8	64.8	$3,015	$3,185	$3,330

10.20 Impasse

PERB assists the parties in reaching negotiated agreements through mediation, and, when necessary, through factfinding under EERA and HEERA.

The 1984–85 budget proposes to increase fees paid to factfinders from $200.00 to $300.00 per day to bring PERB closer to parity with the fees paid to neutrals hired from lists maintained by the American Arbitration Association, State Conciliation Service, and Federal Mediation and Conciliation Service.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

8320 PUBLIC EMPLOYMENT RELATIONS BOARD—*Continued*

20 REPRESENTATION DETERMINATION

Program Objectives and Description

This program administers a variety of processes which involve determination of appropriate units for collective bargaining, resolution of disputes regarding appropriate units, conduct of elections for the selection and decertification of exclusive bargaining agents, changes in bargaining unit structure or content, changes in the identity of exclusive representatives, and conduct of elections to rescind organizational security provisions.

The budget proposes a reduction of $15,000 and one personnel year to reflect efficiencies achieved in administering this program.

Elections	71	80	80

30 ADMINISTRATION

Program Objectives and Description

Administration provides administrative services for the departmental programs through executive and fiscal management, personnel and training, research and legislation, business services, data and word processing, and reproduction services.

The 1983/84 budget proposes a one-time augmentation of $66,000 to upgrade the current word processing equipment to an office information system. The current word processing system will reach its seventh year of useful life in May 1984 and is not sufficient to provide for adequate production. The budget also proposes a reduction of $33,000 and two personnel years to reflect efficiencies achieved in administering this program.

Program Elements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

97 UNALLOTTED

Program Objectives and Description

During the current year, the Board will issue decisions, conduct elections, and perform other activities to establish representation for University of California employees under the Higher Education Employer-Employee Relations Act. In the current and budget years, the Board will conduct decertification elections for state employees and California State University employees. Currently $685,000 is appropriated for allocation by the Department of Finance for the implementation of the Higher Education Employer-Employee Relations Act (HEERA) and the State Employer-Employee Relations Act (SEERA). These funds will be used to augment programs 10-30 as approved in the allocation order.

8350 DEPARTMENT OF INDUSTRIAL RELATIONS

The objective of the Department is to protect the workforce in California, improve working conditions, and advance opportunities for profitable employment. The Department is continually working toward this objective by enforcing the compulsory Workers' Compensation Insurance Law and adjudicating workers' compensation insurance claims, by working to prevent industrial injuries and deaths; by promulgating and enforcing laws relating to wages, hours, and conditions of employment; by promoting apprenticeship and other on-the-job training; by assisting in negotiations with parties in dispute when a work stoppage is threatened; and by analyzing and disseminating statistics which measure the condition of labor in the State.

The 1984–85 Governor's Budget proposes an increase of $67,000 (GF) to complete the reorganization of the Division of Labor Standards Enforcement which began in 1983–84 as required by Chapter 323, Statutes of 1983 (the Trailer Bill). This act requires the Labor Commissioner to maintain separate offices for field enforcement activities.

The 1984–85 budget also proposes $222,000 (GF) and 5 positions to implement Chapter 1096, Statutes of 1983 which increases penalties for failing to pay an employee on the designated payday. These penalties are expected to increase revenues $500,000 annually. The budget proposes $62,000 (GF) and two positions to implement Chapter 685, Statutes of 1983 which expands farm labor contractor licensing requirements and increases the license fee. This act is likely to increase revenues $165,000 annually.

The 1984–85 budget proposes $150,000 (GF) for automated equipment to increase efficiency without the need for additional personnel in the Divisions of Industrial Accidents and Labor Standards Enforcement.

The 1984–85 budget proposes $476,000 (GF) and 16 positions to establish permanently the claims adjustment function of the Uninsured Employers Fund. These positions are currently scheduled to terminate on June 30, 1984.

The 1984–85 budget also proposes $306,000 ($61,000 GF, $245,000 FF) and 6 positions to establish a mining consultation function in the Division of Occupational Safety and Health. This function has been established administratively in 1983–84 and is designed to create a unit for the mining industry comparable to the Cal/OSHA Consultation Service.

In addition, the 1984–85 budget proposes $415,000 (GF) and 10 positions for increased legal defense and investigative staff for the Uninsured Employers Fund. Staffing is proposed at a level to enable the departmental representation itself in all significant proceedings and to expand its investigative activities.

The 1984–85 budget proposes $205,000 (GF) and 5 positions to collect revenues used to fund the Subsequent Injuries Program. Staffing is proposed at a level to enable the Department to process all new cases.

The 1984–85 budget also proposes $888,000 ($574,000 GF, $314,000 FF) to reduce the salary savings rate in the Department from 8.7 percent to 7.3 percent.

10 REGULATION OF WORKERS' COMPENSATION SELF-INSURANCE PLANS

Program Objectives and Description

An employer may meet the statutory requirement of providing workers' compensation benefits for his employees by obtaining a certificate of consent to self-insure. A certificate is issued after the employer has proved to the satisfaction of the Director of Industrial Relations that it has the financial ability to pay normal and catastrophic losses over a long term, maintained an effective safety program and provided prompt and competent delivery of benefits. A security deposit is required of private employers and the amount of the deposit is revised periodically. The benefit delivery systems of self-insurers are audited on a three-year cycle to make certain all benefits are paid promptly and in full. A part of this three-year audit is a reevaluation of the self-insurer's financial strength. Program advice is provided to self-insurance plan administrators.

Authority

Labor Code, Sections 129, 3700 through 3705 inclusive.

20 CONCILIATION OF EMPLOYER–EMPLOYEE DISPUTES

Program Objectives and Description

The objectives of the program are to protect the economy of the State and the well-being of employees in all categories by preventing or minimizing work stoppages, business interruptions, or the interruption of public services. It is the objective of the Mediation/Conciliation Service to accomplish this on a voluntary basis by making skilled professionals available to disputing parties with the objective of achieving settlements that are within the means of those concerned and that prevent an adverse effect on the economy.

Authority

The program is authorized by Sections 65 and 66 of the California Labor Code, the labor provisions of the various Transit District Acts of the Public Utilities Code, the Meyers-Milias-Brown Act, the Educational Employment Relations Act, the State Employer-Employee Relations Act and local legislation deriving from these acts and the Agricultural Labor Relations Act.

30 PREVENTING, SETTLING, ADJUDICATING, AND ADMINISTERING DISPUTES UNDER WORKERS' COMPENSATION LAWS

Program Objectives and Description

The Division of Industrial Accidents staffs and administers the regional offices of the Workers' Compensation Appeals Board, which are courts of limited jurisdiction with exclusive constitutional powers to decide disputes between workers and employers/insurance carriers that arise from work injuries. The Division also operates a number of nonlitigious services for injured workers and all elements of the workers' compensation system, as mandated by the Labor Code.

Objectives of the program are to: (30.11) prevent, settle, or adjudicate expeditiously, inexpensively and without encumbrance, work-connected injury claims; (30.21) to provide information and assistance to injured workers; (30.31) to provide workers' compensation benefits under certain special programs; (30.41) to approve and enforce rehabilitation plans; (30.51) to provide ratings of permanent disability; (30.61) to provide medical consultative services, and; (30.71) to assure that disputes are resolved fairly and in accordance with law.

In 1983–84, and in 1984–85 the budget for this program is displayed in elements which reflect the current organizational structure.

Authority

Article XIV, Section 4 of the Constitution of the State of California and Divisions 1, 4 and 5 of the Labor Code.

30.11 Preventing, Settling, and Adjudicating Disputes under Workers' Compensation Laws

Special calendars such as pretrial settlement, conference, and rating calendars are used to expedite the resolution of issues; disputes not otherwise resolved, and which generally involve more complicated complex legal and/or medical issues, are adjudicated by a formal hearing. Workers' compensation judges with private attorneys and retired judges acting as pro tempore are assigned throughout 22 district offices to accomplish these procedures.

The 1984–85 budget proposes $60,000 for automated equipment to increase efficiency, without the need for additional personnel. The budget also proposes a reduction of $353,000 and 7 positions to reflect efficiencies achieved in administering this element.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
New filings	137,947	151,742	160,000
Dispositions	154,559	160,000	170,000

Reimbursements				–	*151*	*140*

30.21 Expediting The Provision of Workers' Compensation Benefits

This element helps to resolve disputed workers' compensation claims administratively by providing information and impartial assistance to injured workers who request help. This mitigates the need of workers to acquire attorneys and initiate legal proceedings. The element is also concerned with promoting prompt payment of workers' compensation benefits to injured workers by insurance companies or self-insured employers.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Providing Information and Assistance on Workers' Compensation Benefits			
Information on Workers' Compensation questions	$103,573	$113,930	$125,323
Assistance on Workers' Compensation cases	126,589	139,248	153,173
Review of claims delayed and denied	55,907	58,702	61,637
Assistance and investigation of asbestos workers' claims	98	147	220
File review for identity of eligible asbestos workers	409	490	588
Monitoring Promptness and Adequacy of Benefit Notices and Payments			
Benefit information notices processed	$416,582	$437,411	$459,281
Payment clarification requests processed	11,710	10,539	10,012

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	–	36	36	–	$1,470	$1,639
General Fund				–	*1,435*	*1,602*
Asbestos Workers Account				–	*35*	*37*

30.31 Operating a Claims Bureau

This element provides benefits to injured workers covered under certain special workers' compensation programs. The purpose is to provide benefits promptly when they are due without the worker having to resort to unnecessary and expensive litigation. The Death Without Dependents component collects death benefits from carriers and self-insured employers for use in the payment of Subsequent Injuries.

The 1984–85 budget proposes to establish permanently 16 positions and $476,000 to administer the Uninsured Employer's Fund. These positions were due to terminate on June 30, 1984.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Uninsured Employers' Fund (UEF) Claims			
Amount of claims paid	$5,993,505	$7,116,000	$7,116,000
Amount collected	820,962	900,000	900,000
Number of new cases opened	1,406	3,000	2,000
Average number of open cases	4,935	5,857	6,982
Subsequent Injuries Fund (SIF) Claims			
Amount of claims paid	$4,338,778	$5,124,000	$5,524,000
Number of new cases opened	642	650	650
Average number of open cases	3,055	3,250	3,450

* Dollars in thousands

30.41 Supervising the Rehabilitation of Disabled Workers

The Division of Industrial Accidents is required by Labor Code Section 139.5 to maintain a rehabilitation bureau to ensure the provision of rehabilitation benefits for injured workers. The Rehabilitation Bureau administers a reporting system for rehabilitation services, approves rehabilitation plans, and resolves disputes involving issues of rehabilitation and related benefits.

The 1984–85 budget proposes an increase of 2 workers compensation consultants and $78,000 in the Rehabilitation Bureau to meet the demands of increasing caseloads while maintaining the current level of service.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Work status reports processed	$43,194	$45,000	$48,000
Decisions issued	65,732	71,000	75,000
Cases closed	27,767	25,000	26,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	–	70	72	–	$3,850	$4,062

30.51 Operating a Disability Evaluation Bureau

This element (authorized by Labor Code Section 124) provides estimates of percentages of permanent disability to the Administrative Director, the Workers' Compensation Appeals Board and employers and employees or their representatives. This enables the WCAB, carriers and self-insured employers to institute orders to provide payments to injured workers suffering permanent impairment as an outcome of industrial injury.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Formal ratings	6,296	5,855	5,455
Informal ratings	9,824	10,708	11,671
Consultative ratings	48,173	50,582	53,111

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	–	38	38	–	$1,526	$1,605

30.61 Operating a Medical Bureau

This element (authorized by Labor Code Sections 122, 124 and 129) provides advice and consultation on medical matters to the Administrative Director and his agents, including the staff of the Workers' Compensation Appeals Board. The Medical Bureau helps to resolve medical disputes on workers' compensation cases by providing physical examinations of injured workers or by utilization of outside Independent Medical Examiners. The Bureau also has educational, informational and liaison roles with all the elements of the Workers' Compensation system.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Request for Independent Medical Examiners	996	1,000	1,000
Medical Bureau Examinations	286	180	180

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	–	8	8	–	$453	$485

30.71 Reviewing Adjudication of Disputes under Workers' Compensation Laws

The Workers' Compensation Appeals Board (created by Section 110 through 138.2 of the Labor Code) reviews decisions of referees for errors of fact and law, occasionally decides cases directly (on a nonappellate basis) when justified by special circumstances, acts on petitions for disqualification of referees, acts on petitions for exhumation and autopsy, regulates the adjudicatory process, punishes for contempt, determines who may represent parties in the adjudicatory process, and participates as a party in the appellate review process. The goal of this program is to assure that disputes are resolved fairly and in accordance with law.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Petition for reconsideration	4,314	4,500	4,600
Decisions	3,815	3,900	4,100
Appellate proceedings processed	863	950	1,010
Other proceedings	140	160	175

* Dollars in thousands

8350 DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

Expenditures *(General Fund)*	–	43	43.4	–	$2,310	$2,461

40 THE PREVENTION OF INDUSTRIAL INJURIES AND DEATHS TO CALIFORNIA WORKERS

Program Objectives and Description

To ensure the safe and healthful working conditions for all California working men and women, this program enforces safety and health standards, investigates the causes of occupational deaths and injuries, and assists in encouraging employers to maintain safe and healthful working conditions by providing research, information, education, and training in the field of occupational safety and health.

Authority

Labor Code: Division 1, Chapters 6 and 6.5, and Division 5, Part 1 through Part 8, inclusive.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	613.2	606.7	564.6	$31,038	$33,792	$35,015

40.80 Cal/OSHA Consultation Service	57.8	58	58	3,027	3,578	3,781
40.90 Cal/OSHA Program Office	5	5	5	194	206	226

40.10 California Occupational Safety and Health

Engineers and industrial hygienists are responsible for conducting safety and health compliance inspections under the California Occupational Safety and Health Act for the purpose of bringing about corrections of unsafe practices in all places of employment through the enforcement of State health and safety laws, rules, regulations, and standards.

This element also conducts special studies of target industries and initiates compliance actions in the case of violations.

There is a special unit which oversees use of carcinogens in industry and conducts education on carcinogens. This unit also promotes and manages the voluntary compliance program.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Catastrophes/fatalities investigated	1,800	1,800	1,785
Scheduled inspections	6,802	6,802	6,975
Follow-up inspections	2,336	2,336	2,490
Complaints investigated and inspected	5,730	5,730	6,245
Violations cited (citable hazards)	37,558	37,558	37,500
Carcinogen inspections	460	460	460

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	376.5	360	322.4	$19,842	$19,965	$20,574
General Fund				*10,030*	*10,081*	*9,977*
Federal Trust Fund				*9,662*	*9,710*	*10,427*
Reimbursements				*150*	*174*	*170*

* Dollars in thousands

8350 DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

40.20 Safety of Employees in Mining

Underground mines are inspected four times per year, surface mines, once per year, and tunnels six times per year. Prejob conferences, answering complaints and requests, investigation of accidents, licensing of blasters, certification of safety representatives and gas testers, classification of underground operations, environmental surveys, and the development of proposed safety orders must also be accomplished by the unit. The element also includes ongoing training and engineering and accident prevention for the mine safety engineers. A federal grant had been awarded to expand the Division's training, consultation, and safety order activities.

The 1984–85 budget proposes to establish permanently 6 positions administratively established in the current year. This augmentation will create a consultation function for the Mining Element similar to the Cal/OSHA Consultation Service and includes $61,000 General Fund and $245,000 Federal Fund.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Original inspections	522	565	565
Reinspections	107	120	120
Requirements written	310	350	350
Unsafe instances	530	580	580
Licensing of blasters	277	300	300
Certification of safety representatives	25	300	300
Certification of gas testers	15	18	18
Prejob conferences	200	220	220

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	10.7	10	12.5	$483	$614	$739
General Fund				*465*	*402*	*485*
Federal Trust Fund				*18*	*212*	*254*

40.30 Safety of Employees While Using or Repairing Elevators, Escalators, Aerial Passenger Tramways

This element involves conducting inspections of elevators, aerial tramway (ski lifts) equipment, movable amusement rides, and construction personnel hoists by safety engineers specializing in this work. This program also calls for related consultation, equipment approval, plan review, accident and complaint investigation, education, and safety code reviews. Fees are charged for inspection work and desposited in the Elevator Safety Inspection Account.

The 1984–85 budget proposes a reduction of $66,000 and 2 positions to reflect efficiencies achieved in administering this element.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Elevators inspected	25,596	22,000	22,000
Aerial passenger tramways (ski lifts) inspected	524	530	540
Amusement rides inspected	437	440	440
Construction personnel hoists inspected	221	220	220
Consultation, complaints, accident investigations, and other special calls	8,549	8,550	8,550

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	57.2	58	56	$2,390	$2,747	$2,790
General Fund				*703*	*600*	*607*
Elevator Safety Inspection Account				*1,687*	*2,147*	*2,183*

40.40 Safety of Employees from Radiation

This element involves conducting safety compliance inspections under the California Occupational Safety and Health Act and the Atomic Energy Act of 1954 (as amended).

These inspections are performed to cover prelicensing inspections of radiation users, follow-up inspections, complaints, accident investigations, the development of proposed standards, and the monitoring of contract county programs.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
X-Ray Machines and Accelerators:			
Inspections	289	315	331
Incident investigations	27	31	33
Radioactive Material:			
Prelicensing evaluations	45	100	100
Inspections	301	235	245
Incident investigations	91	35	37
Miscellaneous:			
Requirements written (unsafe conditions)	492	450	455

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	6.1	7	7	$293	$325	$354
General Fund				*39*	*50*	*74*
Reimbursements				*254*	*275*	*280*

* Dollars in thousands

8350 DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

40.50 Safety of Employees from Pressure Vessel Failure or Malfunction

This element involves conducting field inspections of pressure vessels by safety engineers specializing in this work. The program also entails the shop inspection of new pressure vessels.

Related to this field inspection program are the section's permit-issuing activities along with consultations, plan review, accident investigation, education, and code review (boiler and fired pressure vessel safety orders, and unfired pressure vessel safety orders). Fees are charged for inspection work and placed in the Pressure Vessel Inspection Account.

The 1984–85 budget proposes a reduction of $82,000 and 2 positions to reflect efficiencies achieved in administering this element.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Boilers inspected	1,400	1,400	1,400
Tanks inspected	24,000	24,000	24,000
Shop inspection hours	12,000	12,000	12,000
Special inspections, consultation, accident investigations, etc.	15,700	16,000	16,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	63	65	63	$2,743	$3,516	$3,587
General Fund				*574*	*399*	*402*
Pressure Vessel Inspection Account				*2,169*	*3,117*	*3,185*

40.60 Occupational Safety and Health Appeals Board

The Occupational Safety and Health Appeals Board is a quasi-judicial body (appointed by the Governor) empowered to settle disputes arising out of citations and civil penalties issued to California employers found to be in violation of health and safety codes by the Division of Occupational Safety and Health. Appeals from employers are heard by administrative law judges employed by the three-member board and written decisions are filed within 30 days after hearings. If any party to a hearing is dissatisfied with the decision of the administrative law judge, he may petition the Board for reconsideration. Following the Appeals Board's Decision After Reconsideration, a party may appeal to the Superior Court. Employers who are successful in their appeal may petition the Board to recover the cost of litigation.

The 1984–85 budget proposes a reduction of $79,000 and 2 positions to reflect efficiencies achieved in administering this element.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
New filings	1,351	1,486	1,635
Dispositions	1,522	1,674	1,841
1. Withdrawals	128	158	174
2. Closures	636	561	617
3. Dismissals	34	64	70
4. Decisions	724	891	980
Decisions after reconsideration			
1. New filings	65	72	80
2. Decisions[1]	73	80	88

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	23.9	24	22	$1,334	$1,539	$1,559
General Fund				*670*	*769*	*771*
Federal Trust Fund				*664*	*770*	*788*

40.70 Occupational Safety and Health Standards Board

The Occupational Safety and Health Standards Board has responsibility to adopt, amend, and repeal occupational safety and health standards, assuring as much as possible safe and healthful working conditions for California workers. The Board's objectives are to adopt reasonable and enforceable standards at least as effective as those promulgated by the federal OSHA program.

The Board also has the responsibility to grant or deny variances from adopted standards. Permanent variances requested by employers are granted by the Board if it determines that the methods used by the employer will provide equivalent health and safety to his employees as if he complied with the standard. Any employer or other person adversely affected by the granting or denial of a temporary variance from the Division of Occupational Safety and Health may appeal to the Board within 15 working days. Also, any interested person may propose new or revised standards or any other item concerning occupational safety and health to the Board.

The 1983–84 budget authorized 8 new positions to perform the review of Cal/OSHA regulations required by Ch. 567, Statutes of 1979, and the remedial rulemaking required by Ch. 865, Statutes of 1981. These statutes require the Standards Board to review and re-write where necessary approximately 3,700 pages of Cal/OSHA regulations by June 30, 1986.

The 1984–85 budget proposes an increase of $66,000 for a mandated contract with the State Building Standards Commission for regulations approval, codification, and publication services pursuant to Chapter 1082, Statutes 1981. The budget also proposes a reduction of $33,000 and 1 position to reflect efficiencies achieved in administering this element.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Public meetings/hearings	12	12	12
Proposals to the board	28	33	55
Standards adopted by the board	33	30	50
Emergency standards adopted	1	2	2
Variance applications	39	40	40
Permanent variances granted	24	35	35
Interim order of variances issued	–	–	–

[1] Includes decisions denying petitions for reconsideration.

40.80 Cal/OSHA Consultation Service

This element provides on-site consultations—both safety and health—to all employers, at their request, to assist them in complying with California's safety and health regulations. California recognizes the need to assist employers in achieving voluntary compliance with Cal/OSHA safety and health regulations through on-site consultations and employer/employee education as an alternative to correction of unsafe practices through enforcement/compliance. In addition, a need exists for greater understanding by employers of their obligations under the Federal or State OSHA Acts to encourage voluntary compliance. The interpretation of complex standards and the ability to recognize hazards pose difficulties for employers, particularly small business employers, who often lack the financial resources to utilize private consultants to assist them in understanding their obligations under the Act.

In addition to the 7(c)(1) contract with federal OSHA which provides for 90 percent federal funding—10 percent State funding for private-sector employer assistance, the Cal/OSHA Consultation Service supervises ten staff persons funded 50/50 under the 23(g) grant (shown in Element 40.10). This allows on-site consultations to be performed at the request of public agencies and also provides for the development of a training and education program for employers/employees. Employer/employee education and training is a vital activity in assisting employers to voluntarily comply with health and safety laws and to protect employees from job-related injuries and illnesses.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
On-site consultations	2,944	2,900	2,900

40.90 Cal/OSHA Program Office

The Cal/OSHA Program Office assists the Director of the Department of Industrial Relations (designee for California's Occupational Safety and Health Program) in maintaining liaison between the State Program and Federal Occupational Safety and Health Program. The office prepares and coordinates reports dealing with program activities, coordinates State standards activities with federal requirements, functional elements within the State Program, and develops narrative supporting annual funding requests to Federal OSHA.

50 ENFORCEMENT AND PROMULGATION OF LAWS RELATING TO WAGES, HOURS, CONDITIONS OF EMPLOYMENT, AND LICENSING AND ADJUDICATION

Program Objectives and Description

This program promotes and protects the economic well-being of approximately ten million California workers. The objectives are: (1) The enforcement of the Industrial Welfare Commission Orders and sections of the Labor Code which relate to wages, hours of work, and conditions of employment; (2) the determination and collection of unpaid wages; (3) the licensing of farm labor contractors, industrial homework firms, athlete agencies, talent agencies and garment manufacturers; and (4) the promulgation of Industrial Welfare Commission Orders which regulate wages, hours and working conditions.

Authority

State Constitution, Section 1, Article XIV; Labor Code: Division 1, Chapter 2; Chapter 4, Section 95; Division 2, Part 4, Chapter 1; Division 2, Part 10; Division 2, Part 6.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

8350 DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

50.10 Wages and Standards Enforcement

Provisions of the Industrial Welfare Commission Orders (which establish minimum wages and standards for hours and working conditions) and wage sections of the Labor Code are enforced by investigations, citations, and hearings, with criminal prosecutions as a last resort.

Disputed wage claims are determined by hearing and payment of wages due may be enforced by the courts, when necessary.

The 1984–85 budget proposes $90,000 to convert manual clerical operations into an efficient automated system without the need for additional staff. The budget also includes $67,000 operating expenses to meet the requirements of Chapter 323, Statutes of 1983 (the Trailer Bill). This act requires a reorganization to establish separate offices for field enforcement activities.

The budget proposes 5 positions and $222,000 to enforce the provisions of Chapter 1096, Statutes of 1983 which increases civil penalties for failing to pay an employee on the designated payday. Additionally, $54,000 is proposed for the cost of regulating produce market activities as required by Chapter 424, Statutes of 1983.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Proceedings opened	59,999	60,000	60,000
Proceedings closed	57,237	58,000	58,000
Permits and licenses issued	12,703	13,000	13,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	406.6	395.6	378	$15,664	$15,643	$16,044
General Fund				*15,241*	*15,132*	*15,508*
Industrial Relations Construction Industry Enforcement Fund				*416*	*504*	*529*
Reimbursements				*7*	*7*	*7*

50.20 Licensing, Registration, Uninsured Employers' Fund, and Workers' Compensation Insurance Enforcement

The Labor Commissioner, as the regulating authority, may issue licenses to talent agencies, athlete agencies, farm labor contractors, garment manufacturers and firms which employ industrial homeworkers. Work sites are inspected to insure compliance with employment standards and to prevent the employment of minors in hazardous occupations or under conditions which are detrimental to their health and well-being.

The 1984–85 budget proposes 2 positions and $62,000 to enforce the requirement for more frequent and more in-depth testing of farm labor contractors required by Chapter 685, Statutes of 1983.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Licenses issued:			
Farm labor contractor	1,151	1,200	1,200
Talent agencies	779	800	800
Industrial homework	42	50	50
Garment manufacturers	4,448	4,500	4,500
Athlete agencies	13	250	250

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	20.4	24.4	20.4	$1,065	$1,554	$1,405
General Fund				*756*	*1,041*	*900*
Reimbursements				*309*	*513*	*505*

50.30 Cal/OSHA Antidiscrimination Enforcement

The Labor Commissioner enforces the sections of the Labor Code which prohibit an employer from discriminating against an employee who reports or makes known unsafe working conditions.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Discrimination complaints received	144	140	140
Discrimination complaints closed	106	100	100

General Fund				*112*	*213*	*171*
Federal Trust Fund				*112*	*186*	*219*

50.40 Industrial Welfare Commission—Promulgation of Labor Standards

The Industrial Welfare Commission (IWC) has the continuing duty to ascertain wages, hours of labor and working conditions and to investigate the health and welfare of employees. It must undertake a full review of the adequacy of the minimum wage at least every two years. Upon petition or upon its own motion, it may promulgate, review, and amend its orders establishing minimum wages, maximum hours, and working conditions necessary to the health and welfare of employees in various industries and occupation groups, according to procedures specified in the Labor Code and the Government Code. For these purposes it conducts research and provides information and holds public meetings and hearings. Amendment of an order usually requires calling an advisory wage board consisting of employer and employee representatives for the affected industries. Minimum standards protect nearly all employees in the private sector and establish fair conditions of competition for employers. The nature of IWC's output varies in each fiscal year according to the procedural phase in which it finds itself, as it responds to requests for review or amendment of its order.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

60 PROMOTION, DEVELOPMENT, AND ADMINISTRATION OF APPRENTICESHIP AND OTHER ON-THE-JOB TRAINING

Program Objectives and Description

To develop a maximum of on-the-job training opportunities in the State's industrial economy through apprenticeship and other on-the-job training programs. The State's youth, minorities, women, and veterans require an increasing number of job training opportunities in order to enter the skilled labor market.

The Division of Apprenticeship Standards develops apprenticeship and other on-the-job training programs in the private and public sectors (including correctional institutions) to assist industry to develop a trained labor force and also ensures equality of opportunity in apprenticeship and other on-the-job training.

The Division monitors and enforces state and federal regulations that cover the employment of apprentices (California Plan for Equal Opportunity in Apprenticeship) and also enforces state codes dealing with apprentices on public works. The Division also inspects, develops, and approves training establishments under contract with the United States Veterans Administration as authorized by Labor Code Section 3090.

Authority

Labor Code Chapter 4, Division 3, and Chapter 1, Division 2, Sections 1777.5 and 1777.6

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	123	118.6	101.5	$5,100	$6,148	$4,962

Program Elements

60.10	Promotion, Development, and Administration of Apprenticeship and Other On-the-Job Training	115.4	110.6	93.5	4,802	5,757	4,536
60.20	Veterans' Benefit Training	7.6	8	8	298	391	426

60.10 Promotion, Development, and Administration of Apprenticeship and Other On-the-Job Training

The Division, as the staff for the Administrator of Apprenticeship and the California Apprenticeship Council (CAC), carries out the requirements of the Labor Code and the rules and regulations established by the CAC. These activities include: the development and expansion of on-the-job training programs with both the public and private employers; the development of apprenticeship in nontraditional occupations with special emphasis on health care services occupations, data processing, electronics industry and the field of mental health; the enforcement of Section 1777.5 of the Labor Code requiring contractors to employ one apprentice for every five journeymen on public works contracts; providing more training opportunities for inmates and wards of correctional institutions to extend to the outside labor market after their release; and cooperation with other State agencies such as the California Youth Authority and the Department of Rehabilitation.

Performance Measures

Promotion, Development, and Administration of Apprenticeship:	*1982–83*	*1983–84*	*1984–85*
Number of active apprentices	36,404	32,000	34,000
Percent of women in apprenticeship	8.4%	9%	9%
Percent minorities	32%	32%	32%
Number of active trainees	3,132	3,000	3,000
Annual average cost per apprentice/trainee	92.03	101.07	101.07

Reimbursements				*934*	*992*	*143*

60.20 Veterans Benefits Training

The Division of Apprenticeship Standards under a contract with the United States Veterans Administration promoted, inspected, approved and monitored for compliance in accordance with VA regulations those training sponsors offering job training to Vietnam veterans. Through the Division's inspection and approval of training establishments, eligible Vietnam veterans received training allowances.

The 1983–84 current Veterans Administration Grant will terminate September 30, 1984. The 1983–84 budget proposed 9 positions and $320,000 for the continuation of this grant.

Performance Measures

Regular Contract Items:	*1982–83*	*1983–84*	*1984–85*
Number of gross application approval actions	1,432	1,100	1,100
Number of supervisory or compliance calls	1,011	600	600

8350 DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

70 LABOR FORCE RESEARCH AND DATA DISSEMINATION

Program Objectives and Description

Continuing expansion of the California work force requires urgent ongoing statistical and research information to provide an understanding of on-the-job safety and health as well as economic and industrial developments in both the private and public sectors.

The objectives of the program are to provide data for use in planning and executing safety programs; to measure the effectiveness of accident and illness prevention efforts in the work place; to provide accurate information pertaining to industrial relations from an impartial source on short notice; and to guide legislative and administrative decisions by State and local government. These objectives are met through the occupational injuries and illnesses statistics and industrial relations research programs which provide information on wage rates, working conditions, fringe benefits, work injuries, occupational diseases, industrial disputes, industrial relations practices, cost-of-living, and other studies related to labor.

Authority

This program is required by the Labor Code: Division 1, Chapter 7, Sections 150–156; Division 2, Part 4, Chapter 1, Section 1202; Division 2, Part 7, Chapter 1, Article 2, Sections 1773.1–1773.8; Division 5, Part 1, Chapter 2, Sections 6409–6413.5; Public Utilities Code, Sections 465–467.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	58.2	64.6	66.2	$1,769	$2,597	$2,782
Totals, Labor Force Research and Data Dissemination	58.2	64.6	66.2	$1,769	$2,597	$2,782
General Fund				*1,093*	*1,682*	*1,766*
Federal Trust Fund				*676*	*915*	*1,016*

Program Elements					
70.10 Occupational Injuries and Illnesses Statistics	44.7	50	51.6	$1,363	$1,830	$1,965
70.20 Industrial Relations Research	13.5	14.6	14.6	406	767	817

70.10 Occupational Injuries and Illnesses Statistics

To provide data on the incidence, severity, and trend of occupational injuries and illnesses, the Division of Labor Statistics and Research conducts an annual *Occupational Injuries and Illnesses Survey* among California employers. Conduct of the survey is mandatory for any state with an approved state plan under the Federal Occupational Safety and Health Act.

Supplementing the annual survey, the Division compiles statistics on the causes of occupational injuries and illnesses based upon individual injury reports filed by employers and physicians. Accident factors coded and analyzed include accident type, source of injury or illness, nature of injury, part of the body affected, age, sex, and occupation of injured worker, county of occurrence, and industry. Data are used to pinpoint when, where, how, and why work-connected accidents or illnesses occur and are presented in a series of quarterly, annual, and special reports.

Under the California Occupational Safety and Health Act, the Division assumed jurisdiction over employer recordkeeping required by the act, including responsibility for promulgation of regulations, printing and distribution of forms and employer education regarding recordkeeping.

The Division of Labor Statistics and Research is party to grant agreements providing for 50 percent federal funding by the United States Department of Labor for all phases of the occupational injuries and illnesses statistics program.

The budget also proposes a reduction of 2 positions to reflect efficiencies achieved in the administration of this element.

Performance Measures

Quantifiable output of the occupational injuries and illnesses statistics activity are shown below. The statistics the Division compiles, which serve to pinpoint accident and occupational disease factors and to measure prevention progress within various industries, are used by individuals responsible for giving direction to and implementation of occupational injury and illness prevention programs, both in government and private industry. Statistics alone cannot prevent accidents and exposures; but prevention efforts are successful only if based upon knowledge of past experience, and the work injury and illness statistics represent a source of such knowledge.

	1982–83	*1983–84*	*1984–85*

8350 DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

70.20 Industrial Relations Research

The Industrial Relations Research element carries out statistical and analytical activities designed to provide information that is of use in stabilizing collective bargaining relationships. This element maintains a reference file of both private and public sector collective bargaining agreements which provide the basis for most reports. This element also gathers information needed to make prevailing wage determinations for public works and for janitorial services in public utilities in accordance with Section 1773 of the Labor Code and Section 465 of the Public Utilities Code; conducts a biennial census of union membership; and, performs research on industrial relations and labor economics topics as required.

Performance Measures

Output consists of information on provisions of collective bargaining agreements, wage rates, prevailing wage determinations, and other industrial relations subjects. This information is summarized in published reports and in unpublished compilations used to answer specific requests.

	1982–83	*1983–84*	*1984–85*
Number of reports distributed	10,500	12,400	10,600
Number of information requests	12,300	12,900	13,550

80.40 Farm Labor Contractors	–	–	50
Totals, Claims Payments	$6,142	$7,622	$7,652

80.10 Industrial Relations Unpaid Wage Fund

This element permits the Labor Commissioner to collect any unpaid wages or monetary benefits due and unpaid to any worker in this State without an assignment from such worker. After seven years, if the Labor Commissioner has been unable to locate any worker for whom he has collected unpaid wages or benefits, the wages escheat to the State for deposit pursuant to the Unclaimed Property Law. This program is authorized under the provisions of Sections 96.6 and 96.7 of the Labor Code, which were added by Chapter 714, Statutes of 1975.

Chapter 562, Statutes of 1981, provides that whenever the balance in this fund is more than $200,000, the excess shall be transferred to the General Fund.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Claims paid, Unpaid Wage Fund)*	$57	$60	$60

80.20 Employees' Account, Uninsured Employers' Fund

This element provides for payment of workers' compensation benefits to employees whose employers have failed to make benefit payments required under the Labor Code. This program is authorized under the provisions of Sections 3715–3727 of the Labor Code which establishes the Uninsured Employers' Fund for the purpose of making such workers' compensation benefits payments.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Expenditures (Claims paid)	$5,994	$6,816	$6,801

Employees Account, Uninsured Employers' Fund	*1,072*	*600*	*585*

80.30 Asbestos Workers' Account, Uninsured Employers' Fund

AB 946 (Chapter 1041, Statutes of 1980) establishes a special revolving fund to pay benefits to individuals with asbestosis while litigation determines the responsible employer(s).

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Claims paid, Asbestos Workers Account)*	$91	$746	$741

* Dollars in thousands

8350 DEPARTMENT OF INDUSTRIAL RELATIONS—*Continued*

80.40 Farm Labor Contractors

Chapter 803, Statutes of 1976 establishes a special account in which the Labor Commissioner shall deposit twenty-five dollars ($25) of each Farm Labor Contractor's annual license fee. Funds from this account are to be disbursed for any damages to employees which exceed the limits of the licensee's bond or time certificate.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Expenditures *(Farm Labor Contractor's Account)*	–	–	$50

94 ADMINISTRATIVE SUPPORTING SERVICES

Program Objectives and Description

Administration, under the guidance of the Director, formulates departmental policies and provides administrative services for the departmental programs through management analysis, fiscal management, personnel and training, reproduction services, and data processing. Legal and public information services are provided to the programs by staff in the Director's office.

The 1984–85 budget proposes $72,000 to establish permanently 3 accounting technicians due to terminate on June 30, 1984.

The budget also proposes $415,000 and 10 positions to defend the Uninsured Employers Fund and 5 positions and $205,000 to collect the Death Without Dependents revenue for the Subsequent Injuries Program.

The budget proposes $55,000 and 1 position to determine the Department's responsibilities related to firefighter cancer presumption claims, Chapter 1568, Statutes of 1982.

In addition, the budget proposes a reduction of $23,000 and 1 position to reduce departmental overhead.

The cost of these positions has been distributed to the appropriate programs.

Authority

Labor Code: Division 1, Chapter 1.

8380 DEPARTMENT OF PERSONNEL ADMINISTRATION

The Department of Personnel Administration is the agency responsible for managing the nonmerit aspects of the State's personnel system. The goal of the Department of Personnel Administration is to insure the proper administration of existing terms and conditions of employment for the State's civil service employees and to represent the Governor as the employer in all matters concerning state employer-employee relations.

The State Employer-Employee Relations Act (Chapter 1159, Statutes of 1977) established a formal, bilateral process of employer-employee relations. The right to meet and confer in good faith granted to state civil service employees under this Act requires the Department of Personnel Administration, in conjunction with departments, to review existing terms and conditions of employment subject to negotiation, to develop management's negotiating positions, to represent management in negotiations with the exclusive representatives of employee representation units, and to administer negotiated memorandums of understanding.

It is also the responsibility of the Department of Personnel Administration to provide for the compensation, terms and conditions of employment, as well as the development and training of the State's management team and employees not represented in the collective bargaining process.

10 PERSONNEL MANAGEMENT

Program Objectives and Description

The objectives of the Personnel Management Program are to: 1) develop and maintain the Administration's policy for the conduct of management relations; 2) coordinate the statewide application of terms and conditions of employment for non-civil service employees; 3) formulate personnel policy for non-represented employees; 4) develop, coordinate, and deliver training programs and policy for State employees; 5) administer the deferred compensation, merit award, and dental insurance programs; 6) administer the State's work force reduction policies and procedures; 7) interpret personnel policies and regulations; and 8) maintain the State's compensation and pay program.

Expenditures *(General Fund)*	9.7	11	11	$496	$543	$571

10.20 Employee Development and Training

This element is responsible for: 1) the development and implementation of statewide training policy; and 2) the development and delivery of training programs designed to enhance the job-related skills, knowledges, and abilities of State employees.

In the budget year, this element is reduced by three positions due to a decline in training reimbursements. Two and one-half existing positions are proposed to be funded directly from the General Fund. In prior years, attempts were made to recover these costs through fees imposed on departments using the State Training Center.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of training programs conducted	250	300	300
Number of participants	5,800	6,800	6,800
Number of participant hours	110,000	128,000	128,000

General Fund				*63*	*–*	*129*
Reimbursements				*617*	*954*	*776*

10.30 Deferred Compensation

This element administers a program that allows State employees to defer, through payroll withholding, a portion of their salaries to various private enterprise investment programs contracted for by the State. Activities include: 1) the enrollment of employees in the program and maintenance of participant record files; and 2) the determination and authorization of the transfer of funds from the State to the investment companies and from the investment companies to retired employees.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of active participants (year-end)	14,815	16,500	18,200

Deferred Compensation Plan Fund				*384*	*372*	*393*

* Dollars in thousands

8380 DEPARTMENT OF PERSONNEL ADMINISTRATION—*Continued*

10.40 Personnel Services

The objective of this element is to provide developmental and administrative services to the State's personnel system. Activities include the development, implementation, and administration of: 1) employee service-related programs such as the dental insurance, employee assistance and merit award programs; and 2) personnel system management-related services such as the coordination of layoff processes including the computations of employee seniority points and length of service credits; interpretation of personnel rules, regulations and policy; and the development and maintenance of State compensation and pay structures.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of dental insurance enrollees	154,947	165,000	170,000
Number of dental insurance contracts written	5	10	20
Number of dental insurance information requests	8,000	10,400	12,000
Number of merit award suggestions received	2,861	2,470	2,800
Number of merit award pending/open suggestions (year-end)	1,808	1,536	1,766
Amount of merit award reported savings	$1,812,367	$1,920,000	$2,108,000
Number of requests for layoff processes (seniority lists)	176	166	143
Number of seniority computations completed	8,621	8,590	7,400
Number of length-of-service computations completed	699	1,123	997
Number of policy memos issued	66	35	84
Number of Trade Rate Letters issued	132	150	170

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements				*372*	*445*	*472*

20 LABOR RELATIONS

The objectives of the Labor Relations Program are to: 1) represent the Governor in all labor relations matters relating to the State Employer-Employee Relations Act; and 2) administer personnel regulations relating to all terms and conditions of employment for represented employees pursuant to negotiated memorandums of understanding and Government Code provisions.

Pursuant to Chapter 1258, Statutes of 1983, 4.6 analyst positions, $113,000, have been restored in the current year. Seven new positions (2.2 personnel year equivalents) are added in the current year and continued in the budget year for workload increases to be funded from reimbursements from State agencies with represented employees.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of unfair labor practice cases filed	61	85	100
Number of grievances processed	608	600	900

Reimbursements				*30*	*956*	*1,262*

25 LEGAL

The objectives of the Legal Services Program are to represent the Department in all legal matters in which the Department is interested and to provide legal services to other State departments in all labor relations matters.

Three new positions (1.5 personnel year equivalents) are added in the current year and continued in the budget year for increased legal services for labor relation matters.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of unfair labor practice cases filed	61	85	100
Number of unfair labor practice cases completed	48	42	70

30 ADMINISTRATION

The objectives of the Administration program are to: 1) provide the executive direction and leadership necessary in administering the non-merit aspects of the State's personnel management program; 2) provide support services through the analysis and coordination of legislative bills; 3) maintain communications between the Administration, the Legislature, and State employees; and 4) provide administrative support services to the Department in the areas of internal personnel functions, fiscal/budget management, business services, word processing, files, data processing, systems development, and consultation on work flow issues and processing problems.

Compensation Insurance Fund

The California State Compensation Insurance Fund is a self-supporting enterprise created to offer insurance protection to employers at the lowest possible cost. This fund operates in competition with other insurance carriers, acting as a yardstick to secure fair premium rates for employers and fair treatment for injured employees. The law requires that the fund use the same rates and classifications established by the State Insurance Commissioner for insurers generally, and provides that the rates shall be only sufficient to carry out the specific purposes stated in law.

Expenditure estimates for the budget year are based on the level of activity anticipated by the fund's management. Changes in economic conditions may result in corresponding changes in the various items of expense.

The budget data presented is information available as an annual operations report. As a public enterprise fund authorized by statutes, no budget detail is presented.

Benefits Paid:			
Insurance Code Section 11800.1	$285,770	$310,000	$325,000

8450 Subsequent Injuries

This program, authorized by Sections 4750–4755 of the Labor Code, provides benefits for permanent disabilities which arise from industrial injury to an employee who has suffered from a previous permanent disability.

Section 4706.5(e) of the Labor Code provides that where there are no heirs of a deceased employee or no persons entitled to death benefit payment, such payment will be made to the State. These moneys are continuously available for payment of benefits and partially offset the need for direct General Fund support.

8420 WORKERS' COMPENSATION BENEFITS—*Continued*

8460 Disaster Service Workers

Chapter 10 of Part 1, Division 4 of the Labor Code provides for the funding of hospitalization and medical care for disaster service workers. It is the State Compensation Insurance Fund which administers this fund.

The budget proposes an increase of $50,000 in 1984–85 to reflect the increased trend in the costs of these services.

Workers' Compensation Costs

The Labor Code (Divisions 4 and 4.5, Sections 3200–6148) mandates a complete system of workers' compensation for all employees, public orprivate, who incur injuries or illnesses that are employment-related. The following table provides data on actual and estimated workers' compensation expenditures by State agencies. This table is informational only. All workers' compensation expenditures are included in the individual agency budgets.

State agencies are either legally uninsured against workers' compensation liability or are insured by the State Compensation Insurance Fund (SCIF) pursuant to Section 11870 of the Insurance Code. Benefits paid by the uninsured agencies and insurance policy premiums paid by the insured agencies are shown below. Pursuant to Section 11871 of the Insurance Code, claims against uninsured agencies are adjusted by SCIF under a Master Agreement entered into with the Department of General Services. Adjustment costs and other administrative charges under the Master Agreement are also included below.

Additionally, the table includes Industrial Disability Leave benefits available under Chapter 374, Statutes of 1974, which may be elected in lieu of workers' compensation temporary disability benefits. Special disability benefits available under Section 4800 of the Labor Code to members of the California Highway Patrol and safety members of the Department of Justice are also highlighted.

The unfunded liability of the State for estimated future payments of Workers' Compensation benefits as of June 30, 1983, was $214,267,650. Based on current assumptions and trends, the State Compensation Insurance Fund anticipates that this liability will increase to $242,000,000 by June 30, 1984. The estimate includes legislated benefit increases effective January 1, 1984.

SUMMARY OF COSTS

	1980–81	*1981–82*	*1982–83*[1] *(est)*	*1983–84 (est)*	*1984–85 (est)*
Policy premium costs of insured State Agencies (all funds)	$3,465,009	$3,458,084	$4,300,000	$5,100,000	$5,600,000
Benefit costs paid by uninsured State Agencies (all funds), exclusive of payments under Labor Code Sec. 4800 and Industrial Disability Leave	41,964,181	50,648,889	56,825,459	60,300,000	63,000,000

8500 BOARD OF CHIROPRACTIC EXAMINERS

Program Objectives and Description

The Board of Chiropractic Examiners was established by the Chiropractic Act of California, an initiative measure passed by the voters in 1922. The Act assigned to the Board the primary responsibility of assuring the consumers of California that providers of chiropractic services are adequately trained and meet the minimum standards of performance for each treatment. Through licensure, continuing education, and disciplinary processes, the Board insures that recognized standards of treatment and practice are maintained by licensees, approves and regulates fifteen (15) chiropractic schools in the U.S. and Canada, reviews complaints, investigates possible violations of the Chiropractic Act, and polices unlicensed activity.

Maximum license fees have been $75 per year for new applicants and for renewals. Chapter 533/1983 (Rosenthal) (SB 286) authorized a $25 increase in fees for new applicants and provided for a $30 increase in renewal fees. The Board now has adequate resources to support its proposed expenditure level.

An additional 1.5 clerical positions are requested due to workload increases. The number of licensees has increased from 5,000 in 1978–79 to 6,400 in 1984–85, while the number of applications has increased from 900 per year in 1978–79 to almost 1,200 in 1984–85.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**
10 Board of Chiropractic Examiners *(State Board of Chiropractic Examiners Fund)*	$580	$666	$687

8510 BOARD OF OSTEOPATHIC EXAMINERS

Program Objectives and Description

The Board of Osteopathic Examiners exists as a result of its 1922 Initiative Act, as amended in 1962. It sets and enforces standards of licensure for California osteopathic physicians and surgeons, conducts examinations and investigations and initiates disciplinary proceedings.

Through this process, the Board assures that recognized standards of treatment and practice are maintained by its licentiates, thereby protecting and assuring the people of California osteopathic physicians of high caliber.

This budget proposes 1.5 new positions due to legal workload.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**
10 Board of Osteopathic Examiners *(Board of Osteopathic Examiners Fund)*	$273	$308	$338
Personnel years	3.7	4.5	5.1

Authority

Osteopathic Initiative Act adopted in 1922, as amended in 1962.

Performance Measures

Activity in the majority of components continues on a gradual increase. All applications processed and examinations given are by reciprocal agreement:

8530 BOARD OF PILOT COMMISSIONERS FOR THE BAYS OF SAN FRANCISCO, SAN PABLO, AND SUISUN

The Board of Pilot Commissioners for the Bays of San Francisco, San Pablo, and Suisun is responsible for providing qualified pilots for vessels entering or leaving those bays. The three-member board is appointed by the Governor and administers the program of licensing and regulating pilots by conducting examinations and acting on disciplinary complaints. The Board maintains an office in San Francisco staffed with one full-time secretary to provide support to the five-member Pilotage Rate Committee, which is appointed by the Governor and recommends pilotage rates to the Legislature. On November 1, 1983, the Board decreased the pilotage fee rate asssessment from 3.5 percent to 2.5 percent in order to avoid an excessive surplus in the Board's Special Fund.

Prior budgets have shown the commissioners as full-time State employees. They are correctly reflected in this budget as part-time commissioners.

8540 CALIFORNIA AUCTIONEER COMMISSION

The California Auctioneer Commission is a public corporation created by Chapter 1499, Statutes of 1982, for the purpose of licensing persons engaged in the practice of auctioneering or operating an auction house or auction company. A seven member Board of Governors has responsibility to set standards, determine license fees, conduct examinations and investigations and initiate disciplinary proceedings.

Under normal circumstances, consumer complaints will be investigated and mediated by the Board and Commission staff. Any costs associated with formal disciplinary proceedings (e.g. Attorney General and Office of Administrative Hearings services) are not included in this budget because workload data is unavailable at this time. The Commission plans to sponsor legislation to authorize fines to be levied against violators, and to adjust fee schedules to ensure adequate support for its program requirements.

8550 CALIFORNIA HORSE RACING BOARD

Program Objectives and Description

The purpose of the Board is to regulate parimutuel wagering for the protection of the betting public, the promotion of the horse racing and breeding industries, and the maximization of State of California tax revenues.

In 1933 the electors of the State of California adopted a constitutional amendment which created the California Horse Racing Board. The measure wrote many safeguards into the law and gave complete jurisdiction and supervision over all racing activities to the State of California acting through the California Horse Racing Board, a seven-member commission appointed by the Governor. Previously racetracks had acted autonomously and the stewards had complete and final authority over all meetings. The amendment transferred this authority to the Board, and gave the Board wide discretion in rulemaking powers. Pursuant to these powers, the Board passed rules establishing the authority of the stewards, but made the stewards strictly and completely responsible to the Board for all their actions.

The California Horse Racing Board supervises all race meetings in the State where parimutuel wagering is conducted. Principal activities of the Board include:

Protection of the betting public;
Licensing of racing associations;
Sanctioning of every person who participates in any phase of horseracing;
Designating racing days and charity days;
Acting as a quasi-judicial body in matters pertaining to horseracing meets;
Collecting the State's lawful share of revenue derived from horseracing meets;
Enforcing laws, rules, and regulations pertaining to horseracing in California.

The State's revenue from horseracing is principally derived from fees based upon a percentage of the parimutuel wagering pools, breakage (the odd cents not paid to winning ticket holders), and unclaimed tickets. Additional revenue is derived from licenses issued to horse owners, trainers, jockeys, grooms and others, and from fines.

Estimated revenues for the 1984–85 fiscal year will amount to $138.2 million of which approximately $114 million is appropriated the General Fund; and $19.1 million to the Fair and Exposition Fund; $1.4 million to the Racetrack Security Account, Special Deposit Fund; $1.4 million to the Horsemen's Organization Welfare Account, Special Deposit Fund; $1,550 million to the Standardbred Sires Stakes Fund Account; and $750,000 to the Wildlife Restoration Fund.

The 1984–85 budget includes $323,000 for converting manual CHRB record keeping to an automated system, and $32,000 for the microfilming of paper records now stored in the CHRB Sacramento Office. Fair and Exposition Fund money will be used to support the microfilming, while Racetrack Security Account, Special Deposit Fund revenue will be used to automate CHRB record keeping. No positions were added to the Board.

Authority

Section 19b of Article IV of the State Constitution and Sections 19400 through 19705 of the Business and Professions Code.

SUMMARY OF PROGRAM REQUIREMENTS

8550 CALIFORNIA HORSE RACING BOARD—*Continued*

10.10 Licensing

It is essential, to protect both the public and the industry, that the Board be aware of every individual participating in horseracing. The licensing of each participant establishes such a control.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$250	$300	$305
Personnel years	10.3	12.7	12.1

10.20 Enforcement

Racetrack investigators, who represent the California Horse Racing Board, inspect racing operations for compliance with the rules and regulations of the Board, seek the ejection of undesirables from racing enclosures, and keep the Board informed of all racing matters. Strict compliance with the detailed rules is required in order to establish preventive control and protection of the betting public and the State's interest.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$686	$827	$849
Personnel years	11.8	15	14

10.30 Administration

Administration includes the California Horse Racing Board, which consists of seven members appointed by the Governor for four-year terms, and the administrative staff which is responsible to the Board for budgeting and accounting, supervising, licensing and enforcement activities and administering the increasing number of appeals.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$312	$374	$813
Personnel years	9.6	10	10

10.40 California Standardbred Sires Stakes Program

Chapter 1148, Statutes of 1976, provided for the establishment of a standardbred sires stakes program to encourage horse breeding in California. This encouragement is to be accomplished through increased purses and special races supported by the distribution of breakage from harness racing meets.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$1,646	$1,700	$1,700
Personnel years	1	1	1

10.50 State Stewards Program

Chapter 1080, Statutes of 1977, provided that the Board contract with stewards at racing meets. The Board assesses each racing association for the pay and fringe benefits of the stewards and overhead for this program.

Input	*1982–83**	*1983–84**	*1984–85**
Totals, Expenditures	$945	$1,070	$1,070
Reimbursements	*—945*	*—1,070*	*—1,070*
Net Totals, Expenditures	–	–	–
Personnel years	14	14	14

10.60 Horsemen's Organization Welfare

Chapter 1043, Statutes of 1980, provided that one-half of the redistributable money from unclaimed parimutuel tickets from thoroughbred, harness and quarter horse race meetings be paid into a welfare fund established by the horsemen's organization.

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures	$1,374	$1,350	$1,400

8560 CALIFORNIA EXPOSITION AND STATE FAIR

The objective of the California Exposition and State Fair is to provide a medium for the education, commercial interaction, personal interaction, and recreation of the citizens of California by providing a forum for the competitive and non-competitive exhibition of the State's industrial and agricultural accomplishments.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**

Program Objectives and Description

Fairs traditionally provide an arena for the presentation of new ideas and information for the education of the visitor as well as provide a market place for the demonstration, advertisement, and sale of goods and services. Sponsors from the governmental and commercial sectors can present promotional information to the public. Fairs stimulate achievement through awards and prizes for excellence in the fields of agriculture and industry, and create a festive atmosphere with events and attractions for the amusement and recreation of their participants.

The California Exposition and State Fair provides a showcase for the agricultural, recreational and industrial resources of California for both residents and non-residents. It provides a forum for State Government to present its achievements to its constituency, and establishes programs of public participation to encourage the interchange of information regarding agriculture, industry and government. The State Fair also provides conventional youth programs for Scouting, 4–H, and FFA, and provides a recreational outlet for the citizens of California.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.
* Dollars in thousands, excluding salary range.

8560 CALIFORNIA EXPOSITION AND STATE FAIR—*Continued*

In fiscal year 1982–83 the California Exposition and State Fair incurred a deficiency of $805,000. Of this amount, $600,000 was funded from the General Fund reserve for contingencies and emergencies. The remaining $205,000 of the deficiency will be provided through special legislation.

Following a revenue shortfall of $313,000 at the 1983 State Fair, the Board of Directors has reduced staffing and operating expenses in 1983–84 in order to maintain a balanced budget.

The 1984–85 budget reflects General Fund support of $1.1 million for bond payments. The budget proposes to appropriate revenue (exclusive of revenue from special accounts) at the actual level collected during the 1983 State Fair and 1982–83 interim events. In addition, the budget proposes an expenditure of $12,000 from the State Fair Police Special Account, established by Chapter 548, Statutes of 1982.

The budget proposes a reduction of 13 positions in 1983–84 and 30.4 positions in 1984–85 to reflect lower revenue forecasts.

Authority

Food and Agricultural Code, Part 2 of Division 3.

8570 DEPARTMENT OF FOOD AND AGRICULTURE

The objectives of the Department of Food and Agriculture are:
To serve the citizens of California by promoting and protecting California agriculture in the interests of public health, safety and welfare.
To maintain a viable food system which assures delivery of an abundant supply of wholesome food to domestic and export markets.
To provide leadership in the development of policy on issues important to California food and agriculture.
To preserve and protect use of the State's natural resources to meet the present and future requirements for food and fiber.
To provide effective and uniform administration of the Food and Agricultural Code and other laws over which the Department has jurisdiction.
To serve the citizens of California by assuring that equity prevails in the commercial exchange of goods where value is determined by weight or measure.

10 PESTICIDE REGULATORY PROGRAM

Program Objectives and Description

The Department of Food and Agriculture's Division of Pest Management, Environmental Protection and Worker Safety is responsible under existing State law and under delegations of authority by the Environmental Protection Agency for registering all pesticides prior to sale for use in California as well as regulating and controlling pesticide use. This responsibility requires close liaison with county agricultural commissioners, federal agencies, universities, and private industry to establish and effectively enforce regulations, to monitor agricultural productivity, to determine environmental contamination associated with the use of pesticides, to protect worker safety, and to promote integrated pest management.

The Division is comprised of six elements: Pesticide Use Enforcement, Pesticide Registration, Integrated Pest Management, Environmental Hazards Assessment, Biological Control Services, and Worker Health and Safety.

The budget proposes a reduction of $74,000 and 5.9 positions to reflect efficiencies achieved in administering this program.

Authority

Food and Agricultural Code, Division 2 and 6; Chapter 308, Statutes of 1978.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

10.60 Worker Health and Safety	28.8	28.3	25.3	1,717	1,989	2,098

10.10 Pesticide Registration

Before a pesticide can be offered for sale in California, manufacturers are required to obtain registration from the department. Through the pesticide registration process, the availability and use of approximately 11,000 different pesticide products are regulated. The Pesticide Registration and Agricultural Productivity Unit has the responsibility of registering, reregistering or denying registration of chemicals labeled as pesticides. The registration process is designed to ensure that if registered pesticides are used according to their approved label, adverse health or environmental effects would not occur.

Increased demands for data gathering, coordination, evaluation, and maintenance require greater responsiveness by the Division in order to meet time frames mandated by regulations. To assist the Division in meeting these demands, the Information Services Unit provides support services that include, but are not limited to: information gathering, cataloging and maintenance; coordination of data processing functions; interagency committee assistance; and analytical assistance in the areas of public report and regulation writing.

Performance Measures	*1982-83*	*1983-84*	*1984-85*
Registrations issued: new ingredients	46	49	52

Reimbursements	–	–	–	*9*	–	–

10.20 Pesticide Use Enforcement

The Pesticide Use Enforcement element primarily involves the County Agricultural Commissioner's staff enforcing the day-to-day use of pesticides at the application site, with the State providing coordination, supervision, training, investigative assistance, and overview controls necessary to keep the program uniform.

Counties support approximately 30 percent of the cost of local pesticide regulatory activities through local revenues. The restricted materials permit plays a major role in county enforcement activities. The Commissioners receive financial assistance for county enforcement of State pesticide regulations through Section 12844 of the Food and Agriculture Code. Payments are apportioned to the counties based on criteria adopted by regulations. The criteria measure workload, time and money expended and performance. The General Fund supports contracts with counties for enforcement of new pesticide regulations adopted during 1980.

Section 12112 of the Food and Agricultural Code provides that 50 percent of the moneys collected from licensing pesticide dealers shall be paid to counties for enforcement and administration of Chapters 6 and 7 of the Food and Agricultural Code. These payments are made to the county that the applicant indicates as his principal address at the time of payment of such fees.

Farm commodities used as food or feed are sampled and laboratory tested for pesticide residue. Produce found with illegal residues is quarantined and removed from sale. Follow-up investigations are made to correct possible improper practices.

Coordination is maintained with county agricultural commissioners, the Departments of Health Services and Industrial Relations, the US Food and Drug Administration, and the US Environmental Protection Agency. Assistance is given to county agricultural commissioners in developing and executing local programs for regulation of pesticides.

10.30 Environmental Monitoring and Pest Management

The purpose of this element is to incorporate integrated pest management into the planning and decision-making processes of the Department. The Environmental Monitoring and Pest Management program assembles and disseminates information on pest control options and provides the Director with a pest management perspective of the activities of the Department of Food and Agriculture.

The Environmental Monitoring and Pest Management program meets its responsibility through the following activities:

1. Promotes programs which generate and organize pest control technologies into effective integrated pest management delivery systems.
2. Provides integrated pest management information into the decision-making process of pesticide regulation.
3. Outlines information about IPM practices from which pesticide registration decisions can be based.

10.40 Biological Control Services

The Biological Control Services Program (BCSP) meets its responsibility through the following activities:

1. Inventories (through literature searches, surveys, correlated with pesticide use problems and/or lack of other alternative) the immediate and long range needs for biological control.
2. Develops funding (through BCP's, proposals for Federal Grants, interactions with industry) to finance pertinent contracts with other agencies to conduct needed research.
3. Utilizes research findings to develop and implement bio-control methods for use by departmental programs, other agencies and industry.
4. Prepares bio-control action plans for use and consideration in eradication or control programs of present or potential (imminent) pest infestations.
5. Maintains rearing facilities (greenhouses, insectary trailers and satellite labs) to provide specific bio-agents and their hosts for use by the program, the department, or other agencies.
6. Prepares assessments of the biological control alternatives for specific crops.
7. Provides training for departmental personnel, California Agricultural Commissioners, and personnel of other agencies involved with pest control activities utilizing biological control methods and techniques.
8. Assists California Agricultural Commissioners and other state and federal agencies in the use of bio-control agents in regulatory weed programs and other activities.
9. Serves as an information center on bio-control for the Department as well as other agencies and the public.

* Dollars in thousands

Expenditures *(General Fund)*	10.6	9.2	9.2	$562	$529	$636

10.50 Environmental Hazards Assessment

The Environmental Hazards Assessment Program evaluates the extent of environmental contamination from pesticides, agri-chemicals and pollutants, determines the impact of pesticides on the environment and agricultural productivity, and recommends mitigation methods to minimize or eliminate potential or existing threats. The program monitors selected pesticide applications and identifies off-target transportation and fate of these materials in the environment by collecting and analyzing samples of air, water, soil vegetation and other media. The scientific evaluations and recommended mitigation measures are used to guide the regulatory and registration functions of the department. It also provides the monitoring data necessary for human exposure evaluation. Additionally, the program develops methods to accurately assess air pollution crop losses, identifies sensitive and resistant plant varieties, identifies pollutant-pesticide interactions, and compiles and disseminates pesticide methodologies and information regarding activities.

The 1984–85 budget proposes an increase of $334,000 and a redirection of 5 positions to provide environmental impact data gathering and analysis and active monitoring to support emergency projects and the pesticide use enforcement program.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Air/pollutant/crop responses evaluated	2	2	2

Reimbursements	*0.1*	–	–	*4*	*6*	–

10.60 Worker Health and Safety

There are over 300,000 agricultural workers who may be exposed to pesticides used in California either through accidental exposure where residues accumulate on foliage and plant surfaces or directly in mixing and applying pesticides. Additionally, there are an even greater number of non-agricultural workers whose occupations involve working with or possible exposure to pesticides. The goal of this unit is to provide increased protection for workers and the public from the potentially harmful effects of pesticide products in their environment. In meeting this goal, the unit performs the following activities in cooperation with the Department of Health Services and the Department of Industrial Relations:

1. Reviews toxicological and human experience data concerning the hazards of pesticides proposed for use or in use and recommends appropriate actions.
2. Conducts tests of pesticide residues on plant surfaces in soil, in water and in air, establishes worker reentry standards, and develops regulations and recommends registration actions to establish requirements for safe working conditions;
3. Evaluates adequacy of medical supervision provided by employers and responds to requests for sources of medical information;
4. Reviews and investigates reported pesticide-related exposures and compiles informative summaries to determine the causes and necessary corrective action in terms of packaging, safe use instructions, handling, applicator techniques, registration actions and regulation changes.
5. Assists county agricultural commissioners with investigations of pesticide-related incidents of all kinds.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Studies: field worker reentry safety	358	200	200
Studies: mixer/loader applicator safety	38	35	40
Investigations of pesticide related illnesses	2,552	2,800	2,800

20 AGRICULTURAL PLANT PEST AND DISEASE PREVENTION

Program Objectives and Description

The objective of this program is to prevent the introduction or spread of plant disease, weeds, insects and other pests and diseases. This is accomplished by 1) the establishment and enforcement of quarantines to exclude such pests and diseases whenever possible; 2) the detection of diseases and pests now established or about to become established in the State and, through identification, analysis, and evaluation after detection, making recommendations for action; 3) the formulation and enactment of plans for action to eradicate or control such diseases and pests. These activities are carried out by program staff either directly or with county agricultural commissioners.

The budget proposes a reduction of $132,000 and 6.7 positions to reflect efficiencies achieved in administering this program.

20.15 Exclusion of Plant Pests and Diseases

This element provides 1) inspection at border stations of vehicles carrying high risk cargo (or coming from high risk areas) to detect quarantined pests and to assure that out-of-state shipments meet California market quality standards; 2) coordinating, overseeing, training and certifying county personnel to inspect plant materials arriving at terminal points within the State (air/sea ports, rail stations, post offices, etc.) to assure compliance with quarantine policies and procedures; and to inspect and certify (phytosanitary) all outgoing plant materials to assure compliance with "clean plant" standards required by foreign or out-of-state markets; and 3) issue news releases and make formal presentations to agricultural associations, educational institutions, and recreational and wildlife organizations, in an effort to increase public awareness and enlist their aid in accomplishment of program goals. These activities ensure uniform enforcement of numerous exterior, interior, and Federal domestic quarantines regulating shipment of plants and other specified articles arriving into the State.

With 16 inspection stations operating along its northern and eastern borders, California enforces 29 State exterior quarantines and 10 federal domestic quarantines designed to prevent the introduction of plant pests. The State provides planning, training, coordination, supervision, and evaluation to county agricultural commissioners for uniform statewide enforcement of 53 State exterior, interior, and federal domestic quarantines regulating shipments of plants and other specified articles arriving in California.

Other government agencies are assisted in meeting their missions and roles at border stations by observing and recording weather data, validating game tags and reporting out-of-state game, reporting highway conditions, cooperating with other law enforcement agencies, and conducting traveler surveys.

Other Department units are assisted in meeting their roles and missions at border stations by reporting out-of-state shipments of grain, hay, livestock, eggs, bees, and bulk shipments of certain fresh produce.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Commercial vehicle border inspections—pest inspections	1,340,090	1,581,000	1,581,000

20.20 Control and Eradication of Plant Pests and Diseases

This element, working cooperatively with county personnel, establishes boundaries of current infestations of plant pests or diseases and locations of known hosts to determine potential for spreading; applies chemicals or releases bio-control agents to treat the infested areas; and systematically follows up to determine the effectiveness of the treatment. The apiary program includes inspections, apiary assessments and brand registration. By means of county-administered inspection programs, each county assures clean resident apiaries and monitors migratory apiaries to prevent the spread of diseases. The State issues official apiary brands for identification of equipment, and provides information on bee thefts to local authorities for apprehension and prosecution of culprits. The program also administers the apiary assessment program, which supports the bee disease control activities of the program and bee disease research. Training programs are prepared, conducted and evaluated for county personnel.

20.21 Predatory Animal Control

This program through contract with the U.S. Fish and Wildlife Service administers a program of wildlife resource management throughout California. The primary program is animal damage control or predatory animal control and its chief objectives are the protection of agriculture, range, forest and wildlife resources from depredations caused by wild mammals and migratory birds. Surveillance and suppression of wildlife-borne diseases are also conducted.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures (State Operations) *(General Fund)*	–	–	–	$778	$681	$722

20.25 Pest Detection and Emergency Projects

This element provides for a trained group to be able to respond immediately to emergencies and any serious and damaging invasion of a plant pest or disease and to assure early detection of agricultural pests and diseases. Response activities involve statewide detection programs, training of other governmental agency personnel and quality control of all statewide detection activities.

Pest detection is cooperatively conducted by county agricultural commissioners under the general supervision, guidance and evaluation of State personnel. Activities include systematic trapping, visual surveys, and remote sensing techniques involving aircraft and satellite photos, and computer interpretations.

This element provides 1) statewide detection of plant pests including trapping and special surveys; 2) training of county and other governmental agency employees in detection techniques; 3) overseeing and coordinating county pest detection programs; and 4) immediate response to plant pest infestations in order to eradicate them.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of pests detected by traps	5	4	4

20.30 Analysis and Identification

The five laboratories included in the Analysis and Identification element are Botany, Entomology, Nematology, Plant Pathology, and Seed Taxonomy/Germination. These laboratories 1) identify plants and seeds, plant pathogens and disorders, nematodes, insects and related arthropods and mollusks; 2) monitor and record germination rate, type and percent of noxious weed seeds present in samples; 3) maintain pest collections and records; distribute pest detection devices; 4) grow and maintain indicator plants for testing; 5) serve as professional resource centers in fields of botany, plant pathology, nematology, and entomology; 6) gather, store and serve as a source of technical information regarding exotic pests. These services support Department programs including pest exclusion, pest detection and emergency projects, control and eradication, pesticide management, environmental protection, animal industry, and the nursery and seed services. On a reciprocal basis, service is also provided to Federal agencies, county agricultural commissioners, universities and museums, the extension service, other states and foreign countries, as well as the general public. Analysis and Identification is responsible for the California Plant Pest and Disease Report, a bi-monthly publication concerning pests of California agriculture.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Total—quarantine determination samples	13,216	14,118	14,197

20.40 Nursery Service

The Nursery Service element initiates and maintains programs to coordinate and supervise county agricultural commissioners' enforcement of State laws which regulate the growing, handling, and distribution of nursery stock. Persons selling nursery stock are licensed to enable effective enforcement work.

The unit provides uniformity in regulation enforcement and leadership in pest detection programs while ensuring sufficient freedom of movement of nursery stock to keep the nursery trade from becoming involved in restrictive quarantines and to assure orderly marketing. Nursery Service also engages in cooperative research to solve nursery-related pest problems and provides voluntary registration and certification programs as a means of producing and marketing plants relatively free of virus diseases, disorders, and plant pests.

The nursery services are supported entirely by fees collected for licenses and services performed in nursery stock registration and certification activities.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Total number of nurseries	8,700	9,100	9,400
Number of nursery inspections and reinspections	7,357	7,960	8,357

Agriculture Fund, Section 221	–	–	*7.7*	–	–	*849*

20.50 Seed Potato Certification Service

California's seed potato certification program commenced in 1915 when it became evident that potatoes could no longer be produced commercially unless seed, meeting strict standards of pest cleanliness and varietal purity, was available for planting.

The fitness of potatoes to qualify for certification is determined by inspection and testing of plants and tubers for serious pests, grade standards, and varietal purity.

Approximately 1,700 acres of seed potatoes are entered for certification annually. This acreage is grown and harvested over a 12-month period throughout the State. The service is supported entirely by acreage and test plot fees.

* Dollars in thousands

Agriculture Fund, Section 221	–	–	*2.1*	–	–	*115*

20.55 Seed Service

This element provides protection to growers by ensuring that commercial seed is free from prohibited noxious weed seeds and properly labeled with regard to quality statements and fungicide treatments. Objectives are accomplished through coordination and supervision of inspection, enforcement, and seed certification done by county agricultural commissioners. State responsibility in seed certification includes training as well.

The industry supports the total enforcement cost of the California Seed Law and up to one-third of the associated laboratory costs. Seed laboratory expenses for service and quarantine samples are displayed in the Laboratory Services element.

The element also administers the One-Variety Cotton Districts Act, revised and amended by Chapter 592, Statutes of 1978. This Statute establishes an elected Acala Cotton Board and expands the non-approved variety testing program. The Board is authorized to approve those cotton varieties which meet Fiber Quality Standards, thus assuring the growth of the most profitable and uniform cotton varieties. Funding is provided by an assessment upon cottonseed sold for planning within the One-Variety Cotton District.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Pounds of seed planted in California	280,000,000	280,000,000	280,000,000

20.70 Gene Resources

The purpose of this 30-month project is to develop a reference system in order to safeguard specific gene resources of plant and animal species that are vital to California's agricultural industry. Preservation of gene resources is a key factor in the State's ability to adapt to a new resource needs. The work will be performed through a contract with the Bodega Bay Institute, a nonprofit research and educational organization.

This work shall include:

1. An inventory of animals, plants and microorganisms with their use, site of growth, origin and degree of domestication;
2. A setup of standards for assessment of commercially valuable species, such as cotton, cattle, fir trees and salmon;
3. A description and evaluation of current conservation technologies, existing programs and policies.

25 ANIMAL PEST AND DISEASE PREVENTION/INSPECTION SERVICES

Program Objectives and Descriptions

The Division of Animal Industry's primary responsibilities are to prevent, detect, diagnose, control, and whenever practical, eradicate animal diseases and pests. An important function is the planning and preparation to respond immediately to an introduction of an emergency disease. Of particular concern are those diseases or pests which can be transmitted to humans, can cause serious financial losses to the livestock and poultry industry in California, or can adversely affect the supply of animal products. Inspections of meat, poultry, and milk and dairy products are essential to assure consumers that products are safe, wholesome, and properly labeled. This Division also helps to protect the livestock industry against loss of animals by theft and straying.

The Division consists of five bureaus: Animal Health, Meat Inspection, Milk and Dairy Foods Control, Veterinary Laboratory Services, and Livestock Identification. Through combined efforts, we strive to maintain a viable livestock and poultry food-producing industry and to assure an adequate supply of meat, poultry, and dairy products to the consumer.

The budget proposes a reduction of $69,000 and 4.7 positions to reflect efficiencies achieved in administering this program.

25.10 Animal Health

The Bureau of Animal Health provides an organized statewide preventive veterinary medical service program designed to assist with ensuring an adequate wholesome food supply, and to aid in protecting the public health. These responsibilities are met by detection, control, eradication, and prevention of animal disease in the State. Detection activities include surveillance, examination, testing, and autopsies performed both in the field and in the laboratories.

Disease control is accomplished through vaccination, testing, and elimination of infected animals, cleaning and disinfection of trucks and premises, and restriction of animal movement by hold orders, quarantines, or controlled destination movement permits for animals with disease, exposed to disease, or contaminated with deleterious substances.

Disease eradication efforts are accomplished through state and national programs to break the cycle of infection by test and removal of infected animals, sterilization of garbage fed to swine, sanitation of hatching eggs, and herd treatment for external parasites. Owners of animals removed are in some cases indemnified for a portion of the animal's value.

Preventive activities are directed against the entry of diseases which do not currently exist in California. This is accomplished by destroying ship and aircraft garbage, inspecting imported animals, disease monitoring and educational efforts, and quarantines when applicable. An important function is the preplanning and preparation to respond immediately to an introduction of an emergency disease. The preplanning includes devising systems and methodologies, training field personnel, eliminating constraints and increasing effectiveness and efficiency of procedures utilized in eradication efforts.

The Bureau also seeks to prevent the fraudulent drugging of horses that would alter their disposition in a public sale or performance.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
1. Number of destructive diseases monitored	75	75	78
2. Number of disease investigations	22,181	24,000	25,000

25.20 Veterinary Laboratory Services

Diagnostic laboratory services are provided in support of foreign and domestic livestock disease detection, control, and eradication activities by the staff of five state veterinary laboratories. Pathology, bacteriology, virology, serology, parasitology, and toxicology are all important disciplines in the laboratories. Information developed concerning diseases of both human and animal significance is furnished to State and Federal Animal Health regulatory agencies, state and county public health departments, veterinary practitioners, State Meat Inspection, Milk and Dairy Foods Control, and university and extension veterinarians. Specified services are provided to the poultry, beef, dairy, sheep, swine, and horse industries on a fee basis.

The University of California, School of Veterinary Medicine, at Davis provides specialized services through interagency agreements as part of the overall enhancement of technical capabilities.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Livestock—cases received	11,181	11,000	12,000
Poultry—cases received	8,982	9,000	9,000
Livestock—specimens received	47,367	47,000	47,000

25.30 Meat Inspection

The purpose of the Bureau of Meat Inspection is to provide meat and poultry inspection services in slaughterhouses and processing plants which are exempt from federal inspection to ensure that all meat and poultry food products produced or consumed in the State are disease free, wholesome, unadulterated, and truthfully labeled.

Many animal diseases are transmissible to individuals through the meat they eat. Pesticides, antibiotics, pathogenic microorganisms, carcinogenic compounds, additives and deceptive extenders used in meat products and meat from animals which died other than by slaughter are undetectable by the consumer.

The Bureau provides inspection in establishments slaughtering domesticated pigeons, squabs, pheasants, quail, or rabbits, establishments slaughtering less than 20,000 turkeys or 20,000 chickens per year, livestock custom slaughter plants, establishments preparing meat food products such as hams and cooked sausages that sell such products to individual consumers on the premises where produced, and pet food slaughter and pet food processing plants.

In meeting program objectives, the Bureau:

Performs ante- and post-mortem inspection of livestock and poultry, enforces AQL (Acceptable Quality Level) standards of poultry carcasses and parts, implements moisture and chilling temperature control of poultry, marks and denatures carcasses and parts not intended for food purposes, reviews records to prevent diversion of condemned and inedible materials into human and pet food channels, provides fat and moisture control of cooked sausages, controls the use of nitrites, and other additives, monitors trichnae control in pork and pork products, and enforces sanitation, facilities, and equipment standards;

Provides sanitation inspections of locker plants (retail markets that cut and wrap farm killed livestock);

Prevents meat from dead or condemned carcasses and condemned and/or adulterated meat and poultry products from entering human or pet food channels by licensing, issuing permits, and inspecting rendering plants, collection centers, dead animal haulers, importers, pet food slaughterers, pet food processors, and conducting compliance reviews.

Reviews and approves inspection programs provided by city, county, State, or foreign countries to prevent the shipment into California of uninspected domesticated pigeons, squabs, quail, pheasants, and rabbits from sources which have not been approved.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Meat inspected from slaughter of poultry and rabbits in pounds	3,119,442	3,400,000	3,500,000

Meat inspected from custom slaughter of livestock in pounds	2,555,657	4,000,000	6,000,000
Number of pounds condemned	5,984	8,000	9,000
Processed poultry and meat food products inspected and passed	5,976,381	6,200,000	6,500,000
Number of pounds condemned	5,671	6,000	6,000
Meat inspected for pet food (from pet food slaughter & processing plants)	127,270,756	128,500,000	130,500,000
Number of pounds condemned	3,495,944	3,606,000	3,835,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(State Operations)*	18	16.8	16.8	$811	$875	$906
General Fund	*16.6*	*16.8*	*16.8*	*745*	*798*	*829*
Federal Trust Fund	*1.4*	–	–	*66*	*77*	*77*

25.40 Milk and Dairy Foods Control

The objectives of the Bureau of Milk and Dairy Foods Control are to insure that milk, milk products and products resembling milk products available to the public are safe and unadulterated, and to insure that these products meet state and federal compositional requirements and are properly labeled.

The staff of the bureau provides training and supervision for city and county Approved Milk Inspection Services (AMIS) to develop statewide uniformity of compliance and certifies dairy farms, milk plants and sources of single-services dairy containers for the U.S. Food and Drug Administration for interstate sales and for use by milk processors selling products to federal entities. They inspect or supervise the inspection of manufacturing grade dairy farms, make inspections of milk processing plants and provide product grading service for the U.S. Department of Agriculture. In addition, the bureau insures that tests used to determine the basis for payment for milk or cream are accurate.

The 1984–85 budget proposes an increase of $159,000 and 2 redirected positions to inspect dairy farms and milk processing plants in Tulare and Kings counties.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Pounds of milk produced in California per year	14,558,381,000	14,718,525,000	14,895,147,000
Final packaging units inspected	238,517	264,000	251,500
Percentage found in compliance with all standards	91.20	91.50	91.60
Number of inspections: raw milk	111,542	111,300	111,200
Number of milk producers	2,898	2,875	2,900

25.60 Livestock Identification

The Bureau of Livestock Identification staff protects cattle owners in California against loss of animals by theft, straying, or misappropriation. This is accomplished by the registration of livestock brands; inspection of cattle for legal ownership prior to transportation, sale, or slaughter, and the recording of the information obtained by such inspections; and assisting local law enforcement officials with investigations and prosecutions involving cattle theft.

Branding of livestock is not mandatory; however, it provides a deterrent against cattle theft. Stolen or missing cattle that are recovered as a result of inspection or investigation are returned to the rightful owner.

Livestock owners pay the total cost of the program, including overhead charges. The primary sources of revenue are from brand registration and inspection fees.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of registered brands	29,358	28,500	29,000
Number of cattle reported stolen	1,742	3,200	3,000
Number of cattle inspected	3,592,340	3,240,291	2,922,743

30 AGRICULTURAL MARKETING SERVICES

Program Objectives and Description

California agriculture produces 200 different crops which enter state, national, and international commerce for human consumption and use. These commodities are faced with a myriad of potential problems moving through the various trade channels. The objectives of this program are to assure orderly marketing, reduction of economic waste, adequate supply, consumer protection, and fair pricing practices. Agricultural Marketing Services fulfills its objectives by collecting and disseminating marketing and economic information, identifying and helping to resolve marketing problems, assisting the milk industry to maintain stability, and reviewing and helping to mediate problems between producers and handlers.

The budget proposes a reduction of $141,000 and 6.5 positions to reflect efficiencies in administering this program.

Authority

Food and Agricultural Code Division 7, Chapters 4, 5, 6; Division 12, Part 4; Division 16, Chapters 1, 2, 3, 5; Division 17; and Division 18, Chapter 1.

30.10 Marketing Trust

The Department currently provides administrative, marketing, and some accounting services to a varying number of marketing programs (34 this current year). Activities carried on under these programs include market development through advertising and sales promotion, production, processing and marketing research, the establishment of quality regulations with inspection, and the prohibition of unfair trade practices for various farm products at a cost of about $65 million in 1982–83 when commissions are included. The Marketing Trust Program is supported by marketing trust monies collected by the Department under authority of the Marketing Act of 1937 and, as such, is subject to the controls of specific agricultural commodity groups and the various marketing boards. This element is exempt from budgetary review under the provisions of Section 221 of the Food and Agricultural Code.

The major benefit of marketing trust program is the protection provided to the consumer by assuring an adequate supply of pure and wholesome food products at a fair and reasonable price. The total cost of promoting an orderly marketing program is paid by the producers and processors through fees and assessments. The personnel years and dollars shown below reflect the civil service employees within the Department that are involved in the centralized administration of the various marketing programs.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

8570 DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

30.21 Market News

The Market News component is operated jointly with the United States Department of Agriculture as the Federal-State Market News Service. Funding is approximately half federal and half State.

Agricultural marketing data is collected by telephone and by personal contact from farmers, buyers, dealers, shippers, auction sales companies, and others involved in the marketing process. All data is given to Market News representatives on a voluntary basis including confidential information such as an individual's or firm's selling prices, volume sold, volume processed, shipments, and market conditions. Information from the many sources is consolidated into Market News reports and disseminated to the public by telephone, teletype, radio, TV, printed reports, newspapers, and trade journals.

California markets the largest food and agricultural production of any state, with a large portion shipped to eastern consuming centers. The exchange of current marketing guidelines nationwide gives California the timely information needed to economically market several billion dollars worth of perishable food commodities each year. The unbiased third-party information provided by the Federal-State Market News Service assists in creating a better economic balance between buyer and seller, thereby benefiting both the producing and consuming public.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of commodities covered	330	330	300
Value of commodities covered	$17,050,000,000	$16,000,000,000	$18,000,000,000
Number of commodity prices reported	480,000	475,000	470,000

30.30 Agricultural Statistics

The California Crop and Livestock Reporting Service is a federal-state entity supported under a cooperative agreement between the Department of Food and Agriculture and the United States Department of Agriculture's Economics, Statistics, and Cooperatives Service. Funding is approximately two-thirds federal and one-third State. The responsibility of this component is to prepare and distribute statistics on California agriculture. These statistics are used as a basis for production and marketing decisions by those in agriculture and allied industries. The growing complexity of California agriculture has expanded the need for "farm facts" and increased the demand for their precision.

The statistical series provide estimates of acres planted and harvested, production, stocks, and utilization of crops. Forecasts of yield and production are issued monthly during the growing season. Also prepared and published are statistics covering inventory numbers, production, and prices of livestock and poultry and their products, and periodic reports of weather, crop and range conditions.

Newer sampling techniques and improved estimating procedures provide forecasts of production with greater precision than in past years. The improved estimating procedures include objective cotton and fruit counts, probability list sampling, area frame sampling, multiple frame sampling, and the use of aerial photography.

Performance Measures			
Number of usable questionnaires tabulated	125,000	125,000	124,000
Personal field interviews made	30,000	33,000	34,000

30.40 Milk Marketing

The Milk Marketing Component is authorized to establish the minimum prices paid to producers by handlers under standards established by the Legislature. The program also has responsibility for controlling unfair practices in the milk industry. These responsibilities include the prohibition against sales below cost and discriminatory prices, which undermine competitive forces in the industry.

Another major responsibility is administering the Milk Pooling Act, which provides the standards for distributing the monthly statewide revenue, derived from the sale of bulk market milk to handlers, to California dairy producers based on their individual entitlements.

* Dollars in thousands

30.50 General Marketing Services

General marketing services include (1) making special reports, assisting in the formation of nonprofit cooperative associations, preparing bill analyses, compiling data relating to the export of California commodities and responding to the correspondence, inquiries, and requests from the Legislature, the general public, business, the Director's Office, and other governmental agencies; (2) assisting agricultural industries in analyzing their marketing problems and in preparing programs to meet these needs; (3) explaining to consumers and the general public the agricultural condition and the reasons certain activities, including those under marketing programs, are undertaken.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Marketing inquiries/correspondence and telephone	10,000	10,100	10,200
Legislative inquiries	130	130	130

Reimbursements	*0.3*	*0.4*	*0.4*	*26*	*14*	*14*

30.60 Direct Marketing

The goal of the Direct Marketing Component is to encourage and assist in the establishment of marketing outlets that concentrate on the direct marketing of produce between the farmer and consumer. The activities of the program include: (1) assisting in the development and operation of certified farmers' markets; (2) producing and disseminating informational marketing publications; (3) aiding in encouraging the formation of farm trail organizations and other forms of on-farm agricultural marketing; (4) operating a central marketing information system which includes a toll-free hotline for farmers and consumers; (5) cooperating with other agencies to further direct marketing activities; (6) promoting the concept of direct marketing and direct marketing outlets to California farmers, consumers, and organizations through educational outreach presentations and program exhibits at fairs and expositions throughout the State; (7) providing information on and aiding in the distribution and utilization of surplus commodities.

The 1984–85 budget proposes an increase of $79,000 and two positions to implement the provisions of Chapter 1100/83 which are designed to prevent unfair trade practices.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Certified Farmers' Markets	82	90	95
Farmers listing in the Farmer-to-Consumer Directory	1,000	1,000	1,100
Farmer/Consumer information system contact	55,000	50,000	50,000
Farm trail organizations	19	20	21
Promotion and outreach contacts	250,000	280,000	300,000

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(State Operations)*	8.5	11.1	12.1	$393	$478	$514
General Fund	*8.4*	*11.1*	*12.1*	*387*	*428*	*514*
Federal Trust Fund	*0.1*	–	–	*6*	*50*	–

30.70 Market Enforcement

Through licensing provisions of the Food and Agricultural Code, this component exercises control upon the activities of middlemen and processors of farm products to ensure that fair marketing practices prevail.

Mandatory provisions require investigation and settlement procedures when complaints against handlers are received from producers or other suppliers of farm products. In the event that settlement negotiations are not successful, the authority provides for formal hearings where disposition of the complaint may be either by dismissal or disciplinary action against the licensee in the form of probation, suspension, or revocation of his license. This activity is handled by a field staff under the supervision of regional administrators.

Preventive and deterrent effects are achieved through examination of licensee's records to assure that the licensee is conducting his business in an acceptable manner. This part of the activity is handled by auditing licensees.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Number of licensees at year end	13,838	14,000	14,000
Number of administrative hearings	16	20	20
Claims—number investigated	394	400	400
Claims—dollars recovered	$3,807,388	$4,000,000	$3,900,000

8570 DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

40 FOOD AND AGRICULTURAL STANDARDS AND INSPECTION SERVICE

Program Objectives and Description

This program has diverse program responsibilities involving agricultural regulatory, consumer protection and industry supported grading services. Program elements work cooperatively with county agricultural commissioners, state and federal agencies, agricultural industry groups and marketing order programs. Several program elements operate under cooperative agreements, delegations of authority and contracts with federal agencies. Certain program elements have requirements for federal supervision and federal licensing of state employees.

Program objectives are:

1. Consumer protection and industry supported grading services provided to assure fruit, vegetable, nut, honey and shell egg product compliance with state and federal standards or industry standards for quality, grades, labeling and packaging.
2. To regulate the sale, labeling and ingredient guarantees of livestock feed and drug products and fertilizing materials to assure users that products selected will: 1) result in safe and economical production of meat, milk and eggs; and 2) maximize plant productivity.
3. Industry supported grading and weighing services are provided to accurately certify grade, quality and quantity of grain, rice, beans and other like commodities to facilitate orderly marketing and utilization into feed and food products.
4. To provide support to governmental agencies needing chemical or product determinations by providing accurate and timely chemical analyses.

The budget proposes a reduction of $235,236 and 17.1 positions to reflect efficiencies achieved in administering this program.

Authority

Food and Agriculture Code, Division 7, Chapters 4, 5, and 6; Division 12, Division 16, Chapters 1, 2, 3, 4 and 5; Division 17 and Division 18, Chapter 1.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

40.75	Garlic and Onion Inspection	(9.3)	12.3	12.3	(288)	379	389

40.11 Fruit and Vegetable Quality Control

The purpose of this element is to inspect fruits, nuts, vegetables, and honey to assure compliance with minimum legal standards of maturity, quality, packaging, and labeling.

Inspections are performed at production, wholesale, and retail levels by county agricultural personnel who are trained and supervised by State personnel. In addition, State personnel operate highway inspection stations to monitor commodities and verify certificates.

The element is also responsible for inspecting avocados to ensure that those offered for sale are certified as meeting minimum standards of quality and maturity. This mandatory inspection and certification is supported by a fee charged on each hundred weight of avocadoes.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Fruits, etc: prod/WHS/RTL insp (containers)	204,052,636	215,000,000	215,000,000
Fruits, etc: inspection stations (containers)	51,827,974	52,000,000	52,000,000
Fruits etc: prod/WHS/RTL rejections (containers)	1,050,994	1,125,000	1,125,000

40.15 Commercial Fertilizer Control

Approximately four million tons of fertilizing materials are used annually by the producers of food and fiber crops and the home gardner, representing a value of about $400,000,000.

This component provides protection to the buyers and users of plant food, soil amendments, agricultural minerals and auxiliary soil chemicals.

Users depend upon complete label information for purchase decisions and proper application instructions. Further, the user relies on label integrity to achieve the lowest unit production cost. Mislabeling or adulteration can result in serious economic loss to the user.

Intensive inspection and sampling are used to determine product compliance with State labeling requirements. These activities are supported by registration fees and mill tax assessment.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Fertilizer—commercial fertilizer (tons)	2,662,779	2,400,000	2,400,000
Fertilizer—agriculture minerals (tons)	1,275,287	2,000,000	2,000,000
Number of inspections for fertilizer	1,596	2,400	2,200
Inspections for agriculture minerals	225	200	200

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(State Operations)*	10.5	11.6	11.6	$746	$866	$887

Agriculture Fund Section 221	–	–	*11.6*	–	–	*880*

40.21 Feed and Livestock Drug Control

This component provides protection to producers of livestock and poultry through product registration and label enforcement activities.

Complete labeling is necessary so that producers can select and use products with confidence and efficiency to maximize production. Inspection, sampling, and laboratory testing assures that commercial feeds and feed additives will not cause illegal drug and pesticide residues or other contaminants in food products purchased by consumers and that such products will be safe and wholesome.

Livestock drugs require registration and proper labeling so that livestock and poultry producers can depend on these products to control disease problems safely and effectively. Random monitoring of the user is performed to ensure that label directions are being followed to prevent the possibility of illegal residues in meat, milk and eggs.

An intensive inspection program supports labeling requirements and conformance with required regulations. It is supported by license fees, registration fees and tonnage tax assessments.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Annual tonnage of commercial feeds	9,365,667	9,200,000	9,200,000
Number of inspections—commercial feeds	3,260	3,300	3,300
Livestock drug inspections	387	400	400
Good manufacturing practices (GMP)	4	35	35

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(State Operations)*	10.4	10.6	10.6	$815	$959	$981

Federal Trust Fund	–	*0.8*	*0.8*	*2*	*10*	*15*

40.25 Grain and Commodity Inspection

This component provides inspection and grade certification services for grains, rice, beans, peas, hops, hay, safflower, and certain processed commodities in cooperation with the United States Department of Agriculture. Authority is derived from the United States Grain Standards Act, Agricultural Marketing Act, and California law. An additional activity is supervision of official weighing of grains shipped from and received by export elevators.

Grade and weight certificates issued by the Grain and Commodity Inspection element are generally accepted as proof of quality and quantity and are used as a basis for the domestic and export trade of grain and other commodities. Inspection offices are located throughout California wherever demand for services is sufficient. Except for export grain inspection and weighing activities, the services are voluntary. All services are completely supported by user fees.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Grains: inspection certificates issued	84,193	85,000	112,500
Inspection certificates issued—rice and commodities	20,961	20,000	20,000
Inspection certificates issued—other	7,215	7,500	7,500
Weight certificates issued	20,639	20,000	25,000

* Dollars in thousands

40.30 Chemistry Laboratory Services

This component provides laboratory services for governmental agencies involved in consumer and industry protection by:
(1) Analyzing meat products, dairy products, feeds, fertilizers, livestock remedies and pesticides for label guarantees;
(2) Analyzing milk, meat, produce, plant material, and agricultural commissioners' samples for pesticide residues;
(3) Analyzing meat and milk for antibiotic and drug residues;
(4) Analyzing feeds for toxins resulting from mold;
(5) Performing on location analyses of preharvest food samples and crop foliage to ensure workers' safety and safety of food crops.
(6) Utilizing two mobile laboratories which are on call for emergency pesticide situations anywhere in the state.
(7) Performing environmental pesticide monitoring of air, water and soil for pesticide residues.

The 1984–85 budget proposes an increase of $51,000 and redirection of 1.0 positions to continue funding of increased chemical analysis of manufactured milk products, and an increase of $50,000 and one redirected position for additional workload in the Federal funded meat Laboratory.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Goal: All routine Dairy Laboratory samples are to be completed one week after receipt (eight days).			
Chem/samples: dairy—samples received	3,620	3,000	3,000
Chem/samples: dairy—within goal	2,896	2,850	2,850

8570 DEPARTMENT OF FOOD AND AGRICULTURE—*Continued*

40.50 Egg and Poultry Quality Control

The purpose of this component is to inspect eggs and egg products to assure compliance with minimum California and United States Department of Agriculture standards of quality, size and labeling; to assure California consumers only wholesome eggs and egg products of established quality are marketed and properly labeled; to furnish the California egg industry with a means of maintaining a fair and equitable marketing standard.

Inspections are performed at production, wholesale and retail levels by county agricultural personnel who are trained and supervised by California personnel. In addition, California personnel are responsible for the collection of fees on all eggs sold in California. The fees are paid by egg dealers and support the total administrative cost of the program and a portion of the County Agricultural Commissioners' cost of enforcement.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Dozens of eggs inspected	25,369,650	20,240,167	20,240,167
Dozens of eggs rejected	2,082,348	1,659,694	1,659,694

Reimbursements				*(7)*	–	–

40.55 Shipping Point Inspection

The objective of this component is to fill a need in the marketing system for unbiased inspection certification by furnishing third party inspection service when requested by industry and approved by the Director. This service provides applicants with a certificate based on federal, State, or industry standards that accurately describes the quality, condition, grade and size of fresh fruits, nuts and vegetables grown in California and destined for commercial resale or processing usage.

The major benefits are the establishment of an orderly marketing condition, assurance of maximum protection to the allied segments of the agricultural industry, and minimization of losses to producer, processor, buyer, receiver and carrier. Further residual benefits are received by the consumer. Through quality control and economical marketing, both better acceptance and monetary savings are realized.

Shipping Point Inspection is funded by fees charged for inspection and certification of California produce.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Fresh products inspected (1000 lbs.)	4,976,054	5,200,000	5,300,000
Fresh products reversed/terminal market (1,000 lbs.)	258	800	750

Reimbursements	–	–	–	*(1)*	–	–

40.60 Canning Cling Peach Inspection

The purpose of this component is to inspect each load of cling peaches destined for processing for quality; assure the Processors' Cling Peach Advisory Board, which operates under a State marketing order program, that quality information is accurate; assure that inspection procedures are uniformly applied statewide; and provide these services economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to the producer and processor by an impartial third party by providing accurate and uniform analysis of all loads and issuance of an inspection certificate which provides a communicative link between producer and processor for payment purposes.

The cost of the program is borne solely from processor assessments levied on a tonnage fee basis.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Cling peach loads inspected	64,451	42,000	45,000

Agriculture Fund Section 221	*(2.9)*	*2.8*	*2.8*	*(91)*	*112*	*116*

40.65 Canning Tomato Inspection

The purpose of this component is to inspect each load of tomatoes destined for processing for quality and color; assure industry that grade and color information is accurate; assure that inspection procedures are uniformly applied statewide; and provide this service economically, efficiently, and safely.

The major benefit of this program is the protection and assistance given to the producer and processor by an impartial third party by providing accurate and uniform analysis of every load of canning tomatoes and issuance of an inspection certificate which provides a communicative link between producer and processor for payment purposes.

The program is entirely self supporting. The inspection fee is shared equally by the producer and processor.

* Dollars in thousands

40.70 Wine Grape Inspection

The purpose of this component is to inspect all required loads of wine grapes destined for processing for rot defect, foreign material, and soluble solids (sugar content); assure industry that grade and soluble solid information is accurate; assure inspection procedures are uniformly applied statewide; and provide these services economically, efficiently, and safely.

The major benefit of this program is the accurate and uniform analysis of every load requiring inspection and the issuance of an inspection certificate which provides a communicative link between producer and vintner for payment purposes.

The total cost of the program is paid through inspection fees charged to persons requesting the service.

Performance Measures	*1982–83*	*1983–84*	*1984–85*

40.75 Garlic and Onion Inspection

The purpose of this component is to inspect all required deliveries of onions and garlic destined for dehydration. This program element is exempt from budgetary review under the provisions of Section 221 of the Food and Agricultural Code.

The program assures that grade standards are applied uniformly and accurately statewide and that the inspection is done economically, efficiently, and safely.

The primary benefit of the program is the accurate and uniform analysis of every load requiring inspection and the issuance of an inspection certificate which provides a communicative link between the grower and dehydrator for payment purposes.

The program is entirely self-supporting. The inspection fee is shared equally by the grower and dehydrator.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Onions—loads inspected for dehydration	17,532	12,000	13,000

50 MEASUREMENT STANDARDS

Program Objectives and Description

In order to provide a basis of value comparison for consumers and fair competition for industry, the Division of Measurement Standards is responsible for providing the standards of measurement necessary for the use of commercial weighing and measuring devices; quantity verification of both bulk and packaged sales of goods and commodities; and quality, advertising and labeling standards for most petroleum products. In excess of $287 billion of commerce is subject to the standards of weights and measures. The Division works closely with county weights and measures officials who, under the direction and supervision of the Director, carry out the majority of the local weights and measures enforcement activities. During the last budget year, county contributions to weights and measures activities exceeded $9.5 million.

This budget proposes a reduction of $53,000 and 2.9 positions to reflect efficiencies in administering this program.

Authority

Business and Professions Code, Division 5, Chapters 1 through 17.

60 FINANCIAL AND ADMINISTRATIVE ASSISTANCE TO LOCAL FAIRS

Program Objectives and Description

The State has county fairs, citrus fruit fairs and district fairs. The majority of county fairs are conducted by nonprofit corporations under contract with county boards of supervisors. Citrus fruit fairs are State instrumentalities operated by nonprofit corporations. District fairs are operated by district agricultural associations, which are State institutions with Governor-appointed directors. State support for local fairs is administered by Fairs and Expositions, which oversees budget approval and the capital outlay program. Regulations and procedures are communicated to the fairs by the *Fairs Administrative Manual* and the *Master Premium List.* Reviews of appeals on allocation of support funds, capital outlay funds, fair manager's salary, and legislation are made by the Fair Budget Review Board, which then passes on its recommendations to the Director.

This budget proposes a reduction of $33,000 and 0.9 positions to reflect efficiences in administering this program.

70 EXECUTIVE, MANAGEMENT AND ADMINISTRATIVE SERVICES

Program Objectives and Description

The objectives of this program are to provide active leadership to meet current and future agriculture problems and to assist the Department in meeting its overall goal through timely, efficient support services.

Executive Management includes the executive leadership of the Director's Office and the staff services associated with it. The Director's Office sets priorities and policies which recognize and meet the current and long-range needs of the agribusiness community of this State and which help protect the health and welfare of its people.

Administrative Services provides centralized administrative support to the Department through fiscal operations, employee/employer relations, personnel management, employee training and development, general business services and audits.

The 1984–85 budget includes an increase of $85,000 and one redirected position to expand the audit program to include audits of district, county, and citrus fairs throughout California.

This budget proposes a reduction of $42,000 and 3.1 positions to reflect efficiencies in administering this program.

80 GENERAL AGRICULTURAL ACTIVITIES AND EMERGENCY FUNDING

Program Objectives and Description

The objectives of this program are to:

Secure more adequate and uniform enforcement of the provisions of the Food and Agricultural Code through sharing in the payment of salaries of county agricultural commissioners;

Participate in the preservation of prime agricultural lands under the authority of the Land Conservation Act of 1965; and

Partially reimburse counties for carrying out agricultural programs authorized by the Food and Agricultural Code under the supervision of the Department of Food and Agriculture.

Provide emergency funding for unanticipated outbreaks of plant and animal diseases and pests, and funding for administrative support of agricultural programs.

80.40	Agricultural Resources	–	1,227	812

80.10 Salaries of County Agricultural Commissioners

To secure more adequate and uniform enforcement of the provisions of the Food and Agricultural Code, the State participates in the payment of salaries of the county agricultural commissioners as provided by Sections 2221 through 2224 of the Food and Agricultural Code. Participation is limited to the lesser of $6,600 per year or two-thirds of the salary of each commissioner.

Input	1982-83*	1983-84*	1984-85*
Expenditures (Local Assistance) *(General Fund)*	$383	$383	$383

80.20 Payment to Counties for Agricultural Programs

Section 8352 of the Revenue and Taxation Code provides for the annual transfer of gasoline taxes applicable to agricultural use from the Motor Vehicle Fuel Account, Transportation Tax Fund, to the Department of Agriculture Fund. Section 224(3) of the Food and Agricultural Code provides that of the funds transferred each year, the amount in excess of $1,500,000 is to be paid to counties as partial reimbursement for county expenses incurred in carrying out agricultural programs authorized by the Food and Agricultural Code. These payments are apportioned to the counties by the Director of Food and Agriculture in the percentage relationship that each county's expenditures for such agricultural programs during the preceding fiscal year bear to the total amount expended by all counties.

* Dollars in thousands

Input	*1982–83**	*1983–84**	*1984–85**
Expenditures (Local Assistance) *(Agriculture Fund)*	$2,692	$1,441	$1,455

80.30 Unclaimed Gas Tax—Emergency Fund and Administration

The purpose of this element is to provide contingency funds for agricultural emergencies.

Section 8352 of the Revenue and Taxation Code provides for the annual transfer of unrefunded gasoline taxes applicable to agricultural use from the Motor Vehicle Fuel Account Transportation Tax Fund, Motor Vehicle Fuel Account to the Agriculture Fund.

Section 224(1) of the Food and Agricultural Code provides that of the funds transferred each year, $500,000 is appropriated for reimbursement for charges for State administrative costs and for departmental and divisional overhead expense apportioned to the Agriculture Fund. The Agriculture Fund supports elements under both annual appropriation and continuing appropriations.

The portion of the $500,000 applicable to the elements supported by annual appropriation is shown in the individual elements within this budget.

Section 224(2) of the Food and Agricultural Code provides that of the funds transferred, $1,000,000 is appropriated for emergency detection, eradication, or research. If not used for the purpose in the year of transfer, the balance of any transfer is appropriated for payment in the following year to counties as reimbursement for their expenses in carrying out agricultural programs authorized by the Food and Agricultural Code.

80.40 Agricultural Resources

Agricultural Resources evaluates and recommends policies related to the management and development of land, water, energy and other agricultural resources. Agricultural Resources examines and proposes solutions to technological and economic aspects of farm production in order to meet the short- and long-term demands of the state agriculture and the general public. Departmental services are provided, such as technical projects, statistical and economic analyses and quality control designs.

8620 FAIR POLITICAL PRACTICES COMMISSION

Program Objectives and Description

The Fair Political Practices Commission has primary responsibility for the impartial, effective administration and implementation of the Political Reform Act of 1974. To fulfill this responsibility the Commission adopts, amends, and rescinds rules and regulations to carry out the purposes and provisions of the act; issues opinions to persons who request them with duties under the act; prescribes forms for reports, statements, notices, and other documents under the act; prepares and publishes manuals and instructions to facilitate compliance with and enforcement of the act; explains the duties of persons and committees under the act; provides assistance to agencies and public officials in administering the provisions of the act; investigates possible violations of the act; conducts hearings and applies sanctions provided by the act; provides technical assistance to State and local agencies in the preparation of conflict of interest codes; reviews and approves the codes of State agencies, county boards of supervisors, city councils, and all local government agencies with jurisdiction in more than one county.

8640 POLITICAL REFORM ACT OF 1974

General Description

Chapter 10, Statutes of 1976, requires the Department of Finance, in preparing the State budget and the Budget Bill submitted to the Legislature, to include in the budget item dealing with the support of the Political Reform Act of 1974 (Proposition Nine): (1) the additional amounts to be appropriated to other agencies to carry out their duties under the act, which amounts shall be in augmentation of the support items of such agencies; (2) the additional amounts required to be appropriated by the Legislature to the Fair Political Practices Commission to carry out its duties; and (3) in parentheses, for informational purposes to show the continuing appropriation of $1,000,000 adjusted for cost-of-living changes made to the Commission by the Political Reform Act during each fiscal year.

The Political Reform Act detail for each affected agency will be found under their respective program budgets as identified in the following table.

8660 PUBLIC UTILITIES COMMISSION

The objectives of the Public Utilities Commission are:
1. To provide the public with the lowest reasonable rates for services by utilities, and transportation companies.
2. To make certain that utilities and transportation companies render adequate service and have sufficient facilities to meet the needs of the public.
3. To ensure that the public has stable, efficient utilities and transportation services by controlling and limiting entry into the field to those applicants with financial responsibility and demonstrated capability to render adequate service.
4. To promote public safety and accident reduction by establishing and enforcing safety regulations for utility and transportation companies, as well as for railroad highway grade crossings.
5. To determine the just compensation for the acquisition of utility or transportation company property by political subdivisions.

10 REGULATION OF UTILITIES

Program Objectives and Description

Utilities in California have been granted exceptional powers and privileges by the State, including exclusive service areas, which preclude customers from obtaining service from others. State regulation is necessary to protect the public interest and ensure fair and impartial rates as well as adequate service facilities rendered by stable, financially responsible companies. Regulatory controls have also been established to promote the safety of employees, customers, and the public at large.

The objective is to provide the public with adequate and safe utility services at the lowest reasonable rates.

Authority

California Constitution, Article XII; Public Utilities Code, Divisions 1, 2, and 4.

8660 PUBLIC UTILITIES COMMISSION—*Continued*

10.10 Regulation of Rates

The Commission's responsibility for the establishment and maintenance of reasonable rates for utility service is accomplished by making intensive studies of cost of service, cost of plant, earnings, and financial analyses which are entered into evidence at public hearings. Similar studies are made to form the basis for negotiated rate settlements and reductions. The Commission's attorney represents the people of the State of California and the Commission in all proceedings involving any questions under the Public Utilities Act and any order or act of the Commission. The Commission participates in rate and certification proceedings before federal regulatory commissions and in the courts.

In the budget year, 1.9 personnel years and $76,000 are proposed to review and forecast fuel costs; for the same purpose, 2.9 personnel-years and $133,000 have been re-directed from the environmental impact report activity (10.30 Certification). Workload resulting from the AT&T divestiture will require the continuation of 3.8 personnel-years and $185,000. An increase of 1 personnel year is proposed for accounting workload associated with the change to user fee funding (Chapter 323, Statutes of 1983). Funding of $18,000 for the Universal Telephone Service Program established pursuant to Chapter 1143, Statutes of 1983 is also included. An augmentation of $1,000,000 in reimbursable consulting and professional services is required for construction cost assessment and monitoring pursuant to Chapter 1139, Statutes of 1982 and Chapter 1253, Statutes of 1982. Membership dues in the National Regulatory Research Institute will increase general expenses by $197,000. A reduction of 17.1 personnel years is proposed to reflect operational effeciencies. An additional reduction of 1.4 personnel years results from increased salary savings.

Expenditures	415.5	344.3	331.6	$18,319	$14,045	$16,466

10.20 Service and Facilities

Utility services are regulated through Commission orders issued as a result of investigations, studies, and public hearings related to the adequacy of service and facilities. A large part of new facilities are financed through the issuance of stocks or bonds which require Commission authorization prior to issuance. The control and supervision of financing practices of utilities are essential because of the effect of such practices on capital costs and the availability of capital funds, both important elements in providing adequate service at reasonable costs to the customers. Commission authorization is required for security issuance and such related matters as transfers of utility properties, mergers, and consolidations for the purpose of assuring sound, well-balanced financing and capital structures.

With a continual growth in the general population and the number of customers in the State, the number of service connections and the related activities of maintaining adequate service and facilities will also continue to expand.

A reduction of .8 personnel year results from increased salary savings.

Performance Measures

	1982–83	*1983–84*	*1984–85*
Water supply and service investigations completed	22	35	35
Energy service investigations and reports	100	100	240

Expenditures	36.7	87.5	86.7	$1,607	$4,900	$5,363

10.30 Certification

Before utilities can exercise any rights or privileges of franchise, they must obtain certification that public convenience and necessity require their exercise of these rights.

New or existing entities file applications for certification of public convenience and necessity to construct or extend facilities to areas not previously serviced. The processing of the applications involves studies and investigations covering financing programs, operations, and reasonableness of initial rates.

* Dollars in thousands

8660 PUBLIC UTILITIES COMMISSION—*Continued*

The number of decisions issued gives a reasonable measure of output and shows how utility service is being reviewed for the benefit of the consuming public in California.

Beginning in the budget year, it is proposed that 2.9 personnel-years and $133,000 be redirected from the environmental impact report activity to the review and forecast of fuel costs (10.10 Rates). A reduction of 3.8 personnel years results from increased salary savings.

Performance Measures	*1982–83*	*1983–84*	*1984–85*
Decisions issued	36	40	40
Proceedings completed, environmental impact	4	5	5
Out-of-state gas supply projects completed	5	5	6

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	28.9	38.7	32	$1,387	$1,942	$1,890

10.40 Safety

The safety element of the Commission's regulation of utilities program is divided into two components: gas safety and electric safety.

In its endeavor to meet the objectives of this element, the Commission establishes minimum standards for the construction, operation, and maintenance of utility plants to promote the health and safety of employees and the public.

Accident reports and other utility reports are made to ensure that these standards are maintained. This is accomplished through field investigations, tests of utility plants, and examination of methods of construction, operating procedures, and maintenance; and public hearings where appropriate.

	1982–83	*1983–84*	*1984–85*
Gas Safety:

20 REGULATION OF TRANSPORTATION

Program Objectives and Description

The Commission regulates various privately owned for-hire passenger and freight transportation companies including motor carriers, railroads, vessels and pipelines as well as transit guideway systems. The program for the regulation of transportation protects the public interest in matters relating to rates, service, licensing and safety. Authority comes from statutory and constitutional provisions.

The main responsibilities of the program are: (1) to maintain a healthy, efficient and competitive transportation system; (2) to ensure public access to services with rates which are just, reasonable and free from unlawful discrimination; (3) to promote competitive price options for a range of service levels in response to market demands; (4) to enforce rates, rules, regulations and statutory requirements; (5) to enforce requirements for permits and licenses to operate transportation services and collect related fees, and (6) to ensure safety of rail transit systems and railroad-highway crossings.

The Commission's regulatory responsibilities are discharged through administrative actions and through decisions and orders which, except for non-contested matters, are based on evidence presented by staff and interested parties in public hearings.

Authority

California Constitution, Article XII; Public Utilities Code, Divisions 1, 2, 4 and 10.

8660 PUBLIC UTILITIES COMMISSION—*Continued*

20.10 Regulation of Rates

The rate element of the transportation regulation program provides for Commission oversight of pricing activities of trucking firms, railroads, passenger bus lines, vessel carriers, pipelines and related companies.

The Commission approves and establishes freight rates and passenger fares in accordance with constitutional and statutory requirements that such prices be just, reasonable and nondiscriminatory. Rate regulation varies in form according to mode of transportation and carrier and commodity classifications within modes, but it is generally directed to ensuring adequate service, efficient operations, equal competitive opportunity, and freedom from destructive rate wars.

The Commission supervises carrier pricing practices through informal staff activities as well as through formal quasi-legislative and quasi-judicial proceedings. The public has the right to petition, complain, and seek judicial review of all rates subject to Commission regulation.

A variety of activities related to rate and fare regulation are performed in Commission offices throughout the state. The Commission maintains as legal documents open to public inspection, tariffs and contracts filed by carriers or their agents. Rate and fare filings are reviewed in accordance with statutory and administrative criteria and are then either accepted or rejected. Evaluation of price adjustments involves cost factor research, cost allocation studies, prevailing wage criteria, and other economic studies. Information and assistance concerning rates, fares and regulations are furnished to carriers and the general public upon request. An important aspect of rate regulation is the enforcement of rates and rules to ensure uniform observance by all carriers.

In the budget year, 1 personnel-year and $100,000 in additional in-state travel ($143,000 total) are proposed to ensure that highway carriers are operating safely and within the requirements of the law. An increase of .9 personnel year is proposed for accounting workload associated with the change to user fee funding (Chapter 323, Statutes of 1983). A reduction of 4.8 personnel years is proposed to reflect operational efficiencies. An additional reduction of 3.7 personnel years results from increased salary savings.

Performance Measures

RATE ELEMENT	*1982–83*	*1983–84*	*1984–85*
Public value of motor carrier property transportation (revenue) under Commission purview (thousands)	$5,184,000	$5,443,000	$5,660,000
Public value of passenger stage transportation (revenue) under Commission purview (thousands)	$234,000	$258,000	$280,000
Number of tariffs analyzed and filed with Commission:			
Property:			
Motor carrier	26,755	30,000	38,000
Vessel	10	10	10
Passenger:			
Motor carrier	7,038	4,930	6,800
Vessel	44	48	60
Number of motor carrier (property) transportation contracts analyzed and filed with Commission	10,000	12,000	13,000
Rate reduction and competitive rate filings for property transportation processed	7,193	9,600	12,000
Number of motor carrier (property and passenger) compliance investigations	3,012	3,100	3,200
Number of formal and informal disciplinary actions for rate violations	194	225	250
Amount of fines and undercharges collected (thousands)	$304	$310	$320

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	191.5	219.1	212.5	$7,352	$9,759	$10,182

20.20 Service and Facilities

This element includes four functions: freight service, passenger operations, rail transportation and consumer protection.

The Commission is responsible for ensuring that an adequate level of service is provided by carriers of property. It must evaluate such service with regard to geographical areas (particularly small communities), types of commodities, classes of shippers and volume of shipments. The program considers service level changes, discontinuance of service and the desirability of new service. Traffic flow and other operating performance reports are made available to the public and transportation companies and staff who monitor carrier service.

The Commission is empowered by the State Constitution and statutes to regulate the operations of most privately-operated passenger carriers in California. The Commission performs in-depth investigations and analyses of the service provided by passenger carriers, and formulates policies, procedures, and regulations affecting numerous carrier services including intercity busses, charter-party carriers, home to work carriers, airport access and other specialized services.

Commission staff consult with passenger carriers to develop new bus services and improve and coordinate existing services and routes.

By maintaining carrier tariffs and timetables the Commission staff ensures that the passenger carriers fulfill their service obligations of providing reliable transportation.

To ensure adequate train service, the Commission analyzes passenger and freight train operations, facilities, and equipment in light of existing service and proposed service changes. The analyses include investigations and reports, as well as testimony before the Public Utilities Commission and Interstate Commerce Commission in hearings on proposals of railroads to initiate and discontinue privately operated passenger trains, merge railroad companies and abandon rail lines. The Commission consults and advises other government agencies on the establishment of new rail service and improvement of existing service including intermodal facilities necessary for interurban rail passenger service.

The Commission staff responds to consumer complaints regarding motor freight and passenger transportation. Many of these complaints involve loss or damage of used household goods or general freight. Other complaints are concerned with passenger service or lack of service by common carriers who are obligated by the terms of their certificates to serve certain geographical areas. Rules are established for consumer protection which include provisions for loss and damage claims on property shipments and compliance with passenger service standards as set forth in tariffs and timetables. The Commission provides public information and assistance for resolving service complaints and has offices located throughout the State.

Expenditures	18.6	19.3	19.4	$796	$1,105	$1,153

20.30 Licensing

The Transportation Division administers programs which control entry, continuance and discontinuance of for-hire transportation companies. The Commission's licensing responsibilities include:

1. Public utility motor carriers of property.
2. Public utility bus and other passenger motor carriers.
3. Vessels which carry passengers and property.
4. Express corporations, freight forwarders and motor transportation brokers.
5. Interstate and foreign motor carriers operating in California.
6. Commercial air operators.

The Licensing element has four functions:

1. Evaluation of the need for passenger and freight transportation services and issuance of the kinds and numbers of operating authority which will adequately satisfy this need.
2. Determination of the character and amount of insurance and bonds required to protect the public. Verification of minimum insurance coverage by the regulated carriers.
3. Development of financial, operational and managerial standards required for entry into specific classes of carriers.
4. Support functions including collection of fees and taxes.

The Licensing element responsibilities are performed by three branches of the Transportation Division. Passenger matters relating to buses, railroads, and vessels and verification of insurance coverage for commercial air operators are assigned to the Passenger Operations Branch. Administrative control for freight motor carrier operators is the responsibility of the Tariff and License Branch. Both of these branches rely on the Compliance and Enforcement Branch to implement statutory and Commission established license standards and requirements by obtaining compliance of the affected businesses.

A reduction of 5.7 personnel years is proposed to reflect operational efficiencies. An additional reduction of 1.8 personnel years results from increased salary savings.

Performance Measures

LICENSING ELEMENT	*1982–83*	*1983–84*	*1984–85*

8660 PUBLIC UTILITIES COMMISSION—*Continued*

20.40 Safety

The safety element in the regulation of transportation program is divided into the following functions: railroad, grade crossing, rail rapid transit and public transit guideway, and passenger operations. The railroad safety function is concerned with the promotion, adoption, and enforcement of safe and efficient operations by railroads and the maintenance of their facilities in compliance with Commission orders and State law. In the grade crossing function, the Commission evaluates the need for the installation of automatic protection devices, the closure of unnecessary crossings, and the construction of underpasses or overpasses at dangerous railroad-highway crossings. The rail rapid transit and public transit guideway safety functions, provide independent safety oversight of all planned and operating rail transit and fixed guideway transit systems.In the passenger operations function, coordination is maintained with the California Highway Patrol and other law enforcement agencies and the Department of Motor Vehicles to ensure that bus companies authorized by the Commission to operate are inspected for mechanical deficiencies and proper maintenance procedures.

In the budget year 1 personnel-year and $41,000 are proposed to meet the increased workload related to grade crossings in southern California.

Performance Measures

SAFETY ELEMENT	*1982–83*	*1983–84*	*1984–85*
Railroad Safety:			
Miles of track inspected:			
Operational condition	3,500	4,000	4,250

Totals	53.7	51	52	$2,328	$2,308	$2,523

20.50 Just Compensation

Upon petition by a political subdivision, the Commission determines the just compensation for the acquisition of a transportation company's property. Also, whenever on its own motion or upon the complaint of a public utility, the Commission finds that public convenience and necessity require the use by the public utility of the passenger vessel terminal facilities operated by the Golden Gate Bridge, Highway and Transportation District, and when the district and the public utility are unable to agree upon the terms and conditions or compensation, the Commission shall prescribe reasonable compensation and terms. Any public utility which initiates a complaint regarding the district's terminal facilities shall reimburse the Commission for its reasonable expenses in hearing and determining the complaint. The determination of just compensation and the terms and conditions or compensation involve valuation, depreciation, appraisal, and financial studies.

Performance Measures

No work is planned in this element until a political subdivision of the State makes a formal request for such services.

30 ADMINISTRATION

Program Objectives and Description

The objective of this program is to provide the divisions with administrative support through fiscal, personnel and training, electronic data processing, business services and other management functions. Activities in this program also consist of the following: (1) to consolidate management and program and formulate policy and program development, (2) to assist the legal, financial and technical staff in maintaining divisional objectives, (3) to evaluate workload for identification of deficiencies in program requirements, and (4) to provide a liaison between the public and the utilities for the resolution of consumer complaints.

In the budget year, 1.9 personnel-years and $46,000 are proposed to process the increased workload in the fiscal office resulting from user fee funding for the Commission (Chapter 323, Statutes of 1983).

8700 BOARD OF CONTROL

Pursuant to Government Code Section 13900, et seq., there is in State Government the State Board of Control. The primary objectives of the Board of Control are:

1. To consider and settle claims against the State in an orderly and impartial manner and reduce the number of items requiring legislative review or judicial adjudication.
2. To provide equitable allowances to State employees for travel, relocation expenses and other reimbursements specifically assigned to its jurisdiction.
3. To protect the public against arbitrary or capricious acts of State agencies in the procurement of supplies and equipment.
4. To compensate innocent victims of violent crimes for documented financial loss associated with the crime.
5. To compensate local jurisdictions for additional financial burdens caused by a state mandate.

Authority

Government Code Sections 905.2, 912.8, 11031, 11270, 13920, Penal Code, Revenue and Taxation Code, Code of Civil Procedure, Welfare and Institutions Code, Education Code, Health and Welfare Code, Military and Veterans Code, and others.

11 CITIZENS INDEMNIFICATION

Program Objectives and Description

This program indemnifies those citizens who are injured and suffer financial hardship as a result of a crime of violence, or who sustain damage or injury while performing acts which benefit the public. The victim of a crime of violence, a citizen performing an act beneficial to the public, or any person dependent upon the victim or citizen for support may file a claim with the State Board of Control. Eligibility is determined by the Board of Control as authorized by Chapter 1144, Statutes of 1973, after an investigation of the claim is conducted by the staff. Program structure change effective July 1, 1984.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

21 HAZARDOUS SUBSTANCE CLAIMS

Program Objectives and Description

Chapter 756, Statutes of 1981 mandated a new program and function for the Board of Control. This statute allows reimbursement to claimants for personal injury and property damage as a result of a hazardous or toxic substance released in the environment. Program structure change effective July 1, 1984.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Reimbursements	*0.5*	*1*	*1*	*40*	*43*	*43*

30 CIVIL CLAIMS AGAINST THE STATE

Program Objectives and Description

This function receives, processes and investigates all claims for money or damages against the State. Tort liability claims approved by the Board of Control are paid from funds appropriated for that purpose. All equity claims approved by the Board are referred to the Legislature for payment under an omnibus claims bill.

During the 1982–83 fiscal year the Mediterranean Fruit Fly Claims Fund was established pursuant to Chapter 332 Statutes of 1982. Monies are released from the General Fund to the Mediterranean Fruit Fly Claims Fund on an as needed basis. Program structure change effective July 1, 1984.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

Civil claims against the state	11,500	13,000	15,000

41 LOCAL MANDATED COSTS

Program Objectives and Description

This program receives and processes all claims from local jurisdictions claiming increased expense attributable to legislation or executive orders. Parameters and guidelines are established by the Board of Control following its determination that a mandate exists. Claims approved for reimbursement of state mandated local costs are submitted twice a year for legislative appropriation.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

8700 BOARD OF CONTROL—*Continued*

51 ADMINISTRATION

Program Objectives and Description

The administrative function provides direction to the Board of Control staff in response to the tenor set by the Board; serves as liaison between the Legislature and the Board; provides personnel and budget services to all programs under the jurisdiction of the Board of Control; and acts on behalf of the Board in matters specifically delegated by the Board.

8730 COMMISSION ON STATE FINANCE

Program Objectives and Description

The Commission on State Finance was created by Chapter 1162, Statutes of 1979 (SB 165) effective January 1, 1980. The Commission consists of seven members or their designees: the President pro Tempore of the Senate, the Speaker of the Assembly, the Senate Minority Floor Leader, the Assembly Minority Floor Leader, the Director of Finance, the State Controller, and the State Treasurer.

The objective of the Commission is to aid the Legislature and the Governor in establishing an appropriate, timely and coordinated fiscal policy for the State by providing them and the public with forecasts of state revenues, current year expenditures, and the surplus or deficit at least 4 times a year.

To carry out its duties the Commission is empowered to examine the records of State agencies, hold hearings and contract for studies and reports.

Authority

8740 CALIFORNIA INFORMATION SYSTEMS IMPLEMENTATION COMMITTEE

Program Objectives and Description

The State has established policies regarding electronic data processing which to be effective must be expeditiously implemented. The Committee's objective was the formulation of recommendations regarding appropriate legislative and executive actions in order to expeditiously implement the State's electronic data processing policies.

This Committee is no longer necessary since its functions are duplicated by the Department of Finance and Joint Legislative Budget Committee.

8780 COMMISSION ON CALIFORNIA STATE GOVERNMENT ORGANIZATION AND ECONOMY

Program Objectives and Description

The Commission on California State Government Organization and Economy was created by the 1961 Legislature and has responsibility for submitting reports of its findings and recommendations to the Legislature and to the Governor. The Commission is composed of two members of the Senate, two members of the Assembly, and nine citizen members, five of whom are appointed by the Governor, two by the Speaker of the Assembly and two by the Senate Rules Committee.

The objective of the Commission is to provide assistance to the Governor and the Legislature in promoting economy, efficiency, and improved service in the transaction of the public business in the various departments and agencies of the executive branch of State Government. The Commission pursues that objective by conducting studies on its own prerogative or at the request of the Administration or the Legislature and is authorized to examine in detail any department or agency of the executive branch of State Government and make recommendations to the Governor and Legislature at such times as the Commission believes is appropriate.

8800 MEMBERSHIP FOR COUNCIL OF STATE GOVERNMENTS

The Council of State Governments is a joint agency of all fifty states and is directed by state officials, primarily governors and legislators, who serve on the governing board and the executive committee. The council has its headquarters in Lexington, Kentucky and regional offices in San Francisco, Atlanta, New York, and Washington D.C. The council is funded through assessments based upon each state's population.

Program Objectives and Description

This item of expenditure is California's share of the cost of operation of the Council of State Governments.

Participation in that organization provides an opportunity for California interests to be coordinated with those of other states having similar needs and problems and to be represented in discussions with the federal government. Similar benefits are derived through participation in the National Governor's Conference, which is budgeted in the Governor's Office, the National Association of State Budget Officers which is budgeted in the Department of Finance, and the National Conference on State Legislators, which is budgeted in the Senate.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**

8820 COMMISSION ON THE STATUS OF WOMEN

Program Objectives and Description

The Commission on the Status of Women works to eliminate inequities in laws, practices, and conditions which particularly affect women. The Commission was originally created as a limited-term agency by Chapter 1378 of 1965, continued by Chapter 854 of 1967, and again by Chapter 721 of 1969. Chapter 541 of 1971 established the Commission as a permanent state agency, broadened its areas of concern, and added special projects and consultative functions to its mandate. Chapter 1118, statutes of 1982, clarified the Commission's authority to take positions on legislation, to propose legislation, and to express its views on issues affecting women.

The Commission examines bills introduced in the Legislature which affect women's rights; maintains an information center on current needs of women which is available to government agencies, private groups, and individuals; and is mandated to give technical and consultative assistance to organizations throughout the state which assist women. Emphasis is on economic issues, child care/support/custody, health services, problems of violence against women, minority/older women, and homemakers' rights.

Legislation provides for a 17-member commission consisting of the Superintendent of Public Instruction, the Chief of the Division of Labor Standards Enforcement, three Members of the Assembly and one public member appointed by the Speaker of the Assembly, three members of the Senate and one public member appointed by the Senate Committee on Rules, and seven public members appointed by the Governor. Chapter 382 of 1973 provided for staggered four-year terms for public members, commencing July 1, 1974. Chapter 868 of 1976 provided for $50 per diem for public members, in addition to necessary expenses.

10 RESEARCH AND INFORMATION SERVICES

Program Objectives and Description

The Commission collects, maintains, and disseminates current information on the status of women, the needs of women, and on projects designed to meet these needs. The unique resources of the Information Center are available to government agencies, private groups, and individuals. A bi-monthly newsletter, a weekly public service newspaper column, and fact sheets and brochures on specific issues are regular methods of information dissemination.

Chapter 111, Statutes of 1983 established a task force to identify and address barriers to the implementation of equal pay to women for work of equal value. The 1984–85 Budget proposes one and one-half personnel years limited term to 6/30/85 and $55,000 for support to the task force.

30 ADMINISTRATION

Program Objectives and Description

The commissioners establish policy and priorities for the work of the Commission. The commissioners hold four meetings per year, with additional meetings of committees. Current standing committees focus on economics, child support/custody/care, violence against women, health, minority women, and the status of homemakers.

8860 DEPARTMENT OF FINANCE

By statute the director serves as the Governor's chief fiscal policy advisor with emphasis on the financial integrity of the State and maintenance of a fiscally sound and responsible Administration.

The objectives of the Department of Finance are:

1. To prepare, present and support the annual financial plan for the State.
2. To serve as the Governor's chief fiscal policy advisor.
3. To assure responsible and responsive State resource allocation within resources available.
4. To foster efficient and effective State structure, processes, programs and performance.
5. To establish integrity in State fiscal and program performance data bases and systems.

10 ANNUAL FINANCIAL PLAN

Program Objectives and Description

To ensure the financial integrity of the State through the planned allocation of scarce State resources, the Department of Finance advises the Governor on the fiscal condition of the State and guides in the preparation, presentation to the Legislature and support of the Governor's annual financial plan for the State. The Governor's Budget encompasses proposed expenditures and estimated revenues for the next fiscal year (commencing July 1) and includes proposals for new governmental actions as well as those necessary to continue existing levels of most services.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

* Dollars in thousands

8860 DEPARTMENT OF FINANCE—*Continued*

Performance Measures

The Governor's Budget, Budget Bill, and proposals for special legislation prepared in accordance with the Governor's policy.
Revenue estimates and forecasts of the economic pattern anticipated during the period covered by the Budget and the translation of these into revenue under current tax laws.
Current and long-range population estimates of the State and its counties.
Analysis of the population composition.
Current and long-range estimates of enrollments in the State's educational institutions.
Revenue-related and demographic estimates for agency workload and caseload projections.

10.10 Preparation

To effectively allocate anticipated future State resources to meet the anticipated future needs of State Government, the Department of Finance develops an expenditure planning estimate for each State agency. These estimates provide expenditure adjustments resulting from legislation approved in the current year, economic conditions, and distribution of resources authorized by the Legislature. Each department then adjusts its budget to the planning estimate. The Department of Finance reviews and coordinates budget submissions from each department. A department wishing to change its program or level of support must initiate a budget change proposal which is reviewed by Finance to ensure consistency with statutes and the Governor's policies. The Department of Finance enters changes in the annual financial plan to reflect the adjusted expenditure projections for both the current and budget years. If expenditures exceed revenue, alternatives are recommended for additional revenue sources and/or expenditure reduction. The financial plan proposed for the next fiscal year is presented to the Legislature by January 10 of the current year.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	48.2	46.9	49.7	$2,381	$2,613	$2,937

10.20 Enactment

To ensure that the Governor's proposed programs are effectively presented to the Legislature and to monitor the status of the budget as it proceeds through the legislative process, the Department of Finance assists in the legislative review of the budget bill. The budget bill is introduced in each of the legislative houses and contains appropriations necessary to finance the programs proposed in the Governor's Budget. Representatives from Department of Finance, the Legislative Analyst and State agencies provide testimony as needed during legislative committee hearings on the budget bill. Finance records legislative changes in weekly change books and produces a final change book following enactment of the budget. At the time of budget enactment, revenue estimates are prepared to reflect the latest economic forecasts and recent financial legislation.

Performance Measures

Weekly Change Book and Final Change Book

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	14.1	13.8	16.5	$696	$765	$961

10.30 Support and Direction

State programs must be administered in accordance with the authorized financial plan. Controls are placed on appropriation items in the Budget Act and other statutes which require specific monitoring by Department of Finance. Variations from the approved financial plan are analyzed to ascertain their effects on programs and on the financial position of the State. If justified and within approved policy and legislative intent, revisions are made to the extent permitted by law. Variations are reported to appropriate legislative committees for their consideration as required by law.
A comparison is made of expenditures and revenues. Cash flow statements are required to adequately manage the State's fiscal resources.

Performance Measures

Revisions to the approved programs are reviewed and acted upon.
Estimated cash flow statements.
Comparative statements of cash flow reporting actuals with previous estimates.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	43.6	42.6	42.6	$2,065	$2,401	$2,588
General Fund				*2,026*	*2,355*	*2,538*
Reimbursements				*39*	*46*	*50*

10.40 Legislation and Intergovernmental Relations

The Department of Finance provides analyses of bills introduced in the Legislature and makes recommendations to the Governor's Office. These analyses inform both the Governor and the Legislature of the fiscal and program implications of the bills, including additional mandated costs to local governments. Representatives of Finance appear before the fiscal and revenue committees of the Legislature which are considering bills. New programs or proposed expansion of existing programs are analyzed to ascertain if any additional costs are mandated on local governments. Appropriate criteria are developed for reimbursement of those costs by the State Controller's Office. Commencing 1984–85 program component detail will be reported at program element level.

* Dollars in thousands

8860 DEPARTMENT OF FINANCE—*Continued*

Element Components	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

10.40.010 Bill Analysis

To provide the Governor's Office with analyses and recommendations on bills introduced in the Legislature, the Department of Finance establishes departmental positions on legislative bills, constitutional amendments, joint resolutions, concurrent resolutions and single house resolutions under legislative review and/or to the Governor for signature.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	11.5	11.1	(12)	$587	$628	($713)

10.40.020 Local Mandates

Finance monitors a system to reimburse local governments for costs legislatively mandated on local governmental entities under Section 6 of Article XIII B of the State Constitution and Section 2231 of the Revenue and Taxation Code. Functions include: (1) financial impact analyses of potential new or expanded programs to local government as contained in legislative bills, proposed legislation, and initiatives; (2) providing analytical advice on local mandate problems to departments issuing executive regulations; and (3) making findings with respect to claims initiated by local governments and presented to the Board of Control regarding mandated costs.

Performance Measures

Annual Report on chaptered legislation with State mandated local program implications.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	9.2	8.8	(8.8)	$488	$516	($538)

20 PROGRAM AND INFORMATION SYSTEM ASSESSMENTS

Program Objectives and Description

To improve operating efficiency and performance of State agencies, and ascertain the need for changes in programs or levels of support, the Department of Finance systematically reviews and evaluates State-administered and financed programs. Alternatives are provided to more effectively satisfy identified needs. Specific review functions include program analysis and evaluation, financial and performance accountability, and assessment of statewide electronic data processing (EDP).

Authority

Government Code Sections 11700, et seq.; and 13291–13302.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	82.6	82.6	82.6	$4,007	$4,418	$4,730
Workload adjustments	–	–	3.9	–	–	589

Reimbursements				*136*	*83*	*35*

Program Elements

20.10 Program Evaluation	27.2	26.5	25.7	$1,232	$1,369	$1,412
20.20 Financial and Performance Accountability	41	42.6	42.6	1,941	2,183	2,337
20.30 Information Technology	14.4	13.5	18.2	834	866	1,570

20.10 Program Evaluation

To assist in governmental decision making, particularly with respect to the allocation of resources and formation of public policy, Finance performs critical analyses and evaluative examinations of State programs, policies, resources, organization, and management. Study projects may originate within Department of Finance, by referral from officials at Cabinet level, from the Governor's Office or from the Legislature. Occasionally, another State agency requests a study. Studies may produce formal or informal reports. The formal reports are listed in *California State Publications* and are given full distribution under the Library Distribution Act. *For 1984–85, the Program Evaluation Unit will be assigned to the following priority activities—staff to the Tax Reform Task Force and staff to the Management Reform Task Force. Additionally, a small core of staff will be assigned to short term projects.*

Performance Measures

Recommendation of ways to increase the effectiveness and efficiency of State programs.
Recommendations designed to improve the allocation of State resources to programs.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	27.2	26.5	25.7	$1,232	$1,369	$1,412

20.20 Financial and Performance Accountability

To assist the Director of Finance in fulfilling statutory responsibility for supervision over all matters concerning the financial and business policies of the State, the Financial and Performance Accountability Unit: (1) examines financial, budgetary and operational information, systems of internal control, EDP systems and controls; (2) coordinates executive branch organizations performing internal auditing activities; and (3) provides audit advice and support as needed by the Director of Finance or other agency officials.

* Dollars in thousands

8860 DEPARTMENT OF FINANCE—*Continued*

Reimbursements				*135*	*83*	*35*

20.30 Information Technology

The purpose of the Office of Information Technology is to increase the efficiency and effectiveness of State Government through the appropriate utilization of the technologies offered by Electronic Data Processing, Information Systems and Telecommunications. The Office of Information Technology establishes statewide policy for the use of these technologies, monitors the acquisition and use of the State's information technology resources (equipment and personnel) whether through lease or purchase, and provides technical assistance to State agencies. Excluded from control are the State Legislature, University of California, State Compensation Insurance Fund, and the community colleges. *To implement provisions of Chapter 1327, Statutes of 1983, the budget year proposes additional resources including five positions for telecommunications policy and planning. Workload adjustments in Department of General Services' Communication Division have made five positions available.*

Performance Measures

Coordinated plans for telecommunications, information systems, and EDP facilities.
A manual of statewide policies, procedures and standards.
The use of teleconferencing as an alternative to State travel.

30 SUPPORTIVE DATA

Program Objectives and Description

To provide a centralized source of official relevant data and analyses for economic, revenue, and tax information, the California Fiscal Information System furnishes revenue and expenditure information to decision makers. Basic and applied economic and tax research functions support the revenue estimates required for the State financial plan, for the analysis of financial legislation, and the evaluation of any fiscal developments which will affect the State. Basic and applied demographic research functions provide data which form the basis of caseload estimates of most State agencies.

Authority

Article IV, Section 12 of the State Constitution; Government Code Sections 13300, et seq.; and the Budget Act.

Program Requirements	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

30.10 California Fiscal Information System

To meet a growing concern among executives and legislators regarding the need for better accounting and budgeting information, the California Fiscal Information System (CFIS) was created. CFIS is a comprehensive on-line, computer data base system which acts as a bridge between detailed departmental accounting and budgeting systems and the users of high-level fiscal information. It provides timely and uniform fiscal data to both the Executive and Legislative Branches. CFIS also includes information generated from the California State Accounting and Reporting System (CALSTARS) which is a computerized governmental and program cost accounting system that will be utilized in approximately 150 State agencies and institutions once all entities are phased in.

Element Components	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

* Dollars in thousands

8860 DEPARTMENT OF FINANCE—*Continued*

30.10.001 CFIS Data Base

The CFIS data base was created, pursuant to the requirements of Government Code, Section 13337(j), to provide timely and uniform fiscal data needed to formulate and monitor the budget with an on-line inquiry capacity. The system is to provide the ability to simulate budget expenditures and forecast revenues. The system is to include fiscal data by line item, program, governmental unit and fund source, and provide for the ability to compare similar or identical activities through the use of a common coding structure. The system is to be available to both the legislative and executive branches.

The development of CFIS will span several years. In 1978–79, the Legislature was provided on-line access to Bill Tracking (Legislation) and Budget Bill Tracking (Changebook) information. In June 1979 a contract was awarded for the computer software and consultant assistance to create the CFIS data base. Two software packages were acquired: (1) to manage the data base, and to provide tabular and graphics reporting capabilities; and (2) to provide for the statistical and forecasting/modeling uses of CFIS.

In 1979–80, the CFIS software was installed at the Teale Data Center and video graphics terminals were installed in the offices of the Interim CFIS users. Interim CFIS data base files were established which included data from eight large departments, the State Controller and Department of Finance. A CFIS Users Manual has been developed to help in the retrieval of this data. A contract was let for U.S. and California economic data, a portion of which is now available for CFIS users. Training sessions were conducted for CFIS users (staff from Finance, State Controller, State Treasurer, eight large departments, and the Legislature).

In the 1981–82 fiscal year, the interim CFIS database was expanded to accommodate the input of fiscal data from the first CALSTARS users and four additional departments with their own program cost accounting systems.

In the 1982–83 fiscal year, the data base is being expanded to include the fiscal data from an additional 21 departments and institutions. Funding is included for legislative assistance in using CFIS, as has been provided in prior years. In addition, enhancements will be made to existing reporting capabilities as well as development of new supporting systems.

In the 1983–84 and future fiscal years, additional departments will be added to the CFIS data base as their accounting operations are brought onto CALSTARS. Significant enhancements are also planned for the Bill Tracking (Legislation) application to meet needs both of the Executive and Legislative users as well as to provide interfaces with other computerized Legislative Information Systems. The experience gained from the CFIS effort and a review of current user needs will be applied in formulating the final data base.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures	9.1	9.1	9.1	$1,009	$1,134	$980

The implementation of CFIS is planned over a period of several years in a modular building block approach. Initially, CFIS will provide monitoring capability for approximately 50 percent of the State budget. The data base files now being established to accomplish this are intended to provide reasonably accurate and timely data which will be useful to decision-makers. The data is, of necessity, only a partial picture of the State's total fiscal activities. With the experience gained in the implementation of CFIS, activities will be undertaken to simplify and improve the use of the data base.

REVENUES AND EXPENDITURES

Planned and actual revenues, budgeted expenditures, planned and actual monthly expenditures, and performance measures for ten independent (non-CALSTARS) departments with program cost accounting capabilities and for those departments which have implemented CALSTARS to date.

BILL TRACKING (LEGISLATION)

Summary information on bills in the Legislative process from introduction to enactment. Input to the system comes from the Governor's staff, Department of Finance, and legislative history reports. The system contains a brief bill summary, subject, author, Governor's Office position, and applicable revenue and cost estimates by the Department of Finance and Legislative Analyst's Office.

BUDGET BILL TRACKING (CHANGE BOOK)

Recordating and reporting of both Houses, and Conference Committee changes to the Governor's Budget in program and traditional line item detail. Enhancements include implementing common code structures.

BUDGET ADMINISTRATION

Budget authorizations (appropriations), revisions, allocations, etc. for the 1981–82 and 1982–83 fiscal years; Governor's Budget proposed appropriations for the 1983–84 fiscal year.

HISTORICAL DATA

Actual revenues, expenditures, and personnel-year data for all departments and funds from 1974–75 to present. Selected summary data will be available for longer time periods.

ECONOMIC DATA

Selected U.S. and California economic time series data, along with other revenue data used by the Department of Finance.

REVENUE MODELS

Equations and models used by the Department of Finance in modeling the State's economy and estimating major revenues.

30.10.002 CALSTARS

In order to properly, accurately and systematically account for all revenues, expenditures, receipts and disbursements of State agencies, the California State Accounting and Reporting System (CALSTARS) has been developed for all agencies which do not have in place an automated and complete governmental and program cost accounting system. CALSTARS has been designed to include program cost accounting, cost allocation and fund distribution, and to encompass the reporting requirements necessary to provide data to the State Controller and to the CFIS data base.

This program also incorporates the effort required to make other modifications in the State's accounting systems. Such changes include bringing California State Government accounting practices into conformance with Generally Accepted Accounting Principles (GAAP), the modification of the State's Chart of Accounts, and the creation of the Federal Trust Fund to provide a central accounting over Federal funds.

The Federal Trust Fund has been established and an accounting of Federal receipts for each State agency is ongoing. The State's Chart of Accounts has also been modified and a Uniform Codes Manual has been developed to relate budgeting and accounting data for line item objects of expenditure, programs, organizations, and fund sources.

In July 1980 a contract was executed with Peat, Marwick, Mitchell and Co. to design and install a governmental program cost accounting system in 27 agencies and institutions. CALSTARS will ultimately be installed in approximately 150 State agencies and institutions. CALSTARS is a computerized accounting system that automates traditional governmental accounting and program cost accounting for the departments and provides summary receipt and expenditure data to the CFIS data base by line item, program, governmental unit and fund source. The system is capable of providing automated data transmission to the State Controller in a format compatible with the State Controller's accounts. CALSTARS currently operates out of a host computer at the Teale Data Center and a distributed processor located in Sacramento. Agencies and institutions submit data to CALSTARS through data entry terminals to the distributed processor.

* Dollars in thousands

8860 DEPARTMENT OF FINANCE—*Continued*

On July 1, 1981, CALSTARS was installed in 27 agencies and institutions. An additional 21 agencies became operational on CALSTARS July 1, 1982. During the current year, CALSTARS will be installed in 16 agencies/institutions to begin CALSTARS operations July 1, 1983. During the budget year, another increment of approximately 10 agencies will be readied for CALSTARS operations July 1, 1984.

In-house technical accounting and operational support is being provided on a continuing basis to all CALSTARS agencies. In addition, on-site consulting assistance will be provided to the 1982–83, 1983–84 and 1984–85 agencies during the current year, and to the 1983–84, 1984–85 and 1985–86 agencies during the budget year.

No major system developments or modifications are planned for the budget year. However, current year efforts now underway for a Post Implementation Review will extend into the budget year. *For the budget year, redirected resources previously allocated for consultant services are proposed to support six additional positions for continued implementation of the CALSTARS program.*

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	40.3	40.2	45.9	$7,588	$5,483	$5,217

30.10.003 Performance Measures

Under Government Code Section 13336, the Department of Finance is required to develop departmental performance or workload measures for each State agency. Performance measures include a wide range of descriptive statistics concerning the State's programs—program size, workload, program outcome, regional comparisons and aggregated client group data—enabling CFIS users to perform many initial program and budget analyses on line. As of fall, 1982, the Department, in cooperation with CFIS users and the reporting agencies, had defined performance measures for fifty-one State agencies.

An associated activity is the review and refinement of departmental program structures in accordance with Government Code Section 13335. A new Statewide Program Structure also has been devised which provides the means to identify similar or identical activities which cross departmental boundaries. Commencing in the current year, implementation of the new Shared Savings Program to promote improved productivity (Chapter 312/82) is being absorbed under this component.

For the budget year, the Performance Measures Program component is proposed for elimination. A recent study has concluded that continuation of the centralized Performance Measures Program function is unwarranted.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	8	4.2	–	$384	$308	–

30.10.004 Planning and Systems Support

Chapter 1284, Statutes of 1978 (AB 3322) requires the Department of Finance to make several changes in the formats of the Governor's Budget and Budget Bill and to make other changes in the budgetary process as related to the development of CFIS. Such changes include the development and implementation of a uniform code structure for use in the Governor's Budget, Budget Act and in all related fiscal systems; the implementation of program scheduled appropriations for all departments; the Budget Act appropriation of Federal funds; and the evaluation of the necessity for continuous appropriations. In addition, automated budget formulation capabilities are being developed to aid the departments in preparing budgets and the Department of Finance, and other reviewing agencies, to analyze budget proposals and to determine the impact of decisions on the detailed budget.

A uniform code structure has been developed and was included in the 1981 Budget Act. The 1981–82 Governor's Budget was similarly redesigned to include the uniform coding for organizations, programs, funds, receipts and objects of expenditure. Data may be found in the CFIS data base, using this common coding, for State agencies reporting to CFIS.

The Department of Finance Budget Preparation System has been modified to use the uniform data coding planned for the State's major fiscal systems. CFIS software was used beginning with the development of the 1981–82 Governor's budget for budget change proposal tracking and reporting and for the production of various summary schedules. The 1981 Budget Act included the appropriation of Federal funds deposited in the State Treasury as required by AB 3322. The 1982 Budget Act included program scheduled appropriations only for those agencies which had program scheduled appropriations in the 1981 Budget Act. While 23 additional agencies implemented program cost accounting in 1982–83, the Legislature elected not to schedule their 1982–83 Budget Act appropriations by program in order to facilitate the implementation of the new State Controller's Fiscal System and provide for the completion of the testing of newly devised program cost accounting mechanisms.

In the 1984–85 fiscal year, emphasis will be placed on improving the efficiency and effectiveness of the formulation, preparation, and enactment systems within the budget process. This will aid the Department of Finance and other departments in their budget preparation processes as well as the administrative and legislative review processes.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	4.4	4.3	4.3	$287	$262	$273

30.10.005 Other Fiscal Systems

The State Controller's Fiscal System has been redesigned to accommodate the requirements of AB 3322, CFIS data base needs and to better meet the needs of the State Controller's own operations. This redesigned system was tested in the 1981–82 fiscal year with 22 of the 27 CALSTARS departments and institutions and on July 1, 1982 it replaced the existing State Controller's Office Fund Accounting and General Disbursements Systems. In addition to capabilities provided by the current systems, the system provides new capabilities for automation of the State Controller's Annual Report, ad hoc reporting, claim tracking and claims auditing assistance. Modifications are also underway in the current year to the State's Payroll System to accommodate the CFIS common coding.

Through the 1982–83 fiscal year, this program component provided the funding needed to complete the pilot system test through year-end closing as well as production of the State Controller's annual reports.

8860 DEPARTMENT OF FINANCE—*Continued*

30.20 Economic Research

To aid in the development of the State financial plan, the Economic Research group prepares economic forecasts on a comprehensive basis approximately four times a year. Long-term projections are prepared at regular intervals. Semiannual economic outlook conferences are organized to bring together leading authorities from California and other areas to advise the staff on economic developments and to evaluate the preliminary forecasts. U.S. and California data are developed and maintained, forecasting models are built and maintained, analyses are prepared on various economic developments, and consultations are provided to assist State departments and local governmental agencies in planning and evaluation. The unit also prepares the Economic Report of the Governor, California Statistical Abstract, California Economic Indicators, and the California Index of Leading Economic Indicators.

Expenditures *(General Fund)*	4.9	4.7	4.7	$250	$300	$319

30.30 Revenue Estimating and Tax Research

To provide the revenue estimates required for the Executive Branch to prepare the State financial plan, analyses of financial legislation, and evaluation of financial developments of importance to State Government, the Financial Research unit maintains a basic and applied research function which includes major studies, task forces, and special projects initiated by the Administration, Legislature, or State agencies. Revenue estimates are prepared for the Governor's Budget, May Revision, monthly revenue collection analyses are conducted, and long-term projections are also made to support policy recommendations or analyses as requested. In addition, the unit is charged with estimating the growth in local property tax revenues and estimating State allocations for local government fiscal relief.

Performance Measures

Revenue estimates for the Governor's Budget.
Analyses of proposed legislation.
Monthly analyses of revenue collections.
Special studies.
Statistical analysis.
Long-term projections used to support policy recommendations or analyses as requested.

Expenditures *(General Fund)*	6.2	6	6	$318	$381	$405

30.40 Demographic Research

Finance provides at the State level a single source for official demographic data required for fiscal programs, research and planning purposes by State agencies, county and local governments, the Federal Government, academic institutions, school districts, and private entities. The Demographic Research Unit carries out a basic and applied research function primarily directed at the production of population figures which underlie the caseload estimates of most State agencies. In the development of estimates and projections, data are gathered from all levels of government and the private sector. In addition, population estimates are used as the basis for apportionment of certain State subventions and tax rate limits. Analyses and projections of enrollments in public schools, colleges, and universities are prepared. The State Census Data Center, which provides data from the Bureau of the Census and coordinates special censuses, is also included in this unit. *For the budget year, resources are proposed to purchase special censuses' cards with which to perform special censuses for local governmental entities. This purchase is totally funded through increased reimbursements.*

Performance Measures

Analyses and projections of enrollments in public schools, colleges, and universities.
Basic data and statistical compilations.
Local (city and county) population estimates for tax distribution, tax rate limitation, special survey design, and supervision.
Designs and tests research methodologies.
Annual estimates of state population and its composition.
Short and long range population projections.
Advisory services to State agencies, other levels of government, and the business community.

40 Administration

Program Objectives and Description

To facilitate the daily functioning of the Department of Finance and to maintain its operational effectiveness and efficiency, as well as to ensure a fiscally sound State Government, the Director of Finance provides executive leadership, policy and the direction required for achievement of departmental goals and objectives. Administrative services (including support services, business services, and personnel) are also included in this element.

Authority

Government Code Sections 13000, et seq.

40.01.010 Executive

To provide active leadership in maintaining a fiscally sound State Government, the Director serves as the Governor's chief advisor for fiscal policy and participates as a member on many boards and commissions as required by law (including the Franchise Tax Board, Pooled Money Investment Board, State Lands Commission, House-Bond Credit Committee, California Fiscal Advisory Board, and the State Public Works Board). The Director also maintains an office in Washington, D.C., through which various agencies (including Health and Welfare Agency and Department of Transportation, as well as the Department of Finance) contribute resources to represent the State's diverse interests in matters between the Federal Government and State. Total support of the Washington Office is:

	82–83	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

8860 DEPARTMENT OF FINANCE—*Continued*

40.01.030 Computer Support

Computer Support activities provide necessary data processing support during the entire budgetary process to Department of Finance staff and other State agencies. The Computer Support Unit functions include six major subsystems: (1) budget planning—planning estimate recording and reporting; (2) budget posting—generating budget summary Schedules 3, 6, 7 and 8; (3) Schedule 10 generation; (4) budget changes and enactment; (5) financial legislation—including changes; and (6) appropriation control accounting. Assistance is also provided which supports Finance's economic analyses and demographic research activities. For the budget year, this program component is eliminated and its activities charged to Programs 10 and 30 to better reflect program support of computer support activies. This will permit optimum management of departmentwide EDP resources.

Performance Measures

Budget summary schedules 3, 6, 7, and 8.
Supplemental schedules of appropriations—Schedule 10.
Lists of executive change requests and legislative changes to Assembly and Senate Budget Bills.
Final list of changes to the Governor's Budget.
Financial Legislation Report.
Planning Estimate Report.
Special reports and analyses using the appropriation data base.

8910 OFFICE OF ADMINISTRATIVE LAW

Program Objectives and Description

By statute the Office of Administrative Law is charged with a broad range of responsibilities related to the regulatory process and to accomplishing regulatory reform in California. The office is the central agency in state government with the power and duty to review regulations to ensure that they are written in a comprehensive manner, are authorized by statute, and are consistent with other law. These duties include the orderly review of administrative regulations against specified procedures and standards with the goal of improving the quality of state regulations. The objectives of OAL are:

1. To provide the regulated public better access to state government by promoting increased understanding and awareness of the regulatory process, and to provide the Legislature with information regarding statutes that affect the regulatory process.
2. To ensure that agencies examine all regulations in existence prior to July 1, 1980 for compliance with statutory standards and to review regulatory actions proposed by agencies to conform "existing" regulations to the new criteria.
3. To review all proposed and emergency regulations for compliance with six statutory standards, and statutorily required procedures.
4. To review and determine whether agencies' informal rules should be adopted as formal regulations.

OAL achieves these objectives through five basic functions: review of existing regulations; review of new regulations; determinations regarding informal rules, as mandated by AB 1013; provision of public information and coordination of regulatory and legislative affairs; and publications.

Review of Existing Regulations:

Existing regulations which state agencies elected to retain following their in-house review must be further reviewed by OAL to ensure that they meet the statutory standards. Currently, over 25,000 sections are scheduled for review with an additional 1,500 expected in 1984–85. This review will be carried out with a program base of six staff and will require at least two years to complete.

Review of New Regulations:

OAL reviews all emergency and non-emergency regulations against the standards set by statute. Regulations filed on an emergency basis must be reviewed within 10 days; non-emergency regulations must be reviewed within 30 days. *The 1984–85 budget proposes 3.5 new attorneys and one clerical position to meet increases in the number of new regulations to be reviewed and the time required to review them. In the past year, these increases were met by redirecting staff from the review of existing regulations; however, that workload is now backlogged and staff from that unit can no longer assist in the review of new regulations. The proposed positions will assure that agencies are not subjected to delays in the regulatory process.*

Determinations as Mandated by AB 1013:

AB 1013 (Chapter 61, Statutes of 1982), extended the regulatory review process to administrative rules and orders. Whenever OAL determines it is necessary, any informal rule issued by an agency is subject to the issuance of a determination by OAL as to its regulatory nature and, therefore, enforceability. *The 1984–85 budget proposes to establish a unit with two new attorneys to provide determinations on informal rules as required by law.*

Public Information, Regulatory and Legislative Affairs:

Public information regarding the regulatory process is the key to making the reforms necessary to carry out the intent of the Legislature. In addition, a program for comparing previously enacted statutes with regulations is required to meet the mandate of the Legislature to provide periodic reports on needed legislative changes. *The 1984–85 budget adds a Public Information Officer II to improve the office's public outreach efforts.*

Publications:

In keeping with legislative requirements, OAL publishes on a weekly basis both the new pages of the Administrative Code as well as the notices of proposed adoptions of new regulations. OAL also publishes other documents designed to inform the public regarding regulatory matters. *The 1984–85 budget proposes a two-year limited-term program to reformat the Administrative Code at an annual contractual cost of $100,000, in accordance with Government Code Section 11344. In addition, the budget allows for expansion and upgrade of currently published items including a newsletter, handbook, and the Notice Register.*

Authority

Government Code Sections 11340–11446.

8940 MILITARY DEPARTMENT

The Military Department is responsible for protecting life and property during periods of civil emergency and natural disaster by furnishing trained units for federal mobilization and for state missions as required by the Military and Veterans Code or as directed by the Governor.

The department is organized into a command element and three functional staff divisions to accomplish the command and management responsibilities of the Adjutant General. Staff activities include personnel, recruiting, information, administrative services, training, logistics, emergency operations and resource management. The department is organized in accordance with Department of the Army and Department of the Air Force staffing patterns.

Authority

Military and Veterans Code.

10 ARMY NATIONAL GUARD

Program Objectives and Description

This program manages Army National Guard units, personnel, supplies, and equipment in order to maximize the readiness of those forces when required for federal missions in the military defense of the United States or for state missions in support of civil authority.

The Army National Guard consists of 161 company-size units allotted to the State by the Department of the Army. The Military Department, in turn, stations those units at locations deemed best suited to insure their readiness and availability to perform state and federal missions. The current authorized strength of the Army National Guard is 21,071 officers and enlisted personnel.

The current and budget years reflect as workload adjustments the reduction of thirteen federally funded positions based on revised federal funding. The budget year also reflects one new maintenance position, two new emergency support planners, and increased operating expenses for support of the department's 123 armories. In addition, the base program in 1984–85 reflects an increase of 9.6 personnel years (no positions) due to an adjustment in benefit funding which will allow more positions to be utilized.

8940 MILITARY DEPARTMENT—*Continued*

10.10 Training

California Army National Guard units utilize training programs established by the Department of the Army and train under the general supervision of Active Army personnel. Units are inspected frequently by National Guard and Active Army officers to assure attainment and maintenance of readiness objectives.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	13.7	13.6	15.6	$520	$674	$809

10.20 Logistics

All of the federal funds provided to support the Army National Guard are to sustain the supplies, equipment, and maintenance requirements necessary for readiness training and operations. Camp San Luis Obispo is a state-owned installation which serves as the primary logistical base for receipt, storage, and distribution of federal supplies and equipment. Camp San Luis Obispo and Camp Roberts are major outdoor training areas that are utilized year-round by the National Guard, Army Reserve and Active Army forces. Camp Roberts and Los Alamitos Armed Forces Reserve Center are federal installations licensed and operated by the Military Department with 100 percent federal funding support. Camp San Luis Obispo receives 37 percent federal funding support.

Army National Guard units and equipment are housed in 123 armories. Local maintenance support is provided at 37 organizational maintenance shops, with higher echelon maintenance accomplished at eight support facilities. Over 80 percent of the state funds provided to support the Army National Guard Program are directed toward logistical activities.

Reimbursements				*262*	*337*	*338*

10.30 Command Support

This element provides command direction and policy guidance for the Army National Guard program. Activities include the issuance of directives and coordination of training and logistics; supervision of training and determination of readiness levels; and contingency planning and operational control over elements ordered into state service during emergencies.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	7.8	8	8	$379	$470	$492

10.40 Personnel

This element establishes standards for administrative and personnel practices. It develops policies, procedures, and standards for management of personnel and other records. It administers military personnel systems, including procurement, assignment, payment, promotion, retention, separation, and retirement of Army National Guard personnel.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20 AIR NATIONAL GUARD

Program Objectives and Description

The objective of this program is to maximize the readiness of trained and equipped air forces when required for federal or state missions.

The Air National Guard consists of an air defense unit at Fresno, a tactical airlift unit at Van Nuys, an air rescue and recovery unit at Moffett Field, and a tactical fighter unit at March Air Force Base. Additionally, communications units are located at North Highlands, Van Nuys, Hayward, Compton, Costa Mesa, Los Angeles, and Ontario. All of these units are allotted to the State by the Department of the Air Force. The authorized strength of the California Air National Guard is 5,563.

Workload adjustments for the budget year reflect two proposed maintenance positions and additional operating expenses for the new March Air Force Base facility. In addition, the 1984–85 base program increases by 8.3 personnel years (no positions) due to an adjustment in benefit funding which will allow more positions to be utilized.

8940 MILITARY DEPARTMENT—*Continued*

20.10 Training

Plans are developed and maintained for employment of Air National Guard forces during state emergencies and federal mobilization. Support plans include airlift, communications, and other specialized support. The operations unit within this element is responsible for the control and management of resources committed to these missions and the implementation of training and flying schedules. Training is conducted utilizing USAF technical schools and on-the-job training. Each individual trains a minimum of 39 days per year and proficiency is assured through periodic individual and unit testing conducted by regular Air Force advisors.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**

20.20 Logistics

The federal government provides virtually all supplies, equipment, transportation, subsistence, and support services necessary for training, deployment, and commitment of the Air National Guard. Major tasks are procurement, issuance, and control of repair parts, administrative supplies, uniforms, fuels, meals, ammunition, mobilization stockpiles, housekeeping, and the highly technical maintenance of over $186,000,000 worth of aircraft, 900 wheeled vehicles, and modern mobile radio, teletype, and radio relay equipment. The State of California operates and maintains ten Air National Guard facilities under a contract with federal reimbursement for a major portion of the costs.

Federal Trust Fund				*2,811*	*3,515*	*4,024*

20.30 Command Support

This element performs all functions of command to ensure achievement of program objectives. Tasks include development of long-range plans and programs concerning state military requirements and operational capabilities of 50 California Air National Guard organizations.

Input	*82–83*	*83–84*	*84–85*	*1982–83**	*1983–84**	*1984–85**
Expenditures *(General Fund)*	3	3	3	$186	$229	$239

20.40 Personnel

This element develops and implements personnel policies and systems, and accomplishes the procurement, selection, appointment, enlistment, commissioning, assignment, classification, reporting, promotion evaluation, separation, and discharge of Air National Guard personnel; establishes criteria and procedures for maintenance of personnel records; and provides services including the development and publication of policies concerning correspondence, records, files, reports, libraries, processing of security clearances, and the safeguarding of classified information. Most staff personnel involved in this program are federal employees.

30 OFFICE OF THE ADJUTANT GENERAL

Program Objectives and Description

The objective of this program is to provide executive leadership, policy direction, and administrative services. The Adjutant General exercises direct command over the State's military forces until such time as those forces have been mobilized under federal authority.

The budget year reflects .5 new position to augment the department's budget staff and the reduction of one administrative assistant to fund staff benefit cost increases. The department also proposes to begin conversion of 18,600 personnel files to microfiche ($152,000) and to install an emergency computer system power supply ($40,000).

35 MILITARY SUPPORT TO CIVIL AUTHORITY

Program Objectives and Descriptions

The objectives of this program are to provide National Guard personnel, equipment and other support to civil authority when called to state service by the Governor due to domestic emergency or disaster and to provide state, city, county and other public agencies with specialized planning and preparation training designed to minimize the destructive impact of disasters and other massive emergencies.

35.10 State Emergencies and Disasters

The Adjutant General is responsible for the employment of personnel and equipment to support the emergency needs of civil authority when the Governor calls the National Guard to duty. Resource data, plans, policies and procedures governing the use of available resources are continuously reviewed and updated to assure a timely and effective response. Liaison and coordination is maintained with federal, state and local agencies so that mutual understanding and unity of purpose is assured during an emergency. During 1982–83, National Guard members have responded to 93 emergency calls and served over 3,700 days in support of floods, the Coalinga earthquake, search and rescue missions and the Livermore demonstration.

Monies for support of state emergencies are provided through the Emergency and Contingency Fund. The current year expenditure includes a General Fund contingency allocation of $150,000 for the department's support of operation CAMP.

35.20 California Specialized Training Institute

The purpose of the California Specialized Training Institute, as prescribed in Section 185, Military and Veterans Code, is to provide training to state agencies, cities and counties in their planning and preparation for disasters. To accomplish this goal, the institute conducts a series of resident emergency management training courses relating to emergency preparedness, mitigation, response and recovery. Training courses address earthquakes, hazardous material incidents, major events, nuclear related accidents or incidents and terrorist activities. Additionally, the institute conducts emergency management seminars and exercises for local jurisdictions. These on-site programs allow for a realistic disaster management exercise for all departments of a jurisdiction using local plans, facilities, communication systems and the personnel responsible for emergency response.

Course attendees include members of fire services, health services, law enforcement, water resources, public utilities, medical services, transportation, public administrators and emergency service departments. Representatives of business, industry and community services also attend. Tuition and fees are charged for training provided by the institute. During 1982–83, training was provided to 2,961 personnel.

The budget proposes to transfer CSTI to the Office of Emergency Services during 1984–85 in order to centralize the State's emergency management training activities. The Office of Emergency Services will contract with the Military Department during 1984–85 to continue operating the program and will formulate plans to assume full operational responsibility in 1985–86.

40 MILITARY RETIREMENT

Program Objectives and Description

This program provides retirement benefits, similar to those provided by the federal military services, to persons who entered state active duty prior to October 1, 1961 and have served 20 or more years, at least 10 of which have been on state active duty. All other permanent state employees are covered by the Public Employees' Retirement System. Currently, there are 48 retirees receiving benefits under the Military Retirement Program. There are four individuals yet to retire under this system.

60 FARM AND HOME LOAN PROGRAM

Program Objectives and Description

This program is known as the California National Guard Members' Farm and Home Purchase Act of 1978 which was effective January 1, 1979. The objective of the program is to provide members of the California National Guard who are enlisted members, warrant officers, or commissioned officers of the rank of captain or below and who serve a six-year obligation, the opportunity to acquire farms and homes with low interest loans. Funds for loans are raised through the issuance of revenue bonds. An amount of $2.5 million has been appropriated from the General Fund (Chapter 920, Statutes of 1981) for the purpose of creating the Supplementary Bond Security Account within the California National Guard Members' Farm and Home Building Fund of 1978 as backing for the revenue bonds issued. A total of approximately 444 home loans will be issued by the end of 1983–84. The $2.5 million will be repaid to the General Fund at the end of 30 years. The administration of the program is vested in the Military Department; however, all administrative functions, except eligibility determination, have been assigned to the Department of Veterans Affairs with the administrative costs of the program payable from revenue bond proceeds.

71 CALIFORNIA IMPACT PROGRAM

Program Objectives and Description

The California Innovative Military Projects and Career Training Program, known as the California IMPACT Program, has been in continuous operation since 1977 with various reimbursable funding sources. In the current year, IMPACT received supplemental funding from the General Fund. A primary objective of this program is to recruit, provide pre-skill training, job counseling, coordinate in-kind skill training and job placement of disadvantaged youth. Pre-skill training includes remedial and military instruction designed both to insure success while participating in military skill training, following enlistment in the California National Guard, and to enhance the participant's open job market employment potential by instilling self-discipline, punctuality and organizational loyalty. Another priority objective is to recruit into the California National Guard disadvantaged youth who would not otherwise be eligible for National Guard membership except for the training and other instructional services provided by the IMPACT Program.

Since its original establishment, the California IMPACT Program has placed 539 participants into full time unsubsidized employment and provided 292 enlistees for the California National Guard. In the current year, the IMPACT Program will train 450 eligible participants, of which 382 will be placed into full time unsubsidized employment and 287 will become enlistments to the California National Guard. In the budget year, the program anticipates 600 participants, of which 510 will be placed into full time unsubsidized employment and 384 will become National Guard enlistments.

9100 TAX RELIEF

A significant portion of the State's annual budgeted expenditures is allocated for tax relief. Tax relief programs were initiated in the late 1960's as a response to the growing concern with the burden of taxes on certain groups of taxpayers. In an effort to mitigate the impact of property taxes, the Constitution was amended to provide homeowners a partial exemption against the value of their residences. In response to assertions that the property tax on inventories was stifling economic activity, businesses were given a partial exemption for inventories. The inventory tax was fully eliminated beginning with the 1980–81 fiscal year. The State provided subventions in the amount of actual property tax revenue loss resulting from these exemptions to reimburse cities, counties, school districts, and other local taxing jurisdictions. In 1967 the Senior Citizens' Property Tax Assistance program was established to provide direct assistance to low income elderly homeowners based on the income and property tax of a claimant. In 1972 the State began to partially reimburse cities, counties, and school districts for revenue losses due to reductions in assessed value resulting from Williamson Act contracts.

In 1972, substantial increases were made in two major tax relief programs, Homeowners' Property Tax Relief and Personal Property Tax Relief. At the same time, the Renters' Tax Relief program, which provided an income tax credit or refund to qualified renters based on income, and State reimbursements to local jurisdictions for revenue losses from future sales or property tax exemptions were instituted. A program to allow older homeowners to defer payment of property taxes was initiated in 1977.

The Senior Citizen Renters' Tax Assistance program was established in 1976. Effective in 1977–78, this program provides low-income elderly renters a cash payment based on the claimant's income and a statutory equivalent for property taxes paid.

Article XIIIA of the California Constitution (Proposition 13) was approved by the voters in the June 1978 election. This Article limits property taxes to 1 percent of market value and limits growth in market value to 2 percent per year, unless the property is sold or transferred. This reduced the State's costs in most property tax relief programs by about 50 percent, the same level of relief provided to property owners.

In 1978, the Renters' Tax Relief program was expanded to include welfare recipients. The disabled, regardless of age, became eligible for the Senior Citizens' Property Tax Assistance and Senior Citizens Renters' Tax Assistance programs. The Substandard Housing program was established to provide funds to local agencies for housing code enforcement and rehabilitation.

The Budget Act of 1983 split the tax relief appropriation. For the first three months of the fiscal year, Senior Citizens' Property Tax Assistance, Senior Citizen Renters' Tax Assistance, and Renters' Tax Relief were paid out of the Motor Vehicle License Fee Fund. Personal Property Tax Relief was paid from a General Fund continuous appropriation. Chapter 983, Statutes of 1983, transferred the appropriation authority for these items back to the General Fund. Chapter 323, Statutes of 1983, removed the schools' share of subventions from Personal Property Tax Relief and added it directly to the apportionment items for schools. In addition, Chapter 1051, Statutes of 1983, extended eligibility for the Senior Citizens' Property Tax Deferral Program to elderly or disabled owners of mobilehomes on rented property.

As a part of the New Partnership recommendations, it is proposed that the Personnel Property Tax Relief reimbursement be eliminated beginning in 1984–85.

10 SENIOR CITIZENS' PROPERTY TAX ASSISTANCE

Chapter 963, Statutes of 1967 provided for financial assistance to low-income California residents 62 years of age and older who own and occupy their homes through a system of direct reimbursements for portions of property taxes they paid. The percentage of assistance is inversely related to household income. The level of assistance ranged from 4 to 96 percent of the amount of property taxes paid on the first $5,000 of assessed value.

Subsequent legislation increased both household income and assessed value levels. Chapter 1060, Statutes of 1976, substantially expanded assistance by providing for 96 percent assistance at $3,000 income to 4 percent assistance at incomes of $12,000, and by increasing the maximum assessed value on which assistance is calculated to $8,500.

Chapter 569, Statutes of 1978, extended program eligibility to totally disabled persons, regardless of age. This provision was effective with claims filed for the 1978–79 fiscal year. Chapter 1207, Statutes of 1978, changed the basis on which assistance was calculated to the first $34,000 of market value, less the homeowners' exemption.

In 1982–83, there were 118,000 claimants in this program, with an average amount of assistance of $93. For the current year, an estimated 98,000 claims will be filed. The average amount of assistance is estimated to be $91. For the budget year, an estimated 88,000 claims will be filed. The average amount of assistance is estimated to be $90.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	$11,091	$9,000	$8,100
General Fund	*11,091*	*984*	*8,100*
Motor Vehicle License Fee Account, Transportation Tax Fund	–	*8,016*	–

20 SENIOR CITIZENS' PROPERTY TAX DEFERRAL PROGRAM

Chapter 1242, Statutes of 1977, established a property tax deferral program, commencing with 1977–78 property taxes, for California residents 62 years of age or older who own and occupy their own homes and who had household income of $20,000 or less for calendar year 1976. For succeeding years, the income limit was adjusted to reflect changes in the California Consumer Price Index.

Chapter 576, Statutes of 1978, expanded the program to persons whose principal residence is located on real property for which the person holds a possessory interest for a term of 45 years or more.

Chapter 43, Statutes of 1978, further extended the program to include persons who are tenant-stockholders of property in cooperative housing corporations and who occupy as their principal residence a unit owned by the corporation.

Under Chapter 925, Statutes of 1980, eligibility determination was transferred from the Franchise Tax Board to the State Controller's Office.

Chapter 1090 of 1981 provided $46,170 for the costs incurred by county assessors, recorders and tax collectors in the implementation of the Senior Citizens' Property Tax Deferral Program. County administrative costs shown for past and current year are actual rather than budgeted amounts. Funding for budget year costs for all counties is estimated to be $182,000 and is shown in the budget for "State-Mandated Local Programs."

Chapter 1051, Statutes of 1983, provided for a variable interest rate tied to Pooled Money Investment Fund, the inclusion of mobilehomes on rented or leased land, and the freezing of the income limit at $34,000 for those who had filed in 1983 and at $24,000 for those filing after 1983.

	*1982–83**	*1983–84**	*1984–85**

9100 TAX RELIEF—*Continued*

30 SENIOR CITIZEN RENTERS' TAX ASSISTANCE

Chapter 1060, Statutes of 1976, established an assistance program for low-income renters who are at least 62 years old. Chapter 569, Statutes of 1978, expanded the benefits and included the disabled, regardless of age. Assistance was based on a $220 property tax equivalent assumed to be paid by all renters and was inversely related to income. Assistance ranged from 96 percent of the property tax equivalent for individuals with incomes of $1,400 or less to 4 percent for individuals with incomes of $5,000 or more. Chapter 569, Statutes of 1978, set the property tax equivalent at $250, raised the maximum income level to $12,000, and increased the income level at which maximum assistance was paid to $3,000. There are proration provisions for individuals renting less than a full year. If a claimant owns a home part of a year and rents part of that year, a claim can be filed for either senior citizen assistance programs, but not both. The program is administered by the Franchise Tax Board.

In 1982–83, there were 282,000 claimants in this program, with an average amount of assistance of $147. For the current year, an estimated 260,000 claims will be filed, with an average amount of assistance of $138. For the budget year an estimated 238,000 claims will be filed, with an average amount of assistance of $135.

40 PERSONAL PROPERTY TAX RELIEF

Beginning in 1969–70 the State provided reimbursement to local governments for the property tax revenues lost as a result of the fifteen percent exemption of business inventories and livestock as well as special reimbursements for motion picture films, aircraft, and cotton. The exemption was increased to 30 percent in 1970–71, 45 percent in 1973–74, and 50 percent in 1974–75 and in following years.

Chapter 282, Statutes of 1979, made a one-time reduction in reimbursements for 1979–80 of $21 million for cities and $17.4 million for counties. The reduction was made in proportion to subventions received as part of the local fiscal relief bill for long-term implementation of Proposition 13 of 1978.

Chapter 1150, Statutes of 1979, eliminated the business inventory tax and changed the method of reimbursing local governments beginning in 1980–81. The 1980–81 reimbursements were equal to the 1979–80 business inventory and livestock reimbursements based on a $4.00 tax rate and increased by the change in the California Consumer Price Index and population (average daily attendance for school districts). A 2.92 percent cost-of-living adjustment was included in the 1981–82 reimbursement.

Chapter 101, as amended by Chapter 242, Statutes of 1981 provided that interest earned on the 1978–79 unsecured roll should be used as an offset to the business inventory subvention. This amount was $54.3 million in 1981–82.

Chapter 327, Statutes of 1982, provided that certain enterprise special districts would not receive business inventory reimbursement in 1982–83 for a reduction of $9 million. No cost-of-living adjustments were provided for the year.

Chapter 323, Statutes of 1983, removed the schools' share of Personal Property Tax Relief from this appropriation, adding it to the apportionment items for schools, and eliminated cost-of-living adjustments. The cities' share of the subvention was reduced by $28.5 million. Provision was made for reimbursement for the non-enterprise activities of enterprise special districts.

Program Requirements	*1982–83**	*1983–84**	*1984–85**

50 HOMEOWNERS' PROPERTY TAX RELIEF

In order to reduce the property tax burden, the California Constitution exempts homeowners from paying taxes on the first $7,000 market value of their principal place of residence. Statutes require the homeowner to occupy the dwelling on the property tax lien date of March 1 if it is to be classified as the principal place of residence. The Constitution also requires the State to reimburse local governments for revenues lost due to the homeowners' exemption. Over four million homeowners participate in this program.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs (*General Fund*)	$333,955	$334,000	$334,500

60 SUBVENTIONS FOR OPEN SPACE

The Williamson Act of 1965 permits cities and counties to enter into contracts with landowners to limit the use of land to agricultural and open-space purposes. Article XIII, Section 8, of the California Constitution permits land under such restrictions to be assessed at other than market value based on its limited use. The State provides financial assistance to cities, counties and school districts to partially defray the loss of property tax revenues. The subvention amount is determined by the type of land under contract: urban prime, other prime and nonprime.

Totals reflect payments to cities and counties only. School district subventions are funded by Chapter 292, Statutes of 1978, and Chapter 282, Statutes of 1979.

Chapter 1075, Statutes of 1979, provided that land under open space contracts may be assessed under Section 110.1 of the Revenue and Taxation Code, if that value is less than the capitalization of income method of valuation. State payments will only be made on parcels where the value is based on capitalization of income.

Chapter 1095, Statutes of 1981 provided that Williamson Act contracts could be cancelled during a 150-day period beginning January 1, 1982. Approximately 95,000 acres were cancelled.

Program Requirements	*1982–83**	*1983–84**	*1984–85**

9100 TAX RELIEF—*Continued*

70 PAYMENTS TO LOCAL GOVERNMENT FOR SALES AND PROPERTY TAX REVENUE LOSS

Chapter 1406, Statutes of 1972, as amended by Chapter 358, Statutes of 1973, provided for state reimbursement of local property and/or sales and use tax revenue losses resulting from statutes enacted after January 1, 1973. This represented an attempt to eliminate the future erosion of the local government tax base in light of the property tax rate limitations imposed on local governments by those statutes. A one-time reduction was made in 1982–83 to recover overpayments made in 1980–81 for Chapter 1077, Statutes of 1980, and Chapter 1348, Statutes of 1980. The 1982–83 payment for documented vessels shown in the table below has been reduced to adjust for prior year overpayments.

Under the provisions of Chapter 1321, Statutes of 1983, local governments will no longer be reimbursed for gasohol exemptions.

Expenditures result from the enactment of the following statutes:	*1982–83**	*1983–84**	*1984–85**
Total, Veterans Programs	$1,789	$1,752	$1,747

80 RENTERS' TAX RELIEF

Chapter 1406, Statutes of 1972, established the program to provide tax relief to qualified renters. For taxable years beginning January 1, 1973, renters received an amount from $25 to $45 depending on their adjusted gross income, with maximum relief at incomes of $8,000 or more. For taxable years beginning January 1, 1976 the amount was changed to a flat $37 regardless of the amount of a renters' adjusted gross income. Chapter 569, Statutes of 1978, expanded this program to include welfare recipients.

Chapter 1207, Statutes of 1979, increased the renters' credit from $37 per qualified renter to $137 for married couples, head of households and surviving spouses and to $60 for all other renters.

This program is administered through the Personal Income Tax Program, with the Renters' Credit claimed as a refundable tax credit. The Personal Income Tax Account is reimbursed for revenue loss due to the Renters' Tax Relief Program.

It is estimated that 2.5 million single renters, 1.4 million married renters and 0.8 million other renters will participate in this program in the budget year.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
Continuing program costs	$422,170	$431,244	$447,000

Motor Vehicle License Fee Account, Transportation Tax Fund	–	*9,874*	–

90 SUBSTANDARD HOUSING

Chapter 238, Statutes of 1974, provided that if a taxpayer derived rental income from substandard housing, no deduction for interest, taxes, depreciation or amortization paid in conjunction with such substandard housing would be allowed under the Personal Income Tax or Bank and Corporation Tax Law. The State retained the revenue derived from this provision.

Chapter 1286, Statutes of 1978 provided that revenue derived from this provision shall be allocated to the cities and counties where the substandard housing is located for the enforcement of housing codes and rehabilitation of housing.

9210 PROPOSITION 13 FISCAL RELIEF FOR LOCAL GOVERNMENT

Proposition 13, a constitutional amendment providing significant property tax relief in California, was passed by the voters on June 6, 1978. As a result of the constitutional amendment, the property tax revenue of local governments was reduced approximately $7 billion in 1978–79. This created an environment of potential fiscal instability that threatened to disrupt the delivery of health, education, and other vital public services such as police and fire protection. To ensure the orderly delivery of services during the 1978–79 fiscal year, legislation was enacted (Chapters 292 (SB 154) and 332 (SB 2212), Statutes of 1978) which provided $4.4 billion of fiscal relief to local governments and school districts and established a $900 million emergency loan program.

In 1979, Chapter 282 (AB 8) was enacted to provide a long-term plan for financing local government. A portion of the school property tax was shifted to cities, counties, and special districts to provide sufficient revenues for their operation. The amount shifted was based on the block grant amount in Chapter 292 of 1978. It also provided for long-term school finance for K–12 and a two-year financing program for community colleges. The measure provided county fiscal relief for certain health and welfare programs. The significant provisions included permanent State assumption of the county shares for the State Supplementary Program (SSP) and Medi-Cal. Other major provisions reestablished a local share in AFDC grants and county administration. The State also assumed a substantial share of the funding for county health services.

Chapter 101, Statutes of 1981, provided reductions to local government fiscal relief through reduced subventions to cities and counties. Chapter 169, Statutes of 1981, contained a $5 million appropriation for Los Angeles County and returned $17 million from the Local Agency Indebtedness Fund to the General Fund. The 1981 Budget Act (Item 910-111-001) provided an appropriation for no property tax cities to restore reduced subventions.

The 1982 Budget Act (Control Section 27.30) provided an unspecified appropriation for no property tax cities to replace lost subventions. The expenditure was $2.1 million.

Chapter 327, Statutes of 1982, provided for a transfer of $2.8 million from the Local Agency Indebtedness Fund to the General Fund.

The 1983 Budget Act (Control Section 27.30) continued the appropriation to no property tax cities. The expenditure is $2.1 million. Chapter 983, Statutes of 1983, provided $208,320 to eleven low property tax cities.

It is proposed that reimbursements to no property tax cities to replace lost subventions be made from Vehicle License Fees in the budget year.

Special funds	*1,003,816*	*1,168,419*	*1,772,073*
Federal Trust Fund[t]	*22,450*	*22,185*	*21,889*

SIGNIFICANT PROGRAM CHANGES

Chapter 101, Statutes of 1981, provided various reductions to local government fiscal relief for 1981–82. A reduction of $131.3 million was made in vehicle license fee subventions to cities and counties in 1981–82. Subventions for liquor license fees, highway carriers' uniform business license tax, and financial aid to local agencies were eliminated effective with the 1981–82 fiscal year.

Chapter 541, Statutes of 1981, provided a one-time allocation in 1982–83 of $59 million to cities and $41 million to counties under the Motor Vehicle Fuel Tax program.

Chapter 327, Statutes of 1982, provided for a transfer of $221 million from cities and $40 million from counties from the Vehicle License Fee Fund to the General Fund. Chapter 327 also created the Local Agency Reimbursement Fund to provide a one-time allocation of $10 million to cities and counties.

Chapter 10, Statutes of 1983 (First Extraordinary Session), reduced local assistance funds to cities by $14.1 million and to counties by $14.5 million. Reductions were made in the vehicle license fee and cigarette tax subventions and the Local Agency Reimbursement Fund.

Chapters 323 and 983, Statutes of 1983, provided for a transfer from the Vehicle License Fee Fund to the General Fund. Cities were reduced by $248 million and counties by $70 million. In the first three months of the 1983–84 fiscal year, $51 million in vehicle license fee subventions were used to pay for Senior Citizens' Property Tax Assistance, Senior Citizen Renters' Tax Assistance and Renters' Tax Relief.

As a part of the New Partnership recommendations, it is proposed that the State's share of the Vehicle License Fees, $210 million, be transferred to local government in 1984–85. Of this amount, $2.1 million would be subvened to the 31 no property tax cities to replace three subventions repealed in 1981–82. The remainder would be allocated to counties on the basis of population.

451 Mobilehome and Commercial Coach License Fee Account

APPORTIONMENT OF TRAILER COACH FEES

Chapter 1149, Statutes of 1980, transferred responsibility for collection of trailer coach fees to the Housing and Community Development Department beginning in 1981–82. If the trailer coach is located in a city, the fee is equally split among the county, city and school district; if the trailer coach is located in an unincorporated area, the fee is equally split between the county and school district. (Sections 11003.4 and 11005 of the Revenue and Taxation Code.)

To counties *(Expenditures)*	$24,055	$26,000	$22,000

064 Motor Vehicle License Fee Account, Transportation Tax Fund

APPORTIONMENT OF MOTOR VEHICLE LICENSE FEES

A license fee is imposed annually on vehicles at a sum equal to two percent of the market value based on a depreciation schedule. The revenues are paid monthly, fifty percent to the counties and cities and counties based on population and fifty percent to the cities and cities and counties based on population. The Department of Motor Vehicles maintains responsibility for the collection of trailer coach fees for trailer coaches other than mobilehomes. A reduction to cities and counties of $261 million was made in 1982–83 pursuant to Chapter 327, Statutes of 1982. Chapter 10, Statutes of 1983, First Extraordinary Session, reduced cities' subventions an additional $2.2 million and counties' subventions $12.6 million. Chapter 323, Statutes of 1983, made reductions of $319 million. (Section 11005 of the Revenue and Taxation Code.)

086 Cigarette Tax Fund

APPORTIONMENT OF CIGARETTE TAX	*1982–83**	*1983–84**	*1984–85**
Thirty percent of the 10 cent per package cigarette tax is apportioned to cities and counties. The money is divided between cities and counties (includes cities and counties) based on their share of the local one percent sales tax. Each county then receives its respective share. Fifty percent of the city money is allocated based on sales tax and fifty percent based on population. The disbursement is made monthly. Chapter 10, Statutes of 1983, First Extraordinary Session, reduced apportionments to cities by $6.5 million. (Section 30462 of the Revenue and Taxation Code.)			
To cities	$59,765	$65,200	$62,800
To counties	14,721	14,800	14,200
Totals, Apportionment *(Expenditures)*	$74,486	$80,000	$77,000

001 General Fund

APPORTIONMENT OF TIDELAND REVENUES			
One percent of the revenues received from tide and submerged lands, to a maximum of $75,000, is apportioned to each city or county having within its boundaries such lands granted to it by the State in which the State has reserved the rights to the mineral deposits. This revenue must be used for commerce, navigation, fisheries, protection of lands, or for beaches and the coastline. (Section 6817 of the Public Resources Code.) *(Expenditures)*	$375	$400	$400

062 Highway Users' Tax Account, Transportation Tax Fund

APPORTIONMENT OF MOTOR VEHICLE FUEL TAX FOR COUNTY ROADS			
An amount equal to the revenue derived from 1.625 cents per gallon tax under the Motor Vehicle Fuel License Tax Law is apportioned monthly among counties for maintenance of county roads. Payments are made for engineering costs, administrative expenses, snow removal, and heavy rainfall and storm damage. The majority of the money is apportioned based on number of registered vehicles and miles of maintained county roads. Chapter 541, Statutes of 1981, provided a one-time allocation of $41 million in 1982–83. (Section 2104 of the Streets and Highways Code.)			
To counties *(Expenditures)*	$208,417	$249,400	$233,300
APPORTIONMENT OF MOTOR VEHICLE FUEL TAX FOR CITY STREETS			
An amount equal to the revenue derived from .725 cents per gallon tax under the Motor Vehicle Fuel License Tax Law is apportioned monthly to cities for maintenance of city streets. Payments are made for engineering costs, administrative expenses, and snow removal. Most of the revenue is distributed to cities based on population. Chapter 541, Statutes of 1981, provided a one-time allocation of $59 million in 1982–83. (Sections 2107 and 2107.5 of the Streets and Highways Code.)			
To cities *(Expenditures)*	$133,253	$182,510	$171,950
APPORTIONMENT OF MOTOR VEHICLE FUEL TAX FOR COUNTY ROADS AND CITY STREETS			
An amount equal to the revenue derived from 1.04 cents per gallon tax under the Motor Vehicle Fuel License Tax Law is apportioned as follows: $400 per month to each city and city and county, $800 per month to each county and city and county, and $30,000 per month to the Bicycle Lane Account in the State Transportation Fund. The balance of the revenues is apportioned based on registered vehicles in each county. The county receives the percentage of the revenue equal to the share of assessed value in the unincorporated area of the county. Cities in the county are apportioned the remainder based on population. (Section 2106 of the Streets and Highways Code.)			
To counties and cities *(Expenditures)*	$107,436	$115,350	$107,150

9350 SHARED REVENUES—*Continued*

934 Local Agency Reimbursement Fund [e]	*1982–83**	*1983–84**	*1984–85**
Chapter 327, Statutes of 1982 provided for a one-time allocation of $10 million to cities and counties in 1982–83. Half of the funds was distributed based on population and half based on the proportion of salaries and wages of bank and financial corporation employees during the 1981 income year. Chapter 10, Statutes of 1983, First Extraordinary Session, reduced the allocation to cities by $5.4 million and to counties by $1.9 million.

9540 FEDERAL REVENUE SHARING

The State and Local Fiscal Assistance Act of 1972 (P.L. 92-512) established the General Revenue Sharing Program with an appropriation of approximately $30.2 billion for distribution to State and local governments over the five-year period January 1, 1972, to December 31, 1976. The Act was designed to give State and local governments financial aid which could be expended on local priorities.

State and Local Fiscal Amendments of 1976 (P.L. 94-488) provided funding of $25.5 billion for the period from January 1, 1977, through September 30, 1980. No substantive changes were made to the allocation formula.

The allocation of General Revenue Sharing among the recipient State governments for each entitlement period was made according to statutory formulas using data on population, general tax effort, income tax collections and income.

Federal revenue sharing receipts and interest earned thereon were required by the federal statute to be deposited in a trust fund and expended in accordance with State laws. These funds were reserved until appropriated by the Legislature. Amendments of 1976 required recipient governments to hold public hearings on proposed uses of funds.

During 1980–81, the State received the last two quarterly payments of Entitlement Period 11. The extension of the program enacted by Congress did not include funding for states in 1980–81. Congress did not appropriate any funds for 1981–82 and did not extend authorization for federal revenue sharing for states. For 1981–82, $179,490,000 was expended for the support of the State Supplementary Aid Program for Adults (SSP).

Chapter 323, Statutes of 1983, appropriated the State's share of the balance from the Federal Reserve Sharing Fund, $5.4 million, to the General Fund in augmentation of the State's share of SSP for aged, blind, and disabled persons.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

Debt Service

9600 BOND INTEREST AND REDEMPTION

The bond interest and redemption expenditure program is based upon the debt service cash needs of the related programs. The proposed sales detailed below are as anticipated by the State Treasurer's Office. Late decisions in some of the program areas which utilize bond proceeds have caused the amounts carried in some of the program budgets to differ from the amounts shown here. Program staff in the affected areas will be working with the staff of the State Treasurer's Office to resolve these differences before the next forecast of proposed sales.

9620 PAYMENT OF INTEREST ON GENERAL FUND LOANS

Program Objectives and Description

Temporary loans to the General Fund are required to provide cash during periods when disbursements exceed collected revenues. These temporary loans are initially made from the Reserve for Economic Uncertainties and from special funds that can be borrowed interest free. When the amount needed to meet cash demands exceeds the interest free borrowable resources, the General Fund will borrow from other special funds that require the payment of interest. The projected interest costs for these temporary loans are contained in this budget.

Due to a significant shortfall in revenues and unanticipated increases in expenditures the General Fund was required to borrow from both internal and external sources in order to meet cash demands. The State sold $1.2 billion of Revenue Anticipation Notes in August 1983.

Authority

Government Code Sections 12020, 12021, 16310.
Budget Act Control Section 12.30.

SUMMARY OF PROGRAM REQUIREMENTS

	*1982–83**	*1983–84**	*1984–85**
10 Interest Cost	$56,100	$70,000	$35,000

In the past, the State has been able to maintain greater spending levels through use of an accumulated surplus of funds. During 1980–81, the surplus was depleted. Consequently, State expenditures can no longer exceed anticipated revenues. As a result, the General Fund was forced into major borrowing from funds which must bear interest since the 1981–82 fiscal year. Economic projections indicate borrowing from both internal and external sources will continue. This will require interest payments throughout the current year and much of the budget year.

Included in this presentation are statements of cash flow, and accounts payable and receivable for the past, current, and budget years. Neither cash receipts nor cash disbursements match revenues and expenditures presented elsewhere in this Budget. In order to reflect cash flow, budget data is adjusted for cash collected by an agency but not yet transmitted to the State Treasurer for deposit and for accrued expenditures. Receipt and disbursement projections are adjusted to reflect various changes in statutes, anticipated legislative action, and administrative action. The estimated 1984–85 cash flow incorporates revenue and expenditure measures reflected in this Budget, as of January 10, 1984.

Borrowing capacity from special funds included in the cash flow statements has been estimated as of the end of each month. Day-to-day transactions are difficult to estimate and have a direct effect on lending capacity and peak borrowing requirements. Since cash flow statements show transactions only on a monthly basis, borrowing requirements and available borrowing resources resulting from day-to-day transactions within the month are not reflected in these statements. The normal cash flow for the funds available for borrowing has been considered but still remains subject to large significant fluctuations.

9650 HEALTH BENEFITS FOR ANNUITANTS

Program Objectives and Description

This program provides health protection and dental care for retired employees. It began on January 1, 1962, with an employer contribution of $5.00 per month toward the cost of a basic health plan. Since then, major medical plans, Medicare, and plans supplementing Medicare have been developed. Dental care was added July 1, 1981.

Premium rate for health benefits by insurance carriers for the 1983–84 fiscal year required an increase in the maximum employer contributions to maintain the average 100/90 level. Monthly contribution maximums were increased to $76 for a single enrollee, $148 for an enrollee and one dependent, and $185 for an enrollee and two or more dependents by Chapter 1258, Statutes of 1983 (SB922). Dental care premiums vary with plan and dependents covered and also by bargaining unit.

The increase in the 1984–85 budgeted amount reflects projected increases in the number of annuitants.

Authority

Title 2, Division 5, Part 5, Government Code.

Program Requirements	*1982–83**	*1983–84**	*1984–85**
10 Health Protection for Annuitants *(General Fund)*	$68,120	$88,817	$89,965

Performance Measures

The cost for annuitant's health benefits is based on the following average number of annuitants covered from each retirement system:

9660 LOS ANGELES COUNTY MEDICAL ASSISTANCE GRANT PROGRAM

Chapter 1594, Statutes of 1982 authorized the transfer of $200 million which would otherwise have been paid to Los Angeles County from the County Health Services Fund, to the Medi-Cal program to pay bills in process ("pipeline" claims). Chapter 1594 also authorized that $200 million be appropriated from the General Fund to a special reserve account for Los Angeles County and that these funds be transferred to Los Angeles in June, 1985. Additionally, Chapter 1594 requires that the maximum allocation of County Health Services Funds, under the Department of Health Services' County Health Services Program, available to Los Angeles County must be paid during June of the 1984–85 fiscal year.

9670 LEGISLATIVE CLAIMS

10 EQUITY CLAIMS

Program Objectives and Description

Otherwise known as the "omnibus claims bill," this program includes all claims approved by the three-member Board of Control and referred to the Legislature for payment. The program provides an equitable procedure for the payment of the following categories of claims:

(a) For which no appropriation has been made or for which no fund is available but the settlement of which has been provided for by statute or constitutional provision.

(b) For which the appropriation made or fund designated is exhausted.

(c) For which settlement is not otherwise provided for by statute or constitutional provision.

The provision which directed the State Board of Control to submit special appropriation measures on a quarterly basis (Chapter 622, Statutes of 1974) was amended by Chapter 182, Statutes of 1976 to require such measures to be submitted at least twice during each calendar year.

Current year estimated expenditures reflect Chapters 1183 and 1184, which are Statutes of 1983 appropriation amounts.

9680 STATE-MANDATED LOCAL PROGRAMS

Chapter 1406, Statutes of 1972 (SB 90) first established the statutory requirement for the State to reimburse units of local government for all costs mandated on them by the State. Such costs may result from either legislative acts or executive regulations which impose a new program or demand an increased level of service in an existing program. The "SB 90 Law" also requires the State to reimburse local government for any revenue losses which result from legislation which either exempts certain property from taxation or reclassifies such property and thereby reduces sales, use or property tax revenue. The approval of Proposition 4, the "Gann Initiative" at the November 6, 1979 election elevated this program of reimbursing State-mandated costs to a constitutional requirement by incorporating this reimbursement concept in Section 6 of Article XIIIB of the State Constitution. The Constitution is silent, however, on the issue of reimbursing revenue losses.

The enactment of Chapters 1256 and 1337, Statutes of 1980 resolved some of the problems in the SB 90 process which were cited in previous Governor's Budgets. Specifically, a six year "sunset provision" must now be included in any bill containing a local mandate appropriation. Further, any bill which results in "cost savings authorized by the State", as defined, may be the basis of a savings claim brought by a state agency to the Board of Control. Finally, a definitive deadline for filing reimbursement claims with the State has been established.

Chapters 327, 734 and 1638, Statutes of 1982 made further changes to SB 90 law. Chapter 327 permits the Legislature, if it deletes funds from a Board of Control claims bill, to make a finding regarding the reason for the deletion of funds. Also, to provide a closer fiscal review of regulations, the chapter establishes requirements for the issuing agencies. Chapter 734 revises claim filing deadlines and procedures, allows for the appointment of alternate local members to the Board of Control and makes other technical changes. Chapter 1638 requires the Governor's Budget to include funding for local detention and probation costs above a specified floor which are attributable to a statute which increased the penalty for a crime or infraction. That legislation also requires funding in the Governor's Budget for statutes whose individual impact is minimal but whose aggregate impact is significant. Since neither type of cost has yet been identified, no such funding is proposed for 1984–85.

Since the inception of this reimbursement program in 1973, the Legislature has enacted approximately sixty statutes in which a State-mandated local program or revenue loss was acknowledged and funded. Most of the programs established by these statutes are ongoing and their estimated costs for the 1982–83 fiscal year are included in the appropriate program areas elsewhere in this budget. However, in the 1983–84 and 1984–85 fiscal years this program is presented as a separate budget act item.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**
10 State Mandated Local Programs	($92,886)	$224,786	$111,592
General Fund	*(92,821)*	*224,492*	*111,437*
Restitution Fund	*(65)*	*294*	*155*

Program Objectives and Description

The amounts shown in this program for the 1982–83 fiscal year are for information purposes only as they are described in each related program budget. The amounts shown for the 1983–84 fiscal year were appropriated in a single program and Budget Act item and are shown parenthetically for information purposes in the program budget indicated. The amounts shown for the 1984–85 fiscal year are also proposed to be appropriated in a single item. In addition, this budget reflects amounts which are anticipated to be appropriated in pending and potential Board of Control claims bills. Specifically, the following amounts are reflected herein as "pending legislation":

	1983–84	*1984–85*
1. Baseline adjustments		
a. AB 504	$21,647	$4,314
b. Selected programs previously deleted from AB 504 for special consideration		
• Ch. 1435/74—Vocational rehabilitation	66,322	18,230
• Ch. 1060/80—Detention of stray cats	12,455	4,006
c. 1984 claims bills (various chapters)	10,000	3,000
Totals, Baseline Adjustments	$110,424	$29,550
2. Deficiencies in prior Budget Act appropriations	24,751	–
Totals, Pending Legislation	$135,175	$29,550

The aggregate of all funding for State-mandated local programs is presented in the following table:

9695 UNIVERSAL TELEPHONE SERVICE PROGRAM

Program Objectives and Description

Chapter 1143, Statutes of 1983, which was effective immediately, directed the Public Utilities Commission to design and implement a class of universal telephone service to meet minimum residential communications needs. This program provides telephone access for emergency communications with public agencies and private medical services as well as for maintaining necessary social contacts by the elderly, the handicapped, and the infirm. The cost of this program is financed by a tax on every telephone service supplier in the state based on gross revenues received from intrastate telecommunications service. The tax rate, not to exceed 4 percent, is to be determined annually by the Public Utilities Commission to assure sufficient revenue to fund the Universal Telephone Service Program.

The Board of Equalization is responsible for collecting the tax for deposit into the Universal Telephone Service Fund. Funds in the Universal Telephone Service Fund are continuously appropriated to be paid by the Controller, solely for the following purposes:

- To pay telephone corporations for the costs incurred to provide Universal Telephone Service
- To pay refunds as authorized
- To pay the Board of Equalization, the Controller, and the Public Utilities Commission for their costs in administering this program.

The provisions of Chapter 1143, Statutes of 1983, become inoperative on July 1, 1988 and are repealed on January 1, 1989 unless amended by subsequent legislation.

9790 MEDITERRANEAN FRUIT FLY

Program Objectives and Description

The Mediterranean fruit fly (Cerititus capitata) is a tenacious pest which breeds on more than 200 varieties of fruits and vegetables. The Department of Food and Agriculture, in cooperation with city, county, federal, and other state agencies has successfully eradicated this pest which infested California.

On December 24, 1980, the Governor, under authority of Section 8625, Article 13, Title 2, Division 1 of Chapter 7, Government Code, proclaimed a state of emergency and directed all agencies to utilize their resources in alleviating the emergency to eradicate the Medfly. In addition to this, several statutes were enacted to provide funding for Medfly eradication effort.

Under the authority of Chapter 14, Statutes of 1981, the Department of Finance has allocated $11,043,923 to various state agencies for eradication costs. Claims for costs are subject to audits by the Department of Finance. Chapter 44, Statutes of 1981 appropriates $500,000 to pay California's share of a Hawaii laboratory, in cooperation with the Federal Government and Hawaii, where an adequate supply of sterile flies are produced. Chapter 27, Statutes of 1981 appropriated $1,134,228 to provide for an expanded statewide trapping program. Chapter 938, Statutes of 1981 appropriated $50,000,000 for Medfly eradication costs which would be incurred until eradication efforts were completed. On September 21, 1982, the Medfly was officially declared eradicated; ending an emergency project which lasted 27 months and cost nearly $100 million. The Department of Food and Agriculture has estimated the 1982–83 expenditure level to be $3.7 million. These funds will cover the eradication costs from July 1982–September 1982 and wind-down costs. A total of $535,000 was allocated to the Board of Control and the Department of Justice to cover their administrative costs related to claims filed against the State. In addition, expenditures of $600,000 in 1982–83 and $300,000 in 1983–84 are attributable to unemployment insurance phase-out claim costs.

9800 AUGMENTATION FOR EMPLOYEE COMPENSATION

Program Objectives and Description

The 1983–84 Employee Compensation Program agreed to between the State and the employees and approved by the legislature provided for the continuation of the State partial payment of the employee retirement contribution through December 31, 1983; a six percent general salary increase, effective January 1, 1984; payment of premium increases for health and dental care benefits; adjustments for several position classification inequities; and, a number of other benefits agreed to in the Memorandums of Understanding.

Of the total amount appropriated for employee compensation and benefits in the current year, the major portion is shown as expenditures in departmental presentations. The balance, which is shown as an expenditure in this budget is for the State share of the employee retirement offset payment and future salary and benefit allocations.

The 1984–85 Employee Compensation Program provides up to ten percent, including both a salary adjustment and payment for health and dental benefit premium increases. To achieve the full ten percent, employees will be asked to bargain for a number of issues (trade-offs) in their contracts. Memorandums of Understanding will be submitted to the Legislature for approval of the issues and costs agreed to between the State and the employees.

The Employee Compensation Program for the University of California, Hastings College of Law and California State University is shown in the Higher Education section of this Budget (Section E).

9810 PAYMENT OF SPECIFIED ATTORNEY FEES

This budget contains funding for the payment of attorney fees awarded by courts under the provisions of Code of Civil Procedure Section 1021.5, the "private attorney general" doctrine, or the "substantial benefit" doctrine. Civil Procedure Code Section 1021.5 provides for the payment of attorney fees in cases resulting ". . . in the enforcement of an important right affecting the public interest. . . ." The payment of attorney fees awarded under this provision shall be made from this item. Those payments are limited to an hourly rate which does not exceed the rate charged by the California Attorney General or a total of $50,000, for a single action.

9840 RESERVE FOR CONTINGENCIES OR EMERGENCIES

Funds are required by various State agencies for unforeseen contingencies or emergencies for which no appropriation or an insufficient appropriation has been made. Amounts as required are allocated to the various agencies by the Department of Finance based upon the determination of need. Beginning with the 1978–79 fiscal year, reserves for contingencies or emergencies were added to the Budget Act by the Legislature to place a ceiling on the amount of deficiency authorizations the Director of Finance may issue to augment special and nongovernmental cost funds. These items specifically prohibit the use of the authority in Section 11006 of the Government Code to fund deficiencies. General Fund loans are authorized to meet the needs of programs which would be curtailed due to delayed receipt of reimbursement, revenues or other financing.

SUMMARY OF PROGRAM REQUIREMENTS	*1982–83**	*1983–84**	*1984–85**
10 Totals, Expenditures (Unallocated)	–	$3,126	$4,500
General Fund	–	*1,112*	*1,500*
Special funds	–	*1,026*	*1,500*
Nongovernmental cost funds	–	*988*	*1,500*

In the 1982–83 fiscal year, deficiency appropriations were approved in the amount of $431,500,000 for the General Fund, $4,500,000 for the special funds and $351,250,000 for nongovernmental cost funds. A deficiency appropriation of $100,000,000 for the General Fund, $17,300,000 for special funds and $26,500,000 for the nongovernmental cost funds will be submitted to finance required allocations in the 1983–84 fiscal year. This budget reflects $1,112,000 (General Fund), $1,026,000 (special funds) and $988,000 (nongovernmental cost funds) available in the 1983–84 fiscal year to meet unforeseen contingencies or emergencies. These amounts are reported as expenditures in the 1983–84 fiscal year in this section of the budget. It is proposed that $1,500,000 be appropriated for the 1984–85 fiscal year for each of the funding sources. The authorization to make temporary loans from the General Fund is proposed to be continued at $2,500,000 for the 1984–85 fiscal year.

The detail below includes allocations for emergencies or contingencies from the General Fund, special funds, and nongovernmental cost funds and loans from the General Fund. All of these allocations are shown as available funds in each applicable agency budget.

For the list of standard (lettered) footnotes, see the end of the Governor's Budget.

DETAIL OF ALLOCATIONS IN AGENCY BUDGETS
STATE OPERATIONS

Legislative/Judicial/Executive

	1982–83 *	*1983–84* *	*Fund*
Judicial:			
To provide for pay increases for Supreme and Appellate Court judges	1,103	–	General Fund
Contributions to Judges Retirement:			
To fund retirement payments to retired judges or their beneficiaries	54	–	General Fund
Office of the Lieutenant Governor:			
To provide additional funding for costs associated with the change in administrations	94	–	General Fund
Department of Justice:			
To provide for additional workload related to fingerprint cards forwarded to the FBI. This funding is offset by additional revenues generated by the $12 processing fee	–	440	Fingerprint Fees Account, General Fund
State Controller:			
To provide $2,160,000 for Howard Hughes trial costs; $737,000 for increased Teale charges; $60,000 for workload in the Inheritance and Gift Tax program; $50,000 to set up Senior Citizens' Property Tax Postponement program; and $47,000 to complete the tax rate report mandated by Chapter 45/82	–	3,054	General Fund
California Debt Advisory Commission:			
To provide for additional staffing and support associated with the statistical workload	37	–	California Debt Advisory Commission Fund

State and Consumer Services

Museum of Science and Industry:			
To provide funding to correct a technical error which resulted in the underfunding of operating expenses and equipment. The Museum will revert an equal amount from its personal services category which will result in a net General Fund impact of zero	–	169	General Fund
Department of Consumer Affairs—Board of Architectural Examiners:			
To provide funding to administer a new architecture national licensing examination	189	–	California State Board of Architectural Examiners Fund
Department of Consumer Affairs—Board of Behavioral Science Examiners:			
To provide funding to continue enforcement of Section 9001 et seq. of the Business and Professions Code	33	–	Behavioral Science Examiners Fund
Department of Consumer Affairs—Board of Cosmetology:			
To implement the provisions of SB 1975, and to continue examining all qualified applicants for licensure	48	–	Board of Cosmetology Contingent Fund
To pay increased rent at its examination facility	–	21	Board of Cosmetology Contingent Fund
Department of Consumer Affairs—Board of Medical Quality Assurance:			
To provide funding to examine acupuncture applicants in the remainder of the fiscal year	33	–	Acupuncturists Fund
To fund increased costs for Attorney General and Office of Administrative Hearings services; increase in proceedings due to decertification of a foreign medical school and the need to revoke licenses of its graduates	–	140	Contingent Fund of Board of Medical Quality Assurance
To fund increased rent charges resulting from reallocation of space at the Board's headquarters	–	3	Physicians' Assistant Fund
To provide funds for operations pursuant to Chapter 1107/83. Legislation authorized a loan to the Polygraph Examiners Fund but failed to appropriate funds for operations	–	50	Polygraph Examiners Fund
Department of Consumer Affairs—Board of Pharmacy:			
To provide funding to enforce the provisions of Section 4000 et seq. of the Business and Professions Code	54	–	Pharmacy Board Contingent Fund
Department of Consumer Affairs—Board of Vocational Nurse and Psychiatric Technician Examiners:			
To provide funds for increased costs of investigation and legal services resulting from growth in disciplinary caseload	–	125	Vocational Nurse Examiners Fund
To provide funds for increased enforcement workload	–	27	Psychiatric Technician Examiners Fund

9840 RESERVE FOR CONTINGENCIES OR EMERGENCIES—*Continued*

Department of Consumer Affairs—Board of Registration for Professional Engineers:			
To provide funding to cover communication expenses due to an unexpected rate increase experienced during the fiscal year	12	–	Board of Registration for Professional Engineers Funds
Office of the State Fire Marshal:			
To provide for implementation of the Hazardous Liquid Pipeline Safety Program per Chapter 861/81	–	173	California Hazardous Liquid Pipeline Safety Fund
Department of General Services:			
To provide funding to cover the cost of operations of the new parking facilities	205	–	Motor Vehicle Parking Facilities Account
To provide funding to reflect the new funding procedures pursuant to the contractual agreement between the Office of the State Architect and the Office of Statewide Health Planning and Development	1,918	–	Architecture Public Building Fund
To provide for a one-time increase of emergency workload in the Office of Local Assistance caused by delays in 1981–82	174	–	State School Building Aid Fund
To provide for the increased time to review plans of local government for compliance with revised regulations for access	–	129	Access for Handicapped Acct, General Fund
To provide for expenditure authority of account created after passage of Budget Act. Funding will be a substitute for Item 1760-001-121 which will not be used	–	2,660	Architectural Public Building Fund, Hospital, Plan Checking Acct.
To support 4 additional staff to review current inventory of applications for funding and to cover internal overhead costs	–	155	State School Lease Purchase Fund
To fund redirected departmental overhead charges to the Fund	–	61	Architecture Revolving Fund
To fund redirected departmental overhead charges to the Fund	–	13	State School Building Aid Fund
To fund redirected departmental overhead charges to the Fund	–	4	State School Deferred Maintenance Fund
Public Employees' Retirement System:			
To provide funding to design and implement programs that would comply with Federal legislation (H.R. 4961) that requires the withholding of taxes on pension payments	17	–	General Fund
To provide funding to design and implement programs that would comply with Federal legislation (H.R. 4961) that requires the withholding of taxes on pension payments	262	–	Public Employees' Retirement Fund
To provide funding to conduct an election for new board member created by recent legislation	–	190	Public Employees Retirement Fund
Business, Transportation and Housing			
Solarcal Office			
To pay lump-sum separation payments and unemployment benefits	–	17	Energy Resources Conservation and Development Account, General Fund
Department of Housing and Community Development:			
To provide funding to support the inspection and enforcement activities performed by the Division of Codes and Standards	318	–	Mobilehome Parks Revolving Fund
Mortgage Bond Allocation Committee:			
To provide start-up funding for the legislatively-established Committee to collect fees to allocate mortgage revenue bond authority to qualified cities, counties, and State agencies	14	–	Mortgage Bond Allocation Fees Account
Department of Savings and Loan:			
To meet unanticipated workload increases resulting from an increase of 47 new association applications	–	443	Savings and Loan Inspection Fund
Department of Motor Vehicles:			
To provide for higher than anticipated vessel registration activity	168	–	Harbors and Watercraft Revolving Fund
To provide funding for bicycle licensing and registration materials provided to local governments which exceed the budgeted amount due to increased workload	–	5	State Bicycle License and Registration Fund

Resources			
Energy Resources Conservation and Development Commission:			
To provide funds for the transition to the program and staffing structure provided for in the 1983–84 budget	–	1,886	Energy Resources Programs Acct, General Fund
Department of Forestry:			
To provide funding for annual emergency fire suppression cost	10,000	10,000	General Fund
To fund increased eligibility for unemployment insurance ($1,500,000), increased workers compensation costs ($1,915,000), employee housing costs ($291,000) and to implement a Joint Apprenticeship Program ($100,000)	–	3,806	General Fund
Department of Parks and Recreation:			
To fund increased workers[1] compensation costs, unemployment insurance, and reduced reimbursements for employee housing	–	1,320	General Fund
Health and Welfare			
Department of Employment Development:			
To provide for the acceleration of Personal Income Tax collections mandated by Chapter 323/83	–	1,134	General Fund
California Health Facilities Commission:			
To provide for salary savings adjustment	80	–	California Health Facilities Commission Fund
To provide funding for the auditing of health facility financial reports and to assist in the processing of penalty appeals	–	36	California Health Facilities Commission Fund
Youth and Adult Correctional			
Department of Corrections:			
To provide funding to meet unbudgeted population growth in the institutions	7,016	–	General Fund
To provide for costs of compression of higher level inmates to lower level institutions, fencing and security at the California Mens Institution, increased workers' compensation benefits, and the accelerated construction requirements of Chapter 938/82	–	7,826	General Fund
Board of Prison Terms:			
To provide funding to pay salaries of authorized positions in the Investigation Unit	132	–	General Fund
Youthful Offender Parole Board:			
To provide for phase out of 8 abolished positions which are being abolished through attrition.	–	186	General Fund
Department of Youth Authority:			
To provide funding for increased ward population. Total cost will be partially offset by redirection of Parole Transition Program funding, and efficiency savings for a net deficiency of $1.3 million.	–	1,300	General Fund
Education			
California Advisory Council on Vocational Education and Technical Training:			
To provide for payroll and other expenses resulting from temporary cash flow problem due to delay in federal grant	(134)	–	General Fund (Loan)
University of California:			
To fund increase in student enrollment above the budgeted number	–	1,618	General Fund
Board of Governors of the California Community Colleges:			
To provide funding for restoration of authorized level of service after fire in Chancellor's Office	523	–	General Fund
General Government			
California Arts Council:			
To provide funds to maintain the level of expenditure necessary to support the grants program.	–	125	General Fund
Agriculture Labor Relations Board:			
To provide transition costs associated with a 50.4 position reduction.	–	200	General Fund
Department of Industrial Relations:			
To provide transition costs associated with a reduction of 170.1 positions.	–	2,200	General Fund
To provide transition costs associated with a reduction of 170.1 positions.	–	1,000	Federal Trust Fund

9845 INFORMATION TECHNOLOGY EQUIPMENT MANAGEMENT PROGRAM

The objective of this program is to provide a source of funds which can be used by departments to acquire information technology equipment when demonstrated to be cost beneficial and when no other funds are available for that purpose. Disbursement of Equipment Management Revolving (EMR) Fund loans is subject to approval by the Director of the Office of Information Technology and these loans must be repaid to the EMR Fund.

9847 STATEWIDE TELECOMMUNICATIONS SYSTEM

This budget contains funding for the initial phase of a program to acquire and operate telecommunications equipment providing data, voice and video transmission for State agencies. It is proposed that departments choosing to use these services will reimburse the General Fund for capital costs initially funded from this appropriation, over a multi-year period. The Department of General Services will provide staff support and operate centralized components of the system. Funds from this budget are available for expenditure by Department of General Services upon allocation by the Department of Finance. A plan for implementation of this sytem is under development and will be completed by April 1984.

9855 LEGISLATIVE INITIATIVES

Historically the Legislature, in responding to a wide variety of issues relating to State and local programs, has increased the level of expenditures above this amount appropriated in the annual Budget Act. The amount added through this process has varied from year to year. In recognition of these additional expenditures, the 1984–85 Governor's Budget includes $125 million for Legislative Initiatives.

9860 UNALLOCATED CAPITAL OUTLAY

Project Planning

Appropriations for project planning provide for allocations to agencies for the purpose of securing sound cost estimates for future projects. These allocations are included in this budget as expenditures.

Increased Cost of Construction

Existing law provides specific appropriations for the Director of Finance to augment capital outlay projects upon approval of the State Public Works Board. These augmentations are made when a capital outlay project cannot be undertaken because the estimate exceeds the amount available, bids received are in excess of the estimate, or acquisition costs for real property are in excess of the appropriation. Savings from completed projects are transferred to these appropriations and are available by law for reallocation.

This Unallocated Capital Outlay Budget provides the summary presentation of the allocations made from Section 16409 of the Government Code, General Fund. The expenditures from allocations are included in individual agency budgets. That part which has not been allocated but which is estimated to be needed for further allocations is included here as an expenditure.

For those allocations which are made from fund surpluses pursuant to Government Code Section 16352 rather than the specific appropriations cited above, the allocations are reflected only in the individual agency budgets.

Fund Conditions

Fund Condition Statements which are not identified to a particular program are also reflected in this budget.

9890 RESERVE FOR ECONOMIC UNCERTAINTIES

Section 12.30 of the Budget Act of 1980 established the Reserve for Economic Uncertainties within the General Fund. Monies are appropriated to this reserve to ensure the ability of the State to meet General Fund obligations in the event of declining revenues or unanticipated expenditures. This reserve is consistent with the provisions of Article XIIIB of the State Constitution. Section 12.30 of the annual Budget Act specifies the amount to be appropriated to the Reserve and delineates general control provisions relating to the reserve. Transfers back to the General Fund from the Reserve are based upon the State Controller's Preliminary Annual Report as of June 30 of the year of the Budget Act.

Chapter 1594, Statutes of 1982 established a Special Reserve Account (Los Angeles County Medical Assistance Grant Account) for the Fiscal Years of 1983–84 and 1984–85.

Chapter 10 (Section 62) of the Statutes of 1983 First Extraordinary Session established a Special Reserve Account within the General Fund for the specific purpose of eliminating the 1982–83 fiscal year deficit.

The 1984–85 Governor's Budget proposes an appropriation to bring the balance in the Reserve for Economic Uncertainties up to $950.7 million.

9900 GENERAL FUND CREDITS FROM SPECIAL FUNDS

Program Objectives and Description

Government Code Sections 11270–11275 and 22828.5 provide for recovery of General Fund costs for statewide general administrative expenditures (Pro Rata) from special funds. Chapter 327, Statutes of 1982, contained language which made special accounts within the General Fund subject to these Pro Rata charges.

The various departmental budgets normally include funds to pay for the Pro Rata charges. In order to ensure that funding is provided to pay for Pro Rata charges, Government Code Section 13332.03 allows for transfers from Special Funds to the General Fund in those cases where appropriate funding was not provided in items.

Program Requirements	*1982–83**	*1983–84**	*1984–85**

STANDARD FOOTNOTES

FUND TITLES, SOURCES OR DESCRIPTIONS

[a] From State Construction Program Fund unlessotherwise indicated.

[b] From General Fund unless otherwise indicated.

[c] Selected Bond Fund expenditures that are included in overall expenditure totals. These bond funds include:

Health Science Facilities Construction Program Fu are
Recreation and Fish and Wildlife Enhancement Fund
State Beach, Park, Recreational and Historical Facilities Fund of 1964
State Beach, Park, Recreational and Historical Facilities Fund of 1974
State Clean Water Fund
State Construction Program Fund
State School Building Lease-Purchase (Bond Act of 1982)
California Safe Drinking Water Fund
State, Urban, and Coastal Park Fund (Bond Act of 1976)
Parklands Fund of 1980
State Clean Water and Water Conservation Fund
New Prison Construction Fund

[d] Bond Fund expenditures from other than selected bond funds are not included in overall expenditure totals.

[e] Non-Governmental Cost Fund revenues and expenditures are not included in budget totals.

[f] Federal Funds and expenditures therefrom are not included in budget totals.

[g] Capital Outlay Fund for Public Higher Educatifund

[h] Energy and Resources Fund (Energy and Resources Accounts).

[i] Non-State Funds and expenditures therefrom are not included in budget totals.

[j] Departmental costs relating to budget year salary increase and employee benefits proposals had not been determined when this fund condition statement was prepared. Therefore, the budget year amount shown for reserve for economic uncertainties or fund balance has not been adjusted for such potential expenditures.

[k] Special Account for Capital Outlay.

PURPOSE OF EXPENDITURE (Capital Outlay)

[A] Acquisition

[C] Construction

[D] Demolition

[E] Equipment

[L] Lease Purchase

[M] Master Planning

[P] Programming and/or Preliminary Plans

[R] Relocation Cost

[W] Working Drawings

INDEX BY BUDGET TITLE
1984–85 GOVERNOR'S BUDGET

The following provides an index by organization in alphabetical order. The four-digit organization code represents the number assigned to a department or budget entity in the State Uniform Codes Manual. For ease of reference, budgets are included in numerical order and the organization code appears at the top of each page.
